"Coskscuking". It�s a Roger thing, as in Lavender Lads.
"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second retest.

� Stgop� Roger�s version of Stop.

�Fahter's� He meant Father�s Day.

�fserting�..would that be festering?

�poists�. Roger meant �posts�.

�snadwich� As in peanut butter and jelly?

�regualr� Glen Dale rendition of �regular�.

�aftrer� After? Aftrer what?

�soory�. Sorry Roger fucks up again.

�didnb't� He didn�t?

�whoile�. He ate the whoile thing?

�Woamn� He�s hooked on West Virginia phonics, all right.

�prrof� And he kin prove it, too.

�beforfe� Was that before he lurned to spell?

�yoiuy� Roger�s version of �y�all�.

�illerate� Only illiterate Roger can spell like this.

�haeart� Aw, how heartless of me to laugh!

�valule� Roger has no values. No wonder he can�t spell it.

�proch� Doesn�t everyone have one on their house?

�inmstitution� Where Roger�s mom put him in June 1999.

�timne� It�s Howdy Doody time?

�whgo� What? Who dat?

�gnetically� Only Roger knows what this one means�

�crfy� Like, cry, Roger, cry.

�stutrtering� Some stutter, Wiseman stutrters.

�Whjere� Where is Curtain Boy?

�Webiste� That�s Website to the rest of us.

�Youire� Your? You�re? Who knows.

�fiored� As in fired?

�Parety� Roger gave a party once. Nobody came.

�Bouynce� Bounce?

�Varification� Verifiable mental case.

�Probelms� Poor Rogie�has many problems of the mental sort.

�Partricipate� Oh, DUH!!!!

�Cryed� Gee, Wogie..cry me a river�you dolt!

�Stoick� What a dork. His old 386 has no spell check program.

�Partiall� More WV Phonics, I see.

�Obsucred� Either obscured or Rogie has �sucre� on his mind.

�Infinate� Stupid. Think finite, Rogie.

�Sustinance� As in Sustenance?

�Juvinile�. This is the way Roger likes his boys.

�Piut� Put it where, Rogie?

�Toyus�. �Toyus R Us?

�Diminuative�. Roger�s height.

�Definitely� Definitely

�Percriptions� Say what?

�Credibiliy� More Glen Dale intellect.

�Thsoe� Yet another Glen Dale gaffe.

# 4475. telegraph sounder question

Newsgroup: rec.radio.amateur.misc
Date: 2003-11-27 16:50:01 UTC
From: tterapin <tterapin@lightstream.net>
Message-ID: <bq5a0l$h6i$1@plonk.apk.net>
Source record: 60995

I have collected a few telegraph sounders and my question is how to tell what DC voltage to use based on the ohms. The 5 ohm and 30 ohm work fine on a 3 volt battery but I have just picked up a 140 ohm sounder and have no idea on how to find out the voltage needed to make it work as 3 volts DC is not enough. Is there a way to find out this type of information as I am only using a short piece of copper wire and dry cells attached to a key and sounder. Any help apprreciated.

Tom

Stop and think about this for a minute.
Dimmy often brags that he is a Navy veteran. He alleges he served 14 years as a Navy Reservist. (When he's drunk, which is often, he tells people he was a SEAL, a medal winner, a combat veteran, etc.)
Now, ponder this.
Do you realize that Dimmy has spent MORE TIME IN JAIL than he has on active duty, basic training included?
Do they have Meritorious Service medals for that?

Message-ID: <qwsxb.19604$sb4.17744@newsread2.news.pas.earthlink.net>
Source record: 60999

Well we could go at this proportionately. 3 volts and a 4 ohm sounder gives you (V*V)/R 2-1/4 watts. So for a 140 ohm sounder the square of the voltage is about the square root of (140 * 2.25) or about 18 volts.

You may find the higher resistance sounder is sluggish in operation, because of its higher inductance. In telegraph practice the low-resistance sounders were used with a cell or two of battery in a local circuit operated by a line relay. The higher resistance sounders were used in the line circuit where there is a lot of resistance in the line and a considerably higher working voltage.

set computer for 18 WPM character speed spaced to 5 WPM - this is similar to
the tests..

run restricted letter groups with both plain text words and 5 character
groups until you start getting it and then add letters until you get
everything in.

copying everything as dots/dashes is a fail, at least here.

greetngs
After I thought about your project for a while I remembered something an engineer amateur told a group of amateurs about 20 plus years ago.
This group of engineers was building a tall, very tall, structure. This included a number of antennas for both tv and radio transmission, plus some two way radio antennas.
To see how good, or bad, the antenna system was the engineer, who was giving this talk, told of an experiment he did to prove a point that you did not need power at high altitudes. He took his handheld and dialed up the direct channel. 146.52 he connected it to one of the tv channel antenna. The resultant swr was considerable. The cable from the radio to the antenna consisted of a long length, perhaps 500 feet, of cable, decoupling networks for the various antennas, etc. He switch over to low power, and called cq. He got a contact in a town about 75 miles away. full quieting.
The point is that once you have gotten away from the earths curvature power on vhf and uhf has almost little meaning.
I sent an email to the jet propulsion labs a few years ago asking what power the space crafts like the jupiter series that are going beyond the solar system are transmitting. Now granted they are using dishes at both ends and rather suffisticated data decoding etc. But the power level used is somewhat in the order of 1 (one) watt from the spacecraft.

Personally I find that incredible and I find myself humbling, and somewhat embarassed, when I used high power on my handheld to transmit 1 mile away.

Larry ve3fxq

heres some other archives of previous 146.640 traders net offerings in the past
NOV 15,2003 mabe you will see something you need that someone is selling...

Bill K4BYY has a Highgain 37' Crank up/Tilt over tower, Mosley 4 Element 5 band beam, covers 10-20 Meters, a CDE Ham 3 Rotor and Control box. Manuals for all. Only $850.00.
Contact: 727-585-7309

Don W4TQL is looking for a TS-180 tuner for an Icom 706M2G.
Contact: 352-854-3327

Pete KA1WBE has a Kenwood TS-530S HF Rig with a D104 Desk Mic for $300.00. Also looking for a HF Mobile Rig.
Contact: ka1wbe@hotmail.com or 478-278-9998

Jay W0JAY has a Separation cable for an Icom 207H. Make Offer.
Contact: w0jay@cs.com

Jim KG4YJJ has a Yaesu VX-2R Dual Band HT with an extra battery for sale. Radio is only 3 weeks old. Asking $130.00.
Contact: jcook2442@yahoo.com

Jay KG4RMD is looking for a Cushcraft 13b2 2 Meter Beam.
Contact: rjayhpd@aol.com

Jim K4IYD has a Yaesu FT-100 Mobile HF Rig for Sale for $550.00.
Contact: 727-502-0465

Gary KB4ZEB has an RCI 5054 6 Meter Mobile rig in great condition. A Radio Shack Scanner, RS-2022 for $45.00. A 10 Meter beam for $40.00.
Contact: 727-525-6542

Gerald KG4GOI has a Kenwood TS-50 Like new with Manual, $400.00. Kenwood 2570 70 Watt 2 Meter Mobile Rig. $75.00. Icom 720A HF Rig with matching Power Supply, covers 10-160 Meters, asking $300.00. Also has a 40 foot Crank up tower that needs some work for $100.00.
Contact: 727-688-0666.

Hello All:
Here is the listing for October 11, 2003

Phil W4AIG has a Kenwood TS-520S HF Rig. Covers 10-160 Meters, also a MC-50 Mic. Asking $200.00.
Contact: 64 Repeater

Bill K4BYY has a Highgain 36' Crank up/Tilt over tower, Mosley 4 Element 5 band beam, covers 10-20 Meters, a CDE Ham 3 Rotor and Control box. Manuals for all. Only $850.00.
Contact: 727-585-7309

Jay W0JAY has a seperation cable for an Icom 207H. Make offer or Trade.
Contact: w0jay@cs.com

Shannon N0JAM has a Radio Shack 30' Pushup Pole and 50' of 9913 Coax. Both for $30.00.
Contact: n0jam@hotmail.com

Jay W0JAY has a separation cable for an Icom 207H. Email for Price.
Contact: w0jay@hotmail.com

Don KC4JGE Radio Shack short wave receiver SX-190 USB and LSB. Covers 3.5 to 27MHz. $100.00. Rayovac P32 battery charger. 115 volts in 9 volts out. $10.00.
Radio Shack SG-190 Speaker 8 Ohms, $25.00.
Contact: 146670 Repeater.

Shannon N0JAM has a Radio Shack 30FT Push up Pole and 50Ft 9913 Coax. Would like to trade for a scanner.
Contact: n0jam@hotmail.com

Ted N4YT has a Kenwood TS-830s HF Rig with Original box for $300.00. Matching External VFO, $200.00. Matching External Tuner, $80.00.
Contact: 813-684-3235 of b06tyy@fds.com

Don W4TQL has a Gap Eagle Vertical HF Antenna. Covers 10-20 Meters. Asking $100.00. Also has a Kenwood TS-450S with a voice modulator and Automatic Antenna Tuner. Also has a Tempo DM-20 Desk Mic and Stock Mic. All for $400.00.
Contact: 352-854-3327

Joe KE4WDP has a Time Wave 9 Plus DSP for HF with Manual. Asking $60.00.
Looking for a TNC for Packet.
Contact: wdp.joe@verizon.net

Alex KG4OGN is looking for 50Ft of Coax and a 4.1 Balun.
Contact: kg4ogn@yahoo.com

Pete KA1WBE has a Kenwood TS-530 HF rig with a D104 for $350.00. Also looking for a 6 Meter Rig.
Contact: ka1wbe@hotmail.com

Listings Via Email:

Albert W8ACN has a Kenwood TS-570 HF Rig and a Hustler HF Vertical Antenna.
Radio Shack HTX-242 2 Meter Mobile Rig and a Ringo Antenna. Two 2 Meter HT's. Radio Shack CB/SSB and Antenna. Manuals for all. All for $800.00.

Contact: 727-581-0556 or w8acn@aol.com

John WA9WHD needs crystals for a Drake TR-22 for 64 machine.
Contact: jldaly_73@yahoo.com

Hello All:
Here is the listing for September 20, 2003.

Bob N4ROB has a Cushcraft 13-B3 13 Element 2 Meter beam for sale.
$25.00.
Contact: 727-392-1320

Don W4TQL has a Gap Eagle Vertical HF Antenna. Covers 10-20 Meters.
Asking $100.00. Also has a Kenwood TS-450S with a voice modulator and
Automatic Antenna Tuner. Also has a Tempo DM-20 Desk Mic and Stock
Mic. All for $450.00.
Contact: 352-854-3327

Connie K4TBZ is looking for a separation kit for a Icom 706 Mark 2G.
Contact: 727-541-2491 or radcfd@aol.com

Jay KG4RMD has a Radio Shack HTX-404 HT, needs a new Battery and has
no Charger. $50.00.
Radio Shack HTX-100 10 Meter Mobile. $65.00.
Radio Shack HTX-252 2 Meter Mobile, New in Box. $110.00.
Radio Shack HTX-10 10 Meter Mobile, New in Box. $80.00.
Astron RS-20A 20 Amp Power Supply. $70.00.
MFJ 862 SWR/Power Meter. Covers 144/440. $60.00.
Cushcraft AR-10, 10 Meter Ground plane. $55.00.
Cushcraft AR-6000 HF Vertical. Covers 20-6 Meters. $120.00.
Comet CQ5M Trunk Mount, Comet B-10 Dual Band Antenna. $45.00.
Contact: 813-982-1616 or rjayhpd@aol.com

Gary KB4ZEB has a Radio Shack HTX-212 2 Meter Mobile Radio and a Trip
Lite 12 Amp Power Supply. Both for $70.00.
Contact:727-525-6542.

Hello All:
Here is the listing for September 20, 2003.

Don W4TQL has a Gap Eagle HF Vertical Antenna. Covers 10,12,15,17 and
20 Meters. Asking $100.00.
Kenwood TS-450S HF Rig. 10-160 Meters. Auto Antenna Tuner. Asking
$500.00. Comes with a G5RV Antenna.
Contact for Kenwood: 352-854-3327 or kf4qljdondon@aol.com
Contact for Gap Antenna: 352-591-0660, ask for Don or Herb.

Hello All:
Here is the listing for September 13, 2003.

Paul W4TPH has a 1984 ARRL Handbook for $10.00.
Contact: paudonter@aol.com

Rich KF4GAH has a Alpha - 374 HF Amp. Covers 10-160 Meters. Use's 3 8874 Tubes with Manual. 220VAC. $1500.00.
Yaesu FT-1000 HF Rig. 10-160 Meters. Original box and Manual. With Mic. $1800.00.
Contact: 727-235-1136 of kf4gah@arrl.net

Don W4TQL has a 1980 ARRL Handbook and a Hints & Kints. $15.00 for both.
Kenwood TM-261A 2 Meter Mobile Radio. $150.00.
Astron RS-12M Power Supply with Meters. $100.00.
Kenwood TS-520S HF Rig, 10-160 Meters with a Stock and Desk Mic. Also a home made G5RV. Asking $500.00.
Kenwood TS-450S HF Rig. 10-160 Meters. Auto Antenna Tuner. Asking $500.00.
Contact: 352-854-3327 or kf4qljdondon@aol.com

Don KG4COQ has a Comet 2 Meter/440 Base Antenna with 9 DB Gain, also 40Ft of RG-213 coax and a 40Ft Rohn Push up Pole. All for $80.00.
30Ft of Tower with a little Rust, A-99 10 Meter Antenna, 50Ft of mini 8 coax. All for $50.00. The above listing must be picked up by Monday.
Contact: 352-597-8022.

Alex KG4OGN is in need of a 2 Meter Duplexer for his High School repeater club. The Duplexer will be used for the High School in Spring Hill.
Contact: kg4ogn@yahoo.com

AA4JT Dennis has a R-6000 HF Vertical Antenna. Covers 6-20 Meters. $125.00.
Lighting bolt 2 Element Tri-Bander Beam. 10,12 & 15 Meters. $80.00.
Icom Mark2G HF Rig. 10-160 Meter Mobile HF Rig. $625.00.
Yaesu FT-1500M 2 Meter Mobile Rig. $110.00.
Contact: 941-776-2072

John AF4PA has a Hammerland HQ-120 HF Receiver.
Contact: af4pa@aol.com

Jim WA4BUX has a Maco 2250 Heavy Duty Vertical Antenna. 10,11,12 Meter. Sell or Trade.
Contact: 904-268-3649

Matt N8RZZ has a Kenwood TS-700A, 2 Meter All Mode Base Radio. 10 Watts out. $300.00. Also a CES Phone Patch wired for the above Kenwood. $100.00.
Contact: 941-429-9303

Julio KF4MFM has a ADI 147 Plus 60 2 Meter Mobile Rig. $140.00.
Contact: 64 Repeater.

Jim K4IYD has a MFJ Desk Mic. Has a Icom 8 pin connector. Asking $45.00.
Contact: ka4idj@aaahawk.com

Hello All:
Here is the listing for September 6, 2003.

Jim KG4WLL has a Icom 756 Pro HF rig plus 6 Meters. Asking $1250.00.
Also looking for some tower.
Contact: 813-431-1569

Phil W4AIG Has a Kenwood TS-520S for sale. Needs tubes. Best offer
takes it.
Also looking for some tower.
Contact:philipvelderssr@juno.com

Bob WB4MCF is looking for a 10 - 12 Amp Power Supply.
Contact: hardro@aol.com

Dave KR4U has a Mirage B-108 2 Meter all mode Amp. 5-15 Watts in and
80 Watts out. $50.00.

That's not quite true. Yes, earth curvature is the big limiting factor for terrestrial communications.

But in free space, signal strength decreases as an "inverse square" function with distance. Everytime you double the distance between the transmitter and receiver, the signal strength decreases by 6 dB (i.e., it becomes only 1/4 as strong). Think of shining a flashlight on a wall. As you move the flashlight further away, it illuminates a larger area, but the intensity decreases.

Yes, low power can cover great distances in free space. But power is not is not meaningless. If it were, you wouldn't need those big dishes for C-Band satellite reception.

Free space path loss equation:

Path Loss (dB) = 36.6 + 20 Log F + 20 Log D

Where F is frequency in MHz, and D is distance in miles. (Assumes isotropic antennas at each end, 0 dBi gain).

A condemnation, therefore, of the CBisation taking place
in the UK (and in no small part caused by the M3/CB Fool's
Licence)?

Modern Cheque Book (CB) rigs contain so much that there
is little incentive for the CBer-Masquerading-As-A-Radio-Ham to
actually become a Radio Ham - even now there are those who turn
up their noses at a radio if it requires the use/construction of a manual
ATU.

The rigs seem to go on for years, and contain everything that you
think, mistakenly, makes for a Radio Ham. The result? That you
never have to visit the shop again. No buying of second-hand
gear. No buying of the odd component. No buying of ex-govt
gear with a view to conversion.

All the little shops close down because there are no Radio Hams;
there are only CBers of one sort or another who visit a shop once
and then never return.

Result? The shop closes down or is taken over by stack'em high
sell 'em cheap merchants who can never give the value that you
used to get from an enthusiasts shop.

The CB ethos is like a cancer - feeding off the body of Ham Radio,
but then finally destroying it; biting off the hand that feeds; killing
the goose with the golden eggs.

It is not too late to turn the tide. (Even if a mixed metaphor sings,
it should be derailed by pulling out the carpet from underneath?)

We can make a start, perhaps, by agitating for the abolishment
of the M3/CB Fool's Licence, and for it to be replaced by
a form of CB licence. All other licence classes to enforce
home construction and, perhaps, the use of CW only for
the first year, as an encouragement to tackle successfully a first
constructional project.

Not only can the village idiot not spell, he cannot post properly.

From the relevant part of RFC 1885

- If you are sending a reply to a message or a posting be sure you
summarize the original at the top of the message, or include just
enough text of the original to give a context. This will make
sure readers understand when they start to read your response.
Since NetNews, especially, is proliferated by distributing the
postings from one host to another, it is possible to see a
response to a message before seeing the original. Giving context
helps everyone. But do not include the entire original!

I have one National FM Adpt.(NFM-73) for sale. The unit is in good condition and is made to plug into the back of the NC-173. The unit comes with a one foot long octal m to f extension cable, perhaps allowing it to be used in the HRO-50, HRO-60 and NC-183, not sure. Price is $80.00 plus shipping within conus. Payment by money order, ups cod, Paypal(add $3.00) or personal check(ten days check clear time). Please email WA4USO@aol.com if interested.

I agree 1-100% why do we need the bull centred around this soldering iron mentality. I want to communicate with a purpose built set not a bodged up ex mod misfit. If you want to be a ham with a soldering iron OK but I just want to use a radio to talk to people and that's a different kettle of fish.
Why do we need the self imposed rules set by the RSGB if we only want to communicate with an out of the box rig. Why do we have to pay to the RSGB to sit some phoney test, is it to keep bad mannered trogs like you in business.
If we want to transmit using CW then we learn the code, simple. If we just want to use voice, no problem. All that is needed is the rules for transmitting and radio manners printed in the box. If you break the rules i.e. bad language etc. then you go to jail.
What is so special about a radio, is a VHF handheld better than a mobile phone for communication, remember these days there are sat coms that costs less than a HF radio. Coded messages can be sent by SMS. Face it your way is a thing of the past, it's a CB world if you don't like it go home but remember we have the ball.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NG3K, W3UR & The Daily DX, KJ4UY, N4AA & QRZ DX, K4ZLE, N4GN, N5FG, N5VL, AA7UC, K8JE, K8BL, K8YSE, 9M2/G3TMA, 9M2TO, CX7BY, DF4SA, DL/VE3ZIK & www.contesting.info, DL1EK/DL7VOA & DX Newsletter, F5CWU & La Gazette du DX, F5NQL & UFT, HS0ZDZ, JI3ERV/NH2C, JI6KVR & JA-IOTA Islands News, LU5FF, LZ2CJ, OH2BH, OH1BN, ON5NT, PY2FUS and VA3RJ & ICPO for the following DX information.

** EDITOR'S SPECIAL NOTICE: This week's bulletin was sent out earlier than normal to accommodate the late CQWW DX CW Contest announcements. Also, we wanted to provide the readers with a consolidated listing of the CQWW DX CW Contest participants.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Friday, 21st/November, through Friday, 28th/November there were 246 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FH, FJ, FK, FM, FO, FP, FR, FR/e, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH5, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T31, T32, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XZ, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

6Y, JAMAICA. Tom, N6BT, will be active as 6Y8A in the CQWW DX CW Contest as a Single-Op/Single Band (80m)/Low Power entry. Also, Mike, WA6O, will be active as 6Y9A in the CQWW DX CW Contest as a Single-Op/Single Band (15m)/Low Power entry. QSL both operations to WA4WTG.

7X, ALGERIA. Con, DF4SA, informs OPDX (just before going to print) that he will be active from the Algerian's Amateur Radio Association (ARA) club station, 7X2ARA, in the CQWW DX CW Contest as a Single-Op/All Band/ Low Power entry. The QTH is downtown Algiers City. The equipment will be a TS-570, using their existing multi-band vertical (40-10m) and a wire vertical for 80/160 meters (which Con installed on the roof). QSL 7X2ARA (only for this period of November 21-30th) to DF4SA by the bureau or (with sufficient return postage) direct to: Cornelius Paul, Adelberger Weg 3, D-73104 Breech, Germany.

9M2, WEST MALAYSIA. Masaru, JI1ETU, who has been active as 9M2/JI1ETU, will be going QRT at the end of December. He can usually be found on 40 meters CW after 1400z (or later after 2200z). Masaru has also been active on 20/17/15 meters CW. Please send QSL to the JARL Bureau via JI1ETU or send direct to: Masaru Funakubo, 2-10-11 Tsujidou-Motomachi, Fujiwara, Kanagawa, 251-0043 JAPAN.

A6, UNITED ARAB EMIRATES. Ghis, ON5NT, informs OPDX that A61AJ will be active in the CQWW CW Contest, operated by the UN WFP operators Mats/SM7PKK, Robert/S53R, Dane/S57CQ, Mike/PA5M and himself. Eugene/N2AA is also flying in to strengthen the team. Please remember to QSL to the new QSL Managers (since early October 2003) as follows: K2UO (for North, Central, South America, Caribbean, US territoriesin the Pacific) and DJ2MX (rest of the world). In the mean time all logs before October 2003 have now also been transferred to both managers. ADDED NOTES (by Ghis): "Due to our actual workload at the WFP, the IOTA operations from AS-021 and AS-124 are postponed until Feb/March 2004. All of us will still be in Dubai anyway at that time. I will have received the YI/ON5NT (multicolor picture) cards from the printer on my return home on December 20th, and they will be mailed out immediately."

AH2, GUAM (Update). Members of the Guam Contest Club will be on the air as AH2R during CQWW DX CW Contest (November 29-30th). This time they set a target as the Oceanic leader in a Multi-OP Single-TX category and World Op 5. Also, they are trying to build an Oceanic record in this category. Operators are: Aki/JI3ERV/NH2C, Toshi/JR7OMD/WI3O, Hiro/JH0USD/KH2VO and Sam/JR8VSE/NH2N. QSL via JH7QXJ (direct, see QRZ.com) or JA bureau. Please DO NOT QSL via the KH2 bureau. Sunrise/Sunset: 2040/0750z.

B4, CHINA. David, BA4RF, will be active as B4RF in the CQ World Wide DX CW Contest (November 29-30th) as a Single-Op/Single Band (40m)/High Power entry. QSL via the address on QRZ.com.

CASTLE ACTIVITY. Look for Antonio, I0SBA/p, to be active November 29th from Palazzo del Governatorato o Currito di Capranica (DCI reference VT-092, for the Italian Castles Award) and Torrioni e Cinte Murarie Medioevali di Capranica (DCI reference VT-093). Activity will be on 40 and 20 meters SSB only beginning at approximately 0800z. Both references are located

in the Region of Lazio, Province of Viterbo (VT) and WW Locator JN62CG.
QSL to I0SBA, direct or via bureau.

CX, URUGUAY. OPDX was informed by Raul, CX7BY, that the following stations
will be active from Zone 13 in the CQWW DX CW Contest. Look for:
CX5BW - Operator Pedro - 28 MHz HP - QSL via CBA
CW4A - Operator Ari, CX5AO - 21 MHz LP - QSL via EA5KB

DXCC NEWS.....
Wayne Mills, N7NG/1, Manager Membership Services Department of the
ARRL, announced this past week: "After receipt of the necessary
documentation yesterday (courtesy of Bill, W9VA), ZW0S, the St. Peter
and St. Paul Rocks operations of April 2001, February 2002, April and
September 2003 and a planned visit from November 26th to December 19th,
2003, by PS7KM (See ZW0 below) are approved for DXCC credit."

Also, the recent operation of 3C0V from the Island of Annobon has been
approved for DXCC credit.

IOTA NEWS.....
RARE IOTAs TO BE ACTIVATED. Ian, 9M2/G3TMA, and two other operators
are planning a trip to two rare Borneo IOTA destinations in
late March/early April 2004. The two islands are:
OC- 165 Pulau Satang Besar (9M8)
OC- 184 Pulau Muara Besar (V8)
Ian has already carried out a survey on Pulau Satang Besar,
and the available antenna space on the beach does not look
particularly good for some of the more populated amateur areas
of the world. However, operation will be on SSB and CW,
including WARC bands. Further details of the operation will
be available in the early part of 2004.

NA-102. Members of the A.C.R.A Guadeloupe ARS will be active on December
13-14th from the Gosier Islet as TO7ACR. Activity will be on
HF/VHF bands CW/SSB, plus 6m. Operators mentioned are: FG5CK,
FG5DN, FG5GG, FG5BC, FG5AS, FG5GP, FG5GP, FG1JD and SWL Isaac.
Other references are: WAZ-08, DIFO FG016 and LH 0142.

OC-NEW. Johan, PA3EXX, will be active as VK4WWI/9 from Cato Reef in
the Coral Sea Islands Territory South Group, December 2-6th.
Actiity will be on 80-10 meters CW/SSB. QSL via his home
callsign.

JY8, JORDAN. Operators Helgert/JY8YB and George/JY9QJ will be active as
JY8B in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-
Single entry. QSL via DL5MBY.

LU5, ARGENTINA. Javi, LU5FF, will participate in the CQWW CW Contest
as a Single-Op/Single Band (10m)/Low Power entry. The QSL Manager is
EA7JX.

PIRATE ALERT. Wally, LZ2CJ, informs OPDX that there has been an unknown operator using the callsign, ZA1MM, making QSOs and giving out as his QSL Manager LZ2UU. Wally states, "THAT THIS IS NOT TRUE! His friend Danny, LZ2UU (LZ0A and VP8/LZ2UU), is NOT a manager for any ZA station. Please spread the word and let the DXers know about this pirate. A lot of QSLs are arriving at Danny's post office box and of course Danny can not send them any QSLs for the illegal QSOs made by ZA1MM pirate."

PT5, BRAZIL. Ron, PY2FUS, is pleased to inform that PT5A (former ZX5J) will be active during the CQWW CW Contest this weekend on all bands as a Multi-Multi station. He also mentioned that he will be one of the TopBand operators. The PT5A setup this year includes beverages beaming NA, EU and OC. For those interested in seeing some pictures, please take a look at the ZX5J link at: http://www.inepar.com.br/araucaria

QSL INFO AND NEWS.....
Vance, N5VL, reports that he has started mailing out the CY9A cards; however, not the RTTY QSOs at the present time and also the Bure cards (which will not be mailed intil later). Vance states that if you just sent a card with no return postage, your card will be in the Bureau cards.

Han, DS2GOO, reports that the logs for the last activity from Soan Island (AS-085) (by members of PDXC Nov. 2003) are now available online at: http://ds2goo.karl.or.kr/log.htm

NEED A V51AS QSL? Bob, K8BL, informs OPDX that he had a rough time getting QSLs from Frank, V51AS, over the last few years for 3 new band QSOs. Five attempts have not gotten through to him and Bob was ready to give up, but sent a bare QSL to him with a request that Frank E-mail Bob with instructions due to his mail being emptied/stolen. He finally got Bob's bare QSL (Bob guesses it was because there was nothing about it worth stealing). Below are his instructions for a better chance of getting your QSL through to him. Frank, V51AS, states, "In V5, IRC are not accepted. Please send 2 USD and registered mail. Sorry for very bad postworkers..... Send to P.O. Box on QRZ.com."

CQWWCW QSL ROUTES. Zik, DL/VE3ZIK (4N1DX), informs OPDX that the latest QSL info from the CQWW DX CW Contest will be published next Thursday, December 4th at: http://www.contesting.info

R1, ANTARCTICA. Oleg will be active as R1ANC from Novolazarevskay Base (WABA UA-08, IOTA AN-016) for only 6 days between November 27th and December 3rd. Suggested frequencies are:
CW - 3510, 7010, 14010, 21010 and 28010 kHz
SSB - 3610, 7071, 14160, 21260 and 28460 kHz. QSL via ZS1OIN (QRZ.com) or via R3AR.

RRC ACTIVITIES. Members of the Russian Robinson Club (RRC) are planning a unique mountain radio expedition into Africa to the highest apex of African continent - mountain of Kilimanjaro (5985m) in Tanzania. The team plans to climb to the top of Mount Kilimanjaro and erect the Russian Robinson Club flag. The team will consist of RW3GW, RW3GU, RZ3EM, mountain

climber Gennadi Khryukin (g.Lipetsk) and video operator and journalist - Boris Mamlin (g.Novosibirsk). The expedition is planned to take place between December 2-17th. Also, look for them to be active from the United Arab Emirates as A61AR during the evening of December 2nd to 3rd and December 16th to 17th. From Tanzania, they will use the callsign 5H3GW and also 5H3AA (EK6DO), 5H3RK (VK4VB). The climb to the summit of Mount Kilimanjaro will take 8 days, while the descent taking 2 days. QSL via operator's instructions.

SILENT KEY. It is with sad regret to announce the passing of Bill Pickard, WA5PAE, on the morning November 23rd. Bill, known as "PICK", was a Vice President of INDEXA (as well as Information Session staff member), and a member of the DXAC for the Great Lakes Division. Jay Slough, K4ZLE (member of the Southwest Ohio DX Association), reports, "Pick was in seemingly good health until earlier this summer when he experienced shortness of breath while on vacation. Upon returning home to West Chester, OH, he was diagnosed with pulmonary fibrosis . In spite of aggressive treatment, the fibrosis developed extremely rapidly and resulted in his death due to asphyxia." OPDX and its readers would like to send out our deepest sympathy to his family and friends. Pick is survived by his wife, Ethel Pickard, two daughters and several granndchildren. Condolences may be sent to Ethel at: 8063 Pepper Pike, West Chester, OH 45069.

TG0, GUATEMALA. Operators Ron/N0AT, William/W0OR, David/W0FLS and Vladimir/ N0STL will be active as TG0AA in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-Single entry. QSL via TG9AXF: Edgar Morales, P.O. Box 57, Mixco 01957, Guatemala.

TI5, COSTA RICA. Operators William/TI2WGO, Jorge/CX6VM, Philip/N0KE, William/N0ZA, George/W1XE/0 and David/OK1DTP will be active as TI5N in the CQ World Wide DX CW Contest (November 29-30th) as a Multi-2 entry. QSL via W3HNK. ADDED NOTE: The TI5KD station has beverages working on 160 on 80 meters.

TO4, EUROPA. The TO4E team is now active and should be active as TO4WW for the CQWW DX CW Contest weekend. Floyd Gerald, N5FG, East Coast USA Pilot Station for TO4E/TO4WW, reports that Rafik, F5CQ, has lost E-mail contact with the FR/E team on Europa due to malfunctioning PSK (??) equipment. This means that unless they are able to get the problem fixed, there will be no updates or skeds sent to the pilot stations. This also means they will not be able to upload any logs to the on-line log on the web site. All the antennas are not installed yet, especially for the low bands. However, they think that they will be ready with the antennas before the contest. Flo, F5CWU, Editor of "La Gazette du DX", also provided OPDX with the following update on the latest news from Europa (dated Nov. 27th): "Tonight, I (F5CQ & F5IPW) spoke with Dany F5CW on 20m and I asked him why the team has to QRT so often. He told me that they must QRT due to restriction with the generator, probably due to a lack of gas, even if the propagation is so good. The team will not have the possibility to work around the clock exept during the CQWWDXCW (QRV 24/24).
Here is the schedule of their operation:

from 0400-0730z
from 1000-1030z
from 1300-1330z
from 1515-1945 or 2000z
Tommorow, Friday Novembet 28th, they will finnish to setup the low bands RX antennas. During the CQWW, the TO4E callsogn will be used on the WARC bands." Remember, the TO4E Europa Web page is at: http://europa2003.free.fr/

V47, ST. KITTS AND NEVIS. Larry/KJ4UY and his fiancee Mel will be leaving Orlando on December 2nd for St. Kitts/Nevis. They will be taking a ferry to Nevis on the 3rd and Larry will start operating as V47UY then. The weekend of December 6th, Larry plans to operate in the TARA RTTY Sprint, the PSK31 Death March and/or the ARRL 160 meter Contest. He states, "I will probably do all to give others a new multiplier and just have fun doing it." On the weekend of December 13th, Karl, V44NK, and Larry will be operating the ARRL 10 Meter Contest using the callsign V47UY. As this is Larry's first vacation in 2 years, it is also not all radio. They will be doing some scuba diving and plan on taking a side trip to St. Barts. He will, however, be on the air as much as possible. Please, QSLs for USA stations go to KJ4UY with return postage and for everyone outside the USA, QSL to KJ4UY direct with return postage or via the bureau. All QSLs are answered 100%. He is hoping to give the deserving a new country or new band/mode country. They will leave December 16th.

ZA, ALBANIA (Press Release - QSP from Martti, OH2BH):
News From Tirana On A Rainy Wednesday
November 26, 2003
A memorable second week came to an end when the U.S./ARRL delegation headed by K7WX and K9LA departed Tirana with many fond memories and new friendships they were taking back home. The group accomplished several objectives, among them relations to Telecom authorities and academics at the University as well as student contacts with many soon-to-be amateur radio licensees.
On the radio side, several U.S. callsigns were aired specifically on 75/80M and PSK 31, resulting in the radio side,to many too be thousands of QSOs, such as 4,000 on 75/80M, including 1,000 to the U.S. and reaching even the West Coast over the long-haul greyline. The 160M activities will continue through the efforts of Robin, WA6CDR. The theory exam was conducted today Wednesday with 33 students getting a passing mark on the CEPT 1 level. Now the course will move on to pure amateur radio related subjects under the leadership of Uli, DJ2YA, while John, G3OKA, will head back to the UK after a job well done. Britain's RSGB deserves credit for their support of the first part of the program. The Albanian authorities released the callsign ZA1UT ( University of Tirana ) symbolizing this program. Another wave of lecturers have now arrived representing Finland and Germany for the following week. You will soon find DJ2YA, DL3DXX, DL6LAU, OH0XX, OH2BH, OH2KI, OH2PM, OH2TA, OH2UA as well as K3NA, K6RLE and WA6CDR on the bands.
The Albanian Amateur Radio Association (AARA) will launch a multi-multi effort for CQWW led by their ZA1B, ZA1D, ZA1E, ZA1I, ZA1S, ZA1Z and others assisted by their foreign guests. You will hear the ZA1A team

appearing during the contest period. A special event QSL card can be obtained for all callsigns active during this program from:
Project Goodwill Albania 2003
P.O. Box 73
02380 Espoo, Finland
or, via OH2BH

ZC4, UK SOV. BASE AREAS ON CYPRUS (Callsign Change). Geoff, ZC4CW, has announced that he has received the contest callsign, ZC4T. So. look for him to be active with the new callsign in the CQWW DX CW Contest, ARRL 10M Contest and the ARRL 160M Contest. QSL is still via G3AB.

ZF, CAYMAN ISLAND. Pete, N2LM, will be active as ZF2PD on Grand Cayman Island (NA-016) from December 28th through January 8th. Activity will be 80-6 meters CW/SSB. Requests for QSL cards can be sent to his home callsign, N2LM.

ZW0, ST. PETER AND ST. PAUL ROCKS. Karl, PS7KM, plans to be active as ZW0S from St. Peter and St. Paul Rocks (SA-014) between November 26th and December 19th. QSL direct to PS7JN: Joaquim das Virgens Neto, Rua Carlos Serrano 1969, 59076-740 Natal RN, Brazil.

---
The following stations are expected to be active in the
CQ World Wide DX CW Contest (November 29-30th, 2003)
---
Thanks to Bill, NG3K, for providing OPDX readers the following consolidated listing of the participants in the 2003 CQWW CW Contest. For a more detailed listing in HTML format, please visit the Web page at:

The first thing I must say is....grow up, Geoff!

There is no call for you to resort to infantile outbursts,
such as your gratuitous use of "village idiot" below. You
are of the age when you should have left the school
playground well behind, and are giving a very poor example
for young noviciates of the art to follow.

Shame on you.

The crucial point in what you quote below is the comma
appearing in "top of the message, or include just" in the
second line. This shows quite clearly that two disparate
options are being discussed. EITHER summarise at the
top OR include enough text to give a context.

My top posting with quotation beneath satisfies the
second option.

Why not change the batteries to Lithium (they weigh less) and put out a lot of power for a long time. Go into the radio and set the power output on "high" to 2 watts, which is a big improvement from 1/2 watt and not as demanding as 5.5 watts output.You might be able to wire the batteries for more amphour rating and a lower voltage due to the need for 2 watts, further extending it's ability to transmit for a longer time. Since the GPS data is streaming, you could even set the transmitter to "burst" or send it's data in 10-15 second bursts every few minutes, extending the batteries even further. Hope this helps....Eddie

Five points arise from your post:

Firstly, I "grew up" years back.

Secondly, I was using the term "The Village Idiot" as provided in the newsgroup post header that I read. Given a reasonable newsreader, you should be able to se this yourself but I reproduce it below for your convenience:

>> "Ryan Breai, village idiot" <Me@privacy.net> ranted in message
>> news:3fc742ea_2@mk-nntp-1.news.uk.worldonline.com...

Third: My comment on spelling: my copy of the O.E.D. does not recognise "CBisation", nor does Websters - anyway, if it was of US origin, it would have been spelt with a "z".

Fourth, why shame on me? I am only quoting from what either you call yourself, or what at least one other NG reader called you.

Finally, and the real point, perhaps one may interpret the comma in the that you do, but commas are notorious for misinterpretation. That is why legal draughtsmen rarely insert commas.

The second sentence of the quoted paragraph of RFC1855, again reproduced below, contains the real meat:

>> This will make sure readers understand when they start to read
>> your response.

Will all top posters please note, that this requirement is met by posting below the quoted part. It certainly is not met by top posting.

In my view, a top poster is the internet equivalent to somebody who shouts over the person speaking, a heckler.

Geoff

1. You have misrepresented what I posted, and
therefore you are a _LIAR_. I did not post what you said
that I posted. I have endeavoured to recreate the correct
way in which things were posted, E&OE.

2. It was you who used the term, "village idiot" however
you wish to claim that you latterly quoted it. Shame on you.
Grow up - by your childish predisposition you demonstrate that
you did not, in fact, grow up years ago, as you claimed, but one
cannot expect any more from a demonstrable _LIAR_.

As I said, Grow up, Geoff.

3. Dictionaries are recorders of history and not prescribers
of knowledge. The word, "CBisation" now exists, you have
used it; you understand the meaning of it.

4. As to commas being open to misinterpretation, then clearly
you have fallen into such a trap, by misinterpreting what you
quoted as a proscription of top-posting.

5. "In my view, a top poster is the internet equivalent to somebody who
shouts
over the person speaking, a heckler."

More unnecessary gratuitous remarks. Shame on you, grow up, Geoff.

6." This will make sure readers understand when they start to read
your response."
Will all bottom posters please note, that this requirement is met by posting
the quoted part anywhere. Anybody who is following a thread will not want to
be forced
to plough through old material again. Anyone who has not been following the
thread is ill-advised to select a posting from the middle. However, if he
does,
the archival material, like all references in any decent publication, is
given
at the end.

You're wasting your time, Geoff. This bloke is such a retard that he can't
even work out that the reason he can't see the original is because the
poster (me) is in his kill file. He won't see this post either, so if you
respond he'll probably accuse you of talking to yourself!

Aw, who is now getting uppity, have I hit on the truth?

Lets examine your points in order:

1 No I have not misrepresented what you have said. The only change that I have made in your news post is in the posting order, I have "de top posted them", placing the contributions in chronological order, which, like the rest, is a matter of record. My local news server retains posts for a period of time, unadulterated with the exception of adding the R-lines, as do news servers all over the world. I do not lie, the facts speak for themselves.

2 As I said, the term "Village Idiot" appears alongside your pseudonym in an internet address as already described. If you care to check, the net time of this predates my post by some hours. Again, a matter of record, I do not lie, the facts speak for themselves.

3 The definition of a dictionary:

A book dealing with the individual words of a language (or certain specified classes of them), so as to set forth their orthography, pronunciation, signification, and use, their synonyms, derivation, and history, or at least some of these facts. (O.E.D.)

History in this context relates to the historic derivation of the word. Yet again a matter of record, again the facts speak for themselves.

4 As nearly any editor, lawyer or student of the English language will know, the comma in the RFC is redundant. However, I do not need to debate the semantics with you, you know that. You were seeking to place your own errant construction on the RFC.

5 We have been here before. Again you wish to get your point over by putting it in front of the views of others. This is typical of a bigot.

6 Even to one as bigotted as you, it is sensible to read the news post in some sensible order. If you need to understand the term "bigotted", here it is, courtesy of the O.E.D.:

Obstinately and blindly attached to some creed, opinion, or party; unreasonably devoted to a system or party, and intolerant towards others.

I think this is a nice summation of your views.

Need I say more - oh yes, I "de top posted" again.

Geoff

At the risk of being accused of picking "easy targets", I am sure that
majority of the readers of uk.r.a must agree that it is fun.

As I have said in my last post, "the village idiot", matched to his
pseudonym, is a matter of record. I doubt that anybody else would admit to
that.

That is why I said, "Interesting." I don't know or any ISPs locally that
accept that. Which one does?

I can't believe you think companies won't accept cash! There is a ISP near here, which takes payment in most any form INCLUDING cash. IF you live close enough to stop by, why not? Of course an option as opposed to credit cards or debit cards if you don't want to use credit type information, is Money Orders. AND to answer another persons comment, USUALLY one knows when their subscription is to expire, SOOOOO you send in the payment a few days early! Not exactly rocket science. Sometimes I have to wonder where some people's minds are. CASH is not a dead option. I own a business and I too PREFER cash. No Credit card transaction costs, no running to bank to deposit checks, no waiting or worrying if a check will bounce. Yep, I prefer good ole cold hard cash. G.W.

I can't imagine running all over town to pay bills in cash anymore.
Looking for parking places, wasting time and gas, standing in line,
having to go to the bank to GET all that cash.
I pay 100% of my bills online or with automatic drafts...no fees and
there's no SS# involved :-)

-Bill

# 4512. SOLAR Constant Voltage XMFR Cap?

Newsgroup: rec.radio.amateur.misc
Date: 2003-11-29 03:57:54 UTC
From: Bruce Anderson <w1lus@worldnet.att.net>
Message-ID: <6PUxb.352575$0v4.19057310@bgtnsc04-news.ops.worldnet.att.net>
Source record: 61031

I have a SOLAR 115 volt 1.04 Amp constant transformer. It does not work. I found that the capacitor in it was open. It appears it was replaced some time ago before I bought it. The failed capacitor is 4uF 350 volt rating. I am trying to find what is the proper value and voltage replacement for this capacitor. An email to SOLAR has gone unanswered.

Can anyone tell me what this capacitor value and voltage should be?

Yes. You did misrepresent what I said. I am a proponent of
top-posting, and by reorganising it to appear that I did not
post in a top-posting manner. you are a _LIAR_ to claim that
what you presented was what I posted.

By the same token, your last sentence below, " I do not lie,
the facts speak for themselves." by mere reorganisation
reads, " I lie, do not the facts speak for themselves."

Which came first, the words or the dictionary?

Putting it into the context of this NG, in which dictionary
did the word, "transistor" appear before it was used by
Shockley, et al?

As nearly any editor, lawyer or student of the English language will know, the comma in the RFC is relevant. However, I do not need to debate the semantics with you, you know that. You were seeking to place your own errant construction on the RFC.

As you who is known here by the pseudonym "The Village Idiot", a title given by others, not I, seem unable to post a single, reasoned, and coherent reply to my post, I repeat it above for your convenience in assembling something worthy of consideration.

Your piecemeal replies are an attempt of self-aggrandisement which is typical of paranoid tendancies.

Geoff

He isn't paranoid, everyone is getting at him. ;-)

His problem is having a NARCISSISTIC PERSONALITY (def.) personality marked
by self-love and self-absorption; unrealistic views about your own qualities
and little regard for others.

Best just leave him to it and ignore him.

I see that having called Mr.Reay's bluff, he has resorted
to childish name calling, thereby classifying himself as a
CBer. Did/Does he not hold the M3/CB Fools' License, "M3OSN"?

If he did, then his silly behaviour confirms one thing, and that is that
the M3/CBer is not a Radio Ham by any stretch of the imagination.

Ham radio has traditions of gentlemanly behaviour.

I have bought several items from W&S, from small to large. The only problem I ever had was then sent me a PL259 right angle when I asked for a BNC right angle. A phone call got me the correct item and was told to keep the wrong one.
So I rate W&S OK

I also use ML&S, both mail order and I pop in when passing to Heathrow.
Chris T is excellent and the service both mail order and in the shop is fine. The only problem I ever had with ML&S was that a tax form went missing costing me 90squid. I don't know for certain it was there it could have been at the VAT man but that is my only problem.

So personally I rate both as excellent.

Maybe. I used to work with a guy who did not believe in credit cards. One
time he went on a business trip and tried to check into a hotel. Only way
they would take cash was for him to pay in advance, and leave a $200
security deposit, and that was at least 10 years ago.

OK you win. I admit it, you did NOT train more people for the May 2003 and
Dec 2003 RAE than I did NOT train.

Seems a bit odd to me that you should be so proud of doing so little but
there is no accounting for test.

So, what did you win for training fewing people?

May be if we just pop you in the kill file with Gareth.....................

Eeee, that's a good'un Duncan.

Have you spoken to your dad lately. I did say to him that I may be up in the Islands soon, and was invited to drop in. It now seems that this isn't going to happen, this year at least.

BTW, remember that Novell 3.11 that was so much hassle to install some 10 years back, it is still going, just keeps wearing disks out! (I think it is on its third!)

I spoke to him a couple of days ago, he says he will let me have one of
his HF rigs for Xmas. Not sure when I will get time to set anything up
though :-(

Do go and visit - you will enjoy the scenery, it's really something else
and very relaxing.

who said anything about winning ?
i didnt know there was a competition on brian.

IT IS MY OPINION that yu are showing signs of
needing to be top-dog in your own little m3 world.

>May be if we just pop you in the kill file with Gareth.....
ohhh typical response from someone who still hasnt been able
to accept his own double standards of refusing to recognise
morse code test but yet ran off to get an m3 licence by sitting
a farce joke fail-impossible morse appreciation/assessment.

time will come when those who are leading the way in lowering the
standard will be on the receiving end of the cb attitude that is
already present on the bands.

10-4!

OR, as is the case, the reaction of someone tired of your pointless
whinging.

The UK has a progressive licensing scheme, based on the FL, IL and Full
Licence.

The 5 wpm Morse requirement is no longer required in the UK, nor in an
increasing number of other countries.

CEPT has accepted that there should only be one class of CEPT licence-
without a Morse requirement.

The hobby in the UK has a bright future- new blood, a progressive licensing
scheme, and the "Beyond the RAE" initiative. Other countries look likely to
follow the UK lead in these areas.

You have been against all of the above but they have happened anyway but
you have still not learned your whinging is not productive.

Please, by all means, continue whinging to yourself- you clearly have
nothing positive to contribute to the hobby.

Brian

I go to nearest bank to cash disability check then pedal my ASSets
[mainly stomach bulge - but it's diminishing] off to pay phone/'net bill
and, every six months, the insurance payment on mini-van I use mainly
for shopping and doing laundry.
```

That's the exception rather than the rule for me. I've never been asked
to post a security deposit since returning all my credit cards and
tendering cash. I've traveled the entirety of the western states by van
and M/C and never had a problem.

Maybe he had a known prior conviction for passing phoney paper?

I hear ya! Funny, they create this bull shit to "stop" people from reproducing, yet it still happens. I think it was a week after the new $20 came out, someone reproduced one. Why bother? It probably costs them more to redesign and retool than it is worth in the long run. G.W.

# 4553. Upgrading to from Tech Plus to General, help on a FCC Form 605 question please

Dang, things just can't be simple any more.

On the 605 Application Main Form, what Code do I use for Block 2 which is the Application Purpose for my upcoming upgrade from Tech (Plus) to General? Even the ARRL site doesn't mention what code to insert.

I'm not even 100% sure it's a 605 I use for a license class upgrade, it looks like it is the right one to use though. The directions cover everything but a simple upgrade of license class.

I think I have the rest of it figured out. Thanks & 73!

Hey, Jerry, how's the Jeep? Any tricks to loosen the fan belt adjuster pulley?

I think you need form 610.

Heh, you're gonna let me have to figure out who you are eh? ;)

Well yeah, I thought it was was the 610 Form too but apparently that's not
the case any more. According to the ARRL at
http://www.arrl.org/fcc/forms.html I now use the 605 form. It says "Form
605 -- used for new license applications and upgrades, license renewals and
address, name and systematic call sign changes."

It's more confusing now if that's possible, at least to me. So who are you
on the forum? :)

Jerry

You have to process any upgrades through a VE team. So go to a VE exam session and they will have the proper forms. They will show you what part you have to fill out and they will fill out the appropriate upgrade information and the team will sign it off and send it in. So you don't even need to worry about what form to use.

If you are a pre-1987 Tech (sometime in April of 1987 is the cutoff date), you just have to do a paper upgrade. But it still has to be processed through the VE team. Otherwise you will still have to take the General written test. Either way, you've got to go through the VEs. You cannot submit an upgrade directly to the FCC.

Thank you Dee, that confirms what I figured out just a few minutes ago. I use the NCVEC Quick-Form 605 Application which takes care of everything and turn it into the VEC team the day of my test. Thanks for the help. :)

Wellll...That's a kinda, sorta, maybe, could be thing.
It's really a matter of scale and no, most companies no longer perfer cash. Small businesses? Yes, but not the larger ones. Cash for anything larger than a "mom-and-Pop" operation is an enormous inconvenience. Then you have the risk of making night deposits. Get robbed and it's only your word as to how much was taken. Plus more than a few such reported roberies have been faked. Then again, it's unlikely the cash is going to be covered by insurrance without a lot of paper work and even then it's only the persons word.

First, any cash transaction with a business or bank of more than several hundred dollars is supposed to be reported to the government as it's suspicious (money laundering among other little items brought that little problem about)

If I travel much, a car, or minivan is far too slow, then it's either commercial aviation, or fly my own plane.
Paying cash for an airline ticket sets off alarms and is is a really good way to gurantee the next clothest thing to a good physical while you wait, and wait, and wait... Now, flying my own 4 passenger plane? It does take gas and it doesn't take long of flying into strange

airports and paying for $200 worth of gas in cash to raise flags. Even though a small plane is not capable of carying much in weight they have been a thing of suspicion for the unknowing general public. Rent a car? Credit card and drivers license... I know of one guy where I used to work who was able to rent without a credit card, but he really had to hunt and it took a big security deposit. the company finally told him to use the company credit card or else.

If I were to take a long vacation I certainly wouldn't want to take enough cash to support the whole trip. All I'd need is to have the wrong person see me peel off a 20 to pay for gas, or groceries. Certainly a person can be more discrete and use a money belt. I know one guy who always carried over $20,000 to the big fly-in at Oshkosh. If he needed cash it was a trip to the Port-O-Pottie where he could peel off a couple hundred without being seen. Had it been me I'd have always slept with my pants on.

Yes, my ISP would be willing to take cash as will the corner gas station, BUT a single credit card, plus checking account is much safer, more secure, and costs me nothing as long as I keep it paid up.

If I were to get robbed and reported some one stold $200 or $300 in cash, let alone enough for a trip, the police would probably have me as the prime suspect. If I'm robbed, they get $20 and my credit card it only causes me an inconvenience and maybe $50. However if purchases sho up that are not typical of my purchasing habbits the phone will be ringing by the time I get home to question the purchase. I know that for sure as it's happened.

Yes a person can get by using cash only, but not most of society could not and maintain their standard of living. It takes 5 minutes to pay the monthly bills. Some are automatically taken out of my pension check at the bank. If I did everything in cash it'd take me most of a day and probably 50 to 75 miles of driving. Cash only for me and most of the people I know would be a severe inconvenience and take a lot of time out of already busy lives.

You'll have to fix the return add due to dumb virus checkers, not spam

Amateur Radio Newsline™ Report 1372 – November 28, 2003

Amateur Radio Newsline report number 1372 with a release date of Friday, November 28, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Australia plans a celebration to welcome no-code, a New Zealand ham plans an Amateur Radio replacement for a frequency standard station and the U-S-A is on the verge of banning unsolicited junk e-mail. Find out the details on Amateur Radio Newsline report number 1372 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: WELCOMING NO CODE “DOWN-UNDER”

Last week Australia’s decided to abolish code exams on the 1st of January. Now its planning a world-wide on-the-air celebration as 2003 gives way to 2004 and Morse testing disappears. Jim Linton, VK3PC, has the story and an invitation for you to take part:

--

On New Year's Day 2004 Australian radio amateurs will gain access to the High Frequency bands using licenses that don't require the passing of Morse code telegraphy tests. The Wireless Institute of Australia invites the world's amateur radio fraternity to join an on-air celebration of this special occasion.

To celebrate the event, there will be a "WIA Welcome to HF QSO Party" beginning at 0001 Australian Eastern Daylight Time and conclude at 2400 UTC on New Year's Day - a total of 35 hours. The VK radio amateurs appearing on HF bands for the first time can be identified by three-letter VK callsign suffixes that begin with the letters H, T, U, X, Y and Z.

WIA amateur stations will be on air to join the HF QSO Party, and these have two-letter callsign suffixes "WI" or three letter suffixes starting with "WI." Listen for the call "CQ WIA Welcome to HF QSO Party".

For the Amateur Radio Newsline, I’m Jim Linton VK3PC.

--

Many in Amateur Radio have been campaigning for years to have code tests removed as a license requirement to operate on amateur bands below 30 MHz. For Australia this will happen on the 1st of January, 2004 with this very special on-the-air celebration.

(DO NOT READ. Find out more by e-mailing hfqsoparty@wiavic.org.au (Q-News))

**

INTERNATIONAL - NEW ZEALAND: A PROPOSAL TO REPLACE VNG

Still down-under, word that well known "Digital Modes" Amateur, Murray Greenman, ZL1BPU, has proposed that New Zealand and Australian hams put together a network of simple and inexpensive transmitters. This, to provide a high accuracy Standard Frequency Service to replace the VNG standards station that has now gone QRT. Amateur Radio Newslines Jim Meachen ZL2BHF is in Auckland with the details:

--

Amateurs in the South Pacific have for many years relied on VNG transmissions as a prime source of accurate frequency reference. With the closure of VNG in December 2002, the sole remaining precision signal source in our area is WWVH, in Hawaii. Unfortunately the WWVH signal quality in the South Pacific is generally too poor for reliable use, either to zero beat a simple calibrator, or using more sophisticated computer based techniques.

ZL1BPU says that a series of tests over the last two years has shown that simple low power carrier transmissions on the 80m band would fulfill most of the requirements of a Standard Frequency Service:

--

Greenman: “Using simple HF transmitters that I've designed, we have confirmed that low power transmissions are very useful, for both calibration and propagation study, up to at least 3000 km range.

Anyone can monitor these signals, using a stable receiver and freely available software to look for small frequency shifts that accompany each propagation path. Classic effects such as multiple paths with different refractive indices for different signal polarization’s are easily observable.

Doppler shift is particularly marked around sunrise and sunset. Observing these signals gives a better understanding of propagation, which is the key to accurate on-air frequency measurement.”

--

The Service now operates on a test basis with transmissions from a high precision local reference on an exact kHz point 80m frequency using a carrier power of 1-5W. The Transmissions are identified in Morse every 30 minutes. Operation is from a different geographical location each weekend. Transmission times are announced and coordinated beforehand by e-mail.

Reporting from Auckland New Zealand I'm Jim Meachen ZL2BHF for Newsline

--

ZL1BPU adds that these are privately owned, operated and attended test transmissions, not beacons. Establishing a Standard Frequency Service formally, perhaps under the auspices of the NZART, might be considered in the

future. (NZART News)

COMMUNICATIONS LAW: HOUSE PASSES ANTI-SPAM LAW

Here in the U-S-A, Congress has moved closer to passing the first-ever federal protections against unwanted commercial e-mails. This, with the House passing a bill on Saturday, November 22nd that would impose new limits on sending direct advertising offers -- commonly called spam mail.

Approved on a 392 to 5 vote, the measure would prohibit senders of unsolicited commercial e-mail from disguising their identity by using a false return address or misleading subject line. It would also prohibit bulk mailers from harvesting addresses off websites and require such e-mails to include a mechanism so recipients can indicate they do not want future mass mailings. Penalties for failure to comply could be up to five years in prison in some circumstances.

The House bill largely mirrors ant-Spam legislation the Senate approved last month. Supporters hope that slight differences between the two measures can be resolved before Congress adjourns for the year. The Bush administration says that it supports the anti-spam efforts. (Published news reports)

(5 sec pause here)

**

RADIO LAW: THE FCC ON PRIVACY OF INFORMATION

The FCC has put in place a temporary policy that will keep the public from knowing who is facing enforcement action by that agency. Amateur Radio Newsline’s Bruce Tennant, K6PZW, picks up the story:

--

Don’t look for names and call signs of alleged regulatory violators to be released by the FCC anymore. At least not for a while. This is because the agency has revised the format in which it's supplying the media and the public with information regarding alleged regulatory scofflaws, including those in the Amateur Radio service.

The revised temporary policy is based on privacy concerns within the FCC. Until further notice, the agency says that it will only provide the location where a violator lives along with a very brief synopsis of the action taken.

Following a policy review now taking place the FCC says it will announce a new privacy policy for all future information releases.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

No timetable has been announced for the privacy policy review to be completed. (FCC)

**

ENFORCEMENT: NO MORE ADS AND WE RENEW YOUR LICENSE

And without mentioning any name or callsign, the FCC has acted in a pending non-certified radio equipment marketing case. This, as a Tomah, Wisconsin, licensee is informed that renewal of his Technician license would be granted on the condition that he permanently remove from the World-Wide-Web certain information.

The FCC says what it wants removed includes any advertisements for, or references to, the sale of transmitting equipment that operates, or is intended to operate, on frequencies in the Citizens Band service. Also references to gear for any other radio service requiring the use of certified transmitting equipment but which has not been certificated by the regulatory agency.

If he says O-K, he gets his ticket renewed. If he refuses to comply, the FCC says that his renewal will be designated for hearing before Administrative Law judge. (FCC)

**

ENFORCEMENT: PA REPEATER PROBLEM

The FCC has also warned a Lewistown, Pennsylvania, Extra class licensee that he must heed the request by a repeater owner to stay off that system and that technical problems with his own repeater must be corrected immediately.

And in an Order issued by Philadelphia FCC office that licensee was told that his repeater could not operate under automatic control until further notice. He was also requested to provide operational information about the repeater, including names and addresses of control operators. (FCC)

**

ENFORCEMENT: TOWER VANDAL FACES 27 MONTHS IN PRISON

And you can just about write the words "the end" to the case of a Washington man accused of tampering with more than 20 high voltage power towers in four western states that we have been reporting on. 62-year-old Michael Poulin has admitted the charges and has entered a plea bargain agreement with federal prosecutors. As a result, he will serve no more than 27 months in prison. He also faces a possible fine of $500,000. Without the plea agreement he could have been sentenced to jail for up to 10 years. (CGC)

**

RADIO LAW FOLLOW-UP: THE NEVADA HIGHWAY PATROL VS THE FCC

Some enforcement news of a different kind by way of the Reno Gazzette Journal and the C-G-C Communicator. Both bring word that the Nevada Highway Patrol has turned over a 255 page investigative report and 2,500 pages of supporting documentation to that states Attorney General's office. The Attorney General will now consider the possibility of criminal charges will be determined in connection with the police agency’s use of a radio system on frequencies for which it holds no licenses.

As previously reported, the highway patrol launched the investigation earlier this year when it was discovered that it didn’t have the proper licenses to operate the $14 million communications system built for it in 2000. The FCC has threatened to fine Nevada and block the states future license requests if the Nevada Highway Patrol does not quickly abandon use of the unauthorized frequencies. (CGC)

**

WITH THE ARRL: 2004 ELECTION RESULTS

The ARRL has announced that Frank Fallon, N2FF, retained his seat as Director of the League's Hudson Division. This, by defeating Vice Director Steve Mendelsohn, W2ML, by a vote of 1933 to 1470.

Ballots were counted November 21 at ARRL Headquarters. The Hudson Division's was the sole contested seat in the current director-vice director election cycle.

Incumbents running in the Central, New England, Northwestern and Roanoke Divisions ran unopposed and were declared elected. Joyce Birmingham, KA2ANF, was the lone candidate for the vice director's seat that W2ML vacated to run for the division's top spot and was also declared as elected.

And don’t look for as many League elections to take place in the future as in years past. These candidates were elected to serve three-year terms of office that begin at noon on January 1, 2004. The change from two year to three year terms was instituted by the ARRL Board a few years ago. (ARRL)

**

REQUIRED READING: SURGE PROTECTION - SEPARATING MYTH FROM FACT

If you think that $2.98 bargain basement power strip will protect your ham gear from power line spikes, you could be in for a rude and very expensive awakening. This is the gist of a feature article in the December issue of Popular Communications Magazine titled Surge Protection: Separating Myth From Fact.

The author is Popcom Editor Harold Ort, N2RLL. In it, Ort takes you on a mind boggling journey into the world of powerline surge protectors. He tells you why power surges take place and what really works to protect your station -- and -- what does not.

The article is must reading for any ham that operates his station from mains power. You can find Popular Communications on many newsstands worldwide or subscribe over the web at www dot popular dash communications dot com. (ARNewsline(tm))

**

INDUSTRY NEWS: ROHN ANNOUNCES ASSET PURCHASE AGREEMENT

Amateur Radio and telecommunications industry tower manufacturer ROHN Industries has announced that it's entered into an asset purchase agreement. This with SPX Corporation which is described as a global, multi-industry company.

According to the ARRL Letter, ROHN filed for Chapter 11 debtor-in-possession relief in the US Bankruptcy Court for the Southern District of Indiana on September 16. The deal, if approved by the court would include ROHN subsidiaries that are party to the bankruptcy proceeding. (WA6KLA, ARRL)

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WITH ARNEWSLINE: YOUR INPUT NEEDED

Amateur Radio Newsline will be holding its annual Board of Directors meeting in early December and those in charge want to find out what you would like from us in 2004 and beyond. If you have any ideas on how to improve the newscast, the Young Ham of the Year Award, funding, or any aspect of our operation, we welcome your thoughts. E-mail is best. You reach us at newsline@arnewsline.org. (ARNewsline(tm))

**

HAM HELP: DX SOUND BITE NEEDED

Did you have a tape recorder running the weekend of the CQ World Wide SSB contest? If you did then Glen Lowery, K2FF needs to hear what you have.

The reason? Well, it seems that Daryl Goldman, KD5CQT, and Randy Becnel, W5UE , spent a week in Suriname in October. Goldman operated as PZ5CQ while Becnel was on as PZ5UE. The duo also activated PZ5A in the contest.

Anyhow, when the team got back home they realized that they had recorded everyone on tape except PZ5UE. And now there is a presentation planned for early December and audio of Becnel in QSO is needed to complete the show.

If you happened to be listening in and have the one missing station recorded, please contact Glen Lowery by e-mail to k2ff@aol.ccm Everyone involved will be very appreciative if one of you can help out.

More is on the web at www.mdxa.org/pz_2003.html (OPDX)

**

EMERGING TECHNOLOGY: CELL PHONES WILL POSSESS LOCATION-BASED BEHAVIOR

According to a report on the National Institute of Standards and Technology website, your cell phone may one day be able to adjust its behavior or call handling based upon where it determines you are located. Such phones could, for example, advise you of the closest bank, dial the nearest emergency specialist or automatically forward your calls while you're in a conference room. The N-I-S-T website carries many other interesting stories too. Its updated regularly and is in cyberspace at www.nist.gov (CGC)

**

HAM RADIO IN SPACE: ARISS GEAR PASSES PREFLIGHT TEST

Some exciting news on new ham radio hardware slated to be carried to the International Space Station. We have more in this report:

--

ARISS International Chairman Frank Bauer, KA3HDO, reports that he and other members of the USA team just returned from Russia where we they were supporting a series of meetings and tests at the Energia facility.

According to Bauer, the primary reason for the US team visit was to complete the testing of the Phase 1 Ericsson 2 meter and 70 cm radios, along with the Phase 2 Kenwood D 700 radio system using a set of flight identical ARISS antenna systems.

The tests were performed in the KIS facility at Energia that houses all their flight equipment. Inside the KIS is a flight equivalent Service Module. The good news is that the group not only successfully completed the end-to-end testing of the Kenwood and Ericsson radio systems but the SSTV system as well.

The successful completion of these end-to-end tests was a requirement by the Russian team. This, to clear these radio systems for use in the on-orbit Service Module.

For the Amateur Radio Newsline, I’m Norm Seeley, KI7UP.

--

By the way, the International Space Station celebrated its fifth anniversary in Earth orbit on November 20th. (ARISS)

**

ON THE AIR: NEW SPANISH LANGUAGE IRLP REFLECTOR

A Spanish language reflector has come to the Internet Repeater Linking Project. This, with word that Reflector 9201 is in full operation and all users with Spanish skills are invited to join in the fun.

Jay Santiago, KP4EOP, is the operator of node 7040. He and the Chicago based Asociacion Iberoamericana de Radio Aficionados are the people behind the project. They say that 9201 is not closed to non-Spanish speakers. Rather it is a place in ham radio cyberspace where the Spanish language will be primary.

Up until now, IRLP- has been dominated English and French speaking nodes and reflectors. This left a large portion of the worlds Spanish only speakers out of communications over the very popular repeater linking system -- a problem that’s now been corrected thanks to the Asociacion Iberoamericana de Radio Aficionados. (K9DC)

**

PROPAGATION TECHNOLOGY: NEW SOLAR FLARE THEORY

The recent series of solar storms to hit Earth may be caused by the sun's iron-rich interior. So says one solar researcher who theorizes that the sun's core is made of iron rather than hydrogen.

Dr. Oliver Manuel is a professor of nuclear chemistry. He believes that iron, not hydrogen, is the sun's most abundant element. And, in a paper accepted for publication in the Journal of Fusion Energy, Manuel asserts that the standard solar model which assumes that the sun's core is made of hydrogen has led to misunderstandings of how such solar flares occur.

As ever ham knows, these flares can play havoc with high frequency communications while turning some VHF frequencies into world-wide D-X bands. (ANS and Space Daily)

**

DX

And speaking about DX, word that OK1TN will operate portable KP2 from St. Thomas in the Virgin Islands through the 13th of December. If you make contact, QSL as directed on the air.

Also, K3JT is active as 5X1X from Uganda for the five or six weeks. Sorry. No other information on this operation is available at this time.

Lastly, the Council of Europe Radio Amateur Club, has launched a competition open to all radio amateurs. This, to commemorate the 18th anniversary of its establishment in June 1986. The challenge involves sending a list of all contacts made with their club station TP2CE using its various special prefixes before the end of June 2004. Complete rules can be found on the Internet at ewwa.free.fr

(This weeks DX news provided by OPDX, GB2RS and Modern DX’er)

**

THAT FINAL ITEM: T-HUNT TIME AGAIN

And finally this week, whether you're young or old, you could become a champion at hidden transmitter hunting. It's time to start training now, as you'll hear in this report from Amateur Radio Newsline's Joe Moell K-Zero-Oh-V

--
USA's best on-foot hidden transmitter hunters will be heading west next summer. The fourth annual USA ARDF Championships will begin June 16 near Santa Barbara, California. Get ready for practice sessions followed by separate days of intense competition on the two meter and 80 meter bands. Medals will be awarded in nine age and gender categories, following the rules of the International Amateur Radio Union.

The competitive courses are open to anyone of any age, experienced or not. Here's your chance to learn from experts like Jay Thompson W6JAY, Newsline's Young ham of the year. He was a medal winner at this year's Championships in Ohio.

These USA Championships will take place just in time for final selection of Team USA members who will travel to the Czech Republic for the ARDF World Championships in September.

Event sponsor for 2004 is the Santa Barbara Amateur Radio club. General Chair is Marvin Johnston KE6HTS, a member of USA's first team to the World Championships back in 1998 and winner of medals at the last two USA Championships.

The official Web site of the 2004 Championships is now being prepared, announcing the location of event headquarters, rules and technical details. Meanwhile, you can find out all about championship direction finding, and how your can have events in your home town, at the "Homing In" Web site, www.homingin.com

You'll learn the rules for this fast-growing sport, meet some of the current champions, get equipment suggestions and find out how to get on an e-mail list for the latest radio-orienteering news. That's homingin, one word, homingin.com

From southern California, where we have regular on-foot foxhunts and everyone is invited, this is Joe Moell K-Zero-Oscar-Victor for Amateur Radio Newsline.

--

Again, for more information take your web browser to www.homingin.com (K0OV, ARNewsline(tm))

> The only advantage of going further is that you get access to the 10m
> band; it will soon be of little interest during the sunspot minimum
> years.

There are other incentives:

1.Use outside the UK.
2. Use of homebrew or converted kit.
3. Ability to supervise others / allow the passing of greetings
4. Most of all probably, the desire to progress.

>
> Nobody adheres to the 10w power limit for the Foundation Licence.

"Nobody"- I know a number that do (or did, until they go their 2E so can
now use 50W).

> Even in the RSCB's journal this month, there is a report of an MW3
> openly admitting to running 50 watts.

And he was in the wrong.

>Most run 100 watts.

Oh yes, the famous "Walt's Way" of measuring RF remotely.

>
> The only purposes of introducing the Foundation Licence were (1) to
> increase (in the short term) the RSCB's membership numbers and (2) to
> provide a new market for commercially made, type approved radio
> equipment.

IF that was the only reason, why are the RSGB pushing the IL, new RAE, and
"Beyond the RAE"?

>
> Hardly progressive.

No, you would prefer to go back the (supposed) good old days, I assume.

> There is no incentive to progress beyond the Foundation Licence level.

There may be a majority that stay at foundation level, but I, and quite a few others on this newsgroup have since passed the IL and are taking the full rae tommorow. Incentive is down to the individual. I personally want to be able to contribute to the group at an ALMOST equal footing to yourself.

> Nobody adheres to the 10w power limit for the Foundation Licence.

>
With respect Walt, I think there is a very large generalisation in your statement.One MW3 admitting to running 50 watts is a drop in the water compared to the 5000+ M3s. May I respectfully ask what published data you take the last statement from?

The Foundation licence may not be perfect, but it is here, and seems to be working. Unsubstantiated comments like these are extremely disrespectful to the large number of Foundation licence holders who operate their equipment to licensing regulations.

Just my tuppence worth ;-)

Roll on tommorow :-0

Wogie. You are a sneaking skank! After all the dates we had together, and all the intimate moments we shared on the couch you said would be forever our "love couch", you turned around and left me for a fifteen year old Boy Scout!

What the Hell is it? Why? It must be the uniform, right? I hear that guys like you fall for kids in uniform. Is it the neat, yellow tie? Is it the shorts that show some leg?

You promised me, you promised me that you'd be faithful to me. I should have known that you were lying.

Why? Why?

I know how much you are suffering. It must be heart rending to deal with your Mom's suicide. Stop blaming yourself. It is not your fault. Get on with your life.

I know that you blame yourself. You often ask yourself if you could have saved her if you had gotten home just a few minutes earlier. You could not have changed anything.

She was hanging from that closet door for at least four hours before you got home and rigor mortis was already setting in.

Don't blame yourself, Wogie. She hated you and had no other way out.

Now you know why you were adopted. You were, and are, the "fifth wheel" nobody wanted to claim.

This is like comparing apples to oranges. CASH is accepted anywhere - for the most part. As to your argument, large corporations not preferring cash, I disagree. I don't see signs on the bigger stores like Wal-Mart telling you "Sorry, we accept credit cards, debit cards and checks only. No cash please." When that day comes, we're all in trouble. For a transaction or two, it isn't bad depending on amount - to carry cash. IF the transactions are for large amounts - big or many purchases such as Christmas shopping or a vacation, then you'd have to be a fool to carry large amounts of cash - it just isn't safe. So then a Debit or Credit Card would be a safer option. And, yes, using plastic or the numbers from that plastic, is a convenience for paying monthly bills or other debts. It is a way of life - a necessary evil. Paying monthly bills in cash COULD be done if the setting is right. But it would be an inconvenience to carry all the cash for security. There are places at least around here, where you can go to pay the phone, electric, gas, water bill all in one location - the majority of the necessary evils - not the luxuries of "credit". It is more a convenience to those who aren't lucky enough to have a bank account. Why don't they have one? With some banks, they require more than some people can keep in it for a minimum balance, thus get hit with service charges which then eats more of their income. Others prefer no accounts due to not trusting banks. Still others aren't adept at keeping an account for whatever reasons. You can't force everyone to open or keep a bank account or credit card active. So, CASH will ALWAYS be accepted.
Credit is a wonderful thing, but sadly, many don't have it - either because they don't trust it, not enough income for it or they ruined it and were forced back into a cash only status. CASH supports these folks. This is leaning to the argument of 666. If you don't have the mark (or number) you

don't get service or goods. While the number may not have to be 666, it is coming down to in your example, if you don't have plastic, you plain can't exist. That is baloney. I'm not a really religious person, so I don't know if the day of the "mark of 666" will ever come. IF it does, we're all in deep dodo. Maybe in your example, we are leaning towards that goal. I certainly hope not. It sure would make life inconvenient for a hell of a lot of people. G.W.

Which is exactly where your logic falls over.

You keep claiming that few will have the incentive or will to progress from
the FL- if this were the case then the market for the books would be
unecomonically small- especially as there are alternative sources of free
study material.

Hoist by you own petard ;-)

Some of them are. I have listened to several M3s on different
occasions talking (bragging) about their activities on 27MHz SSB and
the long distance copies they got.

I had occasion to switch off my eQSO gateway rather quickly this
afternoon when an M3 in this area started telling Michael Jackson
jokes over the air to another M3 in front of a world wide audience.

Oh, as I believe is the case, they can see the progression is happening and
are not basing their actions on half baked bigotry.

When our club formed earlier in the year we had 25 or so members- mostly M3,
some 2Es and 3 Full licensees. We've grown to 30 or so, all the newcomers
were either M3s or not licensed.

We've now got 5 Full licensees (plus hopefully another after Monday's RAE
exam) and only a handfull of M3s- all the rest have progressed to the IL and
most of those are working on the new Full licence exam (three are delaying
for good reasons).

At the Train the Trainers there were 35+ tutors planning and expecting to
run replacement RAE courses, as well as IL courses. One club has coures
booked up a year in advance (and not just FL courses either). I'm having
to coach some M3s through their IL in parallel with running a replacement
RAE course as they want to do the Feb 04 Full exam. I've already got
'names' for the next IL course- probably no due to start before Mar 04.

Not exactly indicative of no one wanting to progress, is it?

# 4570. Help with Cubic RT-1510/URC120

Newsgroup: rec.radio.amateur.misc
Date: 2003-11-30 23:40:21 UTC
From: Don <don308@pacbell.net>
Message-ID: <Fdvyb.28328$%r2.15622@newssvr29.news.prodigy.com>
Source record: 61090
Cross-posted to: rec.radio.amateur.equipment,rec.radio.amateur.misc

I just picked up a Cubic RT-1510/URC-120 hf radio xcvr. I'm wondering if anyone has the voltage requirements and pin outs for the power connector. I would like to try it out to see if it works. Does anyone know anything about this radio. I would appreciate any input.

Thanks..Don.

# 4571. CI-V Cable for 76ProII

Newsgroup: rec.radio.amateur.misc
Date: 2003-11-30 23:56:05 UTC

Message-ID: <vsl0sbi7s6i5d2@corp.supernews.com>
Source record: 61091

Anyone have the pinouts for a cable between the 756 ProII and a computer?
Sales at HRO said I didn't need the CT-17 if I am only controlling one
transceiver.

Thanks,
Andy

March 21, 1987 was the date that the test changed and was split into 3A and 3B. If you can prove that you took your test before that date, OR that your license was processed before July 15, 1987 (that's the date that the first post-change licenses were processed), then present your proof.

What astonishes me is that there are still people who are just getting around to their "paper"/"no-test" upgrades now, 3.5 years AFTER the rules change. In yesterday's session that I participated in, we had two such people.

# 4573. Re: SOLAR Constant Voltage XMFR Cap?

Newsgroup: rec.radio.amateur.misc

The capacitor you are looking for is a common motor run capacitor. Any electric motor shop should have one for less than $10.00. It is a 4mfd, 370volt part.

I am looking for a DTMF mike to use with the Icom 706.If you have one you don't need or just want to sell,let me know your price.Email me with info.Thanks for reading.

# 4576. Power Supply 4 Sale

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-01 04:44:46 UTC
From: carroll_donald@yahoo.com
Message-ID: <d13480b7.0311302044.3a95a63d@posting.google.com>
Source record: 61095

I have a power supply for a Ham Radio setup that was left in my house by the previous owner. I know nothing about these things...but the part says that it's made by Aiphone, 117v input, 28w power consumption, DC 12v at 1 amp output. It is a model PS-12C. I have no idea what these things are worth if anything...but if anyone wants it, fee free to e-mail me. If there is anyone in the KC area who needs a really big assed antena, I have one on the back of my house (also left by the previous owner) with about 400 miles of wiring. If anyone is interested in any of this stuff, again, feel free.

R. J.

Norm N3PVQ has A Kenwood TS-570 HF Rig for sale. Radio has all the latest updates. $700.00 or best offer.
Contact: 352-848-0283

Wayne WB9ZPY has a Yaesu FT-736R all mode 2 meter/6 meter/440 rig. Matching SP-767 speaker and a MD1 Mic. email for price and more information.
Contact: jrbluz2@aol.com

Joe W4CBJ is looking for a Kenwood Receiver R-1000. Working or in need of repair.
Contact: w4cbj@arrl.net

Shannon N0JAM is in need of a Dual band 2 Meter/440 beam.
Contact: n0jam@hotmail.com

Shawn KG4YZZ has anew Kenwood THF-6A HT for sale. Manual and charger.
Contact: kg4yzz@hotmail.com

Pete KA1WBE has a Yaesu 101ZD HF Rig, Has new tubes. CW and SSB with a D104 Mic. $250. Kenwood TS-530S HF Rig. CW and SSB. Has a Silver Eagle D104. $300. Looking for a 50-100 Watt 6 Meter all mode Radio, 2 Meter Rig high power radio.
Contact: ka1wbe@aol.com

Eugene W4WFP Tentec Model 350 Short-wave Receiver for half the price of new.
Contact: 727-772-9793

Jim KA4IDJ has a Elenco Handheld Frequency counter. Covers 1MHz to 3GHz. $40.00.
Contact: ka4idj@aaahawk.com

Cliff N8DII has a Kenwood TS-450SAT HF rig for sale. Radio has the built in tuner. Has all the manuals. Radio is in great shape. Radio has many features, please email for more information. Also has a 30Amp power supply with radio. $500.00. Also needs a Kenwood Hand held Mic for the TS-450.
Contact: n8dii@tampabay.rr.com

Jim WA8JSC Has a Icom 910H all mode 2/440 rig. $900.00 or trade for a FT-736R.
Looking for a 220 FM Mobile radio with Tones.
Contact: 64 Repeater.

Ray KA1WZX has his station for sale. He has an Icom 706 Mark Two G and a FT-90R and much more. Email for a complete list of all the items for sale.
Contact: ka1wzx@msn.com

John KQ4EM has a GSC 35R 35 Amp power supply that needs work. $35.00. Also has a 35 Amp converter from an RV for $40.00. Radio Shack Pro-2030 $80.00. RCI 10 Meter mobile for $90.00.
Contact: 727-514-5950 or kq4em@hotmail.com

Jackie KF4TNE is looking for a D104 Mic.
Contact: 863-665-7981

Please remember the 64 Picnic and Tail gate on April 11th and 12th. Please email Don KG4COQ at, kg4coq@hotmail.com for any questions.

**********64 Nets Schedule**********
Fridays and Saturdays at 9:30pm. Rag Chew Net with Don KG4COQ
Saturdays at 8:00pm. Traders Net with Bobby KE4YFJ
Sundays at 8:00pm. Trivia Net with Shannon N0JAM

Hello All:

I made a mistake in the listing for last week. The correct listing is
below. The first email showed the price for the HTX of $100, it should
have been $60.00. Sorry about that.
Charlie KA4TRF is looking for a FT-620B Yaesu 6 Meter Rig. Has for
sale a HTX-100 10 Meter mobile radio for $60.00. Radio is in good
shape.
Contact: 727-562-2898

Bobby
KE4YFJ

---

Hello All:
Here is the listing for August 9, 2003.

Shoen KG4YMB has a Yaesu FT-2400 for parts. The LCD display is out and
has no manual. Asking $25.00
Contact: 64, 94 or the 97 repeaters.

Ron KF4JED is looking for a 2 meter mobile radio.
Contact: kf4jed@peoplepc.com

Jay KG4RMD has 40 feet of Rohn HBX Tower. Has little rust. Asking
$100.00.
Contact: rjayhpd@aol.com

Bud KG4OUV has a Kenwood TS-830S HF Rig. No Mic and No Manual. 100
Watts out.
Asking $350.00.

Contact: budreaux4.com

Ron N9EE had 100 feet of 7/8 Hard Feed Line for Free.
Contact: 727-376-6575

Jim K4IYD has a Cushcraft 3 element beam for 6 meters. $40.00. Yaesu FT-301D HF rig, 10 - 160 Meters. $300.00.
Contact: 727-502-0465

I just started on hf bands and i usiing now a FD4 from Fritzel and I hear
all goods things about the G5RV.
Is that so, works it's also great on 10 and 15m?
I have not to much space for a full size beam but a mini beam works also
good I think. But most of beginners started with a wire like a G5RV???
If I buy a G5RV is that with a Balun or without a balun what's the best??

That's for sure.. :( if this keeps up, then the simple act of operating a pirate station in the US could become a capital offense under the Patriot Act.. If you think this posit is a bit extreme, read the Patriot Act, and Patriot Act II.. it takes very little to be named a terrorist these days...

Look, even the IRS is using the Patriot Act now....

The IRS Claims New Patriot Act Type Powers to Punish Political
Dissenters

In a precendent-setting case, the IRS wielded new power to punish the
political speech of those who "espouse views" the government considers
"inconsistent" with government-held beliefs. In a hearing originally
closed to the public in a secret tribunal on a military island, but
moved to a public location after protests from the press and the public,
the IRS wants to wield this power against a former IRS whistleblower,
who was forced to resign upon his discovery of fraud in the agency.

After monitoring and taping the whisteblower's appearances on Sixty
Minutes, talk radio shows, and political publications where he
rebroadcast his findings of IRS fraud, the IRS initiated this
inquisition against their former whistelblower. This new power may find
new political targets soon enough.

The IRS, through the small office of "Director of Practice," claims the
authority to wield carte blanche authority over all the other powers of
government -- the authority to monitor, surveil, and eavesdrop on
political dissenters, the authority to pry into the private financial
records of banks, businesses, and taxpayers, the authority to conduct
secret investigations under a criminal grand jury, and the authority to
censure political dissenters by branding on them a badge of infamy and
stripping them of governmentally- protected licenses. In short, under

the guise of a "practice" investigation, the IRS claims the right to wield all intrusive and invasive powers of government available...

A "license" to practice before the IRS -- even for people who have never requested such a license or actually practiced before the IRS, but are given one as a matter of law if they are accountants -- "licenses" the IRS to conduct private audits without notice to the taxpayer, confer with criminal prosecutors without disclosure, and bring special "disbarment" proceedings against disfavored dissenters, even if the alleged "disreputable" conduct has nothing to do with any "practice" before the IRS.

The IRS now claims it can use these so-called "practice" investigations of anyone who Congress licenses to practice before the IRS -- regardless of whether they actually practice before the IRS -- to surveil the public appearances of dissenters, eavesdrop on the political conversations of dissenters, benefit from secret grand jury investigations, hold secret conferences with the criminal investigators, surreptiously tap the private database of taxpayer information, including taxpayers who merely have some financial "connection" to the accused, audit the political dissenter's personal financial records, and use all this information against the dissenter in the "practice" proceeding.

Under the guise of a "practice" investigation, the IRS can ignore all the normal procedural protections against an illicit audit while it conducts such an audit. Simultaneously, the IRS can ignore all the legal protections afforded a person accused of a crime while conferencing with the people conducting a criminal investigation. Indeed, the IRS can even ignore the sunshine laws, as the records of such "practice investigation" are exempt from disclosure under the Freedom of Information Act, as are grand jury proceedings.

The IRS claims it can exercise this authority in a secret proceeding without allowing a person the opportunity to cure any alleged mistakes, the opportunity to prepare a defense by knowing the exact facts they are accused of, without any opportunity for discovery, without any opportunity to call witnesses necessary for their defense, without any opportunity to cross examine their accusers, without any opportunity to testify at their own hearing about the merits of their position, without being forced to testify against themselves without such an assertion being held against them, and without even an opportunity for a hearing on the evidence.

This power of this little office with a Napoleonic vision goes even beyond the Patriot Act type authority and stories of FBI monitoring of war protestors.

Too Hoover-ish to be true in modern America? Just read the case of the IRS against Joe Banister scheduled for a "hearing" -- a hearing where the IRs prohibited Banister from introducing any witnesses or presenting any evidence as to his defenses, and even discussing the sincerity, the

truth or the "reasonableness" of his positions -- on December 1 in the city by the bay, in the Tax Court chambers of the federal courthouse in San Francisco. History is being made.

# 4589. Where's Pork Butt??????????????????????????????

Newsgroup: rec.radio.amateur.misc

There was a fellow on the air quite a while ago that called himself Pork Butt and was always interfering with communications of all types. I would hear him day and night. Did the FCC finally take him off the air?

Why did he call himself Pork Butt? Was it only because he was fat or was there another reason. I don't remember what his call was so maybe someone can come up with that.

Didn't you ask this question a few weeks ago? Didn't the answers then satisfy you? Even if you didn't, I'm sure a web search would yield the answers you seek.

Basically, I think you're a troll trying to stir things up.

Hello all,

This is my first post, so please be kind.

My Grandpa was an avid Ham and Shortwave Radio enthusiast. After he passed, I found a box full

of old tubes in his garage. I would like to gain some knowledge about the applications of the

various tubes, and ultimately find out if they would have any value to a collecter. Below is a

complete list, along with what cross reference numbers I have been able to locate, so far. Any

help with THAT is also much appreciated!
==========
Vintage Vacuum Tubes:

Count Tube# Cross Reference #'s

# 4595. Listening to myself talk on repeaters

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-02 05:13:04 UTC
From: KC2MAC@techfocus.net
Message-ID: <e93de1c6.0312012113.265a1b92@posting.google.com>
Source record: 61115

Sometimes I have a good enough signal to a repeater that I can key in, but not enough to have anything other than a carrier signal get through. Now, if I'm trying to get attention on a repeater on, say, the 2 meter band, how do I know whether I'm full quieting and there is just no one listening at the moment or I'm having problems getting through? A friend suggested having a scanner handy with earphones to listen to myself on the output freq. I tried that and it didn't seem to work at all.

I'm using a Kenwood TH-F6 to transmit on 2 meters and I have an Icom R3 tuned to the output of the repeater I am keying up. I don't have any problems getting into the repeater and everyone seems to hear me just fine. The only thing is, I can't hear myself through the Icom when I transmit on the Kenwood. The Icom is functioning otherwise. It picks up the output of the repeater without issue unless I am transmitting through it with my TH-F6. For a moment I thought that my hearing was to blame, so I dug out an old analog oscilloscope that I had bought at a MIT flea market years ago for about $75. I visually watched the audio output of the Icom with the scope. When other operators were transmitting through the repeater I could see their voices dance on the blue-green glowing screen of the scope, but when I transmitted all I saw was a flat-line.

Why is my scanner deaf when I'm transmitting with a separate rig? Could this have anything to do with near-field emissions? I'm transmitting with 5 watts of power using a 7.5dB gain omni-directional antenna. My scanner is always within 10 feet of the antenna.

Repeater output freq: 147.000 MHz
Offset: -600KHz

BTW, I've talked with another ham that has experienced the same thing, so at least I know I'm not going nuts just yet. :)

Yes, the technical, two way trade term for it is desense. One of the big efforts needed in building a repeater is to isolate the always-on receiver from the always-on-when-someone's-talking transmitter. They do that by use of a duplexer and/or antenna separation and polarization.

Your receiver may not be up to the job, but in any event, its antenna needs to be as far away from your transmitter antenna as possible. If the repeater signal is strong enough at your location, you might also try horizontal polarization for the scanner antenna. That can get you up to 20 dB isolation from the transmitter antenna, but will cost you that same 20 dB in strength of the repeater signal.

[message to all here] What amazes me is the shortsightedness of Republican voters. Even if one believes George Bush, Tom Ridge (head of Homeland Security), and others are absolute angels that would never abuse these powers, one should realize those powers have also been handed to Democrats and anyone else who manages to get themselves elected to office in the future. How will those people, and future Republican office holders, use those powers down the road? Can we ever be assured such massive powers will never be abused?

Sadly, Republican voters don't seem to realize this - which is why I use every opportunity to point it out (hopefully others will too). Bush, Tom Ridge, and others, are going to seek more powers in the future. They're certainly not going to stop now. If Bush will not stop this grab for power, he needs to be out of that office. The same with those in the House and Senate that voted to allow it. All Americans (Republicans, Democrats, and others) will be affected and all must join together to stop it. When that is finished, we can then work to roll back those powers (if successful, look for this in future candidates).

Even though they are different freqs? I'm transmitting on 146.400,
but listening on 147.00 (-600k offset). Is there anything I could do
to treat the symptom aside from keeping the antennas of the two units
far apart from each other? I wish I had a spectrum analyzer. I'd
love to see definitively what is happening to the spectrum when I
transmit. Maybe there is a way I can turn my old oscilloscope into a
spectrum analyzer. hmmmmmmm...

# 4601. Stuck??

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-02 18:27:49 UTC
From: Jerry Oxendine <joxendi@bellsouth.net>
Message-ID: <IP4zb.13450$5d.2243@bignews4.bellsouth.net>
Source record: 61121

This is not exactly Amateur Radio, but I thought I would run it by and see what you thought.

I know there are "odd" ducks on the internet, and every once in a while, one accidentally runs across a website that is perplexing to say the least. Yesterday, I ran across a website run by a Mr. "Sir Stuck Alot", and it is devoted
to becoming mired in the mud with both new and old pictures. Surely, some of these pictures showed people
hopeless bogged down and some of them in real predica-
ments. Some would make one wonder how they got into
such a fix, or why they were in that particular locale in the
first place. I mean, *most* reasonable people wouldn't
drive into creeks, rivers, bogs, snowbanks, etc.

When I was a child, we kids thought it was VERY funny
when our parents got stuck and we helped to push them with excited glee. The muddier, the better, the more stuck
we were, the funnier it was, and we were fascinated by spinning wheels. We would even contrive ways for people to stick up----such as jacking up a parent's car and putting a block under the wheel (good way to tear up a transmission, but we were 11 years and didn't know), or by putting a scooped-out watermelon rind under the
rear wheel. All so we could see Fred's '49 Ford spin a
bit until it wore out the rind and caught traction. Not to
mention the puzzled reaction of poor Fred who was wondering why his car wouldn't move on DRY ground.
Back in the '50s, side roads often were not paved and turned into seas of mud into which our school busses slid
and got stuck up; indeed, we grammar school kids would
rock back and forth trying to cause the thing to slide in the ditch. We LOVED to be late for school on such mornings! In the morning, to the smell of coal and hiss of
steam radiators, the principal would also announce over the PA, "The following busses are late on account of being stuck up (in a mudhole)". All this was great fun--
when you are a kid. We imitated cars with paper plates
(for steering wheels), and ran around the yard pretending we were stuck, gunning our "engines" and rocking our 'cars' back and forth (like Daddy did when he got mired).
We'd "push" each other, one of us resisting while the other leaned against the other with all his might, and making loud motor noises (Ung, Ung, Ung, UUUUUUNNH! and clashing his gears)--sort of a tug-of-war in reverse.
Sometimes, failing to unstick (move the stronger kid) the "car", another buddy would join in

and push with all HIS might--all while making all this racket (ungh, ungh, UNGH, UNNNNNNNNNGH!) as
if we were a 50 Chevy six-cyl! LOL!

Now. Most of us grew up, got licenses, drove cars, got
married, had kids, etc,go ham licenses, and forgot about childish play. We drove prudently (well, not always) except for the occasional burn-out or donut in the high school parking lot, and eventually forgot about being "stuck". Indeed, we avoided becoming stuck, going around mudholes, staying out of snowdrifts, and, well,
just not going where we figured we might not make it.

Perhaps the person that put up that website is grown, perhaps not (maybe still a kid) or, perhaps, an adult that is immature? As we get older, we (I hope) retain a sense of humor, but things such as being stuck up in the mud fails to invoke humor to me. I haven't gotten in such a fix
in YEARS because I'd like to think exercises caution and
maturity enough not to go into a place that might not be
"safe".

So, while it could be mild funny to see a friend bog down
in the mud or get stuck up in a snowdrift, is this website really telling me that there are people that never grow up?
The site strikes me as silly and very immature. Or am I
missing something here?

You may think it's a lot, but 600 kHz to an FM radio can be quite
close.

>Is there anything I could do to treat the symptom aside from keeping
>the antennas of the two units far apart from each other?

See my other response regarding antenna polarization and duplexers.
You could actually build a simple notch filter out of a piece of coax
and a T fitting. It's not going to be very deep, and it will be wider
(in terms of bandwidth) than a duplexer, but every dB helps in this
case.

>I wish I had a spectrum analyzer. I'd love to see definitively what is
>happening to the spectrum when I transmit.

Look at any transmitter product review in QST, especially HF gear.
Basically what you will see is a very high spike at the transmit
frequency, with progressively diminishing sidebands for several
hundred Hz either side of the carrier frequency. There will also be
some highly attenuated spikes at periodic intervals above and below
the carrier frequency.

>Maybe there is a way I can turn my old oscilloscope into a spectrum
>analyzer. hmmmmmmm...

Probably not.

Well I am finding it hard to understand why everyone is so full of bullshit comments, at the end of the day the new licence structure is here to stay, and it doesnt matter what you say on hear it aint gonna change it.

I also think that the new structure is the way forward, or at least a way forward, as it offers newcomers a way into the hobby and lets face it at the end of the day thats all it is A Hobby.

If the new licence system brings in cbers then so be it, I was on cb before I was on amateur radio and unlike most of you lot I am not afraid to admit it, I was also accused of being a pirate when I first got my G6 call (g6xpj).

The persecution of having a new series of call has obviously not faded since the 1980's, as it is still happeng today with the m3's.

Cheers Chris - G0TOO
Think of it this way, we are unprotected and if the number of licenced amatuershad dropped even more then we may have started to loose frequencies.

That's not true. The requirement to pass a Morse Test
was changed, so that those Class Bers who were not
really dedicated to Ham Radio, who were either too
stupid, too lazy, or both to tackle and pass the 12 WPM
Morse Test, can now go onto HF.

(This ne'er do well attitude is recognised by the authorities
who now issue a "Full" licence as oppose to a "Class A"
licence to disambiguate the real hams from the lazy good-for-nothings)

The Novice Licence, which was generally a good thing
has come and gone (NO, it wasn't the same as the Sick Licence)

At one time you needed separate licences for mobile operation
and TV; now you don't.

So, yer wrong. There is no guarantee that anything is here to stay,
and as changes have arisen as the result of discourse, the second
part of what you said below ain't right either.

You are so right and apart from the threads Brian Reay and the odd other contributor puts on here
that is the most sensible thing I have seen.

The norm on here are the pratts who consider themselves to be the "superior race" and know it all
but if you look at the odd technical type thread they put on they actually know very little.
Heard on 2mtrs conversation between two G?3 - Dont know anything about radios or antenas
would rely on mates to sort
Basic questions on set up that any CBer let along M3s would know
No knowledge whatsoever of PC set ups (relating to radio)

Now onto a more serious point, this is a facility that could be put to proper use. In Amateur Radio
there are two monthly magazines Practical Wireless & Radcom in which newcomers can read and
learn, this is quite unusual for any hobby to be so lacking.
Compared with lets say 15/20 years ago there is a big reduction in the number of traders who one
can pick up tips and info from.

There is however a large band of dedicated Radio Amateurs who have accepted the reducing numbers
and give their time freely to educate and enhance the hobby giving newcomers the opportunity to
enjoy Amateur Radio and progress through the hobby.
To them I say thank you to them for what they do and also the many who help and support newcomers
over the airwaves.
To the rest snobs, pratts or whatever that come on here - grow up, go away, you are not wanted

This is a Ham Radio NG, and the norm on here is qualified
Radio Hams participating in a technical pursuit; a technical
pursuit for which they wish the standards to be maintained.

However, there is no snobbery involved. All comers are
encouraged to make an effort to apply themselves to tackle
and then pass the RAE.

Only someone who was ignorant, and was stupid enough to
want to remain ignorant would perceive that the qualified Radio
Hams had a superiority complex.

Are you ignorant?

Do you wish to remain so?

As to knowing very little, a posting here is typical only a few lines
typed in quickly from the top of one's head. it is very rarely a
reasoned discourse of the sort that would be expected in a
_PROPER_ exam. As in verbal communication, the depth of
technical knowledge is revealed by ongoing snippets of
conversation. When you are introduced to someone who professes
expertise, he does not immediately launch into a 10-hour lecture that
reveals all that he knows in great depth!

Hi Alan,

The tubes you listed are typical of what would be found in a 1950-60's Ham shack. I didn't see any that I'd expect would be collectors items in and of themselves (I'm not a collector) but I'm sure they'd be of interest to guys and gals who use and restore older radios. These folks hang out on usenet at rec.radio.amateur.boatanchors --- you should post your list there.

Regards,

Hans, K0HB

></curious>

according to RVMJ it was being an SWL (apprentice)

and then you went for the RAE (with/without morse test)

of course b-licensees nowadays conveniently forget that before the
b-licence was invented it was THEORY AND MORSE TEST before you got
any licence

Judging by the way you try to put everyone down I would have said that your
comment describes you better than the people you use it against.

> > I was also accused of being a pirate when I first got my G6 call
>
> That probably says something about the quality of your operating, OM.

As it happens there is nothing wrong with my operating and as result of the
way I act both on air and in person with regards amateur radio I was voted
the President of Morecambe Bay Amateur Radio Society at the last AGM (and
before you try saying it, this post isnt voted for every year it is only
voted if the previous president is no longer able to hold the post), that is
the regard I am held in in my local club, I also run the Junksale website
www.junksale.co.uk which although has only 1169 registered members gets on
average 12500 hits a day, when you equate this to visitors clicking on
multiple links it works out at around 4000 individuals visiting the site a
day. I will also tell you as you are probably as ignorant to this fact as
you are in your replies on here, that the junksale website is an online
bring & buy site that is operated as a service to the amateur radio
community free of charge and on average costs me about £200 a year to keep
going. This is paid for out of my own pocket and is done in good spirit the
true nature of amateur radio, something which you obviously know nothing
about.

And whilst on the subject of operating, if your attitude towards other
amateurs on this newsgroup is anything to go by then I am glad I have never
had the misfortune to talk to you on the radio, as your operating must be
worse than the worst CBer ever was.

Uh, speaking of snow, the "nasty" weather service is predicting ice and snow
tonite! YUCK! I will remain
holed up downstairs next to my wood stove a-simmerin'
away.

Here in North Carolina, many folks up Naw'th think it doesn't snow here, but
in the Western part of NC it DOES snow and gets pretty darned cold, too.
This ice
and snow comes almost exactly at the same time of the one last year that
pulled down power lines and knocked down trees.

About the biggest snow I have heard of (about 2 hours
from here) was 5 feet with 18' drifts. A group from Michigan got stranded
on the Appalachain Trail and had
to be lifted out by 'copter. That was a few years ago.

I hope they miss this one.

Jerry

It was borne out by the official RA licence figures.

I've posted them on here in the past- do a google.

Go to rec.radio.scanner.flame_fest and ping a certain Mr. Davies,
N0VFP.

He fancied himself quite an expert on (among other things) the former
WB2OTK.

As another poster suggested, a google group search might yield some
informative results, also. Your search results might be enhanced if
you limit the search to rec.radaio and alt.radio .

First one question: Do the words "Made in China" appear anywhere
on this radio? If the product does have those '3 words' imprinted
anyplace on it, then quality control is out the window. The purpose of
Chinese electronics factories is to mass produce consumer goods
for the lowest cost on the planet. As a result, and as the old sage
goes: "You get exactly what you pay for". Remember when the
words "Made in Japan" and "Made in Hong Kong" was a subliminal
warning that the product so marked was of shoddy and/or cheap
manufacturer? This is what "Made in China" represents today.

Perhaps in a few Years with the importation of better tooling
materials, procedures, facilities this will go away. For now I would
avoid ANYTHING that runs off of electricity and comes from the PRC.
Take a look for example at all the product recalls listed at www.cpsc.gov
You will see that 70% of the items listed for recall came from China.

This should tell everyone something. Check those labels folks before
you trade your money for "new-in-the-box-JUNK".

# 4632. 22 echoirlp nodes installed by ian g0hlj

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-04 22:25:24 UTC
From: g3zhi@hotmail.com
Message-ID: <3fcf9899.991922@news.btinternet.com>

22 echoirlp nodes installed by ian g0hlj

hi all

so far ian g0hlj has installed 22 echoirlp nodes
they are all working fine

there has been no new irlp installs required due to a bad echoirlp
install by ian

adding echolink adds over 2,000 nodes/repeaters to your irlp box
which are located in many other parts of the world not covered by irlp

the installation is easy and takes about 15 mins

if requested your irlp node can be backed up first

echoirlp can be uninstalled or disabled if required

it is important though that as always if you are not sure what you
are doing please ask ian to change anything

echoirlp works great and i would hope to see every irlp node have
echolink added

as always if you have any questions please feel free to ask them

we welcome any questions here and all questions will be answered and
treated with respect

ian would be happy to inatall an echolink irlp node for you

please pass this information on

Yes, Kaito is one of a number of Chinese companies that have entered the
SW radio market in the past year. If the quality control curve of the
Grundig Satellit 800 (aka Tecsun Ham 2000) is any indication, it'll take
a few years to iron out all the QC bugs.

Howdy, Folks.

This weekend is quite active on the Amateur Radio bands. The ARRL 160-Meter Contest starts at 2200 on 5-XII-2003 UTC to 1600, 7-XII-2003 UTC, while the PSK Death Match starts at 0000, 6-XII-2003 and runs until 2400 7-XII-2003 on 80, 40, 20, 15, 10, and 6 meters. The TARA RTTY Melee runs from 0000 to 2400 on 6-XII-2003 on 80, 40, 20, 15, and 10 meters. There's also the TOPS Activity 80m Contest, which starts at 1800 on 6-XII-2003 and runs to 1800 on 7-XII-2003 in CW only on 80 meters. Finally, there's the QRP ARCI Holiday Spirits Homebrew Sprint that runs from 2000 to 2400 on 7-XII-2003 in CW mode only on 160, 80, 40, 20, 15, and 10 meters.

What is the propagation outlook on the High Frequency (HF) bands during this weekend?

Earlier, today (5-XII-2003 UTC), between 0100 and 0300, a weak shock wave was detected that indicated the arrival of the glancing blow from the coronal mass ejection from the prominence eruption on 2-XII-2003. The geomagnetic field activity increased to minor storm levels with a planetary K index reaching 6. Since, the geomagnetic field activity is remaining at the active (Kp of 5) level. After about 1200 UTC, the solar wind speed further increased, and the interplanetary magnetic field has remained moderately to strongly southward in its orientation. This will continue to keep the geomagnetic field active to somewhat stormy.

There has been no clear influence of the small coronal hole that is now situated moving closer to the western limb of the sun. However, another large coronal hole is moving into a position that will directly increase the solar wind speed and therefore possibly influence the geomagnetic activity starting today. This coronal hole, originally numbered CH66 and now numbered CH71 by Jan Alvestad, was geo-effective in previous 27-day solar cycles. The leading edge of the coronal hole is now at the central meridian. Soon, the solar wind speed will become even stronger, with the possibility of strongly negative (southward) interplanetary field orientation as this coronal hole moves fully into a geo-effective position.

The geomagnetic field is expected to be quiet to active on 6-XII-2003, increasing to minor storm levels, off and on, from 7-XII-2003 through 15-XII-2003. This will cause the highest HF

bands to become degraded and unreliable. At the same time, we don't expect much flare activity, so the middle to low HF bands will be in fair to good condition.

That means that conditions on HF this weekend will be fair to good for most of the contests and for general HF activity, except on the highest bands. Long distance low frequency HF, below 2 MHz, propagation along east-west paths over high and upper middle latitudes will remain poor, while propagation along long distance north-south paths will be fair. Above 2 MHz, to about 18 MHz, should be fair to good over most low- to mid-latitude paths, but somewhat degraded over the polar paths. Frequencies above 18 MHz will be degraded, with at least a fifteen-percent depression of normal maximum usable frequencies.

I will continue to monitor space weather and propagation conditions, reporting updates at http://prop.hfradio.org/ - the NW7US Live Propagation Center.

Happy DXing!

NOT USING YOUR ANTENNA ANYMORE?
IS YOUR RIG COLLECTING DUST?

LONG ISLAND MOBILE AMATEUR RADIO CLUB IS

LOOKING FOR DONATIONS OF AMATEUR RADIO GEAR FOR

EMERGENCY COMMUNICATION. WE ARE LOOKING FOR LOW

BAND YAGIS AND VERTICALS, RADIOS, TOWERS TO USE

FOR EMERGENCY COMMUNICATION AND FIELD DAY.

IF YOU DONATE SOME EQUIPMENT TO OUR CLUB, YOU WILL

GET A GENEROUS TAX LETTER, AND YOU'LL BE HELPING A

WORTHY CAUSE.

EMAIL AND LET US KNOW WHAT YOU HAVE!

THANKS IN ADVANCE

Amateur Radio Newsline(tm) Report 1373 - December 5, 2003

Closed Circuit Advisory

This is a closed-circuit advisory, and is not for re-transmission.
Repeat, not for broadcast.

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator. As we move into the holiday season, we ask that you include Newsline on your list of giving. This is the first request we've made since April, and we'll be back in the following weeks to thank everyone that helped in that campaign. But with support in the months since that campaign only averaging between $200 and $250, and with our normal monthly expenses of between $600 and $800 each month to bring you the latest news on Amateur Radio, you can see where the math is headed.

The address for the Newsline Support Fund is Newsline, PO Box 660937, Arcadia, CA 91066. If you missed that, it will be given again at the end of today's newscast. And now the latest news:

**

Amateur Radio Newsline report number 1373 with a release date of Friday, December 5, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. Hams in space fail to show up for a highly publicized operating event while hams on the ground save a life. Find out the details on Amateur Radio Newsline report number 1373 coming your way right now.

(Billboard Cart Here)

**

ON THE AIR: ISS ASTRO-HAMS A NO-SHOW FOR K6DUE COMMEMORATIVE EVENT.

What if you planned a party but your host never showed up to open the door and turn on the music. This is essentially what happened to the ARISS folks the weekend of November 29th and 30th in regard to the kickoff of its NA1SS special event tribute to the life of Roy Neal, K6DUE. But it was not completely unexpected. Amateur Radio Newsline's Norm Seeley, KI7UP, has the rest of the story:

---

The event was to get underway on Saturday, November 29th during as the space station passed over the US West Coast. ARISS International Chairman Frank Bauer, KA3HDO, says that Expedition 8 Commander Mike

Foale, KB5UAC, had even been supplied with a list of potentially good radio passes and the frequencies where to call the I-S-S had been published world wide a few weeks ago. Stations on the ground were even asked to keep their Q-S-O's as brief as possible so that the greatest number of hams possible could make contact with the space travelers.

And so it was that hams world wide were ready to honor K6DUE by making contact with the station in space that his years of effort helped to create. But over the entire weekend there were no reports of voice contacts with either Foale or his crewmate Alex Kaleri, U8MIR. Nor was the RS0ISS automated packet robot station activated either.

Why the crew was a no-show remains a mystery. Frank Bauer is certain that Foale knew about the event. In fact a message was received from KB5UAC that said he would try to be on the air for about 2 passes each weekend of December for the event. Bauer also received confirmation that final information regarding this past weekend was uplinked to the ISS crew on Friday, November 28th.

Bauer says that ARISS has discussed the situation with NASA. He says that there are two events that could have kept Foale from getting on the air. The first revolves around a broken exercise treadmill that KB5UAC reportedly spent a lot of his own time fixing this past weekend. The other is the widely reported crushing noise heard by the crew last week. It was in the aft end of the Service Module and its possible that the crew might have gotten instructions from the Russian team to determine the cause. This is being checked out.

Either way, Bauer reminds everyone that last weekend was only the kickoff and that the event commemorating K6DUE's contributions to manned ham radio space operations and that the event continues through the end of the month. He also says that ARISS will alert the ham radio community of potential opportunities for contacts as they become available.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, in Scottsdale, Arizona for the Amateur Radio Newsline.

--

It should be noted that when it made the original announcement several weeks ago, ARISS said that crew participation in the event was completely contingent on the schedule of the on-orbit duties and other issues that might crop up on board the orbiting space station. (ARISS)

**

RESCUE RADIO: LA HAMS ASSIST CARDIAC VICTIM

Ham radio has helped to save the life of one of its own. This, as members of a Southern California repeater respond to a users call for assistance. Amateur Radio Newsline's Mert Garlick, N6AWE, has the details:

--
Almost every ham has heard of the Los Angeles 147.435 MHz repeater. Some call it notorious. Others have given it the nickname of "the animal farm" for the lack of discipline of its users. But on Sunday night, November 23rd, some of the tarnish turned to silver as bad manners gave way to human kindness and a life was saved.

--
Elmer: "We were all sitting around and listening to the radio as we usually do in an evening. All of the sudden, an individual keyed up a microphone whom we were all aware was having some health problems. One of our listeners, Alan Sanchez, KC6QXA, immediately noticed the distress in this persons vloice. He keyed up the mic and asked if he was OK. He indicated he was having some difficulty breathing and needed help. So, Alan immediately called Faith Gonzales who said to call 911 immediately because she was also very familiar with thisd gentlemans health problems
--

That's Gary Elmer is KG6DVO. He recently took over the system. And according to Elmer, the work of his users did not end there. While medical aid was in route, Mike Stavropoulos, KD6JTD, headed over to where the stricken ham lives. He helped him get up, opened the security gate for the paramedics and directed them to the apartment. Mike then followed the ambulance to the hospital and filled medics in on the hams condition.

Later that evening, the hospitalized ham went into cardiac arrest. He was revived by his doctors. Had he been at home the chances are that he would now be a silent key now. Gary Elmer says that he is very proud of his users:

--

Elmer: "You know we like to tear it up and cut up, and have a good time. And you know that some people might of the fun we have. And yes, we have been in trouble with the FCC, but you know, when called upon, we too can rise to the occasion as evidenced by the actions of those three amateurs the other night."

--

As we go to air Elmer says that the ham is still in the hospital recovering. More important he is alive thanks to his friends on the Los Angeles 147.435 MHz repeater.

For the Amateur Radio Newsline, I'm Mert Garlick, N6AWE, also in the City of Angels.

--

In past years the Los Angeles 4-3-5 repeater has received a lot of negative press. This time the press is positive because this time it and its users probably saved a life. (ARNewsline(tm))

**

COORDINATION: REVISED SOCAL 2-METER BANDPLAN NEARING APPROVAL

Still in the Golden state, December 6th was the date set for a vote on a revised 2 Meter bandplan proposed by TASMA, Southern California's Two Meter Area Spectrum Management Association. Amateur Radio Newslines Bruce Tennant, K6PZW, gives us a sneak peak:

--

Among the problems the revised bandplan seeks to correct is recognition of the work of neighboring coordination councils. TASMA has always officially acknowledged the Northern Amateur Relay Council of California, but not those serving the states of Arizona and Nevada. California shares borders and R-F with those states and the revised TASMA bandplan will provide for such political recognition.

Also to be considered will be frequency assignments for specific modes and updating the recognized manned space operations listings. This to conform the Southern California bandplan with the world in relation to current Amateur Radio International Space Station operations.

This revised plan is the product of 2 years of hard work by the regional coordination body written with significant input from the areas Amateur Radio community. It already received a thorough public review at the 2003 ARRL Southwestern Division Convention last September.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

For more information please visit www.tasma.org. (TASMA, ARRL SW Commuinicator)

**

Break 1

We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W6JW repeater serving Santa Clarita California.

**

RESTRUCTURING - SOUTH AFRICA: PROPOSED CHANGES TO LICENSE REQUIREMENTS AND PRIVILEGES

Another nation has taken the first steps in restructuring its Amateur Radio service. We have this report on what South Africa has done so far in welcoming codefree operations:

--

South Africa is taking a look at how to handle the question of Morse code testing until such time as it goes away and it looks as if it has an answer. It comes in a proposal to lower the Morse requirement from 12 to 5 words per minute. That is until applicants for the South African Zed U license will no longer need be tested for proficiency in Morse code.

Also proposed is the introduction of a new license class with the callsign prefix ZT. This license will not have any Morse code requirement. Rather, the holders of ZT licenses would have full VHF privileges and will be permitted to transmit with a maximum power output of 100 W on portions of the 160, 80, 40 and 15 meter bands.

For the Amateur Radio Newsline, I'm Ken Locke, N8PJN.

--

This interim solution would hold in South Africa until a final disposition on the future of Morse testing is made by that nations telecommunications regulators. (Q-News)

**

THE VEC PROGRAM: NEW GENERAL CLASS QUESTION POOL RELEASED

If you are planning to take a United States General Class written exam after next July 1st or know someone who is, then listen up. On and after that date tests will be based on a new set of questions just released by the Question Pool Committee of the National Conference of Volunteer Examiner Coordinators.

According to a news release from the committee, changeinclude the number of questions increased to 432 and release pf the pool in both Microsoft Word and ASCII text formats with no graphic files. Look for the new questions in cyberspace at www.arrl.org/arrlvec/pools.html. (W4WW, NCVEC)

**

RADIO LAW: COMPLAINT LEVELS TO FCC RISE

The United States FCC has released a report on the inquiries and complaints processed by its Consumer & Governmental Affairs Bureau during the third quarter of 2003. According to the report complaint activity increased within all major areas except cable during the third quarter.

The largest increase occurred within Radio and Broadcasting where a total of 19,920 indecency and obscenity complaints were received. Complaint activity was also higher in all five top wireless categories, with the largest percentage increases coming in the service quality and equipment section. Its all in cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-241435A1.doc (CGC)

**

ENFORCEMENT: YET ANOTHER TOWER FINE

The fines for tower related violations continue. The latest is an $8000 fine issued to the Barinowski Investment Company, L P. Barinowski is the owner of a tower located near Savannah, Georgia. It was cited for failure to clean and repaint its antenna structure to maintain good visibility. (FCC)

**

EMERGING TECHNOLOGY: NET-BY-PHONE NOW PLAYS MP3

The HandiHams say that there is now an MP3 file playback feature on the Net-By-Phone service that allows blind users who do not own a computer to access the Internet. This, by using a plain old vanilla telephone.

By way of example, a Net-By-Phone user accessing a website like Amateur Radio Newsline that has a link to an MP3 file can hear that file over the phone by simply selecting it. The system does not play the file right away, but it will download the file in the background and send you an e-mail when it is ready. When you retrieve the e-mail, the file will automatically play, just as a voice e-mail from a Net-By-Phone customer plays automatically.

Net-By-Phone is located in Chicago and is a fee based subscription service. You can find out more on the web at www.net-by-phone.com or call the toll free demonstration line at 1-800-358-7858. (HandiHams)

**

HAM TRAINING: TRAIN THE TRAINER

49 youngsters are now licensed hams and are the newest members of Pennsylvania's Trinity High School Radio Club. This, thanks to a program called "Train the Trainer" by Pete Di Volpi, K3PD, a teacher named Sean Barnes, N3JQ and the Harrisburg Radio Amateurs Club V-E Team.

TheTrinity High School Radio Club operators station KB3JAG. Barnes started the radio club so lower classmen could get exposure to the hobby before they attend his physics class. He notes that the schools physics program and the principals of amateur radio teend to integrate very well.

The Harrisburg Radio Amateurs Club is a Special Services club in central Pennsylvania. It has only 100 members, but has seen over 100 new licensees produced in the last two years from their V-E and Train the Trainer programs. Teachers that are interested in Sean Barnes curriculum can e-mail him to SeanBarnesPolo@aol.com (W3UU, K3PD)

**

HAMFESTS AND CONVENTIONS: FT.TUTHILL BECOMES WILLIAMS HAMFEST

The Ft. Tuthill Arizona hamfest has changed its name, its location and its date. Now the Williams Hamfest and ARRL Arizona State Convention, this premiere event will be held next July 2nd to the 4th, at the Williams Rodeo Grounds, Williams Arizona.

According to a news release from Mark Keshauer, N7KKQ, the move means that the hamfest sponsors can provide lower fees for tailgaters and campers, bigger spaces, a fireworks display and free admission. Most important, the famed Saturday night B-B-Q which is a staple of this show -- will continue. Sorry, that's not free but is among the best feeds found at any hamfest in the United States.

More information is on-line at www.arca-az.org/arca/images/press%20release (N7KKQ)

**

HAMVENTION 2004: THE YEAR OF THE CONTACT

Hamvention planners have announced that the theme for 2004 will be the "Year of the Contact," and they are starting out by improving their own. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--
According to Hamvention General Chairman Gary Des Combes, N-8-E-M-O, his team has been making numerous changes to the shows web site, This, so that things like exhibits, general admission ticket sales and Flea Market spaces can be handled on line and the necessary forms simply downloaded.

And yes, we did say Flea Market rather than Outside Exhibits. As regular listeners know, a number of years ago the Hamvention made the name change to Outside Exhibits. Only one problem. The ham radio public never bought in to that new upscale title.

Hams have always referred to the Hamvention Flea Market as -- well -- the Flea Market. So, taking a cue from the many radio amateurs who have responded to the Hamvention request for input, show planners have gone back to the future. Des Combes says that as of now, the Flea Market is the Flea Market, once again.

Gary Des Combes tells Amateur Radio Newsline that this is only the first of a number of "Going Back to the Future" changes that the public has asked for and that they will get. In fact, "Going Back to the Future" will be a sub theme during Hamvention 2004.

The dates are next May 14th to the 16th. The location is the HARA Arena in Trotwood Ohio just outside the city of Dayton.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, reporting.

--

Lots more information is on-line at www.hamvention.org. (Hamventionr)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAMS HELPING: THE NORTH POLE NETWORK

The holiday season brings hams a great opportunity. What better way could there be to introduce hospitalized children and their families to the magic of Amateur Radio--and to spread holiday cheer--than to arrange to have Santa visit them via Amateur Radio? Newsline's Joe Moell, K0OV, tells us about the North Pole Network.

--

Kids at Childrens Hospital of Orange County get holiday visits from clowns, carolers, firemen, baseball players and rock stars. But nobody is more welcome and anticipated than the ten Amateur Radio operators who arrive on the weekend just before Christmas. They come to establish a special ham radio link that makes it possible for patients to talk directly to the "real" Santa in his office next to the big toy workshop at the North Pole.

Members of the Hospital Disaster Support Communications System have been visiting children and adults in Orange County hospitals for over 25 years, and we think there's no better way than this to spread holiday cheer while showing our hobby in the best possible light.

Will your club be part of the North Pole network this year? If so, we have some suggestions for you. For instance, personalize each QSO. It would be easy to just put the mike in front of a little girl and instruct her to tell Santa her name and where she lives. But imagine how much better the QSO will be if Santa calls her by name right from the start. He's Santa Claus, so he should know! Before each year's North Pole Network session begins, the hospital therapists provide our North Pole station with the list of names for every room and bed, along with plenty of other tidbits about the kids that make good conversation starters for Santa.

You'll find lots of other hints for your best North Pole Network ever at our group's special Web site. The URL is long, but you can get to it with one click from the Hospital Disaster Support Communications System site at www.hdscs.org

The most important hint we have for you is: Don't miss the miracles. Every year, we have had at least one extra-special encounter that astonished families, staff and the hams. In a Santa QSO, children have spoken for the first time following brain trauma. Fevers have broken shortly after North Pole Network visits. A head injury patient started

to eat after being encouraged to do so by Santa, and so forth. We don't know exactly how much the personal contact with Father Christmas has aided in patients' recoveries, but we are always grateful that our hobby can add a little joy and holiday spirit to patients and their families.

Again, the Web spot to visit is HDSCS.org, short for Hospital Disaster Support Communications System. From southern California, this is Joe Moell Kay-zero-Oscar-Victor for Amateur Radio Newsline.

--

More on this and other ham radio holiday activities in the coming weeks. (K0OV, ARNewsline(tm))

**

INTERNATIONAL - AUSTRALIA: VK2BVS HONORED BY VK PRIME MINISTER

Australia's Prime Minister John Howard and Foreign Minister Alexander Downer expresses gratitude for Australian ham radio training in developing countries. This, by way of a certificate sent to Sam Voron VK2BVS in which the Australian Government expresses its gratitude to Voron for a valued contribution towards assisting developing countries to reduce poverty and achieve sustainable development.

The honor was bestowed on Voron for the six months he spent in Somalia where he organized an Amateur Radio training course. In addition to Howard and Downer, the certificate was signed by Dr. Brendan Nelson who is a member of Australia's Parliamentary House of Representatives. (QRZ.COM)

**

INTERNATIONAL - SWEDEN: NEW PAN-EUROPEN TV SHOW ON ITS WAY

Ham radio in Europe will soon have a TV show of its own. Jeramy Boot, G4NJH, is in Nottingham, the UK, with the rest of the story:

--
The Swedish-based 'Club-TV' wishes to establish a monthly amateur radio magazine programme to be transmitted via digital satellite TV to most of Europe. Club-TV wants to cover all aspects of amateur radio and thinks there is a number of amateurs around Europe who can handle a video camera and edit the result.

Videos of 10 to 20 minutes would be perfect. There is no cost involved other than the tape as the broadcasts receive commercial sponsorship.

During the past year Club-TV has carried out a number of tests and broadcast a couple of programmes. The transmission is via the Sirius 2 satellite at 5 degrees East with a Symbol Rate of 6667 and FEC 1/2.

Jeramy boot, G4NJH.

--

Jeramy says that inquiries go to Ben Jockert, SM6CKU, by e-mail to sm6cku@parabolic.se. (GB2RS)

**

ON THE AIR: NEW VHF/UHF PROPAGATION BEACONS NEAR ATLANTA

Back in the United States, Gary Bailey, WA4IOB, invites VHF operators to listen for his new 2 meter and 70 centimeter beacons. The transmitter are located in grid E M 73 near Snellville, Georgia about 25 miles east of Atlanta. The mode is CW on 144.285 MHz and 432.352 MHz with 2 watts output on each band. The 2 meter transmitter feeds a horizontal square loop. The 70-centimeter antenna is 4 half wave dipoles in a 90-degree horizontal quadrature configuration feedwith a 4-way power splitter. Both sign the call B B B W-A-4-I-O-B slash E M 73. Signal reports go to grb734@bellsouth.net (VHF Reflector)

**

DX

In D-X, LA5RIA will be active as JW5RIA from Bear Island until June of JW5RIA will operate on 160 to 6 metres CW, SSB and digital modes. Q-S-L as directed on the air. (RSGB)

Also, eight American operators are active from Christmas Island, East Kiribati, until the 7th of December. Call signs to listen for are T32MP, T32WW, and several others on all bands using all modes. They will have three stations with amplifiers and a large selection of antennas to pipe their signals worldwide. (RSGB)

**

THAT FINAL ITEM: A KILLER RENEWAL

And finally this week, the story of a ham who might have a hard time attending a license renewal hearing. Thats because he is in jail. Amateur Radio Newsline's Don Wilbanks, AE5DW, has more:

--

According to the ARRL Letter, the FCC has issued an Order to Show Cause to a Texas ham who is currently serving a 32-year prison sentence for the 1996 murder of his wife. The order released November 21st is the governments opening salvo in a hearing process that could end with the revocation of the Advanced class license of Roger Thomas Scaggs, W-5-E-B-C.

The FCC says that Scaggs' murder conviction raises very serious questions as to whether he possesses the requisite character qualifications to remain a Commission licensee. It also causes the agency to question whether his license should be revoked.

Scaggs is 64. He apparently was able to renew his ham ticket in the spring of 1998. This is the same year in which he was later convicted of murdering his wife. The FCC granted Scaggs' application for an

administrative update. In this case, apparently a change of address from Austin to Gatesville, Texas.

The FCC only recently became aware of Scaggs' murder conviction, which could keep him behind bars at least until he's 75. Assuming that Scaggs indicates that he will appear for or be represented at a formal hearing, the FCC will follow up with a Hearing Designation Order.

The session itself will be held before an Administrative Law Judge and would consider evidence concerning the effect of Scaggs' felony conviction on his qualifications to remain an FCC licensee. If no action is taken Scaggs license will next expire in 2008.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW, in New Orleans.

--

Scaggs was given the customary 30 days to let the FCC know whether he plans to appear at the hearing. (ARRL)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Meachen, ZL2BHF, saying 73 and we thank you for listening. Amateur Radio Newsline(tm) is Copyright 2003. All rights reserved.

That's an urban legend; no one except the United States Treasury HAS to
accept cash.

See http://www.snopes.com/business/money/pennies.asp and the link to the
US Treasury FAQ at the bottom of the page.

Tell you what, the first son of a bitch who turns down my cash for a payment rendered will be called on for it. I'll take that all the way to the f*#cking supreme court. CURRENCY (CASH to those who don't know what it is) has always been an accepted form of payment and if it is ever refused, then we have a MAJOR problem. AND AGAIN, NOT EVERYONE HAS CREDIT TO USE ANYTHING OTHER THAN CASH! SOME MAY NEVER HAVE CREDIT. G.W.

Tell you what, go into just about any convience store or fast food restaurant
and try to pay with a $100 bill, then try to buy something with any form
of cash from Amazon.com.

Good luck in court.

BTW, you are correct that cash has always been an accepted form of payment,
at least since it was established. It however, has never been mandatory that
anyone other than the government accept it.

Legally, it is totally up to the seller what form of payment is valid
unless there is some sort of contract between buyer and seller.

Since you include so many posting from so many different individuals it
is difficult to determine just who you commenting to.
Name me some hams who would like to have 11 meters back.

He/she/it just got out of diapers (the 'poopy butt' gives it away), and
dosen't know much about the Internet yet.

This may somewhat contradict my reply before but I understand why "large" bills aren't welcomed. They should have it posted. I did go past a bar/lounge today which had a sign saying "NO $50 OR $1OO Bills accepted, no exceptions". At least one is forewarned. Places do not like to keep large amounts of cash on hand even for change. That is understandable. I don't either - in my business. Though I don't post such warnings and it would make me cringe to have to scramble for change, I WOULD. I never turn down cash. I STILL think they would have to take it, if that was ALL you had. I'd welcome that argument in court. CURRENCY IS CURRENCY, regardless the denomination. I HIGHLY DOUBT, if you went in a place for a meal and produced a $100 bill, they would just let you leave because it was a $100 bill. They'd take it and scrounge up the change. TRY IT. Calling the cops to report you for having a large bill? Hardly a crime. It isn't as though you're trying to leave with out paying.
Yes, I'd love to see that end up in court some time. Why - to turn down cash of any denomination is as bad as trying to cast aside the amendments this country was founded on.. After all, currency was established as a way to pay debts. It has been around almost as long as the Bill of Rights itself, if not longer.

As to buying from Amazon.Com, that is a moot point. You don't do CASH transactions like that via online sales. That isn't even an argument. The only way "cash" comes into a picture there which is a false use of the word, is to give them your debit card numbers to withdraw funds right from your account.. CASH - PREPAID, all are being intertwined now days. Sorry, I still disagree. MANY DO NOT HAVE CREDIT AND CASH WILL STILL BE THE ONLY WAY!
You're thinking too much of bible prophecy and 666. It isn't that bad - YET.
G.W.

An after thought. I have seen establishments who have accepted large bills
and had no proper change - make out a check to the party in the amount owed
them. Therefore that party producing the large bill then had the burden to
go get it cashed to redeem his/ her change from it. The other thing is,
though it is becoming a common practice not to accept large bills or cash at
all in some places, it still does NOT outlaw the use of cash if that is the
only manner one has to pay their debts. CASH WILL LIVE.
ON in society for quite some time. Those without credit will still be at a
disadvantage in some ways, but they learn to deal with it. I've been without
and with credit and it makes no difference to me. You live within your means
and surroundings. G.W.

I really coundn't give a hoot.
I do not subscribe to cable TV as
what the is broadcast over the RF
is fine by me and my rabbit ear TV
works OK. Don't need no goddam
cell-phone either. If they won' leave
a message for me on my POTS
answering machine, they can go screw
em'selves. I'll spring for ISP but as
soon as they start charging for e-mail
and/or it costs more than $12 per
month then they too can go pound sand
up their bung too with the Comcast.

I still can't get over all the complaints and
beefs that people have with FCC! Nobody is
making you buy a cell-phone subscription or
buy cable TV. Why just not DO WITHOUT them
as I do, and be happy as a clam and have
a few extra sheckels at the end of the month
left over as a result of not having them!

FCC can give the airwaves back to the Indians
for all I care. There will always be something on
broadcast radio or TV. If not the newspaper
and/or a book an my stock of Chivas Regal
by the fireplace is always ready...

: ) : ) : ) : )

"Bob the Bignose" <6003goths@juno.com> aint finished yet folks!

I nearly forgot!

Go here: http://www.aprilwinchell.com/multimedia/

This is the Audio Blog file for April Winchell's fantastic
web page. (April Winchell is the daughter of the great
Paul Winchell of Jerry Mahoney and Knucklehead Smith
fame)

On this page you can find very rare downloadable
mp3's of the Singing Chickens "Jingle Bells", Mary
Schneider's Yodeling Classics, horrible xian music
like "Joggin for Jesus" and "Menstruation is God's
Plan", as well as "Down by The River Drive".....

She has a very amusing and clever program on
KABC 790 Los Angeles. Baby Boomers like myself will
remember very well the amusing antics of Paul W.
April is just as funny and carries on the tradition.

A Must see. (Much more amusing than 3.947 on
a Saturday night when propagation carries the
odoriferous emissions out West.

Sorry currency doesn't work the way you want.

The way it works is defined in section 392 of Title 31 of the United States
Code.

Go argue with the US code, not me.

I have no idea what bible prophecy you are talking about nor do I have
any interest in such.

> and surroundings. G.W.

To summerize once again, the code basically says that the manner of settling
debts between private parties is entirely up to the parties involved.

The US code neither demands nor forbids cash transactions in any form
or denomination of currency.

It is perfectly legal (though rather dumb) to open a car dealship with
a big sign out front stating that payment is only accepted in the form
of supermarket money orders. And it is perfectly legal for the dealer to
repossess a car for nonpayment if someone tries to pay with anything other
than supermarket money orders.

It makes no difference what either of us thinks or wants the system to
be; it is defined in the US code.

Read the friggin' US code.

And, at the top of the list is the song "Keep your restrooms clean, men"
from the RED LION gasoline company. While I've never heard this
wonderful song during the many hours I've passed listening to shortwave
radio station WINB of RED LION, Pennsylvania, I'd like to think it's a
product of a collaboration of the Reverends Norris & McIntyre. To my
ear they're in a league with Lennon & McCartney, Bacharach & David and
Gershwin & Gershwin.

Mine is only eight miles away for recumbent mobile, KA6SQD, here in Star
Valley on western border of Wyoming. A good heart and muscle exercising
pedal from Etna to Thayne and back on BikeE.

Unfortunately, Federal Reserve Notes only BUY DEBT. Ask any federal reserve attorney. Though they are liars, they cannot wiggle out of that issue. Only gold an/or silver coin PAY debt. Paper is intrinsically worth only what it may be exchanged for and has no particular value in and of itself. Why do you think prices for goods and services continually rise? Couldn't happen with gold and silver so easily.

That which doesn't PAY debt may only be used to "buy" debt!

Federal Reserve Notes are not money but only a medium of exchange which may be exchanged to acquire debt. Not my words but those of law!

Up til mid-60s or so, all U.S. citizens [now serfs-in-feudal-tenure] had opportunity to pay debt with coin or paper redeemable in coin. Paper now only redeemable in more worthless paper that does not and can not pay debt.

ITZ THE LAW!!

You wouldn't have it any other way, would you now? Or would you defy "your" government?

Ya know, you got a point there. The Dollar HAS taken a dip in recent years in comparison to say the Yen and maybe some others. SO in that case, the dollar wasn't worth the paper it was written on... OR made from. Gold and Silver COULD lose value, it has happened, but not quite as likely. G.W.

Try it at FEDERAL EXPRESS SOME TIME!!

There are numerous businesses that no longer accept cash.
You can't force them to!

That's a good starter list of "trolls" for anyone's kill-file. "Stagger Lee" made it to mine some time ago, though.

Thanks!

Paper , gold, silver, or any other thing is only worth what you can get someone to give you something for it. Face it, what can most people do with a bar of silver or gold ? About the same as they can with a piece of paper that is printed on. If it was food atleast you could eat it. Do you remember about 20 years ago when silver took off in price. YOu could get about $ 1.50 for a silver dime but only a dime for the clad ones. Now what can you get for the same silver dime ? Much less . Unless it is a 'rare' collector dime. Anything is just a way of trading your services or items you have for something someone else has. It is only worth whatever ammount of whatever you want that someone else has and what they are willing to give you for it.

US Code, Title 31, Subtitile IV, Chapter 51, Subchapter I, Sec. 5103:

"United States coins and currency (including Federal reserve notes and
circulating notes of Federal reserve banks and national banks) are legal
tender for all debts, public charges, taxes, and dues. Foreign gold or
silver coins are not legal tender for debts"

You need to get out of the bunker more often...

The US went off the gold standard in 1933. If that was the cause of the
dip in the value of the dollar versus the Yen, it sure took a while to
happen.

I'm NOT claiming to be a GENIUS - ASS HOLE. I'm merely saying I defy anyone to deny me goods when I present cash as payment. CASH is a method of payment and if that is all I have, then I don't believe they can deny me the use of it in paying my debts. Speaking of geniuses, you're not so freaking bright either.. Your title speaks well for itself - GAS. YA BIG FART! Blow it out your ass.

Though I didn't cite the example you're referring to in this case, if there
was a Fed Ex office near me, I'd give em a run for the money. Unfortunately
there isn't. NOR do I deal with them much. G.W.

Also doing a google search and checking the original headers on the authors
and addresses he posted produces results showing the troll assuming the
identity of someone that dared to oppose him and then trolling groups,
giving the immpression that the person that was complaining about the troll,
is the actual troll himself.

What problem?

Seeing as how the system has been basically the same for 2 centuries, there doesn't seem to be any problem out there other than in your imagination.

If you have cash, you can open a checking or savings account and get a debit card for those businesses that require plastic payment.

You can go to most supermarkets or a post office and get a money order.

If you choose not to, that's your choice. No discrimination by anyone other than you.

Funny, I was told by an attorney that if cash is offered and refused in
payment of a debt, the debt is considered paid! Cash having been refused,
the debt is no longer collectable. Where is it in the law that Cash is not
acceptable for all debts public and private?

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, W2CE, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N5FG, N5XZ, W5XC, K8YSE, KU9C, 9V1DX, DL/VE3ZIK & www.contesting.info, DL1EK/DL7VOA & DX Newsletter, F5CQ, F5CWU & La Gazette du DX, F5NQL & UFT, G3VMW, I1JQJ/IK1ADH & 425 DX News, JF1LZQ/ JQ2GYU, JI6KVR & JA-IOTA Islands News, JL1UXH, LU3XQ, LU6XTA, M3NJW, OM3JW, OZ4ACK, PP5MQ, VA3RJ & ICPO and VE3EXY for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 30th/November, through Sunday, 7th/December there were 245 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4U1U, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9U, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C9, CE, CE0A, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FR/j, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/m, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH8, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, S2, S5, S7, S9, SM, SP, SU, SV, SV5, SV9, T2, T31, T32, T33, T7, T9, TA, TF, TG, TI, TK, TL, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9C, VK9N, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, XW, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

** IMPORTANT NOTICE ** (ATTENTION WEB MASTERS AND INFORMATION CONTRIBUTORS). Over the past few weeks there have been some changes to the bulletin on the header and on the final credits. The BARF-80 BBS public phone line

is no longer available, and the OPDX FAX number has been changed. I have noticed that some Web pages have not yet changed the information. So, Web masters "PLEASE" change your Web pages to the new header and the final credits. Contributors, please notice that OPDX has done away with the VOICE answering machine and now has a NEW fax number to send information. OPDX's new F A X number is: 1-419-828-7791 ( F A X only! )
Thank you for taking note of these changes..... 73 de Tedd KB8NW

3D2, FIJI (Also, T30). Reports indicate that Hrane, YT1AD, is on the move again and heading to Fiji to team-up with Boban, YZ1AU, to operate in the ARRL 10 Meter Contest this weekend. Reportedly, Boban is already there. Their activity outside of the contest will be on 80-6 meters. The duo has one license already available to them (3D2AD), while the other one will be applied for upon arrival (possibly 3D2YU). Following their ARRL Contest operation, they plan to go to West Kiribati (T30). Their callsigns are unknown at this time. LAST MINUTE UPDATE/CHANGE: Boban, YZ1AU, is now operating as 3D2AD. The station on Fiji is fully operational, and will be there for ARRL 10 Meter Contest next weekend. The callsign, 3D2YU, is expected shortly. Meanwhile, Hrane (alone) is moving to West Kiribati (T30) on Tuesday and will be operating from there during the contest.

4L6, GEORGIA. Shota, 4L6AM, will be active in the ARRL 10-Meter Contest (December 13-14th) as a Single-Op SSB entry. QSL via the address on QRZ.com.

4W, TIMOR LESTE. Michal, OM2AQ, is now active as 4W2AQ from Timor Leste (East Timor) until December 18th. Steve, OM3JW, suggests/states to look for him everyday at 0900z on 28480 kHz. However, we spotted Michal on 15 meters on 21299 kHz between 1130-1330z. QSL via OM2AQ.

9V0 & VP8, ANTARCTICA. Alan, 9V1DX (aka VK0LD and ex-VK0MM Macquarie Island 2000), informs OPDX that he will be active from a temporary base camp in the remote Ellsworth Mountains in the Antarctic interior (approx. 2000 km due South of Peter First Island). He is there supporting a team of scientists and mountainteers climbing Mt. Vinson (highest mountain in the Antartic) from approx. December 15th to around January 10th (exact dates depend on the weather for the long, non-commercial flight in & out). His old callsign VP8PJ has been re-issued for life by the Falkland Islands Govt., and he will use it exclusively on PSK-31. The Singapore licencing authority has also issued him the special callsign 9V0A which he will use for CW and SSB. Alan will be as active as his work schedule permits. QSL route will be announced later. For more details, please visit the following two Web pages at: http://www.sarts.org.sg
http://www.geocities.com/vk0ld/2003.html

D2, ANGOLA. Ed Giorgadze, 4L4FN (aka P5/4L4FN), is now active as D2PFN. Activity will be on SSB and RTTY. He was spotted this past weekend on 15 meters RTTY (on around 21080 kHz between 1430-2030z) and SSB (on 21235 kHz after 1000z). QSL Manager is Bruce Paige, KK5DO. More information and an on-line log will be available on Paige's Web site at: http://www.amsatnet.com (click on D2 Angola)

CO8, CUBA. Raul, CO8ZZ, who was active in this past weekend's ARRL 160m Contest, states he will be active in this weekend's ARRL 10m Contest (December 13-14th) as a Single-Op/CW only/Low Power entry. QSL for both contests are via DK1WI.

E3, ERITREA (2004 DXpedition Cancelled!). Steve Wilson, G3VMW, has sadly informed the Northern Ohio DX Association (NODXA) and OPDX that he will be writing to all their sponsors very soon to advise them of the current situation in Eritrea. He states: "We have been told very recently by the Eritrean PTT that 'ALL amateur radio operation in Eritrea is temporarily suspended and that we should not be optimistic about a radio licence in February.' As you can imagine, we were devastated by this news and it has taken a couple of weeks to find out why the ban on amateur radio has happened. One of our crew has been in Eritrea for three weeks trying to sort out a licence and the place is crawling with UN staff. There is an ongoing border dispute between Eritrea and Ethiopia about a contested village, which may easily erupt into a full-blown war once again. The situation is very serious and the UN is trying to avert another war. All personal communications, including the GSM Cellfone system have been turned off. No amateur radio will be allowed in the foreseeable future. Regrettably, I have no choice but to cancel our planned operation for February 2004 and return all our sponsor's money. I would not be right to hang on to money that has been sent in good faith indefinitely in the hope that the situation might change. We may get the OK to proceed later in 2004, but there is no guarantee and we are faced with looking at an alternative location. I will return your check (NODXA's) and advise all our other sponsors in the next few days. You are the first group I have informed and it hurts!"

EY8, TAJIKISTAN. Nodir, EY8MM, will be active in the CQ 160 Meter CW Contest (January 24-25th) as a Single-Op entry. QSL via K1BV.

FO/A, AUSTRAL ISLANDS. By the time you read this, Vladimir, UA4WHX, will be finishing up his FO/AC4LN/m operation to Marquesas Islands (QRT December 9th) and will move on to Rurutu Island in the Austral Islands (IOTA OC-050) between December 10-12th. He will probably sign FO/AC4LN/a. He seems to favor 40 and 30 meters CW (There was some SSB reported on 40m). QSL to his home callsign.

HI9, DOMINICAN REPUBLIC. William, N7OU, will be active as N7OU/HI9 in the ARRL DX CW Contest (February 21-22nd) as Single-Op/All Band/Low Power entry. QSL via N7OU.

IOTA NEWS.....
AS-043. Osamu, JR1EEU, will be active from Aoga Shima Island (JIIA-AS-043-001) until March 2004. He plans to be active on the HF bands. QSL via direct or via bureau.

EU-109. Nigel, M3NJW, informs OPDX that the North Wakefield Radio Club will be operating under the callsign GX4NOK/P from the Island of Inner Farne (EU-109), off the northeast coast of England, April 17-18th, 2004. This is a rare opportunity, as the island is a National Trust bird sanctuary. Operation

will be on multiple bands/modes, and information will be
posted on the days of operation at: http://www.g4nok.org

OC-137
OC-171. Steve, G0UIH, is expected to be active again as VK2IAY/4
possibly from Dunk Island (OC-171) starting around December
9th for 5 days and Lamb Island (OC-137), December 16-18th.
QSL via G0UIH either direct or through the Bureau.

SA-027. To celebate the 500th anniversary of the discovery of the
Island of Sao Francisco do Sul, look for the special callsign
ZW5SF to be activated between December 15th and January 15th.
Activity will be on all HF bands CW/SSB. QSL via PP5CIT.

KH2, GUAM. Setsu, JL1UXH/KK2H, and his XYL Maki, 7L4FSR, will be again
on the air from Guam from December 16-23rd as KK2H/KH2. Setsu will focus
on working Europe and USA East Coast stations. He will be active on all
HF bands on CW and SSB. Online logs will be available during the operation
and will be updated on a daily basis at: http://kk2h.4th.jp
QSL via JL1UXH either via the JA Bureau or direct to his JA callsign.
Please do not send anything to the U.S. address of KK2H. All the direct
QSLs for the last November operation of KK2H/KH2 have been answered. The
bureau cards will be sent in the early part of 2004 in order to wait for
some more direct requests. Also, the log has been uploaded to the LoTW
(Logbook of The World) and already 38 QSOs have been matched out of 2,500
contacts.

PY0, FERNANDO DE NORONHA. Tony, PY0FT, will be active from December
15-26th. No bands or modes of activity were provided (Last year he was
active mainly on the digital modes). QSL via JA1ELY.

QSL INFO AND NEWS.............
The "ARRL Letter" reports this week that the ARRL's "Logbook of the
World" (LoTW) secure contact-verification database continues to grow.
So far, reports ARRL Membership Services Manager Wayne Mills, N7NG,
nearly 5000 users have uploaded logs containing some 25.4 million
Amateur Radio contacts. This has resulted in more than 1 million QSL
records. Signing up as a new LoTW user is simple. Visit the Logbook
of The World and read the "Getting Started" document, Mills said. He
advises new users to print it out to have the instructions handy. The
Web site is: http://www.arrl.org/lotw

BQ9P QSL STATUS. Steve, KU9C, informed the DX community this past
week that he should be seeing cards from the printer late this week for
BQ9P 2003. He has gotten the labels printed for cards received as of
December 4th. Steve guesses he will have most in the mail before the
end of the year or in the first week or two of 2004. PLEASE NOTE: Those
who chose to use the BQ9P envelope to include other cards that Steve
is QSL Manager for will likely be delayed.

Radio Club Ushuaia (LU8XW) in Ushuaia, on the Island of Tierra del
Fuego in Argentina, has designated Patrick Stoddard, WD9EWK, as their

new QSL Manager. The entries on the QRZ.com and Buckmaster for LU8XW now show WD9EWK as the QSL Manager, and the information for WD9EWK is correct at those Web sites as well as in the Radio Amateur Callbook since 1997. WD9EWK is also the QSL Manager for the special callsign, AY8XW, that was used in 2002. More QSL information by WD9EWK is also available at: http://qsl.wd9ewk.net/

NO LONGER A PIRATE. Mogens, OZ4ACK, informs OPDX that the callsign OZ9TR (former pirate according to some official databases) is now a legal station and is allowed to work on UHF/VHF and 6m.

QSL MANAGER CHANGE. QSL HB0/HB9LEY via JA1LZR. The QSL Manager used to be JH1BSE, but he had been SK. Please do not send any QSL requests to HB0/HB9LEY.

CLOSING THE LOGBOOK. Joe, JA1LZR, has finished replying to all QSL requests for the VP2V/N2AIR operation in 1984, and states he will not answer any more requests.

Ulli, DL5MBY, announces that the JY8YB online log has been updated to include QSOs up to December 2, 2003 (1210z - Also CQWWDX-CW Contest). You also can check on the status of your JY8YB, JY9QJ and JY8B QSOs on the online log at: http://www.qsl.net/dl5mby
There is also information available about QSLing.

TO4, EUROPA. The Europa T04E team is still active despite the rumor stating they are QRT. It is only a rumor, and they are expected to be active until December 16th. The team was a little tired during the first part of the week because of their participation in the CQWW DX CW Contest. Many have complained about the teams operating schedule. They want everyone to know that their activity would not be possible without the help of the French Army, and they must respect their order while on the island. Also, the generators on the island are under the control of the Military. The team does have a new operating schedule: 0600-0700z and 1515-1945z (They are trying to increase the length or split these periods.) The 5 operators are trying to have 4 stations active as much as possible during their operating times. A report (dated December 5th) from Rafik, F5CQ, states: "Since their arrival on the island, the team has completed 15300 QSOs with TO4E callsign: 5800 on SSB, 7700 on CW, 1800 on RTTY, 6 on 50 MHz (with ZS), plus 4000 contacts during the CW CQ WW Contest, as TO4WW." INTERESTING NOTE: Rafik, F5CQ, also reports that protected sea turtles have been a nuisance for the TO4E operation. Lowband antennas are installed on the beach, and each night the turtles knock them over and destroy the radials on their way from the ocean to the top of the beach to rest during the night. This means the team must then repair and reinstall the antenna systems on a daily basis. The Europa Web site is: http://europa2003.free.fr

TT8, CHAD. Allen, N5XZ, informs OPDX that it has take about a month after his arrival to receive a license in hand. However, he has received the callsign TT8XZ, thanks to the efforts of Dennis Carter, KE3TD, and Christian Berdjugin, TT8CB. He now has a HF radio in his room, but as of yet, no antenna. He is still working on that. They are going to try to set up a

mobile antenna on a mast with some radials. Allen will be on HF SSB only because the Motorola radio lent to him by the Security Manager, Christian, TT8CB, only has SSB. It will do CW with an accessory that they do not have. Allen told OPDX that if he comes back next year, he will be there longer and probably bring his IC-706, a keyer and maybe some sort of antenna. Keep your fingers crossed! He also mentioned that he is going to try real hard to spend at least a few hours in the 10 meter contest. Allen will be in Chad until December 19th. QSL via N5XZ.

VK DROPS CW AND CELEBRATES WITH QSO PARTY. On New Year's Day, Australian radio amateurs will gain access to the High Frequency (HF) bands using licenses that don't require the passing of Morse code telegraphy tests. The Wireless Institute of Australia (WIA) invites the world's amateur radio fraternity to join an on-air celebration of this special occasion. To celebrate the event, there will be a "WIA Welcome to HF QSO Party" beginning at 0001 Australian Eastern Daylight Time and conclude at 2400 UTC on New Year's Day - a total of 35 hours. The VK radio amateurs appearing on HF bands for the first time can be identified by three-letter VK callsign suffixes that begin with the letters H, T, U, X, Y and Z. Also, WIA amateur stations will be on air to join the HF QSO Party, and these stations will have a two-letter callsign suffixes "WI" or three letter suffixes starting with "WI." Listen for the call "CQ WIA Welcome to HF QSO Party".

VK9C, COCOS KEELING ISLAND. Look for Ken, JA1CMD (N4XJ), to be active as VK9CA from December 28th to January 2nd. Activity will be on 80-10 meters CW/SSB using only a 100 watts. QSL via JA1CMD or K4ST.

VK9L, LORD HOWE ISLAND. Look for Mark, VK2GND, to be active as VK9LD from December 25-31st. Suggested frequencies are (on or around): 14273 and 14195 kHz. QSL via VK2GND.

VK0, HEARD ISLAND. Reports indicate that Jim, VK9NS, is reporting that a "scientific multi-interest team of fifteen expeditioners" is preparing to leave for Heard Island in the coming days. Jim does not know if there is an amateur radio operator with this team. He also mentioned that there are plans to visit Heard Island on a regular basis every three year to study the island. Jim also mentioned that it has been 21 years since the HIDXA group has been to Heard Island (ed. WOW, has it been that long. Boy am I getting old fast!).

XU7, CAMBODIA. Peter, NO2R, informs the DX community that he will be active from Hiroo's (XU7ACY) shack in Sihanoukville, Cambodia, the first week of Februay 2004. He states he will be concentrating his activity on 160 meters. Meanwhile, Dick, N6FF, is now active as XU7ACB from here. However, Dick has lost his Kenwood transceiver which had a full set of CW filters and is now using an IC-706 which has NO CW FILTERS. He had to makeup an interface cable for the IC-706, and must key the amplifier separately with a foot switch. He should be active on the low bands. Dick will try to alternate between 80 and 160 meters every other day. On the higher bands you will find him on CW or RTTY, as time permits.

ALAS, someone with some sense! I've been told the same and thus my argument
of they must accept my cash if that is all I have to make payment of a debt.
THANK YOU! G.W.

On the dollar bill I just retrieved from my wallet, it clearly says,
"this note is legal tender for all debts public and private".

There might be some disclaimer about small change. Not for sure but I
think there is a maximum amount of say, pennies, a person is required to
accept.

> acceptable for all debts public and private?

The law says the Treasury HAS to accept cash, but private transactions
are up to the parties involved.

You can pay your $10,000 Federal Income tax bill in pennies and the
Treasury HAS to accept it.

Before anyone brings up the old legend about pennies, the Coinage Act of
1965 specified that all U.S. coins are legal tender in any amount.

In lieu of a contract or notice, cash is concidered acceptable by default
and offers of cash genrally must be accepted in payment of a debt.

If your apartment rental contract says only postal money orders are valid
for payment, the landlord can refuse to accept cash or anything other
than a postal money order.

If a business has a big sign that says certain forms of payment are unacceptable (i.e. bills larger than $20), the business has no legal obligation to accept such.

If you sign up for a cell phone plan that says the bill will be payed through a debit to your credit card, the phone company has no legal obligation to accept anything other than a credit card payment.

So this asshole cop pulls me over today and starts asking me why I have a scanner in my car. I tell him it's a hobby and that NJ state scanner law states that having a scanner in your vehicle is not illegal unless it's used for commiting a crime or evading police. Which is true. It's says so right here:

http://www.siscanner.8m.com/laws.html

and here:

http://www.maxpages.com/frequencies/NJ_Laws

and here:

http://www.fordyce.org/scanning/scanning_info/nj-laws.html

That wasn't good enough for that asshole, so after he writes me for not having a seat belt on, he tells me that the "NJ scanner law stuff is hogwash" and that unless I'm a tow truck driver, EMT, fire fighter....(insert own bullshit) that I can't have it in my car and that he has 30 days to decide if he wants to charge me with the crime of having it in my car.

What should I do? I know for a fact that it's not illegal and this asshole harrassed me just cuz he was bored i suppose.

That's a shame.

Well, the first thing to do is wait thirty days so you won't have two charges to defend (bogus or not, it will take up your time if he's provoked into filing the charge).

After that, my suggestion would be to ask your local District Attorney for an opinion on your radio (he'll appreciate the links, or better yet-- a hard copy), and get his favorable reply in writing. (You may end up with an Assistant DA, but they will accommodate you if you persist.)

Keep the letter with your insurance certificate and registration handy in your glove compartment, just in case you forget to buckle-up again.

Have you tried to open a checking account lately? If you don't have
an active credit history banks refuse to give you a checking account. It
took me two years to find a place to get a checking account because I
paid cash for my truck, and the loan on my home is from a relative,
because the interest on his CDs was lower than what I am paying. There
as absolutely nothing in my credit history right now, and I can't even
change banks because I can't find another bank who will let me open a
checking account.

Not so. I walked into a bank in Smalltown, Ohio (First Merit) and
opened a checking account in a matter of minutes with nothing more than
the driver's license I could have pulled out of my turban.
They didn't even ask about other credit lines. I haven't paid a "credit
line" in two or three decades.

You're dealing with the wrong banks.

You must have used a DEBIT card. They won't accept a Discover for one.

I don't think a DISCOVER card counts on wide acceptance but I think it
says on the door here that they accept it.

I checked with every bank in the area. Florida has a big problem with
illegal aliens and with identity theft, so they are overly cautious. I
had to have a savings account with my credit union for over two years
before they finally agreed to the checking account, and on did it
because I had a large savings account. A lot of banks down here won't
let you open a savings account with less than $500 for the first
deposit.

Well, what do you expect from someone so fucking stupid that he can live with
himself for enforcing seatbelt laws? Victimless crimes should be abolished.
The "people" enforcing such laws are robots, not human beings.

I'm in Puerto Rico and I think we have SFla beat for illegal aliens and fraud. After all, we provide you guys with these scamps. Even still, in the local bank (theres only one in this town) they only required cursory identity. They made an issue of my Social Security number since I lost the actual card 30 years ago (I've already told that story) but they accepted a copy of an old tax return that showed my SS number. My wife, an immigrant, had no SS number at the time so they just put her down as 999-99-9999 on the joint account.
I suspect you haven't been to ALL the banks in your area or else you are walking in the door blabbing about Credit Unions and such and telling

them things they don't want to know.
"had to have a savings account with my credit union for over two years".
Shop around, dude.
If you need a credit card or something I'll gladly forward my spam to
you and you can have a whole box full of credit cards with "no
obligation". I get these g*&#%dam things in the mail regularly from
banks I've never heard of and I use them for grain filler scrapers on
old radio cabinets.
You're doing something wrong, Michael A.

My PO will.

But if you have plastic, that kind of implies you have a checking account,
so why would you need a money order?

Get a copy of the New Jersey Police Manual. They are approx. $30.00 from http://www.gannlaw.com/

If you can't the prosecutor (NJ does not use the term District Attorney) is obligated to let you use his /hers in your defense. You should just be able to quote the state statute.

The cop was probably trying to just give you a hard time figuring you don't know the law. I doubt the officer will pursue this further.

> in my car.
>
> What should I do? I know for a fact that it's not illegal and this asshole
> harrassed me just cuz he was bored i suppose.

First off: Please wear your seat belt. Consistently. The life you
save may be your own.

Second: If the cop tries to charge you, take him to court, and
provide the judge with a copy of the New Jersey State Codes of Criminal
Justice, sections 2C:33-21 and 2C:33-22. Between these two sections, the
law clearly states that it is only illegal to have a scanner in your car
IF you are committing a crime, or preparing to commit a crime.

Since the judge will have no evidence that you were going to do
either, your friendly neighborhood cop will end up with egg on his face,
as it were.

In the future, though, I would strongly recommend that you carry a
hardcopy of both law code sections with you, as well as a copy of your
amateur radio license (if you have one). Oh, and try to be as polite as
possible, even if the cop in question is being a jerk. They're human
too, and you have no idea what kind of day they've had.

Good luck.

<biting tongue>

This message is being posted to ham radio and scanning newsgroups.
I will not pollute them with political debates or diatribes, and I would
ask, as one Internet user and ham radio op to another, that you avoid
doing so as well.

In short, please trim down your signature block. Six lines is
considered the max according to widely-adopted Usenet and E-mail

guidelines.

If you have more to say than signature space will allow (and it
certainly looks like you do), please start a web site for it.

I was not saying the gold price dipped and created the drop in value of our dollar to the yen. I apologize if I ran the thought together. I was addressing two issues someone else had raised, at once. I was merely saying that gold and silver HAD been known to dip in price, so even it can't be relied on to be "Rock solid" in price. As to the dollar - I was trying to say when it dipped in value to the Yen a few years back, that would be similar to saying it wasn't worth the paper it was written on or produced on. I forget how far down we were from the yen, but it did happen. If memory serves me correct, that is when the Ham radios shot up in price. Since the dollar balanced out to the Yen, I wonder if they have adjusted the prices of Japanese equipment accordingly? G.W.

Ah, our PO accepts plastic for Money Orders. Why get a MO with plastic? EASY... To pay for an e-bay purchase when the seller isn't set up for pay pal and can't accept plastic. AND so he can get the cash and you don't have to wait for them to get the check cleared. I realize it doesn't take long now days to clear, but they still use the excuse, so I circumvent it with a MO. I did it just this past week. Situations like that! G.W.

As a matter of fact, yes. I opened a checking account on an LLC I formed
without the ink even being dry on the paper work, much less with a credit
history.

I had a checking account, credit cards, and a credit history by the time
I was 18 by the simple expedient of finding a small store that carried
it's own credit, buying something cheap and paying it off early.

Opening a checking or savings account takes little more than a SSN and
cash to start the account.

First, speak with some lawyers and the prosecutor/district attorney. If you find you are in the right, then I would see if it's legal for you to record everything. File a complaint against the cop and if they call you, record what they say. They could come and lock you up, and then you could end up with a nice nest egg.

No one can say a law is "hogwash". Police don't make laws. I wouldn't do anything if I were you. There's nothing he can do either.

Thats a silly argument. You can easily have a credit card with no
checking account.
Why I would need a Money Order is basically due to internet sellers who
won't take personal checks or online payments.

And we can thank Mr. Reagan for blackmailing the states in a similar fashion to raise the drinking age to 21.. I'm not certain that Carter had anything much to do with the federal seatbelt mandate, but he had his own boondoggles.. the 55mph speed limit, the banning of decorative gaslights, etc. during the Arab oil embargo, and our own oil companies claiming we were dangerously short on reserves so that they could gouge us at the pumps (at least Carter's Attorney General made them give some of it back in the form of free gas).

Doesn't matter anyway which party pushes this stuff.... it's BS. The federal government has been strongarming states to do their bidding for years.. wonder what the next unfunded mandate will be??

GW, stop talking about things that you don't know about and you won't
have to back-pedal so much.
What the devil are you talking about the "dollar balanced out to the
yen" and gold prices?
Compare a few graphs available on the internet and get your story
straight then report back.
Sheesh,

-Billstein

Well I sure hope that it's Log Periodic antennas (a whole set of em!) for every short-wave DXer out there.

And the big chunk of property to put 'em on too. And of course maintainence will be done at the cost of the taxp..... er... Government too!

Hey, that works for me. Every time I drive onto Kunsan AB and see the huge
log periodic antenna they have there, I get all envious..

True, NJ /is/ a police state. Took a road trip a couple of years ago,
drove almost 6000 miles around the midwest and northwest USA, saw
maybe three speed traps the whole time. On the final leg through NJ
heading back into NYC, counted over TWENTY speed traps. And those are
just the ones that didn't bother hiding.

And remember, NJ is one of those places where DWB is a felony offense.
(Driving While Black, for the uninitiated).

I've boycotted New Jersey.

Pick up your scanner and move somewhere that the police don't act like
stormtroopers.

And they will plant dope in your car if your not nice to them.
I refuse to drive in the state with New York plates.
Yeas ago I was stopped on the Palisades Pkwy in Alpine for a tire presser test.
The cop said the tires have to much wear and said: "you cant drive garbage through the streets here"
They impounded my 68 Chevy van and slashed the 2 front tires, handed me an unsafe vehicle ticket and told me start walking ......waiving nightsticks

face it, gold and other metals do rise and fall in price. maybe not much,
but they do. the dollar DID dip pretty low to the yen a few years ago. that
is a fact. i know it. i don't have to look it up. maybe you need to do
research. it doesn't matter. it is old stuff anyway. not worth arguing
about. G.W.

What the DA thinks doesn't matter. See FCC ruling 93-17, which dealt with amateur radio equipment which could RX public safety frequencies. Once the feds rule, local jurisdictions don't have a choice.

> Keep the letter with your insurance certificate and registration handy in

> The "people" enforcing such laws are robots, not human beings.

Since when is that a "victimless" crime? Jerk not wearing a seat-belt gets involved in an accident (his fault or not; doesn't matter) - and sues the other driver for the aggravation of his injuries (which could have been avoided or certainly lessened if a seat belt had been worn). Insurance company raises rates on ALL customers due to the litigation (even if their insured is not at fault - because of the "general statistics" of more serious accidents in the area).

Unless you can show me that ONLY the rates of the non-seat-belt-wearer are affected, then there are victims other than the perp. of your "victimless" crime....

It didn't happen anywhere, this whole thread is based on a bogus story that
showed up in April.

It's troll bait. The OP even includes himself in the his moron list,
reread the original message.

The OP is just a cross-posting dumbass sheep shagger who has a hardon for
some of the radio groups.

Search google groups using this criteria: asshole cop group:*.scanner

Let's get real and stop the BS. The police are not going to lock anyone up for having a scanner in their vehicle of not having the belt on. That's the most stupid thing I have read.

You most likely was stopped to for NOT being buckled up. Most states require some other violation before they can use the belt laws. The scanner was just an after thought when the officer seen it. The majority of police (citizens) know nothing about radio/scanner laws. It's not a hobby like fishing or motorcycling etc..

What you DDM should do is stop being a nut and start being polite, just like you would expect be to done to you. The newsgroups are not the place to ask legal questions in the first place. As was stated, get a copy of the scanner laws and show the officer, that could help him/her in their duties and help keep the heat off off of you and someone else in the future.

The "55" came from Nixon. You remember him and watergate.

"ONE" term Carter was a boondoggle.

Carter needed the FREE gas to cook his peanuts.

10-4 on the unfunded mandateed laws from the Feds. They make laws that
the states are required to enforce but fail to fund them.

Brenda Ann wrote:

I'm pretty sure that the basic stuff for remote control of all Kenwoods
are the same.

You can download any of the later Kenwood manuals from www.kenwood.net
and look in the appendix for the details of how to send and receive data
to/from a Kenwood. Try this one:
http://www.kenwood.net/?do=SupportFileCategory&FileCatID=5
and download the one for the TS-2000_Rve2.pdf (near the bottom of the page).

All the best, 73,
Dave

# 4785. Crackdown on radio owners & users

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-08 21:49:03 UTC
From: abc@123.con
Message-ID: <3fd5f05f.6525162@news.alt.net>
Source record: 60855
Cross-posted to: rec.radio.scanner,rec.radio.amateur.misc,rec.radio.shortwave

I've been reading this NG, along with several others. Lately, we have read about a ham arrested in Indiana for having a mobile rig. We now read that Michigan is close to passing a law requiring police permission to carry mobile radio gear, with a proposed penalty of a year in jail for violation. I also seem to recall something about a county in NY having recently issued a rule against mobile operating.

Are these connected? Has the possession / use of mobile radio equipment been targeted for repression, in a similar manner as the possession of firearms?

I don't like the trend I've been seeing in the U. S. The place is rapidly becoming less and less "free". Liberties I have taken for granted all my life are being chipped away, state by state.

I suppose the problem is that the possession of mobile radio equipment (like the possession of firearms) gives a person some "power" of which the government is afraid. It is indeed unfortunate that the people are now so feared and mistrusted by their own government.

I don't have the answers, but I am alarmed. I think we all need to wake up to what is happening in the land of the free and the home of the brave. It's not pretty.

Mandatory insurance is also fascism, and the government should be paying for
everyone's health care anyway -- they're not doing anything else useful with the
taxes they take from us.

Not sure about all mobile radios? but here in Michigan if one wishes to have
a scanner in the vehicle and they are not a licensed radio amateur they must
obtain a permit from the Michigan State Police. It's been that way for a
long time.

Source record: 60861

heres some info from the 146.640 website www.the64machine.org

net meeting times as of 12/8/2003
The 146.64 Repeater Nets

Monday 8:00 PM Computer Tech Net Shoen, KG4YMB.
the computer tech net could use alot of improvement, when a rare checkin occurs that actually has a problem, shoen thinks he's the only one that can answer questions on problems, if he doesnot know, he will say i dont know, NEXT CHECK IN>>>>> without asking if anyone else on the repeater has an answer.
most of the time people just check in with no traffic on the tech net.

Tuesday 8:30 PM Skywarn Net Sponsored by Sean, KG4YZZ.
dont listen to it, no comment

Wednesday 8:00 PM Hump Day Net Sponsored by Mike, W4MDW
mike runs a great net! mike did an excelent job of running the calling channel for the 640 field day 2003 he was very dedicated and stayed up well over 12 hours guideing people in. his famous saying was "SPARKLING DOWNTOWN STARKEY PARK" must have said it 200 times during field day.

Thursday 9:00 PM News line & 9:30 PM This week an ham Chris, KE4YDH
chris runs a great net

Friday 8:00 PM TGIF Net Sponsored by Don, KG4COQ.
don runs an excelent net.

Saturday 9:00 PM Traders Net sponsored by Bobby, KE4YFJ.
bobby runs an excelent net

Sunday 8:00 PM Trivia Net Sponsored by Shannon, N0JAM.
shannon runs an excelent net

Everyday Code practice at 10 AM and 7:30 PM daily
thanks ron for running the code practice.

SB-221 (relist)

FS: Heathkit SB-221. No Mods Soft output 3-500Z tubes (Will need to be replaced). Recently gone through by experienced HAM Amp-builder and all components tested/replaced (as req) with new components. New faceplate (original had some lettering worn off. Cleaned all bandswitch contacts last week. Reason for selling: Moving to a new solid-state amp. SB-221: $295.00 (OBO) Shipping $33.00. Copy of manual.
Extra HV Board $27.00 (I ship)

Thanks, Joe KF5KF (Good QRZ) 228 388 4814

# 4798. converting a VHF micor for ham use

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-09 05:34:54 UTC
From: jackofalltrades2001@hotmail.com
Message-ID: <b6ef7950.0312082134.7c8a0ddc@posting.google.com>
Source record: 60868

from the page
http://www.repeater-builder.com/rbtip/sensitronRX.html

Modification of Micor "Sensitron" High-Band 150.8 - 162 mc. Receiver
RF & IF Board for use in 2 meter ham band.
by Kevin K. Custer W3KKC
Re-written August 19 2000, May 5 2002, and again on October 13 2002
because of coil availability.

Concept: To modify a TLD4073, TLD5273, TLD5773, or TLD8273 high-band receiver for use in the 2 meter ham band. Please read through the entire article before attempting the conversion. You may also be interested in reading a Comprehensive Description of the Micor Sensitron high-band receiver.

Background Theory: The Micor 150.8 to 162 MHz. high-band receiver is the most common unit you will find in the used/surplus market. These receivers were built in the day when most radio systems had only one or two channels of operation. They were designed to be highly selective from the standpoint of both the front-end and I-F stages, and were made to operate on a narrow portion of the spectrum. Parts for this type of equipment were specified to purposely limit the tuning range. This allowed for more precise tuning and better stability from both a mechanical and electrical view. Channels were usually paired close together so the receiver would operate without reduction in sensitivity as it was greatly reduced when trying to receive more than a few hundred kilohertz from where the receiver was tuned. Referring to the manual and parts list shows the intended tuning ranges and the parts associated with them. The "Comprehensive Description" link above provides more in-depth theory on how the receiver operates, and its tuning ranges.

There are several different approaches of modifying the Micor receivers named above for ham band use. One acceptable solution I found is to change the 150.8 to 174 MHz. preselector coils to the ones that are intended to tune the ham band. Placing longer or larger tuning screws into the helical casting creates two problems. First, the width of the bandpass is greater due to 'pulling' the high band coil to resonance. Second, insertion loss is greater than if the correct coils were placed in the casting. These two things are (in my opinion) unacceptable in duplex repeater service, especially on two meters. Research was done on pulling and other methods of making the 150.8 to 174 MHz casting tune the ham band. Go Here to view the research.

Modification Description: You'll need to replace the old 150.8 - 174 mc. coils with ones that tune the 132 - 150.8 mc. range. These are available from me, kust click on the helical resonator ordering instructions link below. From the factory, all 5 coils are identical except for the two end coils have wires soldered to them. Since you are converting an existing casting, just salvage the wires from the old end coils and solder them to the new ones at exactly the same place from the grounded end. This ensures the correct impedance point for the coils.

Helical Resonator Casting/Coil Ordering Instructions Click to purchase new 132 - 150.8 mc. preselector coils or have the author convert your casting to two meters. There are some options to choose from.

The capacitors in the oscillator multiplier need changed to insure these circuits properly tune the 2 meter ham band. Instructions are given below for their replacement.

Modification of Helical Resonator Casting: Remove the "sensitron" receiver "RF & IF" board, from the radio set. Remove the RF preselector casting, by unplugging the small black wire on the output end , and removing the 12 screws securing the casting to the circuit board. Remove the 12 screws that hold the cover on the preselector. Now remove the 5 helical coils by taking out the 2 screws holding each resonator coil, and by unsoldering the input connection from the input coil [leave the little wire connected to the input connector, just unsolder it form the coil.] The use of a quality thin wall 7/32" nut driver will make removal of the screws less difficult. Unsolder or break the coil ground end connections with a pair of needle nose pliers. The output coil has a small wire connected to it that passes through a hole in the casting. This is the output connection of the filter assembly that goes to the mixer. Simply unthread the wire out of the casting then unsolder the wire from the coil and save it for installation on one of the new coils.

Modification of RF - IF board: 150.8 - 162 model receivers will require the changing of some capacitors in the oscillator/multiplier section. Change C 108 to a 27 pf., C 109 to a 47 pf., C 110, to a 100 pf. (if already 100 pf and this stage still doesn't tune, make C 110 an 80 pf.), and C 113, and C 116 to 7.5 pF. It is helpful to do these changes with the helical casting and all 5 aluminum coil shields in the area removed to gain access to the capacitors. Refer to the images below:

Go here for component and shield locations:
Coil Shields.
Component Locations.

Reassembly: Start the reassembly of the casting by installing the salvaged wire from the old output coil by soldering it to one of the new ones at exactly the same point from the grounded end with a soldering gun or large enough pencil. This ensures the correct

impedance point for the coil. Install the new resonator coils by inserting the two screws into the coil base and then carefully dropping the coil, with screws down, into the casting. This makes it easier to start the screws. Install the output coil first by threading the wire back through the hole in the side of the casting and securing the two hold down screws. Install the rest of the coils by securing the screws first then make sure the coils are centered inside each chamber and solder the grounded end of all of the coils to the casting. A propane torch is handy when soldering the grounded end of the resonators to the casting. I use a pencil torch as it works well for this. Let the casting cool so you can handle it. Next, solder the input wire to the input coil at exactly the same point it was attached to the old coil, insuring that the little wire doesn't short out against the casting. Finish by reinstalling the tin cover and place the completed casting back onto the receiver printed circuit board by securing all screws. Be careful not to over tighten the casting screws as the printed circuit board is easily damaged.

Tune the receiver as per the Motorola manual. No other modification's will be necessary for the above receivers to perform as specified in the manual when tuned to the 2 meter ham band unless you are using the optional AFC plug-in module. If using the AFC plug-in module with the appropriate channel element, reverse the polarity of diodes CR103, and CR104 in crystal discriminator portion of the demodulator. These diodes are very fragile and it is difficult to remove them without damaging them. Some people have had success in simply cutting the diodes from the board, turning them and tack soldering then back in place. If you are not using the AFC option (most likely) there is no need to reverse the diodes as this would be as useless as reversing the polarity of the speaker leads on a monophonic radio.

Crystals, for the receive channel element (K1005), can be purchased for the ham band from Jan Crystals at 1-800-JAN-XTAL
Complete channel elements on your frequency can be obtained from International Crystal Mfg.

I just borrowed a friend scanner to listen to. It is a Radio Shack Pro-51. I think that I have the bug and I want one of my own. I am a newbie here so I need advice from people who are experts, which is why I came here. I have read through a lot of posts here and a lot of the talk is over my head. I know that I will want a scanner that has capabilities that I may not need now but I will want in the future when I am more experienced. Here are the features that I would like to have:

1. Must be portable.
2. I want all the "action channels" whatever that really means. Police, fire, aircraft, etc....
3. I want a unit that I won't have to replace 6 months after I find out I want another feature or 2.
4. I want the most MHz coverage that I can legally get here in the US. I am not interested in cellular stuff, seems boring to me hearing about susies sore toe at school today or what the family wants from Hop Sings Chinese place for dinner.
5. I want weather info.
6. If possible I would like to be able to hear FM and AM radio. Please don't make fun if this is not possible to do.
7. What does "trunking" mean? I live in West Virginia and I am not sure that they use such a thing but I would hate to spend money on a scanner and find out that they were going to use it and not be able to get it in the future.
8. Do I need software to hook it to my computer? Seems unnecessary to me.
9. The most features that I can get for the money.
10. Limit of $350.00 new, I would be interested in a good used model from a reputable place or seller.

I know that is a lot of questions to ask here, but I am hoping that I have not overdone it. I figure that it is the best way to find out anyway, if you don't know you have to ask.
The 2 models that have been recommended to me are the Radio Shack Pro-92 (I think, it is the one with trunking and is $349.99) and the Bearcat BC-3000 XLT. When I look at the specs for each of them the Radio shack frequency list has ranges of frequencies and the Bearcat just lists an entire range that is covered. Such as the Bearcat lists 25-550 & 760-1300 MHz, while the Radio Shack model has basically the same coverage but has them chopped up and eliminates small portions of the range. Should I be concerned about that in the Radio Shack model? Is there anything in that range that Radio Shack cuts out that I will miss?
Any help that you all can give me here will be put to good use. If you have opinions on the ones I have listed then please let me know. If you have others that foot the bill or you think would be good for me then help me out

on that too.

Thank you for your time and help.

Another example of the Great Dumbing Down of America.

The world is methodically being dumbed down by government efforts to protect us from stupid people.

Stupid drivers don't recognize the dangers of speed, so they drive too fast and kill themselves. The government regulates speed, so now more stupid people survive.

Stupid automobile passengers get killed because they don't buckle their seat belts. Government steps in and makes seat belt usage mandatory, so now more stupid people survive.

Stupid pedestrians don't know enough to not step out into a busy street, so they get injured and killed trying to cross the street. The government makes laws giving them the right-of-way, so now more stupid people survive.

Stupid parents don't recognize the value of childhood inoculations. The government makes them vaccinate their children before entering school, so now more stupid people survive.

Stupid hams don't know enough to keep their fingers out of 3KV plate transformers, so they get fried in their own juice. Some would have the government protect them, and more stupid people would survive.

In the ways of Mother Nature, stupidity was kept in check because stupid people generally didn't survive to breeding age, thus our species tended to get smarter over time.

But stupidity begets stupidity, so we are being overwhelmed by a tsunami of stupidity. The tsunami is triggered by the government protection of stupid people, which allows them to survive to reproduce.

Ergo, less government regulations makes a smarter populace.

That's news to me. Last Micor of ANY kind I saw was back around
2000 at the Mike & Key ARC swap meet, and that was a UHF unit.

As for Micor parts: Good luck. Motorola stopped making them nearly
seven years ago. They're good radios, and the article is still relevant,
but it's a bit dated.

I understand that one can't rent a car without giving a credit
card number! I've asked several rental agencies 'just for the
hell of it' and they all responded that way! Terry.

On one occasion I had cash (including coin) refused as payment.
I was under the same impression; that a seller had to accept
'Coin of the realm/Standard Currency/Treasury Bills' whatever you
want to call it! So I asked our BBB (Canada).
They advised that was not so. Any offer to sell and buy is an
agreement/contract (conditions of sale) between the seller and
the buyer.
If the seller asks that payment be only in denominations of five
dollar bills or by cheque etc. that is one of the terms of the
agreement. So if I buy an old radio and the seller says "No bills
smaller than 20s, I want $200 by Thursday next week etc. and you
get it out of here by Saturday next week ...." they are all
'Conditions of Sale'.
Terry.

"RARA was founded to meet the needs of the gay/lesbian community. Our
purpose, as defined in the RARA Constitution is as follows:

To promote the Amateur Radio Service
To foster friendship and goodwill
To offer benefits, support and a sense of community to all individuals
who are supportive of sexual minorities and their lifestyles, and who
share a common interest in Amateur Radio."

Great, gay amateur radio operators.

Gays, they wish to integrate with society by segregating themselves.

Makes sense to me (not!). They are ruining the English language by
identifying common words with their causes. One would believe that the
"Rainbow Coalition" was gay blacks, but it's not.

A local situation developed in which a woman referred to the perpetrator
as colored. The host on the news intimated that the woman was racist
since she use the term colored. Colored was in common usage at one time,
so one would expect older people to use it. It was supplanted by "people
of color".

"People of color" is the correct usage for "colored people", but one
usage is regarded as racist, one isn't.

The adulteration of the English language continues.

Dr. Artaud

Most people aren't willing to be this honest. But it is true -- nature
prunes itself, everywhere from the old branches on that oak tree in your
backyard, to the newly-hatched turtle who can't make it to the shoreline
before the seagull eats him up.

It's sad but true. And as usual, humans are trying to change the way
nature works.

My guess is that the dinosaurs tried that once.

ONCE.

> All I need to know about you I learned from reading:
>

All I need to know is that a mongoloid like yourself is unable to refute his own idiocy and therefore must post the same shit no one cared about the first 100 times you posted it.

Remember what Gielda said though.

"Actually this one is beyond a troll. Excessive morphing and posting substantively identical articles. Granted each one is a news story, but the articles contain only text from news stories and if the user wants that posted he should post it as links all in a single post rather than as 20 separate posts each just containing a news story. It's a slightly gray issue of BI, but we decided that it was abusive if continued and because it is gray warned our user first."

/steve

"Yes we do consider this abuse and warned this user about a week ago, if this user is continuing beyond that warning, this account is history. I've asked my abuse desk to investigate if the user continued beyond the warning."

/steve

You posting that "All I need to know about you" crap over and over again is gonna do you in because it's exactly what Mr. Gielda means when he says "posting substantively identical articles". Caputo is being informed. When he warns you to knock your shit off like Gielda did, maybe you'll run to news.admin.net-abuse.usenet and whine to him about how crooked he is because he put you in your place.

Look at the baby whine. Just follow this link and then read through the entire thread. Our little maggot troll boy is "Choir Boy" in this one.

http://groups.google.com/groups?hl=en&lr=&ie=UTF-8&oe=UTF-8&safe=off&threadm=3fcbebe1.1180870752%40pita.alt.net&rnum=34&prev=/groups%3Fq%3DGielda%2Bgroup:news.admin.net-abuse.usenet%26start%3D30%26hl%3Den%26lr%3D%26ie%3DUTF-8%26oe%3DUTF-8%26safe%3Doff%26scoring%3Dd%26selm%3D3fcbebe1.1180870752%2540pita.alt.net%26rnum%3D34

God damn. Someone give that man a Pampers.

Any of you cute radio guys willing to help a girl out?

I am considering purchasing a Uniden BCT-7 for use in my vehicles when traveling. I am also considering using a CB. I am wondering if anyone has any experience with this unit. I am wondering which antenna parts I will need to make it work properly. Will a simple magnet mount antenna do the trick? Can I use the same antenna for both the CB and the scanner or will I need an antenna for each.

Join now, only $15 a year

>>

Further info on this, he posted the same as "RedXIII" in
rec.radio.scanner on April 22, 2003 (probably a cross post).
Link is:

http://groups.google.com/groups?hl=en&lr=&ie=UTF-8&frame=right&rnum=&thl=
0,1083608724,1083589878

A click on the link in his sig

(http://mywebpages.comcast.net/RedXIII1/Info.html)

provided enlightenng, yet crude, info that RedXIII is just a troll. This
link verifies this.

The actual page text says: "You're all a bunch of f***ing losers that
are being duped by the REC.RADIO TROLL!!!! F**K OFF!!!"

How much more more do we need to realize every bit of the original
post is troll fodder?
Gosh.

> Membership is only $15 a year.
>
> http://www.rara.org/

Hmmmmm..... The subject says "everyone" please join, as if this
is some group oriented toward inclusiveness; however, the stated purpose
(via the link Kevin provided) says it's only for "...all individuals who
are supportive of sexual minorities and their lifestyles.....".
Not very inclusive, is it?
Would you like to know who belongs to this group before you
consider joining? Sorry, not possible, according to the website: "The
roster is confidential and distribution outside of the membership is
prohibited." So, they'll take your membership money, but you can't find
out who else is a member until you join, and then, you have to keep those
names a secret. Just what we didn't need, another secret society.
Even Kevin's email address provided in the post is bogus. I would
imagine that anonymous posts to join secret societies would go without
mnay positive reponses.
This might explain why though claim they've been around for almost
9 years, and haven't been able to recruit but 100 members.

Of course, it could be they HAVEN'T been around for 9 years. This
post (again by Kevin) claims he's TRYING TO START an amateur radio club
for gays:

http://groups.google.com/groups?q=%22kevin+souter%22&hl=en&lr=&ie=UTF-8
&oe=UTF-8&selm=3ff20de2.145179266%40oryyfbhqu.arq&rnum=7

this link having today's date, 12/10/03. So, has it been around 9
years, is it getting started today, or is he just starting something to
compete with rara? The post referenced above narrows the membership
topic even more: "just gay Amateur radio talk".

Maybe, just maybe, he's just a troll???????????????

Some of us older hams don't hear as well as we used to, and shouting
makes it easier for us.

Even on the internet.

And now, for the hearing impaired:

SOME OF US OLDER HAMS DON'T HEAR AS WELL AS WE USED TO, AND SHOUTING
MAKES IT EASIER FOR US.

(Apologies to Garrett Morris, SNL)

I have a good condition 9/10 cosmetically, 10/10 functionally. With whip rubber duckie, Kenwood rapid charger and 1 good battery. I will sell for $95 shipped CONUS. Photo upon request

Also for sale, cleaning up:

I was given a new RS pro-96 for a present. We do not have digital here. I am selling it since I already have a BC780XLT. The package is complete from RS, box, manual, antenna, clip and regulated external PS. I will sell the package for $490 shipped. POSTAL MO only. I do not use paypal.

Also have Motorola trunking base and some P110 UFH portables. Photos available for all

"Echolink" would be a good place for the limp-wristed, tongue stuck to the bottom of their mouth, fudge-packing butt bandit turd-burglars. This way they would have their own PRIVATE channel and the rest of us normal hams wouldnt have to listen to their diatribe.What you faggots do in your bedrooms is your biz, keep it that way and off our public repeaters. The masses DON'T want to hear you whine, bitch and complain about runs in your stockings...

I have noticed that there is a "double standard" that exists in how Wisemand and compay act online. They enjoy dishing it out to me, Stagger, Jimmy Dale, etc. But when we are winning, they whine and cry and do the nasty!

They try to get us TOS'd. They make little sorry attempts to get us removed from the internet. In fact, some nut on the NIM board wants to have me committed! Yeah right, that's not even legal! A person has a right to free speech, no matter what the person says. It's does not call for extereme foul language, or any type of threats. Unless the person is doing criminal activity, then there should be action taken.

I dont like alot of the viewpoints that I see on the net. Do I spend every waking momnet trying to have them TOS'd? No way! I went a started a talk show, a soapbox, that I can get on and make my say! If you do not like what I say, you do not have to listen. Now I know that even I can make a mistake or two, but let's be honest. I don't feel I have done anything seriuosly that would even beget this kind of unkind actions on here. I have every right as a free American to voice my opinion about any thing.

But why the double standard? All I want to know is why?

heres another update, coy roy has not been on much lately.

heres some other helpful 146.640 information for those interested in
learning more about 640.

this site has audio recordings of KG4LEG breaking up a net, so now you
all can get a listen to this idiot!

lots of fag boy/sexual comments, claims he has sex so much he gets
tired of it, says 5-6 hours a day.../drug acusations of anyone using
the repeater/
LEG is acting as bad as he normally does in this audio clip!
RON calls LEG a retarded drug addict! HA!

It's like this OM:

People harass others on the newsgroups. Basically it's people choking others right to free speech.

A double standard plain and simple.

# 4858. Why You Don't Like The ARRL

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-11 16:53:56 UTC
From: hamop_62@hotmail.com
Message-ID: <792e029d.0312110853.4daa825f@posting.google.com>
Source record: 60928
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.shortwave,rec.radio.cb

This came from another radio group. They are doing a survey to find
out why some people do not like the ARRL. I don't like it because it
costs to much. If it were $10 a year I might consider joining.
Louis

I do like the ARRL. Do I agree with everything they do? Nope. I don't agree with everything everyone does.

Expensive? A bit, but only for those that think they are just taking out a magazine subscription.

Love their website, I've mined enough out of that to justify the membership dues.

And the alternitive is?

I *am* a member of ARRL, but do find the membership a little
steep... I'd go $25,, but will think long and hard about renewing at
$40.

I think a lot of the long gray vanity call lists of DX and contest
results should be moved out of QST and onto some sub menu web page where
the three people who give a damn could look them up. QST is a pretty
good rag; it can still be improved.

I object to ARRL's position that we should not be discussing sex,
politics or religion on the bands...what else is left worth talking
about? BUT I wish ARRL or *someone* could act effectively to make
these discussions a bit more civil.

I don't think ARRL is doing enough of the "right stuff" to attract
newcomers, particularly youngsters, to the hobby. Often the emphasis is
too much on technolgy and equipment and not enough on the social
exploration that's possible with our radios.

On positive side I think ARRL is still doing a pretty decent job
representing our interests to the Beltway Bandits.

They say he is a troll, but his questions are good ones.

I think a real newbie should buy something very cheap and programable on ebay. After getting some experience, then go shopping for a serious scanner.

Man, please stop posting this nonsense. You're not fooling anybody. Since nobody would use his or her own name to flood newsgroups with this garbage, it's obvious you're not the real "Kevin Souter." Instead, you're using false headers with his name, hoping others will get mad at him for the messages you've actually posted. Since anyone with any newsgroup experience knows this, all you're really doing is causing others to sympathize with him and get mad at you.

11M was sparsely used because it was not harmonically related to the other HF bands (i.e., required a separate VFO band and couldn't be multiplied to other HF bands). With today's synthesized radios, 11M would be no more difficult to implement than any other band.

When the hams had 11M, they could also legally full duplex 10M and 11M simultaneously for a real 2X conversation like the telephone.

And yes, I was on the 11M ham band in those days.

You must have been distracted by a passing bimbo or something, but DXCC listings were removed from QST several years ago and moved to the DXCC Annual Report which goes only to DXCC participants.

The contest result listings similarly have been removed from QST and now can be accessed on the web.

ARRL makes no regulations whatsoever. You can talk about what ever you deem proper, and only Riley Hollingsworth will challenge you if he thinks you're over the line.

For a member, you don't pay much attention. It has been over a year
since the contest results moved to the web. The Section News in the
back of the mag was also moved. I gave a damn about them. I was kind
of hoping the stuff you find interesting would be moved to the web.

> I object to ARRL's position that we should not be discussing sex,

You can't think of a single thing outside of politics, sex or religion?

> BUT I wish ARRL or *someone* could act effectively to make
> these discussions a bit more civil.

Why would the ARRL even try to do so? The League has no enforcement
powers.

> I don't think ARRL is doing enough of the "right stuff" to attract

The ARRL is you. What have you done to attract newcomers?

> Often the emphasis is
> too much on technolgy and equipment and not enough on the social

Not in QST it isn't. Any real technical content was stripped years ago.

> On positive side I think ARRL is still doing a pretty decent job

>
> 73 KC2LVQ

The ARRL doesn't deal much with Beltway bandits. Do you know what a
Beltway Bandit is?

I don't lilke the ARRL, because QST does not print
any articles on Freebanding. Freebanding IS more popular
than ham radio, and we represent almost 15 million new
potential ARRL members. Too bad the ARRL Yankees
can't figure this out.

Jose

Then they shouldn't be trying to enforce such laws or assume that something is
illegal just because they don't like it. They have no authority to enforce a
law that doesn't exist.

Sir, if you are so interested in having a magazine dedicated to the free banding people why don't you start one. With 15 million, seems that you would end up as a financial wizard.

The ARRL isn't going to print anything about free banding when they operate on frequencies they are not permitted. "Licensing" is the name of the game. "Legal" operation is the name of the game. Maybe you should go back to printing a "CB" magazine, something like there was back in the 60's-70's.

I neither approve of or disapprove of the ARRL.

Yes, the dews are high. If they where lower they could attract more potential members. With the majority of hams being senior citizens, the ARRL needs to take that into consideration when it comes to dews. WE all know that seniors are on a fixed income. Members should be given a choice of what magazine they would like when joining the ARRL.

I showed a copy of QST to a new ham friend and ash him if he was interested. His comment after looking over the magazine was: The magazine is to technical for him and most likely other new hams, the cost for membership is to high.

For me, the ARRL reminds me of the Federal Government. We elect the officials who are supposed to be working for the membership, but they do as they darn well please once they are in office. Who is in bed with whom.

I dropped my membership for the reasons I have stated above.

Coalition Provisional Authority (CPA)
Ministry of Transportation and Communications

Iraq Amateur Radio License

In accordance with Coalition Provisional Authority Order 11 effective
9 June 2003, under the laws and usages of war, and consistent with
relevant United Nations Security Council resolutions, including
Resolution 1483 (2003), the frequency spectrum licensing authority in
Iraq is the Ministry of Transportation and Communications.

Under this authority, the amateurs listed herein are hereby authorized
to operate a station in the amateur service and amateur satellite
service anywhere in Iraq, and with full amateur privileges following
the amateur rules and regulations of Iraq as they may be written, the
Region 1 band plan of the International Amateur Radio Union, and the
Radio Regulations of the International Telecommunication Union, using
the call signs listed.
This license is effective on the date of this approval and expires
five years from such date.

You should really self-examine the hatred in your heart, especially during this festive of seasons. Alfa-Tango International is the licensing authority.

Feliz Navidad,

Jose

I have for sale a nice dual band Kenwood TM-732 with the removable face plate.This radio has no problems and is in great condition and works great.I am asking $250.00 for it.If interested please email me.

I have a Standard C5900 Tri Band radio with 2 meter,70 cm,and 6 meters.Comes with manual,seperation kit but not sure if we still have the box.Yes we do have the box for it.This is one of the greatest radios out there.I really don't care to sell it but I have no more use for it in my wifes car anymore.She wants the Yaesu FT-90 I have instead.(Some woman are like that). I am asking $500.00 shipped to your door.Please email me or call 978-281-3359

# 4895. Letter to Larry Lawson aka Larry Lee from www.Truthradio.com owner Dec 11, 2003

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-12 16:08:38 UTC

http://www.stewwebb.com
LETTER TO LARRY LAWSON FROM www.truthradio.com Owner:
Dec 11, 2003
Larry:

This is a bit of curbside justice I have picked up through the years. If you suspect you are being "burned" by an undercover law "enforcement" officer -- you can solve your problem with a direct question. You say, "You are asking me to do something that is possibly against the law, before I decide to take your offer -- are you a policeman or any other sort of law enforcement person?" That done, the person enticing you has been defeated. If he is NOT a cop, you know he is a crook and you can walk away from him. If he IS a cop and he completes the questionable transaction -- his testimony in court will be nullified.

SO -- LET'S SETTLE THIS ALLEGATION OF STEW WEBB against you, Larry. Mail to me a written statement in your hand-writing asserting UNDER PENALTY OF PERJURY that you are not now nor have you ever been associated with the CIA or any other similar agency of government, quasi
government or other entity seeking to mold government policy. Phrase the statement however it best fits, but sign it under penalty of perjury.

This message is being sent by blind copy to those who are interested parties: Webb, Floyd and Boettcher. Your statement (when received at PO Box 344, Nipomo, CA 93444) will be shared with them. Should you neglect, by December 20, to deliver said statement to me, I will have no choice but to believe Stew Webb's allegations about your associations are factual.

This e-mail is from:
Richard Palmquist
Personal: rpalmq@charter.net
Truth Radio business: rp@truthradio.com
PO Box 344
Nipomo, CA 93444

# 4897. K1MAN starts ANOTHER frequency war.

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-12 18:18:11 UTC
From: Dan/W4NTI <w4nti@get>
Message-ID: <DDnCb.661$5B.458@newsread1.news.atl.earthlink.net>

Not content to leave things alone. Glenn Baxter, K1MAN has threatened ANOTHER hostile takeover of a frequency.

Glenn is now claiming the Feds are jamming his 75 meter SSB blabcast. And is demanding everyone around his 'new chosen home' of 3977 to clear out.

Word is those that were told to clear out OR ELSE (more bogus afidavits eh Glenn?) told him to take a flying F*&& at a rolling donut.

And one more thing boys and girls, he and his Polish gentlemen are planning a hostile move to 14.275. This after being thrown off the frequency previously.

How the worm turns.

This from your humble reporter and ever observant listener.

Dan/W4NTI

A choice of magazines? Explain please.

Its a bureaucracy. And according to Doctor Peters, who wrote a book called
'Peters principle' many years ago:

"In a bureaucracy everyone will eventually arise to their level of
incompetence"

Having read of Mr. Baxter's antics over the years, as well as the ineffectual response (ineffectual in the sense that his behavior problems persist and he still has a license) I'm not holding my breath. It's doubtful that anything short of prison is going to keep him from misusing radios.

Carmen

> Drucker. He was a management guru!

No, he meant the "The Peter Priciple", from the book by that title written
by Dr. Laurence J. Peter and Raymond Hull.

Peter Drucker had nothing to do with it.

Good luck on this one now!

Why should the ARRL or anyone else, support a bunch of illegal law
breaking operators?

And it has no authority other than what it self subscribes. The FCC is the only authority that can issue licenses to use the radio spectrum in the U.S. and other countries have their own license structure. Alfa-Tango International has no authority to issue licenses for any use of the radio spectrum. It is just more "freeband" nonsense, and there is no "freeband" in the U.S. as those frequencies you use as a "freeband" are allocated to other services who have ligitimate licenses to use those frequencies. You ATI license isn't worth the paper it is written on and carries no authority whatsoever.

Try posting the real article, mentally ill Davies.......

FREEPORT, OH/GLENDALE, WV: The FCC wrote Advanced licensee Steven A. Tunder, N8WGM, and General licensee Roger L. Wiseman, KC8JBO, on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between the two men that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth cautioned Tunder and Wiseman to review ¬97.1 of the Amateur Radio rules and "to make certain that whatever disputes that may exist are not carried over to Amateur Radio frequencies." Hollingsworth invited the two licensees to contact him to discuss the matter. Last November 9, the FCC sent Wiseman a Warning Notice in response to allegations of deliberate and malicious interference on 20 meters.

This is not a SPANKING, you fucking moron.........the retard Davies strikes again, and for all his flailing, he has yet to score a hit.....

retest, ad
>nauseaum.

>One letter?
>No "interference"?

Read everything closely. There were three letters sent.

The letters to both Wiseman and Tunder were a preemptive
"warning"
that did not allege any activities. That hardly qualifies as a
warning
in the context of someone having actually done something.

The letter with the warning in it ALLEGED interference, and
warned of
consequences.

The retest letter made no reference to interference; in fact
gave no
reason for requiring the retest. Such a request is part of the
Volunteer Examining program. It could have been made for any
number of
reasons that may have had nothing to do with any of the
addressee's
actions. An investigation into the VE group that gave the test,
would
be a good example.

Only one letter was a warning referring to interference.

So, yes; if you are going to tell it, tell it straight.

Thanks, I couldn't see a connection with Drucker!
So it is spelled "Priciple"? That would explain why I didn't find it!

This one?
---
About the Author
Before Dr. Laurence Peter's death in 1988, he was a professor of education at the University of Southern California and at the University of British Columbia.
Raymond Hull lives in British Columbia.

This best-selling business classic of more than twenty-five years' duration is a dead-on account of why boredom, bungling, and bad management are built into every organization. Through hilarious case histories and cartoons adapted from Punch, Dr. Peter shows how America's corporate career track drives employees relentlessly upward -- until they get promoted into jobs they just can't do and wind up desperately treading water, driving their colleagues crazy, and dragging down productivity and profit.

That "incompetence" is more usually a lack of sufficient office politics skills than
technical skills. "Dilbert" is on target more often than you would believe if you
never had to work for a large corporation. AT&T was the worst with this. There you worked on stuff not because there was a chance that it might make the
company any money, but because your boss thinks it will impress his boss. Other
instances are when your department didn't spend all its allocated budget for the
year, so the boss has people order equipment that might be useful in the future.
Known as "Use it or lose it", as next year's budget would likely be scaled back if
this year's isn't fully spent.

I have run across incompetent people in companies I've worked for, but it's actually quite rare. One guy who didn't know what he was doing just tried to
wing it. And his work was very faulty. But by far most incompetence is found in management.

There is no rule against controversial topics. However there is a recommendation that one use common sense and remember that on the air we should be ambassadors of good will. So it is considered inappropriate to discuss such subjects with a stranger, especially those in other countries, since you may inadvertently offend them.

On the other hand, discussing a controversial subject with someone you know well is reasonable.

Post subject: Roomer of Mike Chittenden barring stolen radio's

For those of you who know Mike Chittenden, know that he has stolen astro's xts's and saber's in his posesion or atleast did, by roomer (rumor) they are barried in the desert in ammo cans after the arrest of Brian McNeal of San Diego from which he bought them. A warrent maybe issued for his arrest but the investigation is still under way. Any information on where the radio's might be barried please contact Detective Turner at the Santee Sheriff's office at 619-956-4055 or email: hank.turner@sdsheriff.org.

Posted: 12 Dec 2003 23:01 Post subject:

So do we get any clues as to where there are buried at??? Are they under a big X or is there an astro map (instead of a treasure map)????

I do not know any of these people but we are bordering on slander here and I think this topic needs to go bye bye.

P.S. Did he do like in casino and go dig the hole first cause if someone came along then you would have to take care of them and then you could be out there all day digging holes.

"...I just don't want her to be alive anymore!!" - Stewie from the Family Guy.

Who is more of the fool? The one who wants to be on the digital trunked system or the one who is on it??

I think it is based upon the fact that we are here to exchange information between one another idelas and comments about radios. If someone has an investigation started on them let the proper agency

deal with and either PM or talk about it off the board.

Further more if you are going to post anything I think it should have been in the lounge. The main part of general discussion to my understanding is asking questions or getting ideals about things that do not fall into other catergories on this board.

I have a pretty safe faith placed into the FBI that they will take the case and solve it. There is already a sticky on it in another form.

In closing if someone had an issue with this person then they should be involved in regards to there own business. We are all big boys and girls so I think we can all handle our own problems. So thansk for the update and we can move on......

.... to the hunt for the astro saber. A new movie starring Sean Connery, and Alec Baldwin. It is a tale of captain who wants to defect with an Astro radio from Russia.

Since this person has the writing ability of a plate of beans that has just passed through the digestive system of a sick cat, I wonder how he could think that anyone would take this post seriously. It has to be a joke. "Roomers", "barring", and "radio's"?? I almost threw my computer screen out the window when I saw this post.

Wussman whined that Arf! misspelled when he posted

"Sisnce it is Satruday night, it is tiome to ghet a piuzza and
make some
anoinymous poists about Stagger Lee"

What Wussman ignored (conveniently) is that this comment was created using the very misspellings that Wussman has used over the past 18 months. Come one, come all! Just for the fun of it, let's have a contest to see who can write the longest paragraph using Roger's misspellings. The winner will receive a very nicely appointed award for "Busting Roger's Balls, 2003" and said award will be personally autographed by Arf! Arf!

Enclosed is a current list of Wussman's errors as of 12-12-03. (more will surely be added soon)

�Undre� Is this a city in Germany?

�Surgeoun� And this would be?

�Commuications� Who is laughing at who?

�Ovre� Ovre and out!

�Wondreful� It�s a �wondreful� day in the neighborhood?

�Derivitave� Still no spell-checker, eh?

�You lose, shit for brians.� Woger showing who real loser is.

�Deisowned� Deis what?

�Deeppest� Roger strikes again.

�Dodgeing�. Is he talking about a car?

�Staedy� Steady?

�Linme� Transmission line?

�Getr� Nobody knows.

�Experieince� Wogie is good, ain�t he?

�Appropiate� What kind of opiate?

�Laywer� Lay what?

�Visitpors� You never have any, ergo you don�t know how to spell it.

�It's "complaintant," you sniveling weasel.� (Roger Wiseman on spelling complainant.)

�Irreevant� Good going, Wogie.

�Forwared� Forward HO!

�Glady� Glad Bags?

�Neighborhod� It�s a wonderful day in Wogie�s neighborhood.

�Mena� Mean? What you mean, Wogie?

�Notr� Not?

�Sassifyed� ALA Rolling Stones�No Sassifaction..

�Fantasises� That is �fantasizes�, Wussman.

�Illarate� West BY GOD Virginny!

�Reveresed� Must be one of those off-brand keyboards.

�Soem��as in Some? What a loser.

�VIRIN��What Wogie was before he met the Lavender Lads.

�Minisule��he mussa meant miniscule. Like his IQ.

�Champoin��Whassup, Wiseman? No dictionaries in the mental ward?

"Anoinymous"...a cross between anonymous and annoying?

�Acident� Roger�s mom got preggers by accident.

�Alreaedy� Alright, already!

�Amouints� Roger amounts to nothing.

�Aposterphe� This guy is a hoot, ain�t he?

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?

�Coiward� As in peeking from behind his mommy�s curtains.
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.

�Ghet� Get a load of Curtain Boy!
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.

"Methjadone"...a West Virginia substitute for Heroin.
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!
�Sisnce� He meant Since, but his pudgy little fingers slipped off the keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)
"Schol" (school?)
"strill" (still?)
�shoitgun� 12 ga or 20 ga?
"Snoip" (How they spell �snip� in Glen Dale)
"Maturbater". Wiseman does it all the time, he just can�t spell it.(leaves a sticky residue on his right hand)
"Coskscuking". It�s a Roger thing, as in Lavender Lads.
"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second retest.

� Stgop� Roger�s version of Stop.

�Fahter's� He meant Father�s Day.

�fserting�..would that be festering?

�poists�. Roger meant �posts�.

�snadwich� As in peanut butter and jelly?

�regualr� Glen Dale rendition of �regular�.

�aftrer� After? Aftrer what?

�soory�. Sorry Roger fucks up again.

�didnb't� He didn�t?

�whoile�. He ate the whoile thing?

�Woamn� He�s hooked on West Virginia phonics, all right.

�prrof� And he kin prove it, too.

�beforfe� Was that before he lurned to spell?

�yoiuy� Roger�s version of �y�all�.

�illerate� Only illiterate Roger can spell like this.

�haeart� Aw, how heartless of me to laugh!

�valule� Roger has no values. No wonder he can�t spell it.

�proch� Doesn�t everyone have one on their house?

�inmstitution� Where Roger�s mom put him in June 1999.

�timne� It�s Howdy Doody time?

�whgo� What? Who dat?

�gnetically� Only Roger knows what this one means�

�crfy� Like, cry, Roger, cry.

�stutrtering� Some stutter, Wiseman stutrters.

�Whjere� Where is Curtain Boy?

�Webiste� That�s Website to the rest of us.

�Youire� Your? You�re? Who knows.

�fiored� As in fired?

�Parety� Roger gave a party once. Nobody came.

�Bouynce� Bounce?

�Varification� Verifiable mental case.

�Probelms� Poor Rogie�has many problems of the mental sort.

�Partricipate� Oh, DUH!!!!

�Cryed� Gee, Wogie..cry me a river�you dolt!

�Stoick� What a dork. His old 386 has no spell check program.

�Partiall� More WV Phonics, I see.

�Obsucred� Either obscured or Rogie has �sucre� on his mind.

�Infinate� Stupid. Think finite, Rogie.

�Sustinance� As in Sustenance?

�Juvinile�. This is the way Roger likes his boys.

�Piut� Put it where, Rogie?

�Toyus�. �Toyus R Us?

�Diminuative�. Roger�s height.

�Definitely� Definitely

�Percriptions� Say what?

�Credibiliy� More Glen Dale intellect.

�Thsoe� Yet another Glen Dale gaffe.

news:DDnCb.661$5B.458@newsread1.news.atl.earthlink.net...
> Not content to leave things alone. Glenn Baxter, K1MAN has threatened
> ANOTHER hostile takeover of a frequency.

Well Dan...you do know things can get very boring up there
in Maine, especially in the Winter! (those Maine Winter's
last *8 Months* out of the Year you know! Remember those
Best Western Inn travel guides they used to print? Ever take
a look at the photos of the Best Western Inn's they had listed
for ME? All the photos...every darn one of em...showed pics
of kids playing in swimming pools with green mountain backgrounds.
I mean, who the heck are they trying to fool with that photogeneric
bullshi+ ?) I guess this is what keeps the Boy Broadcaster
busy 8 months out of the year whilst he's holed-up and
snowed-in eh Dan..??

> Glenn is now claiming the Feds are jamming his 75 meter SSB blabcast.
And
> is demanding everyone around his 'new chosen home' of 3977 to clear out.
> Word is those that were told to clear out OR ELSE (more bogus afidavits
eh
> Glenn?) told him to take a flying F*&& at a rolling donut.

He says the FED's are jamming him now? Is MAN going back to "conspiracy
theories" mode? Let me guess...the IARN is now going to be the official ham
EBS station for the approach of Planet-X. Perhaps the triangle-shaped UFO's
are on their way to Belgrade Lakes? Get those tinfoil hats ready
gentlemen because the alien "Eric Cartman mind and anyl-probes"
are on their way! (You know Dan, if Glen had some brains, he'd get on
the phone ASAP with either George Noorey or Art Bell and ask to
be a guest on a future Coast to Coast AM Broadcast. I mean, he
could get all that free publicity on 500+ late night AM Radio stations
just like Wayne Green does.) If he's really lucky, he'll be on some night
right after Richard Hoagland of "The Face on Mars" fame is on and
be an instant hit on the top-20 C toC AM Kooks List.

Finally, as for "rolling donuts", I feel Glen should stay away from
any and all of the same. I seem to remember a photo of him from
Hosstraders appearing on Jon's website, and the ole boy really needs
to lose that spare *Hummer H2 tire* he's carryin around his waistline.....

> And one more thing boys and girls, he and his Polish gentlemen are
planning
> a hostile move to 14.275. This after being thrown off the frequency

> previously.

Don't worry about that! I am sure the poleski boys from
Gdansk, Cleveland and Kalamazoo will give em a nice
ole RF bear hug! : )

>
> How the worm turns.
>
> This from your humble reporter and ever observant listener.
>
> Dan/W4NTI

The Walter Cronkite and General Westmoreland of ham radio.
ho-ho-ho-ho-ho!

I can see it now, lone saggy cancerous tit Rita Dale telling you
to go up to my house, but you're too busy shitting all over
yourself.

> standing against the wall, knees shaking and
> filling his underwear as he quakes in fear while grasping his big .22
rifle
> to his chest.

Try a .45, and why don't you come by and see?

---

Leave it to Pussyman to post several hundred lines when a few will suffice.
Coward Wussyman does not own a .45. In fact, he cannot legally own ANY
firearm!
The RKBA laws in West Virginia state that anybody with a history of mental
illness is precluded from possessing or owning ANY firearm.

What Wussyman is not telling you is that he has had visits from Chief Stenger to be sure that there are no firearms in the Wussie household.
It is legal for Wussyman to own and possess air or spring-driven rifles, such as a Daisy Red Ryder BB gun or a Wal-Mart slingshot. Wussyman is NOT allowed to have on his person or in his home ANY firearm that uses gunpowder as a propellant.
This is for Wussyman's own protection as he is prone to bouts of severe depression. Wussyman's case worker is concerned that he may/could use a firearm to harm himself or his neighbors.
Wogie often cradles his Daisy Red Ryder BB repeater against his chest as he dreams of what it would be like to blast away at Stagger Lee.
Poor Wogie. He harbors such ill will. The poor little guy has not gotten over the fact that his birth mother wrenched her oft shared teat from his grubby, toothless mouth and tossed him aside to fend for himself. Her breasts were in constant and heavy use by the men and women at the nearby military base and poor Wogie had to (pun) suck hind tit.
Poor Wogie. Poor homely little kid...sat there and whined, "Hey! That's MY tit! Move over! My turn!"
Wogie recalls all too clearly what it was like to have an "uncle" push him away from his mom's teat and tell him, "Get outta here, kid. Git your own tit."
It wasn't too many weeks after this that Wogie's mom ran off with a Sailor. Wogie was left in his cradle, little hands grasping the empty air for the tit he so much wanted to suckle...and there was nothing. No mother. No tit. No bedtime stories.
All was not lost, however, for it was about that time that Child Protective Services stepped in and took Roger under their protective custody. Wogie spent several years in their custody but, alas, all good things must end.
As things so go, Wogie was made to leave the custody of his Safe House and join the Air Force. Why?
Well, there were allegations that Wogie took great pleasure in haunting the boys' locker room area and the school had no option but to send Wogie on his way. He had nowhere to go but the Air Force.
Roger is out on his own now. He still has no tit to suck, no life to lead, and he is fastly becoming a laughable old man. He has matured and grown and hopefully learned...but he DOES like to gaze upon a teenage penis every now and then.
As Paul Harvey would say..."Now you know the REST of the story!"

# 4932. Re: Why You Don't Like The ARRL

From: Dit Dit Dah <NoEmail@NoEmail.com>
Message-ID: <brekbj$g7g$0@pita.alt.net>
Source record: 60703

What has the ARRL done for me?
Nothing! Nothing at all!

Once every couple of years they send me an invitation to "join" them at $35.00 a year. For what????

A magazine?
A stupid logo I can put on my QSL card?
What for???

I have been a Ham for 15 years now...never needed the ARRL before, don't need them now.

If the ARRL wants my $$ to pay for their broadcast stuff, to pay for their logos and advertisements, they can stuff it.

I have my Ham license because of the work I did...the ARRL had nothing to do with it.
They can take a hike.

his dick again in his "posts" <sic>
(of "posit") in <bqjj2n$dud$0@pita.alt.net>:
"The trouble is, LRod, that your findings will do little, if
anything, to dissuade or stop
the posts which the two rascals posit as "fact".

Chronic alcoholic and child RAPER "Arf! Arf!"
<DoggieDaze@Liberalz.comz> gets egg on
his "gruesome" face as he blathers more stupidity in
<bmch5m$l4m$0@pita.alt.net>:
"...you're going to have yet more egg all over your guresome

Here's some of LARDASS LLOYD's aka Arf!Arf!'s fuckups on
NImbusters.....
---

In other Nimbusters posts LLoyd babbled:

"breaddead" - LLoyd hasn't got anything upstairs in the oven

"defenseive" - Lardass is "defensive" of his ignorance

"counter-offenseive" - When LARDASS LLoyds attack

"nights" - Athens ASSHOLE was referring to last "night's"
masturbation session

"I forget to set the playlist in Winamp to repeat!" - Mongolloyd
also "forgets" the use of past tense, maybe he forgot!

"Techincal" - Lloyd just hates those "technical" things

"Dalkes" - Lloyd's granddad remembers when movies became
"talkies" too bad LARDASS learned to Dalk <sic>

"That it!" - When Mongolloyds get real mad, they talk like Tor
Johnson

"Woger" - LARDASS closely identifies with Elmer Fudd with his
lack of hair and all

"decide on weather or not" - It's always "stormy weather" with
Lloyd deciding "whether" or not to use correct English

"can not" - Mongolloyd is wondering how he "cannot" seem to get ahead in life

"is'nt" - "Isn't" LARDASS cute when he is mad?

"PAINFULL" - How LARDASS' bathroom scale feels when he steps on it in the morning, real "painful"

"I wish for Roger Wisemand" - Lloyd liked thosed thingd ford Rogerd

"alot" - Davies dreams he can communicate in English a lot

"thier" - Lavender Lloyd sure does lisp after a night behind the dumpster

"dont" - Lloyd says "dont", the rest of the world says "don't"

"Isreal" - Is FATASS Lloyd's retardation for real, or can he blame Israel?

"juist jelous" "extermenate" - A three for one post Athens Asshole axiom

"footting" - What LARDASS doesn't have, an equal "footing" anywhere

"Cant" - Emmanuel?

"th" - When Lloyd gets nervous, he stutte, er stutters

"enfighting" - Lloyd's two brain cells are infighting for control of his stupidity

"YOU STUPID JEW!" - Wasn't Jesus Jewish, so called Christian LLoyd?

"Tonite" - There's nothing in Lloyd's brain "tonight" or any night

"segmant" - What Lloyd's commuications are, only sentence "segments"

"I just listening" - Too bad he doesn't listen to his poor English

"buffon" - The Athens, Alabama "buffoon" strikes again!

"museium" - Where LARDASS LLoyd keeps his "muse"

"nastey" - How everybody describes LARDASS' body stench, especially in the ghetto

"loose" - Lloyd's description of his spinchter muscles...

"wont" - Lloyd refuses to learn English, it's Lloyd's "wont"

"awhile" - It will be "a while" before Davies gets a clue

"freinds" - Lloyd's congobulation of "friends" and "fiends"

"thier" - "Their" just isn't any hope for LARDASS Lloyd "ill-educated" Davies

"backstabers" - Lloyd's version of the OJays' hit

"becuase" - Home of the "Deliverence Extras" spelling by LARDASS Lloyd

"obselete" - What LARDASS thinking is to him, others see it as 'obsolete'.....

"belive" - What fools like LARDASS Lloyd "believes"

"thier" - Ill-educated Xtian LARDASS Lloyd shows off his language skills!

"marshalls" - Mongolloyd spell "marshals" real good!

Wisemand - LARDASSd fucksd upd againd

"compay" - Mongolloyd never gets any female "compay," while others do get "company"

" But when we are winning," DUMBFUCK, YOU have NEVER WON anything in your miserable life!

"and do the nasty!" You don't really know what that means, do you, 30 year old VIRGIN?

"It's does" - Mongolloyd use good English

"momnet" - LARDASS Lloyd Davies misses his dead "momnet" for a "moment"

"seriuosly" - Lavender Lad President Mongolloyd wants to be taken "seriously" instead of "seriously"

"annouced" - Monolloyd "announces" his stupidity again

"tonite" - Davies never lets his lack of education stop him from announcing to the world he's a fucking imbecile!

"nite" - When LARDASS Lloyd molests those kids he makes them say "nite, nite" at "night"

"weldare" - Calling Dr. Weldare, LARDASS needs his head out of his FATASS....put it on his welfare bill

"so fuck of" - When Mongolloyds who have man tits talk tough......

"fukcing funney" - Alabama deliverance extra Davies speak

"pictrue" - "Picture" yourself as a Davies mongolloyd

"isseus" - Davies has "issues" too many to list here

"resortjng" - Is Lloyd from Finland?

"attsxks" - When LARDASS Davies "attacks" he uses illiteracy

"basturds"- What mental illness patient LARDASS Lloyd calls his nurses

"shkt" - Mongolloyld Davies' "Skittles", he likes that "hershey rainbow"

"law suit" - LARDASS never leaves his HUD apartment with out his law suit

"opinionn" - When LARDASSn postsn whiln drunkn

"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth feel fresh

"sneeky" - The teachers always "sneaked" Lloyd through the next grade

"that' wasnet" - LLoyd was out that year of school that they went over English grammar

idiout! - "Lloyid" <sic> strikes out again!

"speling" - Mongollpoyd Davies the "spelling" bee champ of the retards!

"reas isseus instaed" - Davies talking out of that cheap beer again

"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....

"challegne" - When Mongolloyds drink and post

"metnal" - Mongolloyd just doesn't have the "mental" ability to debate......

How safe is it to run these without forced air cooling?

I've got one as a 1 - 4w driver (feeding a BLW60C) and although has a finned TO5 heatsink, it gets up to 70+ degrees Celsius when running. The Mitsubishi spec says it is safe up to 175 degrees Celsius but am not sure if what I'm doing will do the device damage?

Any thoughts anyone?

Neil

# 4936. Re: Why Throw $$ to the ARRL???

In article <brekbj$g7g$0@pita.alt.net>, NoEmail@NoEmail.com says...

> What has the ARRL done for me?
> Nothing! Nothing at all!

What has ARRL done for the hobby that you, me, and loads of other
amateurs all over the U.S. have the privilege of enjoying?

Lots.

To paraphrase a once-popular (if a bit corny) line: "Ask not what
the ARRL has done for you, the individual. Ask instead what they have
done for amateur radio as a whole."

If you don't want to join, that's fine. There's no coercion
involved at all. However, be aware that there are plenty of hamateurs
Out There who are ready, willing, and able to disagree with what you're
saying about the organization in general (and I'm one of them).

Say Plagiarist, where did you steal this material from...you
certainly don't have the brains to write it on your own......

Arf! Arf! plagiarized a story "lame" in
<bratsf$ucs$0@pita.alt.net>,
which was also found at Message-ID:
<SEnbb.73395$PD3.4767951@nnrp1.uunet.ca>
Message-ID: <O5OuB2rqDHA.392@TK2MSFTNGP11.phx.gbl>

Message-ID: <imVza.171125$ja4.8649719@bgtnsc05-
news.ops.worldnet.att.net>

Your own plagiarism makes what you posted in
<bratsf$ucs$0@pita.alt.net> makes you seem stupider than you
already are.....
"The failed attempt is just Woger copying other people's ideas
again,
but he isn't even good at using what he copies. He's so bereft
of new
material..."

But Arf!Arf! clearly plagiarized this grocery store joke....in
<bratsf$ucs$0@pita.alt.net>........ PKB.......

# 4940. Here is My Resume. Who Am I?

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-13 12:03:40 UTC

EDUCATION AND EXPERIENCE:

LAW ENFORCEMENT:

I was arrested in Kennebunkport, Maine, in 1976 for driving under the
influence of alcohol. I pled guilty, paid a fine, and had my driver's
license suspended for 30 days.

My Texas driving record has been "lost" and is not available.

MILITARY:

I joined the Texas Air National Guard and went AWOL. I refused to take a
drug test or answer any questions about my drug use.

By joining the Texas Air National Guard, I was able to avoid combat duty in
Vietnam.

COLLEGE:

I graduated from Yale University with a low C average. I was a cheerleader.

PAST WORK EXPERIENCE:

I ran for U.S. Congress and lost.

I began my career in the oil business in Midland, Texas, in 1975.

I bought an oil company, but couldn't find any oil in Texas.

The company went bankrupt shortly after I sold all my stock.

I bought the Texas Rangers baseball team in a sweetheart deal that took land
using taxpayer money.

With the help of my father and our right-wing friends in the oil industry
(including Enron CEO Ken Lay), I was elected governor

of Texas.

ACCOMPLISHMENTS AS GOVERNOR OF TEXAS:

I changed Texas pollution laws to favor power and oil companies, making
Texas the most polluted state in the Union.

During my tenure, Houston replaced Los Angeles as the most

smog-ridden city in America.

I cut taxes and bankrupted the Texas treasury to the tune of billions in
borrowed money.

I set the record for the most executions by any governor in American

history.

With the help of my brother, the governor of Florida, and my father's
appointments to the Supreme Court, I became President after losing by over
500,000 votes.

ACCOMPLISHMENTS AS PRESIDENT:

I am the first President in U.S. history to enter office with a criminal
record.

I invaded and occupied two countries at a continuing cost of over one
billion dollars per week.

I spent the U.S. surplus and effectively bankrupted the U.S. Treasury.

I shattered the record for the largest annual deficit in U.S. history.

I set an economic record for most private bankruptcies filed in any 12-month
period.

I set the all-time record for most foreclosures in a 12-month period.

I set the all-time record for the biggest drop in the history of the U.S.
stock market.

In my first year in office, over 2 million Americans lost their jobs and
that trend continues every month.

I'm proud that the members of my cabinet are the richest of any
administration in U.S. history. My "poorest millionaire," Condoleeza

Rice, has a Chevron oil tanker named after her.

I set the record for most campaign fund-raising trips by a U.S. President.

I am the all-time U.S. and world record-holder for receiving the most
corporate campaign donations.

My largest lifetime campaign contributor, and one of my best friends,
Kenneth Lay, presided over the largest corporate bankruptcy fraud in U.S.
History, Enron.

My political party used Enron private jets and corporate attorneys to assure
my success with the U.S. Supreme Court during my election decision.

I have protected my friends at Enron and Halliburton against investigation
or prosecution. More time and money was spent

investigating the Monica Lewinsky affair than has been spent

investigating one of the biggest corporate rip-offs in history.

I presided over the biggest energy crisis in U.S. history and refused to
intervene when corruption involving the oil industry was revealed.

I presided over the highest gasoline prices in U.S. history.

I changed the U.S. policy to allow convicted criminals to be awarded

government contracts.

I appointed more convicted criminals to administration than any

President in U.S. history.

I created the Ministry of Homeland Security, the
largest bureaucracy

in the history of the United States government.

I've broken more international treaties than any
President in U.S.

history.

I am the first President in U.S. history to have the
United Nations

remove the U.S. from the Human Rights Commission.

I withdrew the U.S. from the World Court of Law.

I refused to allow inspectors access to U.S. "prisoners
of war" detainees
and thereby have refused to abide by the Geneva
Convention.

I am the first President in history to refuse United
Nations election
inspectors (during the 2002 U.S. election).

I set the record for fewest number of press conferences
of any

President since the advent of television.

I set the the all-time record for most days on vacation
in any one-year
period.

After taking off the entire month of August, I presided
over the worst
security failure in U.S. history.

I garnered the most sympathy for the U.S. after the
World Trade Center
attacks and less than a year later made the U.S. the
most hated country in
the world, the largest failure of diplomacy in world
history.

I have set the all-time record for most people
worldwide to simultaneously
protest me in public venues 15 million people),
shattering the record for
protest against any person in the history of mankind.

I am t he first President in U.S. history to order an
unprovoked,
pre-emptive attack and the military occupation of a
sovereign nation. I did

so against the will of the United Nations, the majority
of U.S. citizens,
and the world community.

I have cut health care benefits for war veterans and
support a cut in duty
benefits for active duty troops and their families --
in wartime.

In my State of the Union Address, I lied about our
reasons for attacking
Iraq, then blamed the lies on our British friends.

I am the first President in history to have a majority
of Europeans

(71%) view my presidency as the biggest threat to world
peace and

security.

I am supporting development of a nuclear "Tactical
Bunker Buster," a

WMD.

I have so far failed to fulfill my pledge to bring
Osama Bin Laden and
Saddam Hussein to justice.

RECORDS AND REFERENCES:

All records of my tenure as governor o f Texas are now
in my father's
library, sealed and unavailable for public view.

All records of SEC investigations into my insider
trading and my

bankrupt companies are sealed in secrecy and
unavailable for public

view.

All records or minutes from meetings that I, or my
Vice-President,

attended regarding public energy policy are sealed in
secrecy and
unavailable for public review.

PLEASE CONSIDER MY EXPERIENCE WHEN VOTING IN 2004.

PLEASE SEND THIS TO EVERY VOTER YOU KNOW.

George W. Bush

The White House, USA

TO SAM: I can hear it now, some will say - if it says no checks, and you read it, why bid?? I TOO have listed no checks in my auctions BUT..... ONLY BECAUSE..... # I hate to wait for it to clear. #2 I like to try to ship the same day or next day and having to wait for a check to clear, just doesn't make that possible. Both tie into the other. IF and it has happened, I do receive a check, no big deal. I will deposit it and wait.

General response to above: And that has long been MY argument.... Some don't have credit for some reason or another. Either because they don't qualify for it, don't believe in it, or whatever. Maybe you haven't heard - MILLIONS are in debt due to credit cards. Many may have filed Bankruptcy, therefore not able to get it now. OR maybe they plain don't trust credit cards. WHAT

EVER their reasons. I have followed along with all the points of those in response but I STILL have to believe that cold hard cash is acceptable. If not, then same as those without credit, they just don't get my business. I don't use my credit all the time. In my business, I'd rather give the customer a discount for paying cash, than to accept credit cards and pay out a fee to process them. It is much simpler to collect cash. I suppose it boils down to whatever works for that business.. Each apparently has it's pitfalls and the customers have to go accordingly. 6 of one and a half dozen of the other. Each business/seller depending on the types of payments they accept, will lose deals somewhere. "I" lose credit card purchases - in store, but oh well! Online sales, I do take pay-pal. G.W.

# 4945. Woger W. at the Country Club

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-13 14:15:14 UTC
From: Stagger Lee <SLee@houston-hunks.com>
Message-ID: <87987698.544575476@houston-hunks.com>
Source record: 60715
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc

Woger was invited to an exclusive country club by a distant relative who was having a party there. As Woger was wandering around the area of the tennis courts, he happened across a ball boy who had his pockets stuffed with tennis balls and was sitting on a bench. Since Woger didn't know about the kid's job, he just kept staring at the kid's groin area and then quickly looking away whenever the kid noticed.

Finally, the kid said to Woger "They're tennis balls."

Woger paused for a moment and then asked, "Do they hurt as much as tennis elbow?"

Neil:

Attached is a link to the Mitsubishi datasheet for the 2SC1947.
Regarding the thermal
specifications, the maximum junction temperature is 175C. The thermal
impedance is
15C-per-watt junction-to-case, and 150C-per-watt junction-to-ambient.

What this means is that the junction temperature will be hotter than the
case temperature
by 15C times the numer of watts dissipated. For example, if the transistor
is dissipating 4 watts,
the junction will be 60C hotter than the case temperature. Thus the maximum
case temperature
should be limited to 175-60 = 115C (pretty darn hot).

There will be some thermal impedance between the heatsink and the case,
but if well designed,
and well attached, it should be only 1 or 2 C/watt, almost negligible in
this example.

The 150C/watt junction-to-ambient spec means that the metal case of the
transistor is not
too effective at rediating heat by itself. Without any heatsink, and
assuming 1 watt dissipation, the
ambient temp would have to be limited to 175-150 = 25C (room temperature).

And just exactly what do you expect that they could do for $10.00
a month?

Please name me ONE organization in ANY "hobby" activity that
provdes the scope of servcies and resources the ARRL offers to it's
target peer group.

Awaiting your informed response.

I think this is one of those cases where some people think that their membership is a subscription to QST. Its a lot more than that. ARRL does a lot for Amateurs, even those who hate the organization.

Hello,
Dit Dit Dah wrote:
> What has the ARRL done for me?
> Nothing! Nothing at all!

Have you availed yourself of the things the ARRL has to offer? How about the EmComm courses? While my buddies and I did it the old-fashioned way (online mentors, etc.) it's possible to purchase the course material and take the tests via a local EC team. We're a small group, but 60% of us have completed all three levels and considered it valuable enough training that we got certified to give the exams ourselves. It's amazing how few of us there are out there. TN has 29 total people qualified, and we've got 4 of them. More people need to take these courses and get certified to help *other* people get the training. It's all well and good to be willing to show up to help during a disaster, but untrained folks require a time investment on the scene that slows recovery efforts. One more side note concerning the EmComm courses: they're not only half price for ARRL members, the federal government has given the ARRL grants that covered the first level for many students under Homeland Security. I got my first *2* levels paid for by those grants.

In the same vein, the ARRL also helps in the effort to make amateur radio more available by operating a highly respected VEC. Again, the more of us there are to give the exams the easier it is for people to locate a convenient exam location and join the hobby.

Add their lobbying efforts to the mix and I'm satisfied that they're a good value. Hell, your YL or OM can join as well for just a few dollars more. That's what my spouse and I did.

Take another look at the ARRL. They have things to offer, you have to avail yourself of them.

What a dumbass. After WW1 when the Navy department wanted to totally
control the spectrum, the founder of the ARRL, H.P. Maxim 1AW fought them
tooth and nail.

So, without the ARRL, you would indeed have no license or for that matter a
reason to bitch. Because there would be no Amateur Radio.

Shut the hell up Troll.

From: lou1@westnet.com
Message-ID: <9f565180.0312131125.49846562@posting.google.com>
Source record: 60729

hi
my old bsr xl-1200 cartridge is wired onto the pins so it wont pop out with the 4 prongs as normal one's do. i think i could remove the wires and put each one onto the prongs of a new cartridge but it seems that the bsr cartridge is proprietary. there is one screw on top of the tone arm that holds my cartridge. i'm not sure it will screw into a new one such as the at3482u. anyone here ahve a solution? i could get another direct replacement for the bsr cartridge perhaps but i thought the 3482u (or another) would give me better sound than what i have now. i could perhaps just snap the new cartridge in without screws. all the wires in the tonearm are very thin so its hard to solder in there.
please email me a copy of your response.
thanks
louis

I have a SWL friend who owns a Kenwood R5000 receiver.

It has developed a problem with the main tuning ?.......The shaft which the main knob is pushed unto and held in place by a small screw has jammed/stuck solid.

He is afraid to try and force the shaft to turn.

Can anyone help with the fix or suggest the way forward please. Maybe its a known problem?

I'm not sure who he is, but I'm hoping that he'll be running for office in 2004. I'll vote for him. He sounds like a guy who'd kick ass. Maybe yours.

I don't like ARRL because:

1) Membership price too high
2) Can't separate QST from membership
3) QST only counts as $15 of the $39 membership fee
4) Incentive licensing from the 60's
5) Ham radio is a dying hobby
6) 5wpm Extras
7) No value given for the money invested
8) No accountability of the board and Executive staff
9) Really doesn't represent the majority of hams (majority don't
belong)
10) Really no different than 'NRA', 'AARP', 'NAACP'. Take your money
and use it for their own agenda, NOT yours!

That is enough for a start.

Sorry to see '73' and Wayne Green exit publishing.
Sorry to see 'Ham Radio' exit publishing.

ex ARRL member

I ask basicly the same thing, which foreign countries, and to provide documented proof that those foreign countries recognized those "licenses", so far nothing from mr. kreep low cycle (just more cb bluster). The ATI is just an international club and any "license/call signs" issued carries no more authority to transmit on any frequency then if the ARRL issued licenses.

> I don't like ARRL because:
>
> 1) Membership price too high

Really?? Many local clubs charge anywhere from $20 to $30 and can't do a whole lot for their members except maintain the local repeater.

> 2) Can't separate QST from membership

Why would you want to?

> 3) QST only counts as $15 of the $39 membership fee

Actually you are lucky that it counts as little as that. These days typical magazines generally cost $3 to $4 an issue so they must be getting a good break on the publishing.

> 4) Incentive licensing from the 60's

That was the FCC's idea not the ARRL's.

> 5) Ham radio is a dying hobby

There are more hams than ever before in history.

> 6) 5wpm Extras

So what. The very earliest requirements for licensing hams were, guess what, 5wpm.

> 7) No value given for the money invested

Let's see. Ham radio would have remained closed after WWI if not for the ARRL. They have managed to expand our HF and VHF frequencies. Battled, athough sometimes unsuccessfully, to preserve our allocations. Have lobbying power in Washinton. Convinced the FCC to come up with what is now PRB-1, which gives hams some protection from restrictive city ordinances on antenna height. They are now fighting BPL, which will tear up our HF bands if implemented, and they are working on a bill in Congress to give hams protection from restrictive covenants.

You have and will continue to benefit from the ARRL's work, all without having contributed a dime.

> 8) No accountability of the board and Executive staff

They are accountable to the membership. Any member can challenge them. Any member can get involved, run for a position, and work to change things.

> 9) Really doesn't represent the majority of hams (majority don't
> belong)

That is not the ARRL's fault. They keep trying to recruit. That majority of hams that don't belong don't belong to any other organization either nor do they attempt to form an alternate organization.

> 10) Really no different than 'NRA', 'AARP', 'NAACP'. Take your money
> and use it for their own agenda, NOT yours!

The agenda is set by the MEMBERS. Any time the MEMBERS do not like the policies they can elect new officials. The agenda is based on what members decide to push.

>
> That is enough for a start.
>
> Sorry to see '73' and Wayne Green exit publishing.

You obviously expected the ARRL to ignore all the other member's preferences and expected them to have an agenda 100% tailored to your wants and expectations. That doesn't happen in any organization. If you want them to change, you have to get in there and work hard to get into the thick of the action. Sitting on the sidelines and criticizing doesn't accomplish anything.

Check your local newstand or magazine rack in stores, many carry QST.
You can purchase it without membership, or check you local library, they
may carry it and you can read it for free.

I don't like them because the head bosses see themselves as self-appointed gods of ham radio.... at least at one point in time they were trying to get the FCC to hand over authority of the ham radio spectrum to them entirely.

You plagiarized. You got CAUGHT. It's not like anybody would
actually USE the Internet for its' intended purpose, to look
stuff up on it ,is it? You used the same joke but only changed
"golf" to "tennis", "blonde" to the lame lisping of "Roger" or
most likely, you used one of the sites I didn't list here,
(there are numerous) that HAD the same "joke" with the tennis
balls in the material. That internet that is your life has outed
your plagiarism again, because that probably is why YOU never
back up ANYTHING you post.

You are a hypocrite.

Besides, as often as you take balls in your mouth, what's the
difference to you, tennis balls, golf balls, MY balls you want
in your mouth, right?

Why do I not like the ARRL? I will answer that with another
question. Would you trust a gang of Yankee carpetbaggers,
the same bunch who stole from the southerners at the end of
the War Between The States? You would? Good! Sign
up for life membership with the rest of the NewingtonYankee
gang. As for me, the league can go f..k itself, since that is what
it has been doing to the rest of us for decades.

Fair enough.

I dislike some of the policies that the ARRL has promoted in the past,
and felt as if the ARRL did not represent me even though I have been a
member since 1986.

Luckily, the FCC went over the ARRL's head and showed a little
lesdership with respect to licensing issues.

it's either a P-mount (new) or it's not.

If it's an old beast, wires should be soldered to terminals that are pressed onto the pins and can be slid off the pins of the cartridge.

Problem - it might be some work to find a replacement cartridge to fit the turntable -- BSR was usually a low end product, probably could replace the turntable with something a little better and modern for about $90.

appears to be some support on the network for BSR - try searching Google for some hits.

Did you get actively involved? Did you become a section director? Did you
campaign to sway the majority to your opinion? Or did you just write a
letter or two complaining and were disappointed because it didn't instantly
change the ARRL's policies? If you want your point of view to be policy
then you have to become very politically active in an organization.

Did you get actively involved? Did you become a section director? Did you
campaign to sway the majority to your opinion? Or did you just write a
letter or two complaining and were disappointed because it didn't instantly
change the ARRL's policies? If you want your point of view to be policy

then you have to become very politically active in an organization.

Dee D. Flint, N8UZE

Hey, Dee. Where is it written that one must be a member of the ARRL to dislike or disapprove of their policies? Your opinion is not the end-all of arguments in this arena, shock that this must be to you.
The fact of the matter is that many, many Hams, such as myself, have dropped our memberships because of the failed policies and ever-increasing costs of said membership.
What do we get for the forty bucks a year? (or whatever it is now).
Nada...nothing.
I will continue to work DX and continue to enjoy the hobby, but the only "loss" as I see it is that I will no longer be able to attach the ARRL logo to my QSL cards. No loss there.
By the way, when those of us who used to be ARRL members voiced our dissent, our voices went unheeded. Bottom line...what's the use? One soon learns that it is a useless endeavor to "piss into the wind".
I am but one voice in this maelstrom, but I take comfort in knowing that the ARRL no longer has use of my dollars.
Know what? I am getting along just fine.
I will not give my name or callsign on these news groups.
Even YOU should be able to understand why.

> (snip)

Several years ago (four or five), QST was available at the Barnes and Noble bookstore in this area. But it then disappeared off the shelf and I haven't seen it since. When I asked the manager about it, he looked on the computer and said the magazine was no longer available from the supplier. This was surprising since the magazine sold out almost immediately each month (I missed several issues because of that).

The newsgroups rec.radio.shortwave and rec.radio.cb has been deleted from this reply (discussion is off-topic in those newsgroups).

Nope. Just value my privacy.

When asked my name I say, "Puddentain, Agrisomolov Mielivich Arkady."
Nips that one in the bud.

My answering machine gets rid of salespeople by requiring a message be left, - "Yep, you've reached me at 883-4156. Please leave name, number and a brief message. Date and time have already been reset in this, the power outage capitol of the world. Thank you."

With respect to the nifty digital displays these days. Describe your
preference.
For example, 14.295.55 or 14.295 55 or 14.29555 the other options are half
height
for hundreds and tens.

I personally like the format of one decimal and then half height for tens
and hundreds.
What do you like?

And just who is

hamvideo@juno.com ?????

I have given a real email address and feel free to respond to it.

The ARRL hasn't represented the membership directly---EVER!

The ARRL has had it's own agenda (big money) for years.

The ARRL would be considered a large corp. in most sectors, operating
under a non-profit status.

The only good about the ARRL is/was QST and now I can't even find it
on the news stands.

Bye bye ARRL.

Bye bye ham radio as we know it.

Without ole HPM, ham radio would have been dead is correct. Him alone,
NOT ARRL.
Since HPM died, the ARRL has been full of underpaid junior staff and
rampant graft with senior staff.

Life would have gone on without ham radio.

By the way, HPM was an inventer. What was one of his inventions?

What difference does it make if he couldn't get credit? MANY CAN'T OR DON'T WANT IT. Not everyone enjoys getting caught up arming themselves with the smallest, lightest weight shovel in the world. That is a large part of the problem, hundreds of thousands of people are in depth up to their ears and countless thousands have filed bankruptcy and WE PAY in the end.
They are conveniences, they can show clout, dignity, etc.. but they can create - very easily - for the best of families, a hell - real fast. G.W.

At $4.99/mo ($59.88/yr) plus tax, I'm sure it wasn't a high volume business
for Barnes and Noble, since that's a 53% premium over the membership dues,
and you don't get the other benefits which comes with membership. Only an
idiot would regularly buy QST from a news stand!

There is no such animal as a 'section director'. Perhaps you meant 'Section Manager'. There is no requirement to be a life member to be elected to that position. Neither is there such a requirement for Division Director or Division Vice Director (I was twice elected to that position, and I'm not a life member.)

Doncha just hate it when facts come into play and spoil your lovely rant?

Bullcrap. Any elected office is open to any ARRL member. Some have class
of license restrictions, but not Life Member requirements.

Several of us have already listed the numerous benefits of the ARRL. Again how did you voice your dissent? Did you get actively and heavily involved? Doesn't sound like it. If you did get involved, you did not convince the majority of members to change to your point of view.

Instead you choose to have little to no impact on proposed changes by the FCC. Yes I know individuals can write letters but a decent sized lobby has a far greater effect. An organized body can much more effectively solicit the backing of other affected groups on questions like BPL.

Being "One voice in the maelstrom" is a waste of one's time as it will be completely obliterated by that maelstrom.

Now I do not say that everyone should be a member of ARRL. That is up to the individual. However if you are not, then don't complain about their policies. Don't complain when BPL makes HF useless in your area. Don't complain when VHF/UHF frequencies get reallocated to commercial uses. Don't complain if the government should choose to eliminate amateur radio entirely as it has tried to do twice in the past.

It probably was no longer cost effective to sell it on newstands.

If the ARRL is making money (a no-no for a non-profit corp) then report them
to the IRS. If they are not making money, then no matter how big they are,
it is not about money since no one is making a profit.

Dee, how very judgemental of you, which is what I've come to expect from the very politically active - The Liberals. No, I didn't burn any bra's or jock straps, and didn't participate in any "Tech-Pride" parades. My greatest dilema was some soul-searching on whether I should continue supporting financially an organization which I thought lacked leadership and supported backward policies. Otherwise, the ARRL is an excellent educational and publishing organization.

As a matter of fact, I did write two letters to the ARRL and I was a member of the field organization. I also participated in the NOI/NPRM process.

Thanks for your concern.

> an idiot would regularly buy QST from a news
> stand!

There are circumstances that might require one to be an "idiot," Hans. In my case, I purchased it at the news stand because ARRL never seemed able to deliver my copy of the magazine (not fast enough to keep up with me). The first time I joined, my address changed several times in a single year. I joined at my home here. Two months later, I went elsewhere to prepare for our operations in Kosovo. Several months later, I went to Italy for the actual Kosovo conflict itself. Even though a change of address was sent with each move, I received only one issue of the magazine that year.

The second year was pretty much the same as the first. I moved back to the USA, moved several months later, and finally ended up back here again two months after that. I got two issues of the magazine that year and didn't rejoin at the end of the year (and didn't make any effort to get the magazine for several years).

I joined ARRL again this year and have gotten each copy of the magazine so far.

Dee got on early supporting the status quo; hook,line and sinker. She
is a perfect mouth-piece for the ARRL, and I've heard her repeating,
word for word, the policies of this organization. She is, more or
less, an official ARRL spam-bot. Wonder if she is an official
bulletin station?

> The fact of the matter is that many, many Hams, such as myself, have dropped

You could have the satisfaction of financially supporting an
organization that does not support you.

> I will continue to work DX and continue to enjoy the hobby, but the only
> "loss" as I see it is that I will no longer be able to attach the ARRL logo
> to my QSL cards. No loss there.

Yet you can still participate in their DX awards if you choose.

> By the way, when those of us who used to be ARRL members voiced our dissent,
> our voices went unheeded.

True.

> Bottom line...what's the use? One soon learns that
> it is a useless endeavor to "piss into the wind".

I understand. They had us doing that in Somalia. The "engineers"
that set up the piss-tubes should have consulted with the weatherman
on the prevailing wind directions. At least when we had a hole in the
ground to piss into, we could choose which side of the pit to stand
on.

Anyway, it was a rather unpleasant experience amid many other
unpleasant experiences. I'd rather not repeat it.

> I am but one voice in this maelstrom, but I take comfort in knowing that the
> ARRL no longer has use of my dollars.
> Know what? I am getting along just fine.
> I will not give my name or callsign on these news groups.
> Even YOU should be able to understand why.

Now you're going to run into some problems. You see, if you agree with "them," then your anonymity is A-OK. But if you disagree with them, and are anonymous, then you are a coward, guilty of heinous crimes against humanity.

Best of luck, Brian

I happen to be a stout conservative. Regardless of whether one is liberal
or conservative, one has to get involved and stay involved to be effective.
Complaining about lack of leadership simply shows that either you didn't
want to do the work yourself or that you were unable to convince the
majority to back your view.

This is not a particularly effective way to change the policies of the
organization.

Not hardly. I disapprove of some of the policies but I do not expect it to
change when my view doesn't represent the majority view. I do not consider
differences of opinion on some policies to be reason to stop supporting
them. Also I merely state that non-members shouldn't think they can change
the policies. The ARRL policies, as with any organization, will reflect the
opinions of the majority of members. Someone with a minority opinion in any
organization will have to work very hard to get the majority to adopt it.
Organizations have no obligation to reflect the opinion of non-members.

Won't happen, Dan. People like that have selective memory. They'll rail about how QST doesn't have articles about what they want to see, and conveniently forget about the important jobs ARRL does for us.

1. That only a minority of hams belong to ARRL speaks much more about hams than it does the ARRL.

2. I would challenge the ARRL haters to come up with scenario's of what the ARS would be like today (if it even existed) if there was no ARRL.

This News should be Good for Every American.

However, The Dumb Ass DeMoCratzys are All on the News about,
How this is NO Big Deal because Mister Bush (My President).
Has not build an International Coalition in Iraq and we are
being mean to other members of the International Community.

So... Whats Good for America is Bad for the DeMoCratzys.

Ham Radio started down hill when the ARRL ramed throught the "Incensing Licensing Program" in the sixites.
. Some say the FCC done it, Sorry the ARRL started it and talked the FCC into it. I know I lived through it.
It's been down hill every since then and will never change but just get worse.
Such a shame a great hobby was screwed up.
Yes the ARRL does some good but only if it helps their image or pocketbook.

Creative book keeping and Yankee lawyers keeps them out of trouble.
Are they making a profit? Hell yes. No profit, No ARRL. Can they
legally hide their profit? Well sure. With all of the books, CD's,
DVD's, tapes and magazines they sell every year you know there is a
profit. They are no different than GoodWill when it comes to making a
profit except that Goodwill actually helps people. ARRL only helps
itself!

We will probably see QST being hawked in Publishers Clearing House
before too long. Get a magazine and win a million

Un-friggin-believable.

Non-profits aren't about profit. They're about salaries.

And that is the reason I tolerate the ARRL's other crappola.

But be sure to send a thank you card to the NTIA and FEMA as well.

Lessee, just from their website, I've looked up exam dates and
locations, Contest dates and rules, Hamfest dates and locations. I've
downloaded project and info PDF's from them, looked up callsigns and
matched names with callsigns. Looked through the swap section of the
site, and been informed and sometimes entertained by the FCC enforcement
news. Off the web, I've used their hints and kinks books, and I'd be
lost without the Handbook.

And those are just the superficial things, not counting the spectrum
work and really critical stuff such as BPL.

Yup, sure signs of an organization that only helps itself!

Good luck with this one now!

- Mike KB3EIA -

Well, there you have it. What benefits Dee must benefit all.

Again
> how did you voice your dissent? Did you get actively and heavily involved?
> Doesn't sound like it. If you did get involved, you did not convince the
> majority of members to change to your point of view.

Must one become El Supremo Commandant to have an organization that
they belong to and pay dues to represent them? Must be so in this
case.

> Instead you choose to have little to no impact on proposed changes by the
> FCC.

Actually, the road the FCC took is closer to leadership of the ARS
than the road that the ARRL took.

Yes I know individuals can write letters but a decent sized lobby
has
> a far greater effect.

Which is the very saddest part of the whole episode.

An organized body can much more effectively solicit
> the backing of other affected groups on questions like BPL.

It is necessary for the ARRL to fight BPL - it threatens their very
existence.

> Being "One voice in the maelstrom" is a waste of one's time as it will be
> completely obliterated by that maelstrom.

Being in the minority doesn't necessarily make one wrong nor
necessarily make ones efforts a waste of time. Re: Galileo

>

> Dee D. Flint, N8UZE

Yes, yes, Dee. Of course. Whatever you say. ARRL spam-bot.

> Dan/W4NTI

Wrong, Dan. And don't go turning into a spam-bot sychophant.

Hanoi Jane tried that approach with the NRA, and none of us seem to
have our very own NVA anti-aircraft guns to sit behind.

With respect to the ARRL:

Withholding dues money changes them.

Not purchasing their products changes them.

Denouncing their policies changes them.

Voicing your concerns directly to the FCC cuts out the middleman.

heres some more archives of the traders net, if you see anything you like please contact the person selling the items..

Hello All:
Here is the listing for November 29, 2003

Special Thanks for Don KG4COQ for running the 64 Traders Net.

Charlie KA4TRF has a Radio Shack Scanner Model 2005. Scanner has been opened. Asking $200.00.
Contact: 727-562-2898
**********

Jim WA8JSC has a HF SWR Meter, covers 6 - 160 Meters. New in Box, $25.00.
Contact: 64 Repeater
**********
Jay KG4RMD has two Cushcraft 10 Element Boomers, Stacking Kit and Matching Harness. All for $100.00.
Contact: rjayhpd@aol.com
**********
Alex KG4OGN is looking for a GE Custom MVP VHF Repeater and a Selwave Duplexer.
Contact: kg4ogn@yahoo.com (DONT EXPECT HIM TO PAY YOU FOR IT< HE WILL WANT YOU TO DONATE IT TO HIM FOR HIS "CLUB")
**********
Listings via Email:
**NOTE**
The below listings are from an email. ALL information that I have about this listings are below. If you have questions please contact the seller.

Cleveland N4CLV (was KG4YJH) has the below listings...
(I THINK CLEVELANDS GETTING OUT OF HAM RADIO< TRY CONTACTING HIM< BUT I DONT THINK YOU WILL GET A REPLY))

Towers
A 40' Tubular triangle Tower in good shape. Three 10' foot sections and one 9' top cone section plus a 5' section that can be concreted. $50

A 50' fold over Tower that is in good shape. Has triangular Mounting base and 3 very large anchor screws to secure the base into the ground. I have most of the guy wire as well.
This tower has a Hy-gain rotor but I do not know the model. I have the

controlling cable but the controller.
I have 3 G5RV antennas that I will include with this tower. All for $150

Pushup poles
20 foot push up pole $10. 40 foot push up pole in good condition. $20
50 foot push up pole in good condition. $30 Two house mounting brackets. New $10

Roof mounting tripod. Good condition $10

Antennas
Cushcraft A505S 5 element 6m beam in good condition. $80
Cushcraft A27010S 2M/440 dual band beam. 5elements for 2 Meter, 5 elements for 440. Excellent condition Never been outside-attic kept. $75
A 3 element HF beam antenna 10M/15M/20M, good condition $40
Cushcraft ARX2B 2 meter antenna. Excellent condition. $40

Radios
Yaesu Ft-1500 2meter 60 watt mobile. Includes all standard accessories plus full size printed and bound manual and external speaker. Excellent condition $70

ICOM 2100H 2 meter 50 watt mobile. Includes all standard accessories plus full size printed and bound manual and external speaker. Excellent condition $70

Vertex/Yaesu VX-300 hand held 2 meter radio. This radio is software Programmable and includes the software and programming cable plus service and operator manual.
It is also 1w/5w capable. Will include professional looking homemade j-pole with 20 foot RG-58 cable that can be attached to radio. J-pole includes mounting bracket. Excellent condition. $40

Power supply
Radio shack 13.8 VDC / 25 amp switching power supply. Brand new in box. $50

Cable
Two 250' sections of RG8 coax. Brand new $50
Two 100' foot sections of FSJ1-50A Andrews ï¿½" superflex $40
Also have 50' foot sections of RG-213, Belden 9913, and LMR400
If any one is interested. $10 ea
Contact: chobby@trak.com or 813-888-8334

**********
Greg WB4NFP had a Dentron 160 - 10 Meter 2KW amplifier. $395.00.

Contact:727-392-5287

**********

NEXT LISTING 12/6/03

Hello All:
Here is the listing for December 6, 2003

Bill K4BYY has a Highgain 37' Crank up/Tilt over tower, Mosley 4 Element 5 band beam, covers 10-20 Meters, a CDE Ham 3 Rotor and Control box. Manuals for all. Only $850.00.
Contact: 727-585-7309

Bruno KG4SBW has a Heathkit SP-221 HF Amp. Asking $595.00.
Contact: kg4sbw@aol.com

Bobby KE4YFJ has a Diamond X-510 2 Meter/440 Base Antenna. Asking $100.00.
Contact: ke4yfj@arrl.net
Listing via Email:

Glen Martin RT-832 8' Aluminum rooftop tower - Excellent Condition - 150.00
Glen Martin RT-1832 17' 5" Aluminum rooftop tower - Excellent Condition Includes Optional MC-10 Mast Clamp. $350.00

Kenwood 930S + SP-230 external speaker, built in antenna tuner, stock filters, NO FM board, NO mike $550.00

Palomar 300A Linear Amplifier - 10 thru 40 meters - 300.00
Kenwood MJ-88 NEW! - mike plug adapter - rj45 to 8 pin - 10.00
Kenwood PG-5A NEW! - data cable - fits TMV7 & many more - 10.00
I have many rotors - Ham II's, III's, IV's, CD-45's, Alliance HD.
All rebuilt $125.00 to $300.00
Contact Mike N4AVL - n4avl1@verizon.net - 727-235-1762
or Rich KF4GAH - diepolder5@hotmail.com

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, ARRL Letter, K1XN & GoList, NG3K, W3UR & The Daily DX, N4AA & QRZ DX, N4GN, KB5NJD, N5FG, N7OU, K8YC, K8YSE, WZ8D, AK0A, WD0M, 6Y5/4S7RO, 9V1DX, CE6TBN, DL/VE3ZIK & www.contesting.info, DL1EK/DL7VOA & DX Newsletter, E21EIC, F5CQ, F5CWU & La Gazette du DX, F5OGL, F5NQL & UFT, HG4I, I1JQJ/IK1ADH & 425 DX News, JJ1BDX, JI6KVR & JA-IOTA Islands News, OH2BH, PA9JJ, RW3RN, RW6HS, UA9XC, VA3RJ & ICPO, VK4APG and ZL2HU for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th/December, through Sunday, 14th/December there were 231 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9U, 9V, 9X, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FR/j, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/m, JT, JW, JY, K, KG4, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, R1FJ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T2, T30, T32, T33, T7, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V7, VE, VK, VK9C, VK9N, VP2E, VP6, VP8, VP8/h, VP8/o, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

** IMPORTANT NOTICE/REMINDER ** The Ohio/Penn DX Bulletin now has a new FAX number. Contributors can now send/fax their DX information to the following number: 1-419-828-7791 ( F A X only! )

6Y, JAMAICA. Ron, 4S7RO, is active as 6Y5/4S7RO and states that he is on 40 meters CW most evenings (between 2300-0500z). Before that time he can be found on 20 meters SSB or CW. QSL via G0IAS.

ARCTIC GRID EXPEDITION. Jeffrey/KG0VL and Justin/K9MU will depart St. Paul, MN, at 11:30 am on January 1st. Beginning January 3rd, the two operators will activate Grids EO16 and EO26 for the next couple of weeks. Operators will sign VE4/K9MU (from EO16) and VE4/KG0VL (from EO26). Their activity will be on HF, 50, 144 and 903 MHz. Liaison frequency is 7268 kHz (Days) and 3958 kHz (Evenings). Because of increased traffic on 7268, they will also monitor 7265 kHz (+/-). Their interesting travel plans and planned operation details can be read on the following Web page at: http://www.qsl.net/k9mu/ArcticGridExpedition.html

CDXA ELECTS NEW OFFICERS. John Scott, K8YC, and Editor for the Carolina DX Association, informs OPDX that at its Annual Meeting/Christmas Party on Saturday, December 6th, the Carolina DX Association elected its officers for 2004. Results of the elections are:
President: Ted Goldthorpe, W4VHF
Vice President: Tom Wright, N4HN
Secretary/Treasurer: Jim Miller, K4SQR
Editor: John Scott, K8YC
Cluster Manager: Joe Simpkins, K4MD
Associate Cluster Mgr.: Paul Sturpe, W3GQ
Webmaster: Wayne Setzer, WB4BXW
Thanks was extended to Bob Burton, N4PQX, for serving as Vice President in the past year and immediate Past President for the preceding two years. The evening of fellowship concluded with recognition of those members who participated in CDXA's annual "Contest Within A Contest" (C Whack for short) which provides a healthy intraclub competition for participation in the CQ Worldwide Phone and CW contests.

HC8, GALAPAGOS ISLANDS. By the time you read this, Mike, G4IUF, should be active from here again as G4IUF/HC8 until January 11th. Activity will be on 160-10 meters CW/SSB.

HG04, HUNGARY (Special Prefix). Tibor, HG4I, informs OPDX that he will be using the special callsign HG04HNY between December 10th and January 12th. The special event callsign, HG04HNY, stands for: The 04 as a call area is the last two numbers of newcoming year and the HNY suffix is the abbreviation of the phrase "Happy New Year". Activity will be on all HF bands (including the WARC bands) on the following modes: CW, RTTY, BPSK, SSB, (FM on 29 MHz). He will try to take a part in all HF contests during the activity period. The stations are valid as a separate multiplier in the HA-HNY activity contest. See the rules on SM3CER's contest sevice Web site: http://www.sk3bg.se/contest/c2004jan.htm
QSL via only direct (SASE) to HG4I: Mr Tibor Szabo, A.R.S. HG4I, H-2465 Rackeresztur, Budai u. 6., Hungary. ADDED NOTE: The special QSLs are ready to send. Please send the QSLs for former HG01HNY, HG02HNY and HG03HNY to the same address above.

HI8,DOMINICAN REPUBLIC (Update from OPDX.635). Hiro, JA6WFM, who will be working in the Dominican Republic for the next year, has been authorized

to operate as JA6WFM/HI8. He did not receive the requested callsign HI8J. More details and QSL route will be announced later.

HI9, DOMINICAN REPUBLIC (Update from OPDX.638). Bill, N7OU, informs OPDX that he will be in HI9-land from February 17-26th. Bill will be active on 160-10 meters before and after the contest, CW only. QSL via N7OU.

IOTA NEWS.....
EU-047. Juergen "Jo", DL1AB, will be active as DL1AB/p from Baltrum Island (N-06 for the German Island Award) between December 25th and January 2nd. Activity will be on 80 and 40 meters SSB. QSL via his homecall to the bureau.

OC-137. Steve, G0UIH, is expected to be active again this week as VK2IAY/4 from Lamb Island between December 16-18th. QSL via G0UIH either direct or through the bureau.

OC-265. Operators David/VK4GL and Peter/VK4APG have announced a possible activation of Cato Island using the callsign VK4GL/P between December 14-17th. Activity will be on 20 meters SSB. This is a low key single antenna station operation. Fishing may take precedence. QSL to VK4APG.

SA-032
SA-091. Marco, CE6TBN, will be active from Riesco Island (SA-091) January 12-15th and Wellington Island (SA-032) January 17-20th. Activity will be on 40/20/17/15/12/10 meters SSB. QSL via N1IBM. For more info, visit the Web page at: http://www.mdxc.org/ce6tbn/tour2004

LIGHTHOUSE ACTIVITY.....
Jim, K9BIG, will be activating a few lighthouses for the ARLHS Christmas Lights QSO party that runs from December 20th to January 5th. Look for Jim to sign K9BIG/p on 40-10 meters on or around the following suggested frequencies: 7270, 14270, 21370 and 28370 (+/- depending on QRM, nets, other activations etc.). He is also going to bring his portable 6-meter beam just for fun. Jim plans to activate the following lighthouses:
December 20th - Kenosha Southport Light, Kenosha, WI (ARLHS USA-912)
December 21st - Kenosha Pierhead, Kenosha, WI (ARLHS USA-416)
January 3rd - Windpoint Light, Racine WI (ARLHS USA-894)
January 4th - North Breakwater Racine, WI (ARLHS USA-682)
QSL via his home callsign (QRZ.com).

Deacon Dave, W1MCE, will be activating the Portsmouth Harbor New Hampshire Lighthouse (ARLHS USA-662) during the Lighthouse Christmas Lights QSO Party. Specific date is unknown, but he will be on 40 then 20 meters from the mobile. So, look for him to sign W1MCE/m. His total operating schedule is hoped to be 3 hours each day on 2 different days. He has a 1 1/2 hour commute to get there. All QSOs will be QSLed automatically. Please don't send Deacon Dave any QSL cards.

Jim, K5JIM, is expected or has plans to activate two Louisiana lighthouses located in the New Orleans area on the opening day of Lighthouse Christmas Lights QSO Party. The pair includes New Canal Lighthouse (ARLHS USA-536) and Port Ponchartrain (ARLHS USA-650). These will mark the 13th and 14th activations of 2003 for Jim. The tentative time of operation for New Canal is 1500z on Saturday, December 20th for two hours. This means his activity from Port Ponchartrain will start about 1800z. Both lighthouses are on Lake Ponchartrain. QSL cards will be available via K5JIM (QRZ.com address) with a SASE.

QSL INFO AND NEWS.....
Zik, DL/VE3ZIK (4N1DX), reports that the latest ARRL 10m Contest QSL routes will be published on Thursday, December 18th on the Web page at: http://www.contesting.info

The logs for the November 3G2D DXpedition to Damas Island (IOTA SA-086, DICE-201) are now available on the Mediterraneo DX Club Web site at: http://www.mdxc.org/logsearch.asp

The correct QSL route for A7/G0MKT is NM7H. You can send QSL cards either via the RSGB or ARRL bureau.

Champ, E21EIC/XW1IC, reports that he is no longer the QSL Manager for E20NTS. Champ was his manager for long time, but now E20NTS wants to handle his QSL cards by himself. So, send all direct QSLs for E20NTS, E20NTS/8 and E20NTS/P to E20NTS's address (Supote Saripan, 19/65 Moo 5, Soi Thensoun, Klong Thanon, Saimai, Bangkok, 10220 THAILAND) or via the Bureau. Champ also states that many people have been sending QSLs for HS9IFG/P and HS1CKC/P to him, but he is not the QSL Manager for them.

Vasil, RW6HS, states to QSL I1XJP to: Pietro Corradi, via Dante Alighieri 18, Ventimiglia, IM 18039 ITALY.

POSTAGE INCREASE FOR JA. Joe, JJ1BDX, informs OPDX that the postage for a letter or a card in an envelope up to 25-grams in weight costs 110 Japanese Yen for US/Canada, Europe, and Oceania (90 Yen for Asia, 130 Yen for Africa). Due to the recent exchange rate change, 1 U.S. Dollar or a Greenstamp is no longer sufficient to compensate the postage. (As of December 8, 2003, 1 U.S. dollar has a little bit lower rate than 108 Japanese Yen.) If you send a SASE from abroad, 1 IRC is strongly suggested rather than 1 U.S. dollar since it covers the highest price for a letter, namely 130 Yen. If you have no choice but to send U.S. dollars, include TWO Greenstamps instead of one.

Ken, K6LA, was active in the ARRL 10 Meter Contest this past weekend as VY2TT from Prince Edward Island. QSL via K6LA.

NOT THE QSL MANAGER. Roger, W3SZ, has been receiving a bunch of inquiries and even some QSLs for C6ALZ (who was active in the CQWW SSB DX Contest), and he states that he IS NOT the QSL Manager for this station. He has no idea where that information came from. He doesn't even operate HF and has never been out of the country. OPDX has tried

to find the manager, but NO LUCK!

Alex, RW3RN, informs OPDX that he is now the QSL Manager for C4M (in the CQ WW DX Contest 2003). He is also now the new QSL Manager for R3ARC/1 (July 26-29th, 2000) and R1NWS (July 29-31st, 2000) for activity from Vorony Island and Nemetsky Kuzov Island (both EU-147). Alex has received the logs from former QSL Manager (UA3BZ) and about 2500 QSLs (from bureau) + 200 envelopes. QSL via RW3RN, Alex Kuznetsov, Box 57, Tambov-23,392023 Russia. His E-mail address is: rw3rn@tmb.ru
Alex's (RW3RN-QSL-Service) Web page is at:
http://www.tmb.ru/~i011f/service.html

TI9M QSL STATUS. Bill, AK0A, reports that all cards received via direct and from the Bureau have been answered as of December 10th and mailed. So, if you're looking for a card, please resend to AK0A direct only. Stations who have sent via the Bureau wait a while and U.S. stations who have sent via the Bureau will have to resend direct.

NEW BUREAU QSL ROUTE FOR TX4PG. Silvano, I2YSB, reports that there is a new Bureau QSL for the TX4PG operation (and the next DXpedition to Tokelau ZK3). The QSL Managers of these two DXpeditions are now: I2YSB, directed QSL ONLY and M5AAV, QSL Bureau ONLY.

Photos of the recent V8AQZ DXpedition to Brunei are now available online at: http://www.mdxc.org/v8aqz

QSL MANAGER/ROUTE CHANGE. Please QSL WL7M via WD0M. Joe, WD0M (ex-WL7M), has moved from Alaska to Colorado, and will be happy to provide a QSL for all the fine folks who need one. Address is OK on QRZ.com.

QSL YA1BV via JA1PBV: Sadao Ito, 3-8-12 Baraki, Ishioka-city, Ibaraki, 315-0042 JAPAN

ZL7C QSL STATUS. Ken Holdom, ZL2HU (ZL4HU), Group Organizer/Team Leader/ QSL Manager, provides an update on the processing of QSL cards for the ZL7C Chatham Islands DXpedition in October 2002: "We began processing cards approximately one year ago and to date there have been 23384 QSOs replied to directly with a further 9267 via the bureau. This gives us a total of 32651 QSOs which have been replied to out of a total of 72,213. A 45% QSL rate in the first year. As of this coming Monday, December 15th, 2003, there will be NO unanswered QSLs on hand. Please do not flood me with E-mails about QSL cards sent via the bureau as we are all only too well aware that this system takes considerably longer than the direct method. If you have any questions regarding direct QSL'ing, I am only too willing to answer these. At the pesent time there is a 24 hour turn-around for direct QSLs for all of our three DXpeditions, ZL8RI in May 1996 (not for the pirate operations at later dates), ZL9CI in January 1999 and ZL7C in October 2002. Any other enquiries, comments etc. are most welcome. The Kermadec DX Association would like to take this opportunity of wishing you all a very merry Christmas and a very happy and enjoyable DXing 2004. Regards to all.... ..... Ken Holdom ZL2HU and ZL4HU

S9, SAO TOME. Charles, S9SS, also Station Manager for Voice of America's IBB Sao Tome transmitting station, has been trying to work North American stations on topband (160m). He states that this band is just too noisy. However, he will try again this coming Friday night (starting possibly around 1900z), conditions permitting. If you need him on the other bands, try 20 meters CW (after 0030z) or 10 meters SSB between 1900-2100z. Also, visit the following Web page at: http://groups.msn.com/s9ss/s9ss.msnw

SPECIAL EVENT. Andrey, UA9XC, informs OPDX that several stations will be active between 2100z, December 18th to 2100z December 21st, to celebrate 100th anniversary of Soviet Polar Explorer/Radio Operator Ernest Krenkel (RAEM). The following memorial stations will be active:
R1AEM - QTH Murmansk R6AEM - QTH Krasnodar
R3AEM - QTH Kolomna, nr Moscow R9AEM - QTH Vorkuta
R4AEM - QTH Votkinsk, nr Izhevsk R0AEM - QTH Norilsk
For all callsigns, QSL Manager is UA9XC: A.Pervacov, P.O.Box 73, Syktyvkar, 167023 Russia. QSL via the bureau, E-mail is OK ( ua9xc@parma.ru ). Also, look for station RAEM (QTH Sankt-Petersburg). QSL via RV1AQ. For details about Ernest Krenkel, visit the Web page at:
http://qsl.net/vu2msy/ernest.htm

TA1, TURKEY. Martin, PA4WM, is now active as TA1/PA4WM. His temporary work QTH is near Istanbul. Look for his activity to be mainly on the WARC bands and 40/80 meters on CW, RTTY and SSB. There is no operating schedule (due to his work), but look for him on most days in the early morning (0430z) and in the afternoon around 1500z (ed. We spotted him as early as 1330z). His equipment is a FT-100 and a G5RV antenna. QSL info can be found at QRZ.com.

TO4, EUROPA (Update). An announcement on Sunday states that the T04E Europa team will not be shutting down on December 15th, but will be active until December 18th. The team will continue to have four stations on the air as much as possible working the low bands and modes that is needed. The team does have a concern. A tropical depression is moving their way and may hit the island on Wednesday or Thursday. It was reported on December 10th that the TO4E team had logged 21851 QSOs (50% on CW, 39% on SSB and 11% on RTTY). The band totals are as follows: 3264 on 10m, 2239 on 12m, 6584 on 15m, 3203 on 17m, 2847 on 20m, 1825 on 30m, 1412 on 40m, 351 on 80m and 126 on 160m. They also mentioned that 4108 QSOs were made by TO4WW during the CQWW DX CW Contest. The Europa Web site is:
http://europa2003.free.fr

VK0, HEARD ISLAND (Update/Disappointing News). Last week we mentioned that Jim, VK9NS, is reporting that a "scientific multi-interest team of fifteen expeditioners" is preparing to leave for Heard Island in the coming days. However, Jim did not know if there was an amateur radio operator with this team. Alan, 9V1DX (aka VK0LD and ex-VK0MM Macquarie Island 2000), informs OPDX that he is on the Australian Govt. "permanent pool" of Communcation Engineers for expeditions to Antarctica. He has confirmed that he was originally slated to be the Communication Guy on the upcoming Heard Island short expedition; however, he could not make the start date this time around due to other commitments. The Communication

Guy going to Heard Island instead does not hold a radio amateur licence and is NOT interested in Amateur Radio. None of the other people on the expedition are licenced amateurs either, and nobody going to Heard knows Morse Code. They are due to depart for Heard Island just about around the time this was written. Allan states that there are only 3 VK0 licences active at the moment (himself, Rob. Sutton - who is not on the expedition and Finn Olsen - who is the Communication Guy going to Davis Station on the Antarctic mainland for 2004). If there is any "VK0 Heard Island" station on the air over the period of the expedition, it is almost certainly going to be a pirate, especially if it is operating CW. Allan states you can obtain info on the Heard Expedition and info on Australian Govt. Antarctic activities at: http://www.aad.gov.au
OPDX visited the Web site and found it very interesting.

ZA PRESS RELEASE (PROJECT GOODWILL ALBANIA 2003 - NEWS FROM THE 5th WEEK)
From Martti, OH2BH: Press Release, December 12, 2003 -- Cold winter weather was approaching Albania when this unique program reached its final day on December 12 amid numerous ceremonies and with warm memories from the past weeks. The program was unique in many ways - taking amateur radio to a university setting as another recognized subject while also staging an international operating event with thousands of QSOs on a variety of bands and modes providing university students, those soon-to-be hams of Albania, with a remarkable experience of seeing amateur radio in action and getting their hands on while studying the subject of amateur radio. Indeed, Friday finally saw these fine students of the Polytechnic University of Tirana taking their full license (CEPT A) exam under the watchful eye of the licensing authority ERT, Enti Regulatory I Telekomunikaciove of Albania. With these extremely capable 4th and 5th year students, the required CEPT passing grade of 65% was met and well exceeded by 95% of the students resulting in 39 new licensees in Albania and doubling the amateur radio population of this what once was a much sought-after country on radio.
While participating in the graduation ceremony, Ole Garpestadt, LA2RR, IARU Region 1 Chairman, congratulated the new licensees, welcomed them to the bands and credited the University and the program organizers with their success in conducting the program at Albania's leading university and succeeding in something that the IARU itself may have had only limited results with in similar undertakings. LA2RR also participated in final negotiations with Albanian authorities for their entry to CEPT and for the integration of the Albanian licensing regime to bring it into line with the rest of the CEPT world. This would provide visiting amateurs in Albania and Albanians abroad with CEPT based treatment, thus giving ZA operating privileges with no paperwork at all. No one could have expected such a scenario ten years ago when Albania stood at the top of all wanted lists the world over.
The Rector, Professor Perparim Hoxha, thanked the course organizers for bringing this extraordinary experience to the University and affirmed continuation of the program through Professor Sonila Agago, a local teacher associated with this program, who also passed the exam. The Dean of the faculty, Professor Gezim Karapichi, was in tears with emotion while assuring that the University Club station (ZA1UT) would have their best facilities

with a new Yaesu donated lineup of FT1000MP Field and Quadra System. The lead teacher, Ulrich Weiss, DJ2YA, presented a Yaesu FT847 to his best student, Eugelent Kola, with a passing grade of 94, and described this course as a highlight of his entire professional teaching career. With his final remarks, the Project organizer, Martti Laine, OH2BH, thanked all for their 5-week serious effort and warm friendships that had affected him personally in his long journey of activating ZA-land initially in 1970, breaking through with a full ZA1A combined training course and DXpedition in 1991 and now establishing amateur radio as another subject as part of the University curriculum. Martti was awarded with a "Senior Fellow of Polytechnic University of Tirana" honor at the graduation ceremony.
On radio, a big bang event will be conducted this weekend to say good-bye to those who followed the program during the past weeks and now want to wish the program participants a safe journey back home. The activity will be on many bands including the ARRL 10M contest with four stations at multiple locations, operated by DJ2YA, G3LQP, LA2RR, OH2BH, OH2PM, Z35M, Z36W, Z31GX and several local ZA operators. The program is set to be closed on Monday, December 15th, when all participants will be flying home to their missed families and a well deserved Christmas holiday. Albania is a Muslim country and Christmas decorations now dominate the scene to bring the Yuletide message to ZA-land. Merry Christmas to all the Deserving from downtown Tirana."

ZD8, ASCENSION ISLAND. Jim, N6TJ, will be active as ZD8Z in the ARRL DX CW Contest as a Single-Op/ALL Band entry. QSL via VE3HO.

You do realize that the ARRL has the publication and distribution of QST contracted out, don't you? You should crab to them, not the league per se.

I had similar problems when I was globe trotting, like you. But when I finally did settle down I dropped both QST and CQ a note...and guess what? They sent me every single issue I missed.
Amazing, hu?

Quicken lets you see how you're doing. When I charge, it is entered in a Quicken CC account. The end total is transferred to an (as yet) un-numbered check to the CC company. I know at a glance how my finances are.

Of course, I've never sent those bastards a dime in interest. If I can't afford to pay for it, I'll save until I do. No balance, no interest.

If they are making a profit, then who is getting the money?? It's got to be going somewhere. There are no stockholders receiving dividends. It doesn't do any good just to sit on the money. And don't say salaries as that is fully documented in the financial records and is not profit. If you believe the salaries are too high, get on the board that makes the decisions and reduce them.

Guess again. Lies won't work here, Kevvy.

GEORGE Magazine, October 15, 2000

The Real Military Record of George W. Bush: Not Heroic, but Not AWOL, Either
By Peter Keating and Karthik Thyagarajan

---
----

For more than a year, controversy about George W. Bush's Air National Guard
record has bubbled through the press. Interest in the topic has spiked in
recent days, as at least two websites have launched stories essentially
calling Bush AWOL in 1972 and 1973. For example, in "Finally, the Truth
about Bush's Military Record" on TomPaine.com, Marty Heldt writes, "Bush's
long absence from the records comes to an end one week after he failed to
comply with an order to attend 'Annual Active Duty Training' starting at the
end of May 1973... Nothing indicates in the records that he ever made up the
time he missed." And in Bush's Military Record Reveals Grounding and Absence
for Two Full Years" on Democrats.com, Robert A. Rogers states: "Bush never
actually reported in person for the last two years of his service - in
direct violation of two separate written orders."

Neither is correct.

It's time to set the record straight. The following analysis, which relies
on National Guard documents, extensive interviews with military officials
and previously unpublished evidence of Bush's whereabouts in the summer and
fall of 1972, is the first full chronology of Bush's military record. Its
basic conclusions: Bush may have received favorable treatment to get into
the Guard, served irregularly after the spring of 1972 and got an expedited
discharge, but he did accumulate the days of service required of him for his
ultimate honorable discharge.

---
----

At the Republican convention in Philadelphia, George W. Bush declared: "Our military is low on parts, pay and morale. If called on by the commander-in-chief today, two entire divisions of the Army would have to report, 'Not ready for duty, sir.'" Bush says he is the candidate who can "rebuild our military and prepare our armed forces for the future." On what direct military experience does he make such claims?

George W. Bush applied to join the Texas Air National Guard on May 27, 1968, less than two weeks before he graduated from Yale University. The country was at war in Vietnam, and at that time, just months after the bloody Tet Offensive, an estimated 100,000 Americans were on waiting lists to join Guard units across the country. Bush was sworn in on the day he applied.

Ben Barnes, former speaker of the Texas House of Representatives, stated in September 1999 that in late 1967 or early 1968, he asked a senior official in the Texas Air National Guard to help Bush get into the Guard as a pilot. Barnes said he did so at the behest of Sidney Adger, a Houston businessman and friend of former President George H. W. Bush, then a Texas congressman. Despite Barnes's admission, former President Bush has denied pulling strings for his son, and retired Colonel Walter Staudt, George W. Bush's first commander, insists: "There was no special treatment."

The younger Bush fulfilled two years of active duty and completed pilot training in June 1970. During that time and in the two years that followed, Bush flew the F-102, an interceptor jet equipped with heat-seeking missiles that could shoot down enemy planes. His commanding officers and peers regarded Bush as a competent pilot and enthusiastic Guard member. In March 1970, the Texas Air National Guard issued a press release trumpeting his performance: "Lt. Bush recently became the first Houston pilot to be trained by the 147th [Fighter Group] and to solo in the F-102... Lt. Bush said his father was just as excited and enthusiastic about his solo flight as he was." In Bush's evaluation for the period May 1, 1971 through April 30, 1972, then-Colonel Bobby Hodges, his commanding officer, stated, "I have personally observed his participation, and without exception, his performance has been noteworthy." In the spring of 1972, however, National Guard records show a sudden dropoff in Bush's military activity. Though trained as a pilot at considerable government expense, Bush stopped flying in April 1972 and never flew for the Guard again.

Around that time, Bush decided to go to work for Winton "Red" Blount, a Republican running for the U.S. Senate, in Alabama. Documents from Ellington Air Force Base in Houston state that Bush "cleared this base on 15 May." Shortly afterward, he applied for assignment to the 9921st Air Reserve Squadron in Montgomery, Ala., a unit that required minimal duty and offered no pay. Although that unit's commander was willing to welcome him, on May 31 higher-ups at the Air Reserve Personnel Center in Denver rejected Bush's request to serve at the 9921st, because it did not offer duty equivalent to his service in Texas. "[A]n obligated Reservist [in this case, Bush] can be assigned to a specific Ready Reserve position only," noted the disapproval memo, a copy of which was sent to Bush. "Therefore, he is ineligible for assignment to an Air Reserve Squadron."

Despite the military's decision, Bush moved to Alabama. Records obtained by Georegemag.com show that the Blount Senate campaign paid Bush about $900 a month from mid-May through mid-November to do advance work and organize events. Neither Bush's annual evaluation nor the Air National Guard's overall chronological listing of his service contain any evidence that he performed Guard duties during that summer.

On or around his 27th birthday, July 6, 1972, Bush did not take his required annual medical exam at his Texas unit. As a consequence, he was suspended from flying military jets. Bush spokesperson Dan Bartlett told Georgemag.com: "You take that exam because you are flying, and he was not flying. The paperwork uses the phrase 'suspended from flying,' but he had no intention of flying at that time."

Some media reports have speculated that Bush took and failed his physical, or that he was grounded as a result of substance abuse. Bush's vagueness on the subject of his past drug use has only abetted such rumors. Bush's commanding officer in Texas, however, denies the charges. "His flying status was suspended because he didn't take the exam,not because he couldn't pass," says Hodges. Asked whether Bush was ever disciplined for using alcohol or illicit drugs, Hodges replied: "No."

On September 5, Bush wrote to then-Colonel Jerry Killian at his original unit in Texas, requesting permission to serve with the 187th Tactical Reconnaisance Group, another Alabama-based unit. "This duty would be for the months of September, October, and November," wrote Bush.

This time his request was approved: 10 days later, the Alabama Guard ordered Bush to report to then-Lieutenant Colonel William Turnipseed at Dannelly Air Force Base in Montgomery on October 7th and 8th. The memo noted that "Lieutenant Bush will not be able to satisfy his flight requirements with our group," since the 187th did not fly F-102s.

The question of whether Bush ever actually served in Alabama has become an issue in the 2000 campaign-the Air Force Times recently reported that "the GOP is trying to locate people who served with Bush in late 1972 ... to see if they can confirm that Bush briefly served with the Alabama Air National Guard." Bush's records contain no evidence that he reported to Dannelly in October. And in telephone interviews with Georgemag.com, neither Turnipseed, Bush's commanding officer, nor Kenneth Lott, then chief personnel officer of the 187th, remembered Bush serving with their unit. "I don't think he showed up," Turnipseed said.

Bush maintains he did serve in Alabama. "Governor Bush specifically remembers pulling duty in Montgomery and respectfully disagrees with the Colonel," says Bartlett. "There's no question it wasn't memorable, because he wasn't flying." In July, the Decatur Daily reported that two former Blount campaign workers recall Bush serving in the Alabama Air National Guard in the fall of 1972. "I remember he actually came back to Alabama for about a week to 10 days several weeks after the campaign was over to complete his Guard duty in the state," stated Emily Martin, a former Alabama resident who said she dated Bush during the time he spent in that state.

After the 1972 election, which Blount lost, Bush moved back to Houston and subsequently began working at P.U.L.L., a community service center for disadvantaged youths. This period of time has also become a matter of controversy, because even though Bush's original unit had been placed on alert duty in October 1972, his superiors in Texas lost track of his whereabouts. On May 2, 1973, Bush's squadron leader in the 147th, Lieutenant Colonel William Harris, Jr. wrote: "Lt. Bush has not been observed at this unit" for the past year. Harris incorrectly assumed that Bush had been reporting for duty in Alabama all along. He wrote that Bush "has been performing equivalent training in a non-flying status with the 187 Tac Recon Gp, Dannelly ANG Base, Alabama." Base commander Hodges says of Bush's return to Texas: "All I remember is someone saying he came back and made up his days."

Two documents obtained by Georgemag.com indicate that Bush did make up the time he missed during the summer and autumn of 1972. One is an April 23, 1973 order for Bush to report to annual active duty training the following month; the other is an Air National Guard statement of days served by Bush that is torn and undated but contains entries that correspond to the first. Taken together, they appear to establish that Bush reported for duty on nine occasions between November 29, 1972-when he could have been in Alabama-and May 24, 1973. Bush still wasn't flying, but over this span, he did earn nine points of National Guard service from days of active duty and 32 from inactive duty. When added to the 15 so-called "gratuitous" points that every member of the Guard got per year, Bush accumulated 56 points, more than the 50 that he needed by the end of May 1973 to maintain his standing as a Guardsman.

On May 1, Bush was ordered to report for further active duty training, and documents show that he proceeded to cram in another 10 sessions over the next two months. Ultimately, he racked up 19 active duty points of service and 16 inactive duty points by July 30-which, added to his 15 gratuitous points, achieved the requisite total of 50 for the year ending in May 1974.

On October 1, 1973, First Lieutenant George W. Bush received an early honorable discharge so that he could attend Harvard Business School. He was credited with five years, four months and five days of service toward his six-year service obligation.

Sure, and I bet you think that everybody should "own" a black,
too, just so they can iron your KKK sheets. And why is it that
KKK members have to hide their identity, could it be they're
secretly ashamed of being that goddamned ignorant?

Oh, BS, Dee. You just got through saying that if you don't belong, if
you don't rise to the top of the food chain, blah blah, horse crap,
blah blah.

The ARRL wants to be the -ONE- voice for the ARS. I suggest that they
start with forward thinking leadership representing all, not just
their CW-centric membership. Or get out of the way.

Brakejob/4ID, the only problem with your little organ grinder/monkey
scenario is that is didn't play out here.

You smell like you've been pissed on, so perhaps you've got some other
monkey scenario going on there. In any case, its none of my biddness
what you do in the privacy of your home so please stop trying to
entertain us with it here.

With all kind wished for a speedy recovery, my T5 logs are intact.
You're still not in them, so don't solicit for an unearned card.

Brian

The FCC spoke. And what they spoke was not ARRL majority opinion.

What do you make of that, Dee?

Who said they were too high?

They have to balance their books somehow (to avoid the appearance of
profit), and the salary is the most convenient place to dump the
excess.

It's about your ignorance of what a non-profit really is.

So you didn't read the whole message through! "old friend and mentor" was
the reference, Not Trent Lot, he only complimented his ... But you missed
it!
Also, many of the southern "republicans" were originally Democrats, who
jumped ship! But largely continued to vote the same way after changing
their registration.

BTW: The comment was also a reference to Clinton..... But you missed that
too!
And what has fishing got to do with this? Dum Bass Bite on Worms! Do you
fish?
Try Lake MoMaw sometime, excellent fishing there!

Like yourself, and the phony "name" you hide behind?
But then the KKK wasn't mentioned until you brought it up....was it?
Your a former member I take it? You seem to know a lot about them.

Oh yeah...non-profit is the best place to be...And, the greates exploiter of
human emotion, etc. With little effort, the dollars churn in--most people
don't file for the donation they are entitled to (only large donations whose
contributors are also playing the non-profit game).

That's why I'd like to see the tax structure change to some kind of percentage across the board. The *only* entity that would not have to pay any would be a church--and that only for the church building, its parking lot, and its parish. If they've got a private school, nursing home, etc., they pay. And, no deductions for *anyone* or *anything* across the board. Colgate, Mr. Bates, and me all pay the same percentage of tax out of our income; that's it--end of game.

Why limit any exclusion to just the church building, parking lot, and parish? Since churches have been running schools, colleges, homeless shelters, women and youth shelters, food kitchens, youth camps and sports activities, hospitals, nursing homes, and so on, for many years (some long before this country was created and each requiring buildings, land, or equipment), such a limit would have a serious impact on many traditional church activities.

The newsgroup "rec.radio.cb" deleted from this message.

WHAT I DO NOT UNDERSTAND IS . . .
= = = The 'same' People Who Want Total Separation of Church and State.
= = = Want to Tax Churches and Any Religious Charitable Activities.

I For One Believe That: There Should be Separation of Organized
Church and Organized State. But that there IS the 'personal' FREEDOM
to be a Religious Person 'within' the State Setting. NO Taxation of
ANY Religious Activities or Properties.

The Simple Fast Is: For about 150 Years before the Personal Income
Tax and the Creation of the IRS by the Government of the USofA. The
were NO Laws establishing Taxation of Religious Properties and
Charitable Giving (Restricting Religious Freedom).

God Bless America ~ RHF

willingness to display in in a public forum.

> "old friend and mentor" was
> the reference, Not Trent Lot, he only complimented his ... But you missed
> it!

Wrong. You are the one who made the stupid blanket statement in
a thtread about Trent Lott, a well-known Republican and
conservative. Start reading a book once in a while instead of
playing your Game Boy. Maybe you can compose sentences that say
what you mean instead of you making excuses for screwing up
afterwards.

> Also, many of the southern "republicans" were originally Democrats, who
> jumped ship!

Are you just finding this out? Try telling something that isn't
common knowledge.

> But largely continued to vote the same way after changing
> their registration.

But YOU made a blanket statement that was in error......you need
to brush up on your reading comprehension, stupid.

> BTW: The comment was also a reference to Clinton..... But you missed that
> too!

You are using the "I meant to do that" excuse for your screw up.
You made the erroneous statement in a thread about Trent Lott
and his illegitamate child. And Clinton wasn't the only
President who had affairs, dipshit.

> And what has fishing got to do with this?

Nobody but YOU brought that up....

> Dum Bass Bite on Worms!

You write like Tor Johnson.

> Do you fish?

Yeah, looks like I reeled in a stupid one that is undersize.
That's you if you didn't catch on.

> Try Lake MoMaw sometime, excellent fishing there!

I prefer salt water fishing.

> > > Trent Lot was only trying to be kind to an old man on his birthday.
> Nothing
> > > bad about that!
>
> > Sure, and I bet you think that everybody should "own" a black,
> > too, just so they can iron your KKK sheets. And why is it that

>
> Like yourself, and the phony "name" you hide behind?

Or how about somebody who posts with a pacbell.net on the header
but in actuality uses prodigy.com?
Try again, Pee Wee.

> But then the KKK wasn't mentioned until you brought it up....was it?

Neither was "fishing," was it?

> Your a former member I take it? You seem to know a lot about them.

What ever gave you that idea? Are you smoking crack again? Did
my statement hit a litle too close to home, I'd say YOU are a
member, or at the very least a sympathizer.

If you don't understand it, then allow me to help. The term "separation of church and state" does not appear in the US Constitution, nor the Declaration of Independence. The closest thing to it is in the First Amendment, which starts with my favorite five words:

"Congress shall make no law respecting an establishment of religion or prohibiting the free exercise thereof ..."

Only a lawyer could claim not to understand the plain meaning of those words.

Dave

How many Democrats have been mentioned for the "Hummers" they received in
the White House?
I did not address Trent lott, only "His Mentor"
"don't speak ill of the dead" SO I have avoided using the Senators name!

> > And what has fishing got to do with this?
You referred to a breed of "Bass" in both responses!
But you don't remember do you?

> Or how about somebody who posts with a pacbell.net on the header
> but in actuality uses prodigy.com?

Interesting, I was unaware that I appeared as a Prodigy user, pacbell.net
contracts with many services, Prodigy, Yahoo, and a others. But none to
which I subscribe.

> > Your a former member I take it? You seem to know a lot about them.
> What ever gave you that idea?
Your expounding on the topic without previous reference!

Even worst, the "Black Listed Journalist" Ya, Sure!

> Texas the most polluted state in the Union.

This is a misleading statement. There are many different kinds of
pollution, and this implies Texas is highest overall or in all
categories, which it is not.

> During my tenure, Houston replaced Los Angeles as the
> most
> smog-ridden city in America.

Ozone is only one component of air pollution; there are five others,
according to the EPA. Houston surpassed L.A. in ozone only (not other
kinds of air pollution or pollution overall) and only in 1999-2000.

These will be of interest:

http://www.findarticles.com/cf_0/m1282/13_52/63173670/p1/article.jhtml
"Anyone who claims that Houston's smog problems are equal to or worse
than L.A.'s is misinformed," says Kay Jones, a former EPA official who
now consults on air quality."

http://www.dallasnews.com/texas_southwest/STORY.e9eb444f2b.b0.af.0.a4.cccba.
html
"In some ways, calling Houston America's smoggiest city misrepresented
the relative quality of air in the two cities. Los Angeles' air is
worse than Houston's in other categories. But ozone is the primary
pollutant of concern and therefore gets more attention, officials
said."

http://www.rice.edu/projects/reno/rn/20001102/Templates/air.html
"Houston's number of ozone violation days are actually somewhat fewer
than in the 1980s. The difference seems to be that Los Angeles has
improved more and faster."

Those were older articles. Here's more recent info on ozone
violations:

http://www.lungusa.org/air2001/analysis02.html#woes
State of the Air 2002

"For the third straight year, the top four most ozone-polluted metropolitan areas were in California: Los Angeles-Riverside-Orange County; Bakersfield; Fresno; and Visalia-Tulare-Porterville. The state also has the five most ozone-polluted counties: San Bernadino has been number 1 three years in a row; Kern, comes in at number 2 this year, after claiming the number 3 spot for the previous two years; Fresno moves up to number 3 after two years as the fourth-most polluted county, Riverside is number 4, after two years as the second-most polluted county; and Tulare, number five for the second year in a row."

And overall air quality:

http://www.chron.com/cs/CDA/ssistory.mpl/metropolitan/2056693
Number of days in 2000-2002 when air quality was unhealthy
1. Riverside-San Bernardino, Ca. 445 days
2. Fresno, Ca. 421
3. Bakersfield, Ca. 409
4. Los Angeles-Long Beach, Ca. 255
5. Sacramento, Ca. 163
6. Pittsburgh, Penn. 134
7. Knoxville, Tenn. 109
8. Birmingham, Al. 100
9. Houston, Tx. 94
10. Baltimore, Md. 93

Once again -- ozone (the main component of smog) is not the only kind of air pollution, and probably not even the most dangerous:

http://www.cnn.com/2003/TECH/science/05/01/smoggy.skies.ap/index.html
".... 1999-2001 EPA data, do not take into account a pollutant that's considered more dangerous than smog -- tiny particles of soot that can lodge deep in the lungs and cause heart problems and even death."

http://bicycleaustin.info/articles/pol-exercise-risk.html
"Severe particulate (soot) pollution exists in many urban and desert areas, including Los Angeles, Philadelphia, Chicago, New York City, Salt Lake City and Phoenix, which in 1998 surpassed Riverside, Calif., with the nation's highest particulate levels. Levels of particulate matter in Houston's air do not exceed the limit set in the current national health standard for that air pollutant."

There is no good reason to spread lies and exaggerations about Houston and Texas in the name of politics.

JIP,

You are confusing the issue with the facts. You have the facts.

Jerks who author stuff like that use scattered facts in their BS rants.
Plus, they don't listen to followups like yours.

As Jesus said, "The truth is the truth no matter who says it."

The corollary is true as well: Democrats speak BS even in those rare
instances when they try to tell the truth. Unfortunately, THAT doesn't
happen often enough to have reliable data for a measurable statistic.

heres some more archives of the traders net, if you see anything you like please contact the person selling the items..

Hello All:
Here is the listing for November 29, 2003

Special Thanks for Don KG4COQ for running the 64 Traders Net.

Charlie KA4TRF has a Radio Shack Scanner Model 2005. Scanner has been opened. Asking $200.00.
Contact: 727-562-2898
**********

Jim WA8JSC has a HF SWR Meter, covers 6 - 160 Meters. New in Box, $25.00.
Contact: 64 Repeater
**********
Jay KG4RMD has two Cushcraft 10 Element Boomers, Stacking Kit and Matching Harness. All for $100.00.
Contact: rjayhpd@aol.com
**********
Alex KG4OGN is looking for a GE Custom MVP VHF Repeater and a Selwave Duplexer.
Contact: kg4ogn@yahoo.com (DONT EXPECT HIM TO PAY YOU FOR IT< HE WILL WANT YOU TO DONATE IT TO HIM FOR HIS "CLUB")
**********
Listings via Email:
**NOTE**
The below listings are from an email. ALL information that I have about this listings are below. If you have questions please contact the seller.

Cleveland N4CLV (was KG4YJH) has the below listings...
(I THINK CLEVELANDS GETTING OUT OF HAM RADIO< TRY CONTACTING HIM< BUT I DONT THINK YOU WILL GET A REPLY))

Towers
A 40' Tubular triangle Tower in good shape. Three 10' foot sections and one 9' top cone section plus a 5' section that can be concreted. $50

A 50' fold over Tower that is in good shape. Has triangular Mounting base and 3 very large anchor screws to secure the base into the ground. I have most of the guy wire as well.
This tower has a Hy-gain rotor but I do not know the model. I have the

controlling cable but the controller.
I have 3 G5RV antennas that I will include with this tower. All for $150

Pushup poles
20 foot push up pole $10. 40 foot push up pole in good condition. $20
50 foot push up pole in good condition. $30 Two house mounting brackets. New $10

Roof mounting tripod. Good condition $10

Antennas
Cushcraft A505S 5 element 6m beam in good condition. $80
Cushcraft A27010S 2M/440 dual band beam. 5elements for 2 Meter, 5 elements for 440. Excellent condition Never been outside-attic kept. $75
A 3 element HF beam antenna 10M/15M/20M, good condition $40
Cushcraft ARX2B 2 meter antenna. Excellent condition. $40

Radios
Yaesu Ft-1500 2meter 60 watt mobile. Includes all standard accessories plus full size printed and bound manual and external speaker. Excellent condition $70

ICOM 2100H 2 meter 50 watt mobile. Includes all standard accessories plus full size printed and bound manual and external speaker. Excellent condition $70

Vertex/Yaesu VX-300 hand held 2 meter radio. This radio is software Programmable and includes the software and programming cable plus service and operator manual.
It is also 1w/5w capable. Will include professional looking homemade j-pole with 20 foot RG-58 cable that can be attached to radio. J-pole includes mounting bracket. Excellent condition. $40

Power supply
Radio shack 13.8 VDC / 25 amp switching power supply. Brand new in box. $50

Cable
Two 250' sections of RG8 coax. Brand new $50
Two 100' foot sections of FSJ1-50A Andrews ï¿½" superflex $40
Also have 50' foot sections of RG-213, Belden 9913, and LMR400
If any one is interested. $10 ea
Contact: chobby@trak.com or 813-888-8334

**********
Greg WB4NFP had a Dentron 160 - 10 Meter 2KW amplifier. $395.00.

Contact:727-392-5287

**********

NEXT LISTING 12/6/03

Hello All:
Here is the listing for December 6, 2003

Bill K4BYY has a Highgain 37' Crank up/Tilt over tower, Mosley 4 Element 5 band beam, covers 10-20 Meters, a CDE Ham 3 Rotor and Control box. Manuals for all. Only $850.00.
Contact: 727-585-7309

Bruno KG4SBW has a Heathkit SP-221 HF Amp. Asking $595.00.
Contact: kg4sbw@aol.com

Bobby KE4YFJ has a Diamond X-510 2 Meter/440 Base Antenna. Asking $100.00.
Contact: ke4yfj@arrl.net
Listing via Email:

Glen Martin RT-832 8' Aluminum rooftop tower - Excellent Condition - 150.00
Glen Martin RT-1832 17' 5" Aluminum rooftop tower - Excellent Condition Includes Optional MC-10 Mast Clamp. $350.00

Kenwood 930S + SP-230 external speaker, built in antenna tuner, stock filters, NO FM board, NO mike $550.00

Palomar 300A Linear Amplifier - 10 thru 40 meters - 300.00
Kenwood MJ-88 NEW! - mike plug adapter - rj45 to 8 pin - 10.00
Kenwood PG-5A NEW! - data cable - fits TMV7 & many more - 10.00
I have many rotors - Ham II's, III's, IV's, CD-45's, Alliance HD. All rebuilt $125.00 to $300.00
Contact Mike N4AVL - n4avl1@verizon.net - 727-235-1762
or Rich KF4GAH - diepolder5@hotmail.com

**********

NEXT LISTING 12/13/03

Hello All:
Here is the listing for December 13, 2003

***Important Notice***
Starting next week the Traders Net will start at 8 pm.
I am looking for my replacement. Someone who can run the Traders Net every Saturday at 8 pm. Any body who is interested please email me at ke4yfj@arrl.net

Don KG4COQ is looking for a SMA Male to a BNC Female Adaptor.
Contact: kg4coq@hotmail.com

Jay KG4RMD has two Astron RS-20, 20 Amp Power Supply. $45.00 Each.
Contact: rjayhpd@aol.com

Charlie KA4TRF has an Icom 701 HF rig with a 20 Power Supply, Desk Mic and the manual. $150.00.
Contact: 727-562-2898

Jim K4IYD has an MFJ CW Keyboard Keyer. Make Offer.
Contact: ka4idj@aaahawk.com

Mike W4MDW is looking for two 50' Push up Poles.
Contact: 813-936-7045

## 5078. 146.640 KG4LEG update

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-15 23:07:10 UTC
From: hamradioman2000@yahoo.com
Message-ID: <e95066a4.0312151507.1e3c0cc@posting.google.com>
Source record: 60598

today KG4LEG was on the repeater several times trying to stir up
trouble, no one was replying to him, so he died off quick each time.
he was doing the usual "FAG BOY this/PUNK BOY that" calling several
users fags.

There you show how out of date you are. In recent years, the ARRL has
shifted to a neutral stand on CW. Their efforts have indeed been centered
on more important issues. What policies do you think the ARRL should be
focusing on? They have to pick and choose. And again they have to pick the

issues that the majority of their members want not the minority and not non-members. If they don't, they'll be voted out of office and someone will be put in who will do it that way.

And what efforts did you make to convert the majority of members to your point of view?? While the items you list are worthy activities, they don't do much to change policy.

Very simple. The ARRL only has the power to lobby. They cannot force the
FCC to go along with the ARRL opinion.

Ok where is the money going?? You said they dump it into salaries thus
implying that said salaries are artificially inflated and then indicate that
you don't think the salaries are too high. Which is it? Facts please, not
emotional innuendo.

If we are going all the way on separation of church and state, why should
they get any special status beyond what other non-profit organization would
get?

Amateur Radio Newsline™ Report 1374 – December 12, 2003

LISTENER ADVISORY: PLEASE ASSIST IN THIS SURVEY

This is directed only to those who are not currently ARRL members.

Amateur Radio Newsline has agreed to help compile a survey which seeks answers for these two questions:

1: If you are not a member of the ARRL, why not?

2: If you were a member of the ARRL and quit, why?

If you are already an ARRL member, please do not reply as those conducting the survey only want to hear from those hams who never joined or who have dropped their membership.

Please respond by e-mail to hamvideo@juno.com before December 18th. And we sincerely thank-you for assisting in this survey. (The Producers)

**

Amateur Radio Newsline report number 1374 with a release date of Friday, December 12 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. A new study says that the Executive Branch should take over the duties of the FCC, hams in Australia could loose part of the 70 centimeter band and the K-6-D-U-E commemorative event is finally on the air from space. Find out the details on Amateur Radio Newsline report number 1374 coming your way right now.

(Billboard Cart Here)

**

RADIO POLITICS: STUDY SAYS WHITE HOUSE SHOULD REGULATE RF SPECTRUM

A new study says that its time for the White House to replace the FCC as the nations regulator of the airwaves. Amateur Radio Newsline’s Bill Pasternak, WA6ITF, is here with the story:

--

The Center for Strategic and International Studies is a private research organization that analyzes global issues. And in a recent report, it basically posed the rhetorical questions of -- what if the FCC went away -- and -- what if the Executive branch of the federal government -- the White House -- took over management of the nation’s airwaves?

Would it be better or worse for America? The Center says yes. That in its view, such a change would definitely improve the way the finite resource called electromagnetic spectrum is managed, but critics have their doubts. One told Amateur Radio Newsline: -- quote -- “You think the spectrum management is bad now, put it under the executive branch” -- unquote.

Be that as it may, the Center’s report called Spectrum Management for the 21st Century was recently presented to Representative Tom Davis. Davis is chairman of the House Committee on Government Reform and the report recommends a number of steps to stop what the think-tank describes as the increasing number of fights over existing spectrum space.

Among its recommendations are to develop a national spectrum strategy. Increase research support for technologies that make better use of the spectrum and the controversial one. Establish a spectrum oversight advisory board to implement full White House control of all spectrum related matters.

Davis said his committee will weigh the report’s findings, along with the results of five ongoing General Accounting Office reviews and a Presidential Spectrum Policy Initiative study commissioned last June. With all of this information for Congress to gather and digest, any change in who will regulate the nations spectrum is probably years, if not decades away.

With thanks to KC0DGY for bringing this to our attention, I’m Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

Currently, the Federal Communications Commission oversees commercial use of the electronic magnetic spectrum while the National Telecommunications and Information Administration handles all aspects of government use. Its far to early to speculate on what effect -- if any -- such a change might have on Amateur Radio.

More information can be found on-line at http://www.gcn.com/vol1_no1/mobile-wireless/24166-1.html (KC0DGY, GCN)

**

INTERNATIONAL - VK: 20 - 430 MHZ AT RISK IN VK-LAND

Australian hams may loose access to all of 420 through 430 MHZ. This, as demands in this part of the spectrum by non-amateurs increases.

Q-News reports on an e-mail from the Space & Terrestrial Systems Team at the Australian Communications Authority to the Wireless Institute of Australia’s Federal President Ernest Hocking, VK1LK, last Tuesday. It deals with an amendment that was made to the Australian radio regulations recently that prohibits the operation of amateur stations in the frequency band 420-430 MHz in certain locations. This, to minimize the risk of interference to that nations Fire Brigades Network and the Mobile Data Radio Service emergency services that operate in this frequency band.

VK1LK told Q-NEWS that he will continue to adopt the view that the Wireless Institute of Australia is looking for primary allocation in the 430 to 440 MHz

band -- or at least some part of it -- to protect ham radio interests. (Q-News)

**

INTERNATIONAL: BIG HAM RADIO EDUCATIONAL SUCCESS IN ALBANIA

Success reported for 33 students in an internationally sponsored Albanian Amateur Radio training project. We go across the Atlantic to Jeremy Boot, G4NJH, is in Nottinham the UK for the latest:

--
The following update on the unique amateur radio training course that is ongoing in Albania has been sent in by Martti Laine, OH2BH, in Tirana.

"A memorable second week came to an end when the US ARRL delegation headed by K7WX and K9LA departed Tirana with many fond memories and new friendships taken back home”

"The theory exam was conducted on Wednesday the 26th of November with 33 students gaining a pass at the CEPT 1 level. Now the course will move on to pure amateur radio related subjects under the leadership of Uli, DJ2YA, while John, G3OKA, will head back to the UK after a job well done.”

Britain's RSGB deserves credit for their support of the first part of the program. I’m G4NJH, in Nottingham.

--

Another wave of lecturers representing Finland and Germany has now arrived. Also, Albanian authorities have released the callsign ZA1UT. This is an acronym for the 'University of Tirana and is meant to assist in commemorating this extraordinary ham radio educational program. (GB2RS)

**

HAM RADIO IN SPACE: K6DUE OPERATING EVENT UNDER WAY

The K6DUE International Space Station Commemorative Event from the International Space Station is finally under way. What’s described as a challenging schedule kept the crew from getting on the air November 29th and 30th, but the ISS ham station was active during a pass on Saturday, December 6th. We have more in this report:

--
According to ARISS International Chairman Frank Bauer, KA3HDO, numerous hams across North America and Europe were able to contact with Astronaut Mike Foal, KB5UAC or heard the ISS ham radio station downlink. Those who did qualify for a special ISS Commemorative Certificate. Information on obtaining one is on-line at www.rac.ca/ariss

KA3HDO also reports that the Phase 2 equipment setup has been completed and the gear activated at approximately 11:20 UTC on December 8th. The new radio is a Kenwood D 700 dual band transceiver. It appeared to operate flawlessly but the packet operation was turned off after Russian controllers requested that the

crew power down the hardware while bilateral safety paperwork coordination is being completed. Bauer says that hopefully, this will be completed quickly and that the long awaited packet operation will be on the air once again.

For the Amateur Radio Newsline, Norm Seeley, KI7UP.

--

The event commemorates the contributions of the late Roy Neal, K6DUE, to manned ham radio space operations and continues through the end of the month. (ARISS)

**

Break 1

From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W3OC repeater serving North Huntington, Pennsylvania.

**

LAW: HIGH TECH MUST FIGHT CYBERTERRORISM

The Federal government says that technology companies must cooperate in the battle against cyber terrorism. This, according to Homeland Security Secretary Tom Ridge who said that the alternative is to submit to government imposed security regulations.

Speaking at a recent two day conference sponsored by his agency, Ridge said that the enemies of freedom use the same techniques as hackers do and the nations industries must be as diligent and determined as the hackers."

The two-day conference was the first formal brainstorming session to draft security guidelines and a cyberspace attack warning systems. (Published news reports)

ENFORCEMENT: FCC AGAIN WARNS AERO ENTHUSIASTS ABOUT UNLICENSED OPERATIONS

The FCC is once again warning several hang gliding and sky-diving enthusiasts and the operators of a number of training facilities about the use of ham gear by unlicensed persons. Bruce Tennant, K6PZW, reports:

--

In a letter to sixteen such California based flying groups, the FCC’s Riley Hollingsworth says that the Commission is receiving an increasing number of complaints that users of these facilities are operating Amateur Radio equipment without a license. Hollingsworth specifically notes the use of hand-held radio transceivers as the biggest violation.

Hollingsworth says that while the FCC encourages the use of radio equipment for the safety of flyers, there are numerous alternative radio services that do not

require a license. These include the Family Radio Service and the Multiple Use Radio Service.

Hollingswoth adds that the use of Amateur Radio Transmitting equipment is also permissible as long as the users -- in this case the pilots and sky-divers -- are licensed in the Amateur Radio Service. Translated, they must have a ham ticket to put an Amateur band transceiver on-the-air.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

Hollingsworth's letter tells the groups that the use of radio transmitting equipment in a service where a license is required, without obtaining a license, is a violation the Communications Act and will result in criminal penalties. He says that fines normally range from $7,500 to $10,000. (FCC)

**

ENFORCEMENT: HOMEOWNERS ASSN MUST FIND INTERFERENCE

And a big win for a Pennsylvania ham that could be precedent setting. The FCC has written to the lawyer representing the Pine Ridge Community Association in the city of Stroudsburg. The note informs the counsel that his interpretation of the Community Association's obligations under Part 15 was incorrect and that the Association is required to investigate the source of its radio frequency interference to an Amateur licensee residing within the Association's property. (FCC)

**

AT THE FCC: CHANGES AT THE CGB

Still with the FCC, word that Louis J. Sigalos has been named Chief and Sherry Dawson has been named Deputy Chief of the FCC's Consumer Affairs and Outreach Division of the Consumer & Governmental Affairs Bureau. This bureau is responsible for conducting outreach to the American public on a broad array of telecommunications issues including the deployment of broadband services, the transition to digital TV, wireless phones and services including local number portability and much more. The Division also promotes public awareness of the Commission's strategic goals and initiatives through consumer advisories and fact sheets, consumer forums and participation in conferences and workshops. (FCC)

**

CHANGING OF HE GUARD: JULIAN HIRSCH

Some sad news. Famed technical writer Julian Hirsch, W2KFB, who spent most of his life testing the latest developments in stereo equipment and explaining them for Stereo Review magazine has died.

Hirsch was a graduate electrical engineer from Cooper Union University. He and Gladden Houck created the Hirsch-Houck Laboratories to test electronic equipment in 1957.

Hirsch went on to author more than 4,000 reports on stereo systems, speakers, turntables and other equipment until his retirement in 1998. He was 81 when he passed away on November 24th. (LA Times, other published news reports)

HAM EVENTS: HRU 2004 ON LONG ISLAND NY

Mark Sunday, January 18, 2004 at 8AM, for the fifth annual Ham Radio University. The event is being held at the East Woods School in Oyster Bay New York with special forums geared to the non-ham as well as the experienced ham radio operator. The focus will be hands-on with many demonstrations on just about everything including ham radio satellite communications, low power operating using radios as small as a tuna tin and the latest in emergency communications. There will also be a testing session for those who would like to take an FCC exam.

Again this year, Ham Radio University will be combined with the ARRL New York City and Long Island Section Convention. Talk-in will be provided on the W-2-V-L repeater on 146.85 MHz and using an access tone of 136.5 Hertz. For more information e-mail n2ga@arrl.org (K2EPM)

INDUSTRY NEWS: FREE SUB TO THE UNEMPLOYED FROM ATVQ

If you are out of work and would like to have something to read, has Amateur Television Quarterly Magazine got a deal for you. How about a free one-year subscription to their flagship magazine?

To qualify, you must be normally employed and not retired. Also, the offer is limited to the first 100 to apply.

To take advantage of this one time offer, send a letter by U-S mail requesting a free subscription and stating that you are temporarily out of work. The address is Holiday Offer - ATVQ, 5931 Alma Dr. Rockford, IL 61108.

Sorry, the magazine will not accept e-mail subscriptions for this one time offer. (ATVQ)

**

INDUSTRY NEWS: JVC TO CLOSE US VHS TAPE PLANT

A not so happy Christmass for some employees of JVC America. This, as the company announces that it will shut down its VHS tape production plant in Tuscaloosa Alabama by January 31st.

The reason given for the closure is the loss of the VHS market to Digital Video Discs. About 115 people will be laid off from the VHS tape plant closing. JVC already has compact disc and DVD plants in Tuscaloosa and Kennesaw, Georgia that employ about 550 people. (KB4KCH)

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

ARNEWSLINE(TM) NEWS: WE THANK YOU

I'm Andy Jarema, N6TCQ with a list of people to thank.

It's been since March that we did this, and we were in big trouble financially at the time. The following is only the first half of who helped us in April:

George Jacobs W3ASK of Silver Spring, MD. He's the former Propagation and Space Communications Editor of CQ Magazine.

Benton Bonney, W4PE of Orlando

David Ziskind, KE4QLH of Atlanta

Joseph Bartzi, Jr., KC8DKF of Wadsworth, OH, who since became a recurring contributor

The Hiram's Ham Amateur Radio Society of Reynoldsburg, OH

Donald West, W9DEW of Fortville, IN

Paul Lebzelter, K8PFL of West Branch, MI

Michael Leahan, N9PQK of Sun Prairie, WI

Gary Harrison, K0BC of Bolivar, MO

Kent Stutzman of Newton, KS

George Ancell, N5LEZ and B&G Communications of Electra, TX

That wasn't everybody in April- we'll continue trying to catch up in the weeks that follow.

Finally, in the entertainment industry, oftentimes one of the biggest stars is listed at the end of the opening credits, such as: "and starring Martin Sheen as President Bartlett."

We at Newsline also have one of those: "and starring Roy Blanchard, N5YHS,” as an occasional, but extraordinary benefactor. Roy, you're amazing!”

Thank you to everyone. Your April response to our crisis was exceptional, and got us all the way to December. We promise to do our best to continue to earn your care and support.

A reminder that Newsline is a 501(c)(3), federally chartered, California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org.

I'm Andy Jarema, N6TCQ.

ON THE AIR: 6 METERS IS BIG IN KNOXVILLE

If you live near Knoxville Tennessee and like to operate vintage ham gear, listen up. This one is for you.

The Repeater Journal reports that a group of local hams have gone back to the future and created a new Six Meter Nostalgia Net that meets on 50 point 4 Megahertz -- or should we say Megacycles in this case. The gathering takes place every Thursday night at 8:30 P.M. local time and anyone with gear capable of running full carrier A-M is invited to take part.

And what if you are not into A-M operation? Well the same group also sponsors F-M and S-S-B nets on Sundays. The F-M gathering takes places at 9 P.M. on the 53.770 MHz repeater. Five minutes after the F-M net is secured the S-S-B net takes to the airwaves on 50 point 200 MHz.

And if that’s not enough, yet another Knoxville area 6 meter F-M net has just started up on the 53 point 610 MHz repeater. It meets on Thursdays at 8:00 P-M local Eastern U-S time. (Repeater Journal)

**

EMERGING TECHNOLOGY: RADIO RESEARCH: NAVY AND AIR FORCE AGREE ON NEW JOINT COMMUNICATIONS SYSTEM

The Air Force and Navy have agreed to merge their two formerly separate programs for the acquisition of improved radio systems. The result will be the development of a single family of radios designed to replace incompatible units in use across the services.

Called the Joint Tactical Radio System, this joint Air Force-Navy initiative is expected to produce more than 17,000 units. Initial deliveries of the new radios are expected to begin in late 2008. (Science OnLine)

**

INTERNATIONAL - CANADA: VE9HC RE-ELECTED

Radio Amateurs of Canada reports that Hugh Clark, VE9HC was recently re-elected Section Manager in the Maritimes Section. This, for a two-year term that will begin on March 1st, 2004. Clark ran unopposed eliminating the need for a balloted election. (RAC)

**

INTERNATIONAL - IRAQ: BAGHDAD COMES TO ECHOLINK

Ian Abel, G3ZHI, reports that Iraq is now on Echolink. Ian says that on December 4th he held a 90 minute cyberspace QSO with YI1SRA in Baghdad using the Echolink program. Laith was operating from an Internet cafe as full Internet access has yet to be widely restored in the city.

YI1SRA reported that he and fellow members of the Baghdad Radio Club are hoping to install a 2 meter repeater in the city. It would be linked to Echolink network allowing on demand around the clock contact with the city and provide communications back home for any foreign ham in Baghdad.

YI1SRA also now has e-mail. Messages to him go to laithtariq@yahoo.com (G3ZHI)

**

DX

In D-X, now its your chance to QSO the real Santa Claus on the air. This, as station OH9SCL is active from Santa Claus Land near the Arctic Circle. OH9SCL will take to the ham radio airwaves from December 17th through the 21st. Operation will be 80 through 10 meters on cw, ssb, rtty, psk31 and slow scan television. The digital modes will be primary focus durning the weekend hours. Santa’s ham radio helpers this year include Finnish amateurs OH2BH, OH2NWG, OH3BHL and several others. QSL via OH9UV. (Via e-mail)

Meantime, the ARRL says that its new Logbook of the World secure contact-verification database continues to grow. ARRL Membership Services Manager Wayne Mills, N7NG, reports that nearly 5000 users have uploaded logs containing some 25.4 million Amateur Radio contacts. This has resulted in more than 1 million QSL records to date. (ARRL)

**

THAT FINAL ITEM: BRINGING THE DEAD BANDS BACK TO LIFE

And finally, its that time of year that the V-H-F frequencies are pretty dead as far as propagation goes. So here's as idea from Terry Hosack, W-A-3-L-T-B, on how to bring them to life.

Terry suggests over the V-H-F Reflector that you download a copy of the W-S-J-T program for digital high speed meteor scatter, weak signal, trop and E-M-E. He says to be certain that you get all the current updates including the new JT65 mode.

Hosack says that other than skeds, activity may be found on 144.140 and 50.260 Mhz mainly during contest and activity periods. If you are on the East Coast just beam west. Conversely, if you live out West, beam to the East and you might be surprised at what you might hear.

Terry says to just put the program in the monitor mode and see if you can decode any signals. If you find an interest in the mode you can buy or build an interface to actually transmit and help bring the dead VHF bands back to life.

The following web site is used for Skeds and chat about WSJT and meteorscatter: http://www.pingjockey.net/cgi-bin/pingtalk (VHF Reflector)

There is very little special special status involved. Every non-profit organization can write off the costs for buildings, land, facilities, equipment, personnel, and so on. Any remaining special status, and again there is very little, is covered by the "free exercise thereof" clause of the First Amendment - "Congress shall make no law respecting the establishment of religion, or prohibiting the free excercise thereof..."

In my opinion, we cannot "go all the way on separation of church and state" without violating the "free excercise thereof" clause. If anyone were to argue to ignore the "free excercise thereof" clause, others could just as easily argue to ignore the "establishment of religion" clause. Luckily, both clauses exist and people who truly believe in the Bill of Rights should honor and defend both. Many people are not doing so today.

Use discretion an the air and help defeat the terrorists. Thatï¿½s the sub title of Bill Sextonï¿½s MARS column appearing in the December issue of Worldradio Magazine. And in it, Sexton, who holds the call N1IN says that Americanï¿½s now face a new concern over the indiscreet transmission of material that my seem harmless but which could be used against us by a terrorist enemy.

By way of example, Sexton cites the well published airline schedules that were used by al-Queda terrorists to coordinate their September 11th attacks on New York and Washington. This is material still available on every airlines website.

Sexton says that we all must all be concerned with what the military calls Operational Security or OPSEC. And he indicates that it is very important for hams to consider what they are saying on the air because you can never tell who listening in. And he says that even the most seemingly innocuous tidbits of information, monitored by hostile ears are probably being handed on to the enemyï¿½s intelligence analysts in the hope it will reveal some weakness or secret that can be used against us.

Sexton covers quite a bit about domestic security and how you can do your part. You will find it beginning on page 50 of the December issue of Worldradio Magazine.

Nonsense. There is no reason whatsoever to spread this level of paranoia and it is fairly irresponsible to do so. I suspect far more ships have been sunk by paranoia and panic than loose lips. Regardless, those with knowledge of sensitive or classified information already know about security issues. What someone else might say on the radio would likely be available from public sources, or is pure speculation, and would therefore not even be considered important from a national security perspective.

Read the 10th Amendment for the few limited powers the FEDs were
explicitly given.
All other power was left to the states.
All the rest of FED power is economic blackmail upon the States.
Ghost

Hello everyone,

I just got today a pair of Telco PMR's on 446 Mhz....I want to use them localy to communicate with my parents who are a few flours bellow me....telephone calls etc....I was just wondering: Is there any way to give those pmr's power supply instead of batteries ?

I did get 4 recharchable batteries for the one pmr, and i intend to get 4 more for the other, but i want to put the on a power supply and dont use the batteries unless i need it....Any info on the web please ?

Tnx, 73's de SV2EVS - Spiros - Greece

First of all, why in the world did you reply to my newsgroup posting
and crosspoast in 3 other groups? what a flippin' Moron!

Next of all, The info is accurate. when the FCC releases it's next
enforcement log to the ARRL, it will be released. unless Ol' Chicken
head told Riley not to tell nobody. so, we might not see a offical
notice, but if one wants confirmation contact W8NS, he's the dude the
dropped the dime. Trust me, Chicken Head got what he deserved. and
seeing the crap he pulled with yours truly, I'll MORE THAN happily
testify in court, on W8NS's part, if need be. So, Don, If you're
reading this, Come see your ol' buddy south of Detroit, if you need
some back up in court. I was personally a witness to that drunk's
antics on 3.865, night after night. and how he broke rules and acted
like an Idiot for like 3 years. (I got my general in 2000)

Yeah.

??? Voting for a democrat will help ???

Oh, wait -- YOU'RE STUPID! I didn't realize that! My mistake.

You need to put a .siggie at the end of your post that says that you are stupid.

By the way, we (taxpayers) would like to spend $200 Million to make sure that your seat in the short bus is comfortable. Is that OK? It will be funded from the taxes from the "rich". OK?

I'm going to be flamed. But at least I identify myself. They won't

Check it out yourself. If they use a real address, mark it on your calendar. If they use a fake, or anon, address, they are typical libs. Worthless.

See the trailer if you want to reply!

All the best,

Dave

here is alot of text clips of conversations and accusations on the
146.640 repeater tonight.

MISC. KG4LEG famous comments heard from 6pm until midnight.

kg4leg - you are all jewish hipicrits
kg4leg - "id'ing" THE KG4LEG for your luxury and convienece
kg4leg - "id'ing" colnel roy YOUR regimential commander fgting terror
kg4leg - my family took me to court to have me commited.
kg4leg - i was a military colnel without an education.
kg4leg - in the marines i was taught to kill at 1000 yds.
kg4leg - i shot a .223 in the military
kg4leg - i was in the 3rd airwing division LTH
kg4leg - i used to check the air in the tires of helocopters on
46/53's
kg4leg - im glad im out of prision now.
kg4leg - i kicked a SGT. in the nuts for smoking all my pot
kg4leg - i left home when i was 15 (a guy said what? in a police car?)
kg4leg - i am retired from the marine corps
kg4leg - i get a 6000 month pension check from the marines
kg4leg - my friends are eddie and sloppy cunt on CB 35
kg4leg - my mom was a whore
kg4leg - my moms a multimillionaire
kg4leg - ive been to key west and miami, i know all about 8th ave,
ive been there for drugs
kg4leg - we need drug testing for ham radio, theres drug
testing for everything else
kg4leg - i smoke pot
kg4leg - i do cocane
kg4leg - i dont do crack
kg4leg - i buy cocane for 1000 dollars an ounce
kg4leg - i buy pot for 40.00 a nickel bag
kg4leg - i am a pussy, i eat pussy.
kg4leg - ive had 100 affairs before i met my wife
kg4leg - ive been thinking of running for congress
kg4leg - rons mom was a prostituting in biloxi
kg4leg - W4MDW is mental mikey
kg4leg - ron your a dumb cluck retard
kg4leg - ron shove it up your butt
kg4leg - ron your such a scuzzbag
kg4leg - ron eat manure and die
kg4leg - ron is on pot

n0jam - roys hitting the bottle again
n0jam - roys running on 2 cylinders

n0jam - roys the manager of bob's crack house
n0jam - roys brainstem is burned (drug reference)

kf4rte - roys bubble is not in the middle of the level
kf4rte - roy has been run off 11 meters

kf4tne - lets change the topic to hunting/fishing/kite flying
kf4tne - i enjoy eating possium and drinking cold beer
kf4tne - i went into the military at 17
i was promoted to warrant officer at 19
i flew helocopters

n9ee - roy is a looser
n9ee - roy you're dummer than crap
n9ee - roy is a puke
n9ee - roys always hard up whenever his mothers home.
(reply to roy saying "i'm hard up")
n9ee - roys going to get in trouble using a 250watt linear on CB
n9ee - what kind of looser gets kicked off CB?

k7kwh - sounds like the 435 repeater

ka3yae - rambeling retard roy from belleair

kg4eao - its settled, roy is a looser/skitso/idiot...goodnight

kg4yzz - roy has multiple personalitys
kg4yzz - roy needs to get back on his thorozene and elec shock trtmt.
kg4yzz - roy has 15 minutes until the next personality.
kg4yzz - roy puts crummy to shame

kg4jpl - roy laughs loud on channel 40

MISC - gay boy roy

MISC callsigns heard thru out the night (not a full list)
KG4YMB
KG4EAO
KG4SSB
K0WS (echolink)
KG4YZY (echolink)
KD4EAO (qrz shows this is an old callsign new one is WA4JN shouln't
you be
using your new callsign instead of your old one?)
KG4RQP orlando station in and out on 5 watts into a j-pole from apopka
KG4YZZ
W4TQL don from dunellon
KE4YDH

ROY EXCHANGES OF COMMENTS

kg4leg - I'm 5.11 and 230 pounds and i excersize and lift weights
unknown - all you lift is beer and doughnuts.

unknown - i've had enough of this crap goodnight!
kg4leg - GOOD and why dont you go in the corner and jerk off!

kg4leg - i worked undercover in vietnam
n9ee - where did you work undercover?
kg4leg - i worked undercover with your wife

kg4leg - kg4leg - i was packing a 140 pound back pack in the marines
n0jam - yeah roy was packing fudge (homosexual reference)

kg4leg - black people on welfare make more money that the users of the
640 repeater.
n0jam - well roy its about time you pull the race card.

ag4ud - i can tell roy lives at home with his parrents
n9ee - roys been sleeping with his own mom

# 5117. Listen up all you Queens !!! Tinkerbell has a question.

I may soon be in the market to buy a handheld counter like Optoelectronics makes. Once many years ago I owned (for a very brief time) a Radio Shack handheld counter, and decided very quickly that it was sh*t. Since those days I have often considered buying a good quality handheld counter for use in grabbing new scanner frequencies, and also as a transmitter testing device for my many RF projects.

I would like to spend no more than $450, and I want the best I can get for that money. I don't care about digital right now, as I won't be in the market for a digital scanner for a long time. My main interest is excellent sensitivity, and the ability to autostore captured frequencies to memory. I understand that the Opto Scout (non-digital version) fulfills this nicely, but can I do better yet and still keep under $450? Could I get substantially better sensitivity by going as high as $500 on some other model/company?

Whatever I finally settle on, it MUST be small enough to hide in a inner coat "shoplifter's" pocket so that I can grab freq's without attracting attention to myself.

Can you girls help out?

# 5119. Do I need a Scanner or Do I need a receiver? This girl is confused.

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-17 12:03:25 UTC
From: ksouter@oryyfbhqu.arq
Message-ID: <400f4589.466630419@oryyfbhqu.arq>
Source record: 60489
Cross-posted to: rec.radio.scanner,rec.radio.shortwave,rec.radio.amateur.misc

I'm wanting to connect my PC to a radio to monitor one particular frequency.

The instructions I've been given say to use a "scanner" but I'm wondering if it maybe less expensive for me to go with a "receiver" set to the proper frequency. Since I'm really only interested in the one setting, I don't see why I'd need a scanner - unless the price of a scanner is about the same as a receiver.

Now if a receiver will work for me, what kind should I be looking for and how do I adjust it to get the frequency I want? I'm assuming I have to install a specific crystal or something. But since I have no idea what I'm doing, I may be way off base. I hope the people here who are knowledeable can help me learn what I need to in order to do this.

The other issue that may be a factor: the instructions I'm following talk about how scanners have a "discriminator" on the ear jack that is where you make the connection to the PC. Would a standard receiver have one too? Anyone have experince with connecting radios to PCs?

DB,

Your {Il}Logic Fails You [.]

NOTE: Some Democrats undoubtedly did Vote for Candidate GW Bush in
2000.
- But then again some Republicans
- - Must have Voted for
- - - Candidate Al Gore in 2004.

FWIW: Members of Both Major Parties: Democrat and Republican.
= = = Evidently did Vote for Ralph Nader and Pat Buchanan.
(Either By Choice -or- By Accident)

Its Called "Democracy" and Inspite of Your Party Affiliation:
= You Have The RIGHT To VOTE For The Candidate of Your CHOICE.
= = Another Basic American FREEDOM !
= = = An American Citizen Has . . .
= = = = The Right, Duty and Responsibility to VOTE [.]

AMERICANISM {The Spirit of America} FIRST:
= = = Overcoming Political Affiliation and Party.
Doing What Is Right For Your Country Out Of Love And Respect For It.

Maybe JFK said it very well in these few Words.
"And so, My Fellow Americans:
- Ask NOT What Your Country Can Do For You
- - Ask What You Can Do For Your Country."
- - - Inaugural Address of President John F. Kennedy
- - - - Washington, D.C. January 20, 1961
NOTE: Not Political Party - But YOUR COUNTRY [.]

FWIW: Many remember these Lines . . .
- - - But do Many Remember the Next Lines ? ? ?

"My fellow citizens of the world:
- Ask Not What America Will Do For You,
- - But What Together We Can Do For The FREEDOM Of Man.
- - - John F. Kennedy President of the United States of America

"Finally, whether you are Citizens of America or citizens of the
world, ask of us here the same high standards of strength and
sacrifice which we ask of you. With a good conscience our only sure
reward, with history the final judge of our deeds, Let Us Go Forth To
Lead The Land We Love, asking His Blessing and His Help, but knowing
that here on earth God's Work Must Truly Be Our Own."

- - - John F. Kennedy President of the United States of America

Where are the Democrat Party Leaders like JFK Today ? ? ?
- And WHY arn't any running for President in 2004 ? ? ?
- - WHY Must We Be Left ONLY with the Choice of GW Bush
- - - and one of the DeMoCratZys in 2004 why, Why. WHY !

here is alot of text clips of conversations and accusations on the
146.640 repeater tonight.

MISC. KG4LEG famous comments heard from 6pm until midnight.

kg4leg - you are all jewish hipicrits
kg4leg - "id'ing" THE KG4LEG for your luxury and convienece
kg4leg - "id'ing" colnel roy YOUR regimential commander fgting terror
kg4leg - my family took me to court to have me commited.
kg4leg - i was a military colnel without an education.
kg4leg - in the marines i was taught to kill at 1000 yds.
kg4leg - i shot a .223 in the military
kg4leg - i was in the 3rd airwing division LTH
kg4leg - i used to check the air in the tires of helocopters on
46/53's
kg4leg - im glad im out of prision now.
kg4leg - i kicked a SGT. in the nuts for smoking all my pot
kg4leg - i left home when i was 15 (a guy said what? in a police car?)
kg4leg - i am retired from the marine corps
kg4leg - i get a 6000 month pension check from the marines
kg4leg - my friends are eddie and sloppy cunt on CB 35
kg4leg - my mom was a whore
kg4leg - my moms a multimillionaire
kg4leg - ive been to key west and miami, i know all about 8th ave,
ive been there for drugs
kg4leg - we need drug testing for ham radio, theres drug
testing for everything else
kg4leg - i smoke pot
kg4leg - i do cocane
kg4leg - i dont do crack
kg4leg - i buy cocane for 1000 dollars an ounce
kg4leg - i buy pot for 40.00 a nickel bag
kg4leg - i am a pussy, i eat pussy.
kg4leg - ive had 100 affairs before i met my wife
kg4leg - ive been thinking of running for congress
kg4leg - rons mom was a prostituting in biloxi
kg4leg - W4MDW is mental mikey
kg4leg - ron your a dumb cluck retard
kg4leg - ron shove it up your butt
kg4leg - ron your such a scuzzbag
kg4leg - ron eat manure and die
kg4leg - ron is on pot

n0jam - roys hitting the bottle again
n0jam - roys running on 2 cylinders

n0jam - roys the manager of bob's crack house
n0jam - roys brainstem is burned (drug reference)

kf4rte - roys bubble is not in the middle of the level
kf4rte - roy has been run off 11 meters

kf4tne - lets change the topic to hunting/fishing/kite flying
kf4tne - i enjoy eating possium and drinking cold beer
kf4tne - i went into the military at 17
i was promoted to warrant officer at 19
i flew helocopters

n9ee - roy is a looser
n9ee - roy you're dummer than crap
n9ee - roy is a puke
n9ee - roys always hard up whenever his mothers home.
(reply to roy saying "i'm hard up")
n9ee - roys going to get in trouble using a 250watt linear on CB
n9ee - what kind of looser gets kicked off CB?

k7kwh - sounds like the 435 repeater

ka3yae - rambeling retard roy from belleair

kg4eao - its settled, roy is a looser/skitso/idiot...goodnight

kg4yzz - roy has multiple personalitys
kg4yzz - roy needs to get back on his thorozene and elec shock trtmt.
kg4yzz - roy has 15 minutes until the next personality.
kg4yzz - roy puts crummy to shame

kg4jpl - roy laughs loud on channel 40

MISC - gay boy roy

MISC callsigns heard thru out the night (not a full list)
KG4YMB
KG4EAO
KG4SSB
K0WS (echolink)
KG4YZY (echolink)
KD4EAO (qrz shows this is an old callsign new one is WA4JN shouln't
you be
using your new callsign instead of your old one?)
KG4RQP orlando station in and out on 5 watts into a j-pole from apopka
KG4YZZ
W4TQL don from dunellon
KE4YDH

ROY EXCHANGES OF COMMENTS

kg4leg - I'm 5.11 and 230 pounds and i excersize and lift weights
unknown - all you lift is beer and doughnuts.

unknown - i've had enough of this crap goodnight!
kg4leg - GOOD and why dont you go in the corner and jerk off!

kg4leg - i worked undercover in vietnam
n9ee - where did you work undercover?
kg4leg - i worked undercover with your wife

kg4leg - kg4leg - i was packing a 140 pound back pack in the marines
n0jam - yeah roy was packing fudge (homosexual reference)

kg4leg - black people on welfare make more money that the users of the
640 repeater.
n0jam - well roy its about time you pull the race card.

ag4ud - i can tell roy lives at home with his parrents
n9ee - roys been sleeping with his own mom

Trying to monitor MDT's? Most all radios don't have a direct
discriminator connection. It's almost a given you would need to modify
the radio to make tyat connection. If you are doing what I think you
are doing, "freq, etc", I assume a scanner is the cheapest radio for
that frequency. "VHF/UHF". Scanners are usually the lower priced
radios of that freq range. There are very few single band, or single
freq radios for those bands, unless they are commercial, or amateur,
etc.. MK

today! kg4leg UPDATE!

today roy spent alot of time on the output of the repeater singing
anti ron n9ee jingles, he was heard numerous times.
roy had multiple conversations with various tampa bay hams on the
output of the repeater, while the repeater was down, one of wich was
N0JAM

roy was also encouraging ron to shut the repeater down numerous times.
roy identified himself today as "KING ROY"

kg4leg had a problem with don KG4COQ today,
roy kept saying "I'M stupid roy and intelegent don"
roy kept saying it about 40 times over the hour
roy apparently has a problem with don
roy made more references to "mental mikey"
ray said lots of "punk boy and fag boy"
roy has a really bad smokers laugh wich others make fun of.
someone calls him "CAMEL" (as in cigarettes) whenever leg laughs hard
roys smokers laugh could be identified as over modulated
roy kept calling N0JAM "DON" when shannon/N0JAM was talking to others.
N0JAM kept saying roy is so confused.

we are doing some research to determine if roy has a multiple
personality disorder. certain stupid comments are made at different
times, when other unique comments are made also, possibly unique to a
personality.

Hello, Radio Enthusiast!

The very large coronal hole that has kept the geomagnetic field at active to minor storm levels is no longer in view. This is giving us a nice period of quiet geomagnetic activity, with the result being that we are seeing propagation that is more normal over most of the paths around the world.

A smaller coronal hole is currently near the central solar meridian and is expected to lead to minor geomagnetic storm conditions from Sunday, 21-XII-2003 onwards. Between now and then, it is expected that the 10.7-cm flux will climb a bit, perhaps as high as 130, while the planetary A index (Ap) should remain at or below 10. From 21-XII-2003 onward, the flux will gradually fall to about 100, with some elevation of the Ap index as the geomagnetic field becomes active again due to that coronal hole.

After 31-XII-2003, we.ll see conditions become a bit rougher, again. However, this is due to the coronal hole that we.re seeing, not because of any major flare. Between today and the first of the New Year, there is only a slim chance of any moderate flare, while there will be a good number of minor small flares (B- and C-class flares). There is also a small chance for a proton event from mid to late December. This might make over-the-pole propagation a bit tough.

At the time of writing this bulletin, the solar wind speed is at about 400 km per second, which is a normal speed, with only a slight southerly orientation of the interplanetary magnetic field. As of 17-XII-2003, the sunspot count is 92, and the 10.7-cm flux is 118. The Ap is 10, and the Kp (planetary K index) is 3.

This translates to some very good conditions for the High Frequencies (HF). Expected MUFs are normal, rather than depressed as we.ve seen for the last couple of weeks. The season is great for worldwide DX on HF, and this period between now and the New Year will offer great conditions for most of the time. The highest frequencies will have some long-range F-layer openings (since the flux will be above 100), but they will be short. Lower frequencies will propagate much better over most paths.

Come by and check out the online Propagation and Radio (SWL and Amateur) discussion forum, where a group of us are discussing the science and current events of space weather and propagation: http://hfradio.org/forums/

In addition, you can always get the latest live space weather and propagation information at http://prop.hfradio.org -- or with a WAP phone, at http://wap.hfradio.org/

Happy Dxing!

Are you retarded?

It has nothing to do with RadioShack you idiot. DirectTV, DISH
Network, SprintPCS, and Verizon all *require* SS numbers for their
credit checks. If you don't like it don't get a cell phone or
satellite dish.

The customer is certainly welcome to write it down and hand it to the
cashier if they don't want to say it out loud.

Remember the "good ole days" of the 14.313/14.300 wars?
The amazing cavalcade of assorted nuts, goofballs, toilet tics
and freaks that would flock to this on a near-daily daytime
basis? Remember also all the legendary crazies and kooks
that populated 75 meters in the P.R.H. (Pre-Reilly H.) days?

Well....those days are gone forever, unless you have a tape
recording collection of the same. If you wish for those fun
days when 20 and 75 were a non-stop cavalcade of comedic
camaraderie of crapola again....just point your mouse to:

http://www.network54.com/Hide/Forum/243612 (....and click)

I am fairly certain that every kook and goofball that the FCC ran off
of 20 and 75 are now at this URL. See for yourself and decide.

A very amusing place, with funny pictures too!!

RIYADH, Saudi Arabia
13 Dec 2003

Saudi Arabia has officially banned the importation of female blowup dolls
and stuffed
animals, giving merchants three months to dispose of such stock, a
state-owned ewspaper reported Wednesday.

Interior Minister Prince Nayef ordered the ban which was relayed
around the country by the national Chamber of Commerce and Industry,
Al-Riyadh said.

The daily gave no reason for the ban, which could not be confirmed
with government officials Wednesday. Strict interpretations of Islamic
law ban representations of living beings and any exposure of the
female figure.

The ban singled out stuffed-animal toys and female dolls. It did not
mention male dolls, and it was not clear if these were banned as well.
The order also ordered any mannequins for female clothes be "far from
any indecency"

The ban comes at a time when some in Saudi Arabia have questioned whether the country's strict Islamic law fuels Islamic militancy.

Rich Whitten, WB2OTK, will be a regular co-host each week on the IARN (International Amateur Radio Network) Bulletin Service and Talk Show beginning Sunday evening 21 December 2003. The first 45 minutes will be the usual call-ins and news, and the last 45 minutes will be Rich and Glenn Baxter in the talk show mode. It should be very, very interesting and many, many hams will get talked about including you know who! It is expected that this new talk show format will have a very significant and major positive impact on our beloved hobby of amateur radio. Expect many surprises. YOU can also join in the fun by calling 1 800 262 9543 with your views or questions at any time, 24 hours a day, 7 days a week, 365 day a year.

You can listen to the program on 14.272 MHz. USB or 3.977 MHz. LSB at 5:30 A.M., 1 P.M., 4:49 P.M., 8 P.M., and 12 midnight, or 3.890 MHz. Amplitude Modulation at 6:23 P.M., and 9:30 PM - all Eastern Local Times. See www.K1MAN.com for further details. 73 and GL de K1MAN

## 5153. I'm gonna take on Glenn Baxter with my Talk show!

Hmmm .. nope .. who will it be?

Will it be Sigster?
Will KT4TR call in and give a rrrooollll ccccaallll?
Will Vic call in and name all the jammers?
Will K4OKA call in and play his latest tape of "Porkbutt Song"?
Will KE4TEW call in and do a live remote broadcast from "mikes'
packaeg store"?
Will Sir Sidney call in and play "Anchors Aweigh"?
Will Kind Jewish Indian call in and read some history from the
encyclopedia?
Will they call The Colonel for an interview?
Will profit Stair call in and predict when he will be headed off to
room with Ty-Rone and Le-Roy?

You have our curiosity up now .. inquiring minds wanna know.
(And I believe his last name was spelled "Whiten".)

daves being funny.....
"cycles" term for frequency back in the day.
"hertz" todays term for frequency
i think the switch happened back in the 50's or 60's but i bet dave knew that.

What's wrong with crossdressing? According to the definition I
crossdress every time I'm wearing a T-shirt and jeans as opposed to a
dress.

Carmen
BTW, if you were capable of reading you'd see that Mr. Hunter is
married and *straight* - as are the majority of male crossdressers.

Straight? Hmmmm. I'm "straight" and I sure in hell don't wear any women's clothes. He may be straight in that he hasn't done men yet(?) - but it appears the urge may be coming out. The only "male" (I won't call it a man) I knew - who started to cross dress - went on to taking Hormones and grew breasts. I didn't see them often, so it didn't bother me as to their life style. Was at last contact before I dropped friendship waiting for a meat hacking to replace with a hole. Once they grew their breasts, they came around and tried to make a play for me. END OF FRIENDSHIP. I told them to leave and don't look back. That's been 2 years now.

You - Carmen, being a woman ( I GUESS) - how would you like to be in a restroom with a male crossed dressed - in there with you? If my wife was in a restroom and some perv went in there cross dressed, I'd be very pissed off. G.W.

I am looking for some comparson tests that I 'think' QST ran in one of their monthly magazines in
years past.. The test were on horz loop two meter and the like antennas. Over the years I have
collected a lot of the magazines, but stopped my subscription about a year and half ago.I hope
someone recalls in which mags the tests were conducted. thanks . cl.

Body handling: HTML body converted to readable text

Some additional background: APCO 25 Phase I refers to 12.5 khz bandwidth with QPSK-C (C for compatible) modulation. Phase II will be 6.25 khz with QPSK, and possibly a two slot TDMA in 12.5 khz bandwidth as an alternative technology. The 6.25 khz scheme is defined as QPSK (same as Phase I) but the TDMA approach is still under review by TIA. There are no Phase II 6.25 khz systems deployed anywhere, and no Beta tests scheduled by any vendor. Everything to date is Phase I 12.5 khz, so this is not a Phase I vs. Phase II situation. However, there are two different flavors of Phase I APCO 25 modulation currently in use. Initial deployment for conventional and non-simulcast APCO 25 systems used C4FM transmit and receive, but with a QPSK compatible receiver in the subscriber. QPSK was specified for APCO 25 Phase I but the technology was not ready and C4FM was selected for the initial roll out, with subscribers that could decode either. C4FM is still the uplink modulation for all subscribers on all Phase I systems due to battery drain issues still to be worked out with the linear QPSK modulation. The Minn Metro system which shipped in late 2000 (and all other Motorola P-25 simulcast systems installed in the last 2-1/2 years) use QPSK in their linear simulcast stations for the downlink modulation and C4FM at intellisite (non simulcast) sites (2 sites for Minn Metro).

It appears that the GRE pro96 receiver was optimized for the older interim C4FM modulation but not for the true Project 25 Phase I QPSK modulation used on all simulcast systems shipped since 2000. Someone in Japan missed the boat big time on this one because simulcast is where all the big metro areas are going.

E.F. Johnson and Kenwood have figured out a QPSK/C4FM receiver in their lower cost subscribers, so one would hope that the GRE team can come up with new firmware in a short time frame.

---

CQPSK vs C4FM -- Merits
OK. We've established that newer APCO 25 systems incorporating simulcast use CQPSK on the downlink and C4FM for intellerepeater sites and for the uplink. New question:

Why?

What are the relative merits of using CQPSK vs. C4FM. It seems that CQPSK is more expensive/difficult to implement, so there must be a performance improvement that offsets the costs.

For example, it could be:

Better signal propogation
Better weak-signal performance
Better operation in an area with many reflected signals...

Hello

These newer complex modulation types are used as they are more
spectrally efficient (i.e more data per KHz) and are supposed to be
more tolerant of interference. The trouble is they can't usually be
demodulated by analogue electronic circuit but require a DSP running a
fairly complex program.

Over here in Europe TETRA uses a similar type of modulation called
DQPSK where the D stands for differential.

C-QPSK is being used as it works better (better audio, more spectrum efficiency) on newer 9.6k simulcast sites.

Better audio ?

It's the same vocoder, so I'm assuming the better audio feedback from users is a result of the signal being simulcasted vs. actually "better audio."

Am I correct in this assumption??

Maybe better signal ?

Both, as it I understood it. Something to do with C-QPSK means better audio because it handles simulcasting better. I'm a little thin on details yet because our radio techs are just now learning the ins and outs of this stuff, in preparation for changing our local system over to P25 C-QPSK in a couple of years.

better audio?
if you want to hear smokin' hot audio....

go to the DVSI home page and look up AMBE....

AMBE came around some time after IMBE was chosen for APCO 25... and it really puts it to shame.... both in required bandwidth, intelligibility... etc...

oh well.

i suppose the only solution to all this is the true "SDR".... so i can carry my iPAQ and decode everything....

Previously there was a method called "WIDE" that was used for
Simulcast because C4FM was for narrowband and couldn't be used in
Simulcast applications because of bandwidths (or maybe not, I do know
RSS recommends C4FM for non-Simulcast). And I think it was here where
I read that WIDE wasn't totally APCO-25 compliant so Moto started
using LSM.

At least that's how I understand it. Please correct me if I'm wrong!

I am not very well versed with Apco at all. Well not YET anyway. I have my Astro Saber Model III VHF and am wanting to put in some stuff locally with RX only, (didnt wana buy a scanner with digital capabilities, so i got a 2-way) My question is, How hard would it be to just take a frequency i know is Digital, Apco 25, and put it in the Radio, with RX only enabled and have the radio do what the scanner can do. I have noticed there are many varialbes i didnt count on in the RSS..

Thanks in advance.

---
OK well did some research, its bad when your a moto tech and this one slips by you. My clash code is for covnetnional only.
i have an astro Saber VHF model III and what threw me off, the astro capabilities are enabled in the software, how ever it wont decode digital signals. Leading me to believe its not fully astro capable as of yet. Now do i need a board or a simple flash upgrade dunno.. here is my current flash code, 000001-000000-9 any Experts care to tell me. ahaahh I am versed in MOTo stuff just not very good on any digital/apco stuff as of yet. But hey we all have to learn..

---
Post your Host/DSP firmware. If it's old host version 3.x.x crap, then I'm sorry to say, but your radio is VSELP based. If the firmware is V 4.x.x, 5.x.x, or 7.x.x, then you're a lucky guy, because it's IMBE.

To get the firmware, simply read the radio and go in to the F9 menu. Or you can power up the radio, press the ".." button 5 times within the first 10 seconds of powering it up, and all of that info will scroll across your screen. May take a few times, as it goes quick.

There are ways of "adding" Digital operation to a radio without sending it to Motorola. But before you even consider doing that, we must know your firmware versions. I'm all for a company making money, but Motorola asking $1000+ for some "option" that is a bit toggled on/off in a codeplug is a little much..

Shaun

Ok, here's a LITTLE pity..

Gwinnett County GA, where I am, had to build 7 simulcast sites, tower heights varying from shortest at 400' to 2 800 guyed towers, the rest around 500' self support Rohns. There are STILL dead spots w/ portables. Nowhere close to flat. The county is about 50 miles N to S, E to W. PA outputs 150 watts, 9db gain antennas, but varying coaxial loss factors due to different tower heights(YOU look up the attenuation per ft., 1 1/4" Andrew Heliax) Tower top preamps. All combining and multicoupling gear TX RX Systems, which is the best there is IMHO. 3 TX, 1 RX antennas, figger around 3db insertion loss thru the combiner.

Motorola engineers designed it using topo maps and RF surveys, which is basically an RF propagation guesstimation overlaid on a topo map. They were trying to accomplish 90/90 coverage including in-building. They shoulda gone to crack rehab instead.

Hey Alex you got a soft copy of 1 of the RF maps for Douglas?

Had they built it with 450 MHZ it woulda kicked major ass---800 in hilly areas and in concrete/steel buildings equals so much multipath you don't know from 1 day to the next if you can talk just down the street from a site on a portable.

900 is even worse, next to useless here. I built 3 900 LTRs a long time ago, they sucked so bad we couldn't load em. Customer hears the demo, na thanks, that's lousy.

OK, crayola, define multipath, relative to "spectulative extrapolations"...

To put it in a nut shell, the coverage will depend on the terrain, foliage, antenna height of both the TX and RX, antenna gains and feedline losses. In a different view, here in the New Orleans area, you can look at the 800 cellar system coverage for your answer.

Most of the antennas here are about 200 feet high, tall long needle pine trees and plenty of rain. The towers are placed about 2 miles apart for decent coverage. The few towersa that are higher give a slightly greater coverage. For a 400 foot tower, it makes about 5 to 8 miles tops.

In the more urban areas where there are fewer trees and more houses, they are less than a mile apart. This is more for capacity than for coverage. The towers are in the 100 to 150 foot height.

If you add in rolling hills or northern up and down hills, you get into line of sight paths. Once you go behind a hill or large building, the signal is gong to go away. You may be lucky and get some reflections from multiple buildings or mountain walls. But don't expect this to help much. It usually make multi path issues crop up.

Digital modulation doesn't like multipath. The receiver has a hard time trying to figure out which signal it should be listening to. Best to stay with analog if your in the mountains.

Not sure this answers your question directly, but it's not an easy question to answer. The system design is not an easy thing to do when you throw in a bunch of variables.

Jim

aye .. it does.

It is because all of those variables that you cannot possiably account for is why I was looking for general comments on currently working equipment.

What started this all for me was tromping through the FCC database. It lists all kinds of different ERP's and twr heights listed. So I got to wondering what the relationships were.

Antenna height, antenna gains, feedline losses, et. al. is brass tacks.

n4voxgill was a perfect post:

Hey we got a 300' antenna with erp of 100 Watts and with our equipment we get 15 to 20 miles.

Anyone else out there care to check in with twr/erp/range?

---
A local city bosts 100watts and has a tower at maybe 50' in the air off the police station. System is a reapter/stand by mode. Erp is at 75, and coverage at times just blows period. The portables are used on the reapter only and the squads have direct to the base (simplex). Whille a local city has there antenna of the water tower, I say at least 100' in the air. Not sure on the erp issue though. But wattaged is far munch lower then the tower at 50'. The prolbem on there end is the siginal loss, leaky coalaxle cable because of the weather weird and tear. Whille the hs that operates in there city pulls 10watts on there repater easily covers both citys and more and only sitts two stories off the ground, but the difference you ask is that the hs is vhf and the others are uhf. Guess where? Near the city of chicago, go firgure. Whille uhf reapters of cpd work great.

Now the trunked issue's
Local business opeaters a ltr system and is right down the block and cant be heard inless your inside the property and even then it has its prolbems in the 400Mhz range.

While a ltr system off the sears tower works great in every directional imagable, 800Mhz, 900Mhz, Well you get the idea.

Meanwhille there are serveral other 400mhz ltr systems that work great, that has tx sites at 50' off the ground and go great.

Know here comes the nightmare, O'hare Airport Trunked must be within two villages of the airport to monitor it, there are two antenna's sites, but if you go the other direction you might as well forget designed that way on purpose!!. Chicago Police Trunked Radio System, works throughout the city and vastily out into a good portion of the burbs in every direction. However it comes with serveral site towers located throughout the city at really high heights. I say about 500" to 1000" if nessacary. Heard a unit that was in ricthon park from o'hare airport and seem like he was right next to me. Its about what is meant to be broadcast wide vs. what instist. Land surrondings and weather patterns have effects but the land surrondings get around by buliding sites high enough to get through. Weather is kinda of hard to avoid especially in chicago, lol. Oec for the techs is connected by highily intergard cables that run throughout the city to connect there sites from the smallest to the biggest. (aka fiber optics) Secondary lines do exist as well if smothing should happen. Personally its a test of what areas need to be covered and at what cost are you willing to pay for it. Lots of money equals great radio systems with minor bugs, no money gets you crap coverage. But then we apply the rule of what area need to be covered and crete crap coverage on purpose. Rule of thumb test it with a portable and then see how far it works. Nwcds major malfunction that biting them in the, well you know.

These brand new shopping malls that heavily use concrete dosent help any matters, along with the new walgreens that block the siginal and diverted around the building, kinda of werid to see happen. Makes you think on what materials were used in the wall structure.
---
200 hundred watt mobile that would be pretty neat, coxical cable is a huge prolbem on these public saftey systems. Rain seems to have quite a big issue. Communication out here just dup itself out because of the weather conditions. If its extremily cold or hot it seems to work rather well for some reason. But a mobile a 110 watt can cover up to 55miles or more depending on height of vechile and hill that he or she may be sitting on. Plus that fact of having a 20foot high antenna brings in the siginal even stronger. Some systems use repeater antenna that sit at a 100ft or more. ISP District chicago has a repeater off of sears tower, yes that huge tall building-lol. Coverage is superior, audio lacks though go firgure. The highest wattaged repeater that I have heard about is 1,000 Watts, know imagine that at 200ft in the air. Here a hint these business deliver covarage to serval millions of people just in IL allone. 900Mhz trunked system simulcast with almost perfect audio. Site locations also will make a huge difference, my mag mount at 6ft works a whole lot better then at 3ft off the ground. Complete metal card or strong metal that travels through the car makes it receive audio even more but it also get business alarm systems to

bleed through constainily. Site location is what is key at any time, plus the issue of coxical cable, then wattage. You be surpised how a 30watt repeater can travel at about 80feet in the sky. Now just amp certain things and your in the next county hear the siginal great. Used the fcc data to help you determine systems plus and downsides to make the siginal come in better.

---

- r0f's guide to ASTRO radios - What you need to know to have a clue -

Lately, there have been several Ebay ads, and other questions asked on the board,
that finally motivated me to write an ASTRO "guide" for newbies. When people ask
questions, we should be able to point them somewhere. The main site (batlabs) has
a lot of info, but not nearly enough to guide newbie/lamers through the woods

Let's start off with the basics.

Currently, there are 7 ASTRO portable models on the market.

- ASTRO Digital Saber (Models I, IR, II, IIR, and III)
- XTS3000 (Models I, IR, II, IIR, and III)
- XTS1500 (16ch only, no keypad/display)
- XTS2500 (Models I, IR, II, IIR, and III)
- XTS3500 (Models I, IR, II, IIR, and III)
- XTS5000 (Models I, IR, II, IIR, and III)
- SSE5000 (SP Radio, NYPD Only. Looks like a model I ASTRO Saber, but grey)

The lowest tier ASTRO portable is currently the XTS1500. This is an entry-level
portable, designed for utility companies and public works users. It is 16 channels
only, and does not support encryption. It supposedly is FLASHport upgradeable, but
there is no mention of this on Motorola's website. It is dual band, 700/800 MHz, and
supports ASTRO25 and APCO16 trunking. (3600/9600bps control channels)

The ASTRO Saber has long been a favorite of batlabbers. It is the last "real" radio
that Motorola released, before going to the XTS series radios, which just aren't
built the same. One could easily use the ASTRO Saber to beat down a bad prisoner,
or get revenge on a locker thief (personal story, I won't go there). There are 2
versions of the ASTRO Saber available -- One with a 512K flash memory,

and one with
1-meg. The 512K ASTRO Sabers are the most popular, but do not support
9600bps
(ASTRO25) trunking, or firmware higher than Host R05.60.00 / DSP
DSPN06.05.02. The
512K ASTRO Sabers support nearly every FLASHport option.
Unfortunately, if the user
wishes to use one of the newer UCM Encryption modules with EMC R03.xx
firmware, the
radio MUST be upgraded to a 1-meg vocoder board, as EMC R03.xx
requires Host firmware
of R07.xx.xx to function. The ASTRO Saber comes in VHF, UHF-low,
UHF-high, and 800
MHz flavors. The ASTRO Saber has 2 lines of 14 characters for the
display.

The XTS3000. Released in 1996, it was Motorola's second ASTRO Portable
to hit the
market, and is the most common ASTRO portable in use, to this day. It
comes with a
1-meg vocoder board, and supports encryption. How could you go wrong
with this? It's
shorter than the "HUGE" (As ASTROMODAT puts it) ASTRO Saber, but the
XTS3000 is a
FATTER radio, even with the Lithium Ion battery. The XTS3000 supports
3600/9600bps
trunking, and any other FLASHport option you wish to have added in. It
does not
require a vocoder upgrade. Like the ASTRO Saber model, certain
features/hardware
are firmware dependant. The XTS3000 and ASTRO Saber share the same
host/dsp firmware
releases. Example: R05.51.00 / DSPN06.04.11 can be found in both ASTRO
Sabers, and
XTS3000's. The XTS3000 comes in VHF, UHF-low/UHF-hi, and 800 MHz.

The XTS2500 and XTS5000 were released in early 2002. While the XTS2500
is a nice
portable with 160 modes, it does not support encryption. It hasn't
been hacked yet
either, meaning if you buy a "featureless" XTS2500 on ebay, it's going
to stay that
way. It's a medium-tier radio, supporting 3600/9600bps trunking and
conventional.
It's nice eye candy, but that's about it.

The XTS5000 is Motorola's "top of the line" digital portable. It
supports 512 modes,
encryption, and 3600/9600bps trunking/conventional. It hasn't been
hacked yet, and the
only portables floating around on Ebay at the moment, all appear to be

alpha-series
developmental models. Their serial numbers are 123ABC1234. Keep away
from them! They
require special Alpha CPS to program, and are not supported via "R"
CPS. The XTS5000
supports 8-meg's of FLASHport memory, and supposedly IP-data features.
The "r0f"
opinion of the XTS5000, is that it's a recased XTS3000 with a new
display and more
memory. Motorola didn't put a lot of effort in to the XTS5000, and it
is overpriced
and currently does not support anything that the XTS3000 or ASTRO
Saber is capable
of. Do not be fooled in to purchasing an XTS5000 thinking it's "the
bomb", because it's
just not!

The XTS2500, XTS5000, and SSE5000, are all programmed with the RVN4181
software
package.

The XTS3500 is an XTS3000, with a faster CPU, and supposedly it
supports higher
levels of encryption -- however this has never been confirmed. It
looks identical
to the XTS3000, but it's only available in VHF and UHF models -- No
800 MHz. The
3500 is programmed with RSS. As far as I know, no CPS exists and the
radio has
not been hacked.

The SSE5000 is an SP radio developed for the NYPD. It looks like a
Model I ASTRO
Saber, in a grey case. It's exact features are unknown at the moment,
and Motorola
does not list it on their website. It's most likely got 1-meg of
FLASHport memory,
a faster CPU, and a few custom "one touch" buttons. Any information on
this radio
would be greatly appreciated!

So now I've covered, in a somewhat brief way, all 7 portables, and
what they are.
Now it's time to talk about what makes a radio worthy of an Ebay
purchase, or just
flat out hacking. I will only cover the XTS3000 and ASTRO Saber, as
they are the
most popular models, and are easily "reconfigured" for the intended
use.

First, when looking at an Ebay auction, or making a deal with someone
to buy an

ASTRO Portable, you MUST have the below information provided to you.
If the seller
is too ignorant or clueless to give you this information, then DO NOT
chance your
hard earned money! This information is obtained via 2 methods.

1. Via the F9 menu after reading the radio in RSS (or equiv in CPS)
2. Via SERVICE mode. To enter SERVICE mode, press the ".." button on
the side
of the radio 5 times, within the first 10 seconds of powering up the
radio. The
information will scroll across the screen. This process may have to be
repeated
a few times to get everything.

First, ask the person selling the radio if it's IMBE or VSELP. If they
don't know,
then they are just stupid and ignorant. I'd be tempted to just not
deal with them
at this point, but sometimes you can "steal" the radio for under $500
from these
people simply because they're too stupid to know what it is they're
selling.

VSELP = Vector Sum Excited Linear Prediction
IMBE = Improved Multi-band Excitation

VSELP was Motorola's first attempt at a digital voice codec. It's
inferior to IMBE,
and is proprietary. The City of Baltimore uses VSELP on their 800 MHz
trunked system.
Other than that, it's almost extinct. IMBE is made by DVSI, and is the
APCO-25
codec. 99% of the time, you'll want an IMBE radio.

- What is the Model #? H04UCH9PW7AN is an ASTRO Saber III 800 MHz. You
need this
to be sure of what you're getting. I've seen MONGOLIAN MORONS selling
800 MHz
radios as "VHF" on Ebay. These people are either retarded, or are
selling something
they know nothing about. i.e. STOLEN.

To decode the model #, visit this page:
http://www.batlabs.com/astromob.html#model

Next, you'll need the HOST and DSP firmware revisions installed in the
radio. This
is probably the most important part. If the MONGOLIAN RETARD selling
the radio
doesn't know if it's an IMBE or VSELP radio, you can obtain that
information from

the firmware revisions. Here's the breakdown:

Host Firmware R0x.xx.xx R= Release. If it's anything but "R" here,
it's a factory
test radio, and is probably stolen. Don't bother. Here is version
information:

Less than HOST R04.xx.xx Less than DSP DSPx06.xx.xx = VSELP KEEP
AWAY!!!
Higher than HOST R04.xx.xx Higher than DSP DSPx06.xx.xx = IMBE UNF
UNF! YES!

The latest HOST/DSP firmware (as of this writing) is R07.10.xx /
DSPN08.02.xx.

Now a few notes about the firmware that you need to know for certain
features to
work..

If you desire SmartZone Omnilink Q173/G173 in your radio, you'll need
HOST firmware
higher than R05.xx.xx. it is not supported in R04.xx.xx.

If you're using an EMC or UCM Encryption module, with EMC firmware
higher than
R03.xx, you'll require at the very least HOST firmware R07.xx.xx or
the encryption
module will not work. R07.xx.xx HOST firmware supports older R02.xx
EMC firmware,
just not the other way around.

The next thing you'll want to ask the seller is what the FLASHCODE is.
This lists
what features are installed in the radio. This even determines whether
or not your
radio will transmit/receive in ASTRO mode. This is VERY important.
Flashcodes look
like this:

540008-000400-3
591008-4F1E00-9 (Whored out Nick flashcode)

They are 12 digits long, with a checksum at the end. You can decode
the flashcode
by punching it in to Lindsay Blanton's flashcode decoder here:

http://www.trunkedradio.net/modules.php?name=Flash

To see a list of all available FLASHport options, type FFFFFF-FFFFFF-F
in to his
decoder.

Next, if the seller says "Radio has encryption installed", you'll need
to ask what

algorithms are installed. Encryption comes in many flavors, and not all algorithms
are compatible with each other. An excellent write-up on encryption was made by
Batwing (Doug) and is available here:

http://www.trunkedradio.net/trunked/stuff/encrypt.html

The encryption algorithms you may see in ASTRO portables are as follows:

DES DES-XL DES-OFB DVP DVP-XL DVI DVI-XL AES-256

If you see FASCINATOR, your phones will be tapped and you better buy some
preperation H, because you'll have a date with Bubba. FASCINATOR is a classified encryption algorithm used to carry US Government communications,
and is NOT available to the public. If you have it, chances are it'stolen, or
stolen. Could also be stolen. Get the picture?

DES - 56-bit
DVP - 32-bit
DVI - 24-bit
AES-256 - 256-bit

While AES-256 may look appealing, there is a massive back-door in this algorithm so that big brother can listen in. Do you really think the boys would
release 256-bit encryption to the public to use, without a way of snooping?
DES was developed for the US Government in the late 1970's. It is still to this
day, considered "safe" from eavesdroppers. There are 72-quadrillion possible
keys, and the amount of computing power required to brute-force the prime
number the key is based upon, is not something joe-schmoe has access to. DES
is not "secure" in the sense you would pass classified communications over it,
but it's definitely a hell of a lot tighter than AES-256. There is no known
back-door for DES.

DVP was developed by Motorola for business users. It's weak, and most likely
is back-doored. Security companies and many police agencies in Canada use (or
did use) DVP in the past, due to tight licensing/export policies back in the

day. DES was restricted to the US only, but that's not the case any longer.

DVI was also developed for Motorola for use by business and law enforcement
users, overseas. It is 24-bit, has a back-door, and is weaker than George
Bushes self-esteem. The "I" in DVI, stands for "International".

Anyway enough of my encryption rant. The next thing you'll need to ask your
seller, is how big the vocoder board is. This is required when asking about
an ASTRO Saber. Is it 512K, or 1-meg? Read above for the differences.

Finally, I'll move on to "parts built radios". These radios are EVERYWHERE!
Originally they were sold by a mysterious man named "Nick", aka Watchbuddy,
but he has since disappeared in to the dark Motorola night. His radios were
supposedly built from "parts" that he or somebody else had ordered from M,
and then later constructed fully functional radios. They work fine, look fine,
and even smell fine (heh heh). They just have one fault; NO SERIAL NUMBER.
A parts radio is usually easy to identify. They all have the same host/dsp
firmware revisions, and usually the same flashcode.

2002 Nick Radios

Host Firmware: R05.51.00
DSP Fimrware: DSPN06.04.11
Flashcode: 591008-4F1E00-9

2003 Nick Radios

Host Firmware: R07.08.00
DSP Firmware: DSPN08.02.02
Flashcode: 548008-000480-9

The 591008-4F1E00-9 flashcode has become known as the "Whored Out"
flashcode. This is because it supports nearly every option Motorola offers,
except it has options that are not compatible with each other. Examples
are Software Encryption, and OTACS and OTACR -- which are proprietary to
the LAPD, UHF high band. Finding these in 800 MHz XTS3000's is messed up.

In early 2003, I started bitching on batboard that Nick's radios had old
firmware in them, and did not support new UCM modules, and described a noted
bug when used with speaker mics. I'm not sure if this is why Nick suddenly
started releasing newer host/dsp with his radios, but things changed a few
weeks after. His second flashcode (less whored out) comes with ASTRO25 9600bps
trunking installed. Unfortunately, it isn't supported by R07.08.00 host
firmware, and caused grief for 3600bps trunking users, as they could no longer
monitor without forced affiliation. After people started bitching, he went back
to the 591008-4F1E00-9 whored out flashcode. Then suddenly, Nick disappeared.
Nobody knows what really happened, but there are lots of stories.

If you come across a parts built radio on Ebay or elsewhere, don't be afraid
of it, just pay attention to host/dsp and FLASHport options. Also be aware that
if you send it in to the depot, it may not come back, due to the serial # issue.

I'm almost done, but I think I should continue ranting about KVL's (Key Variable
Loaders).

A few of us whores like running encryption on ASTRO. Doing so requires
encryption modules, AND.. a keyloader. There are a few keyloaders out there. I
will talk about DES, since they are the most common. The same applies to other
models.

T3011DX -- Works fine for all ASTRO portables/mobiles. NEEDS to be "D". C will not
work. A T3011DX is a DES/DES-XL/DES-OFB capable keyloader. It has 16 key memories,
and 16 shadow-key (used for OTAR) memories. It's big and ghetto looking, but it
works just fine. Don't pay more than $600US for one, or else you're getting hosed.

KVL3000/KVL3000 PLUS. -- There have been a few of these on Ebay lately. The
sellers I've seen, have NOT listed what algorithm is installed! Can you believe
that? "DUh I have a KVL3000 for sale". And? When I've emailed them asking what

algorithm is installed, they rudely reply "THEY DO NOT KNOW". That's like putting
a car on Ebay. "Selling: a car". You need a little more info than that! Buyer
beware! These vary in price, but don't pay more than $1500-1600 for them. One just
went for $2100, and the dork selling it didn't even list the algorithm(s)! I hope
the buyer wasn't scammed.

Well it's been a slice writing all of this, I hope it proves entertaining and useful
to ASTRO lovers. Additions, comments, and arguments are all welcome. Remember,
it's just a hobby

- r0f
10/28/03

-------
:

- Frequency Picklists feature allows you to view or define frequencies that
can be easily selected from many Conventional and Trunking receive and
transmit frequency fields throughout the CPS application. This feature reduces
frequency entry time and frequency entry errors by changing CPS frequency
field entry from a manual edit to a picklist style entry. This feature gets
enabled in View->Options->Frequency Options page. This list must be populated
before accessing it through the applicable dialogs.

- The Clone Wizard feature groups all fields needed to be updated when cloning
to one or many radios, or to one or many archive codeplug files.

- Macro Record and Playback feature can be used to record a series of
interactions within the CPS and play them back on a different codeplug.
Note that erroneous behavior can result from recording and playing back
a macro on separate machines that have significantly different performance
specifications.

- Drag and Drop Personality to Zone feature allows you to drag a Conventional
Personality or a Trunking Personality and drop it on top of any Zone
Channel Assignment zone for easily addition of channels to existing

zones

Rich Whiten spells it as "Whiten" in his Christmas cards and on QRZ.com, or at least he did back when he had a callsign. I'm throwing in with him on the correct spelling.

That should give you a huge clue as to credibility, viz a vis glenn baxter.

RHF,

I'm not going to followup any more after this one, except to say that the dashes and equal signs in your posting confuse me. You must be new to the keyboard.

However, I'm really digging my new IC-R10. Not terribly hot, nor selective, receiving on HF, but it's nice to be able to take a hand-held to work that lets me know if HF or 6m is "hoppin", plus for use as a regular scanner on VHF/UHF.

That being said, since this is a radio group, I also want to say that you should post *before* you start drinking. You sound like a very old person with the mind of a child.

But getting back to the JFK quote, you seem to forget that the purpose of government is to serve the people. The idea of "ask not what your country can do for you..." is completely contrary to the concepts espoused by the framers of the U.S. Constitution. You can compare that document, here: http://memory.loc.gov/const/const.html and then compare it to China's version:
http://news.xinhuanet.com/english/2002-11/18/content_633686.htm

"It also follows that if a government ... itself begins to violate those rights - then it is the right and duty of the people to regain control of their affairs and set up a form of government that will serve the people better." --Thomas Jefferson

Here are some good links to learn more about this country:

http://www.geocities.com/CapitolHill/7970/jefpco21.htm
http://www.kidport.com/RefLib/UsaHistory/AmericanRevolution/DecInd.htm
http://quote.wikipedia.org/wiki/Thomas_Jefferson
http://usembassy.state.gov/posts/rp1/wwwhw022.html

Now, it's important that I say this: whatever you feel about politics or religion, in this country you may say it freely. Yes, that's right, even if I don't agree with you. I've been called a jerk by people whose opinions I deeply respect.

All the best, and 73,
Dave

Could someone explain to me the difference between a magnetic field and an electrical field? I am studying for a ham license and I am having difficulty with these 2 terms.

Thanks

Reduce the resistance of the circuit.

# 5185. Electro-Voice 664 microphone - replacement element?

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-19 22:20:06 UTC
From: Mike Mayer <mayermh@ix.netcom.com>
Message-ID: <qQKEb.1546$IM3.1235@newsread3.news.atl.earthlink.net>
Source record: 60453

Does anyone know where I might find a replacement element for an Electro-Voice 664 microphone? It's a vintage mike.

Great mike for tube ham rigs as well as for general P.A. use. The element I have - the coil connections have corroded away. :-(

Great sounding mike - then went dead as described.

Have tried electrovoice.com, no luck. Many vintage mike websites, but no one selling elements.

Thanks,

Mike

Lloyd Davies has terminal PDBS
by Dr. Alphonse R. Ludowicz
Lloyd Davies has been stricken with terminal PDBS. This can cause delusional behavior, acting tough, seeing robots, thinking he can travel back through time and talking about women he has never known as though they are dating him.

It is somewhat common among lower class/white trash males and is well documented in the New England Medical Journal.

And, just what is PDBS you might ask. Well, it is more commonly known as "Pizza Delivery Boy Syndrome."

At the present time, there is no known cure, except a real good ass whipping, that usually returns them to a normal state of mind.

Hello

I wisht o convert 30 minute tapes to a digital format.
Is it better to use MP3 or WAV files. My concern is that these will be lrge
files and may crash the hard drive?

Nope. EV no longer has elements. The coils on these get bent and then
go open. As far as I know, nobody can rebuild dynamic mike coils.

>Have tried electrovoice.com, no luck. Many vintage mike websites, but no
>one selling elements.

They don't exist. Spend $50 and get a new one at a hamfest.

THE KG4LEG radio update from the 146.640 repeater

Today about 10AM coy roy kept saying
"WARNING!! WARNING!! THIS IS A RESTRICTED FREQUENCY USED BY REEFER
RONALD WRIGHT AND HIS DRUG TRAFFICERS"

roy loves to say he is a former marine,
today someone asked him to sing the marine corps hymn. Roy sang it
with a lot of pride, he knew all the words. I was surprised, I did not
think he could finish it.

Ron said jokingly today to people on the repeater that he is sending
out official "your banned from using the repeater" notices to all the
regular users, he said they are suitable for framing and if you are
not 100% satisfied he will include a 100% money back guarantee

It probably won't fit and it is not "original" but I have used the
receiver element from those old
black "500 type" telephones. The receiver makes a good dynamic
microphone with an
impedance of ( I think) about 500 Ohms.

Rich Whiten spells it as "Whiten" in his Christmas cards and on
QRZ.com, or at least he did back when he had a callsign. I'm throwing
in with him on the correct spelling.

That should give you a huge clue as to credibility, viz a vis glenn
baxter.

LRod

Master Woodbutcher and seasoned termite

Shamelessly whoring my website since 1999

http://www.woodbutcher.net

Rich Whiten lacks credibility as well. Is he still claiming that his wife
"accidentally" emailed his license resignation to Riley??? He was a band
hog throughout his Ham Radio days and excluded everybody but a select few
who were running tons and tons of power. If he is joining forces with MAN as
is being said, this will be a real pair to draw to. Two malcontents, on the
air together, commiserating and grousing.

Get your tape recorders out, boys. This forthcoming blab cast should be a
real hoot!

I'm sorry you ended up losing your friend. The guy who you refer to
is not really a crossdresser though, so much as he was one of those
people who feel that the gender they had at birth does not match the
one their personality has always had. If you look at it from his POV,
the hormones and surgery fixed a mistake. His approach towards you
was most likely made as a "female". His big mistake was not accepting
that to you he'll always be male.
Crossdressing (something I did a paper on in college) isn't primarily
sexual in nature.

> You - Carmen, being a woman ( I GUESS) - how would you like to be in
a
> restroom with a male crossed dressed - in there with you? If my wife
> was in a restroom and some perv went in there cross dressed, I'd be
> very pissed off. G.W.

Yes, I'm a woman. This might surprise you, but I wouldn't have a real problem with that. If he's dressed as a woman then he's going to cause quite a stir in the men's room, and might well end up in a dangerous situation if there are men in there who don't understand what crossdressers are. What they do is unusual, but only harms people who look at them and *choose* to be offended.
One more factor that would make the situation of a crossdresser using the ladies' room no big deal - we only have stalls with locking doors on them. Really think about urinals for a moment. A bunch of men who're most likely complete strangers unzip and display themselves while they answer nature's call. From my POV that's far more startling than some guy in a dress. :-)

Take care,
Carmen

Actually, many parents are indeed siblings. You did not specify that
they were siblings of the same parents, so your assertion is without
merit.

Some months have 30 days, some months have 31 days. How many months
have 28 days?

They all have 28 Days.

Divide 30 by half and add ten. What do you get?

70. Dividing by half is the same as multiplying by 2.

A farmer had 17 sheep. All but 9 died. How many live sheep were left?

9 lived. All but nine died, therefore 9 remain.

If you had only one match and entered a COLD and DARK room, where there
was an oil heater, an oil lamp and a candle, which would you light
first?

The match.

To know and to be, this is not even a question, there is no alternative.
You see it clearly in the loneliest little avenues between particles and
waves, shunned even by the gregarious quark and unknown by the various
strands of time, so big it cannot be seen, yet so little it is
immovable, lies the fabric of the ultimate reality gripped in the tiny
fist of the all or nothing."

Hello, Radio Enthusiast!

Currently, there is an elongated coronal hole in geoeffictive position on the solar disk. This coronoal hole is quite a bit smaller than the coronal hole of last week.

The solar wind speed is currently above 460 km per second, but the Interplanetary Magnetic Field (IMF) currently has a northerly orientation (the "Bz" is positive). There have been brief moments with the Bz going negative (the IMF orientation goes south), so we are seeing the geomagnetic field becoming more active.

Currently the planetary K index (Kp) is 3, down from 4. I am expecting this fluctuation to continue until Monday, with swings between active to minor storm levels.

This ultimately translates to slightly degraded ionospheric conditions, with the maximum usable frequencies (MUFs) just a bit depressed from normal. The highest HF bands suffer under these conditions, and mid-HF openings over high-latitude and polar paths become weaker, and of shorter duration. Again, by Monday, we should start to see conditions settling down and HF propagation becoming excellent. The 10.7-cm flux is above 120, so we'll be seeing nice higher-band HF propagation through the next week.

On VHF, I don't expect strong enough geomagnetic activity to trigger any Auroral-mode propagation. There might be a few periods of sporadic-E (Es) activity, however (we often see a return of Es during December and January). The current 10.7-cm flux is above 120, so I also do not expect any significant F-layer propagation opening on VHF.

Happy Dxing!

Yeah, I'm sorry I lost their relationship too! They were nice, but when they hit on me, that was the end of it. I had a girl then, and they knew it. So to me, that was the unpardonable sin. What others do, doesn't bother me, be it cross dressers or whatever, so long as it does NOT bother me. I will STILL get angry if a CD goes into a restroom with my woman in there. They have no reason to be in there. NONE. They can share a urinal just like the rest of the "men" do. And as far as displaying one's self at a urinal? Most men (STRAIGHT) - won't look. I know I sure in hell don't! Back to other's actions. I was on a CB radio once -talking, a male came on after the others I was talking to had left. He said to me. "I'm gay, would you like to talk to me?" I replied "I'll talk to anyone, just don't try to persuade me with your ideas or try to hit on me and we'll be ok." I don't agree with CD and Gay - but hey... to each his own. I'm not offended unless they press themselves into my realm. As to you, I wasn't sure if you were a male or female. Your post led me to believe you may be a woman, but I couldn't be 100% sure. I've known of men with the same name and spelled the same. Cross dressing from a dress to a t-shirt and jeans - you feel like a cross dresser? Hell, that isn't cross dressing to me. Not from a woman to a man like image. As opposed to a man changing into a bra and panties and a dress complete with make up. Put a 3 piece suit on - like a man, get a butch hair cut and so on, then maybe I can agree with your point of female to male cross dressing. G.W.

JFK was making a request that people volunteer their time to make this
nation and through the Peace Corps the world a better place. It was not
a demand and not against the Constitution. Trying to compare this
request to any demand Red China has made of their people under penalty
of their law is insulting to our nation and memory of a great leader.
You show no understanding of past events with comments like this. You
should be ashamed of writing something like this. Please re-think what
you wrote.

I can count the number of times on one hand that a world leader made a
speech inspiring people to make the world a better place out of self
sacrifice and you try to compare this to a repressive communist regimes
actions? Totally incongruous is this thinking.

Mike, your best bet is likely to pick up a used 664 on eBay, then
either canabalize it for parts or use it as a total replacement,
depending on its condition. It's not uncommon to find these on eBay.

For example, here are two typical and current listings:

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=2367626444&category=41465
http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3066853421&category=15000

TELAMON,

JFK's "Call" was NOT Limited to the Peace Corps; but to
Service of All Kinds to This Nation to Make It Greater.

+ To Get Involved in Government Civil Service.

+ To Join the Military

+ To Become a Teacher, Nurse, Doctor, ETC

+ To Become a Fireman, Policeman, Public Service Worker

+ To Volunteer in Your Communities - Helping Others

+ To Volunteer for the Peace Corps, VISTA, AmeriCorps

+ YES - Even To Get Involved into Politics

For Every American to Actively Work to Build A Better America [.]

NOTE: IMHO - A Better America - Will Make for A Better World.
- I Do Not Subscribe to the "False" Idea of the OWLES
- - That Only By Tearing Down America in Words and Deads
- - - That We Can Then Start to Begin To Build A Better World.

REMEMBER TOO: On that Inauguation Day JFK Also Spoke These Words.
"Let Us Go Forth To Lead The Land We Love,
asking His Blessing and His Help,
but knowing that here on earth
God's Work Must Truly Be Our Own."
- - - Inaugural Address of President John F. Kennedy
- - - Washington, D.C. January 20, 1961

Sometimes I listen to the ARUFON (UFO) Net on 3977.7, as I did tonight. But lo and behold, guess who's planted his fat ass on 3973.0? K1MAN ! The UFO net had already started and K1MAN just opens up 4 khz away without any regard to ongoing QSOs.

Where the hell is the FCC? Why is K1MAN still on the air?

Oh man, I'm sorry. I really messed up my original posting. K1MAN opened up on
3977.3 khz, only 400 cycles away from the ARUFON net on 3977.7 khz.

NOW do you see my point?

## 5221. Rich Whiten?

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-21 09:46:35 UTC
From: Pablo Gonzles <URL@1234>
Message-ID: <bs3q5r$k4b$0@pita.alt.net>
Source record: 60391

Is Rich Whiten really missed? Come on...be truthful. One or two may miss him but as a previous comment was made, he was a band hog.
The guy was a pain in the ass and he took pride that he could be so.

Now his license is gone, forever gone and only his two or three groupies miss him.

Rich was more than controversial. He was in violation of many rules and regulations, overpowered station and malicious interference being but a couple.
His story that he accidentally sent his resignation to Riley holds about as much water as a leaky paper bag.
Rich is dearly departed and this may surprise some, but not others, but his absence is welcomed by many. Whiten just did not get it. Riley warned him time after time and Rich kept on being obnixious.
Rich is gone now. Thank you, Riley.

If you have no life, and if your day is boring, be sure to listen to Glenn Baxter as he hosts Rich on the blab cast talk show. That program should be one helluva waste of oxygen.

# 5222. HELP Request: Can anyone lend a hand? A.D.I. #AT-600 dual band HT NEED an Accesssory

Happy Holidays to all from N2NJK,

I purchased an A.D.I. #AT-600 dual band (Same as Radio Shack had uner their name for a very short time - until they found out "the" mod could be easily done).
Radio has been gathering dust for quite some time and I want to use it a bit. I had heard a long time ago there was a computer software/ & serial cable accesorie to program the unit from your PC. Can ANYONE give me a lead on such an item?

God Bless,

Ray Miller N2NJK

It depends on what the content is -- music or voice, for example. You
will typically get more than 6x reduction in file size between WAV files
and MP3 files (MP3) being smaller) and you probably won't notice the
difference. When I'm grabbing something from an HF QSO I always save it
in MP3.

Go to http://lame.sourceforge.net/ and download a really good MP3
encoder and decide for yourself.

hvalver at hotmail dot com
rosemarytreftz(at)yahoo/dot/com
(352) 637-1755

General Radio:

(28) 1800-A VTVM:
0-150v AC/DC in 6 ranges (0.5, 1.5, 5, 15, 50 &
150v). Wooden case. Unmod, excellent condx,
w/orignal special power cord. Untested.

1230-A DC Amplifier & Electrometer.
Good phys condx and panel lights work. No one here
knows enough about it to check it out.

(12) 1001-A Signal Generator:
5 khz - 50 mhz in 8 bands, 100mv output, CW/400 hz
modulation. Works good up to about 15 mhz. Tubes
tested OK. Unmodified except "Modulation" control
pot appears to be non-original. Osc section en-
closed in oven. Good physical condx, no dents,
gouges, etc. Missing AC cord. Very clean inside.

(13) 605 Signal Generator:
9.5 khz - 30 mhz, with model 605-PL power supply.
Wooden case. Missing tuning dial. Considered to
be parts unit or "hangar queen" to be parted out.

SPECIAL EDITOR'S NOTE: Can you believe it! Another year is almost over. Anyway, my family (wife/OPDX's chief proof-reader Linda, Teddy [TJ] and wife Jessica, Katie) and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy Holiday and Season's Greetings". Also, we would like thank the many who have contributed information over the year (there are too many to list). REMEMBER, without them there would not be an OPDX Bulletin. I would also thank the many who sent holiday greetings. I tried to answer some and wished I could answer each one of them individually, but it would take a huge amount of time. You would not believe the amount of E-mail I receive......
73 and Have a Great Holiday de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 14th/December, through Sunday, 21st/December there were 224 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FR/j, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HH, HI, HK, HK0/a, HL, HP, HR, HS, HZ, I, IS, J2, J5, J8, JA, JD/m, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T5, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, VE, VK, VK9L, VK9N,

VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

** IMPORTANT NOTICE/REMINDER ** The Ohio/Penn DX Bulletin now has a new FAX number. Contributors can now send/fax their DX information to the following number: 1-419-828-7791 ( F A X only! )

3B9, RODRIGUES ISLAND (Update). OPDX received an update/bulletin from Don Field, G3XTT, (3B9C Publicity Officer) on the upcoming Project Star Reach, a project focused around a major expedition to Rodrigues Island, with the callsign 3B9C, just before going to print. Since their last announcement, additional team members and several additional sponsors have come on board. The shipping container has now been packed (see photos on the 3B9C Website) and has begun its journey to Rodrigues. This container holds considerably more equipment and antennas than they took to the Comoros (D68C), including capability for 70cm (satellite and moonbounce). They really do intend to cover as many bands and modes as possible, not only to satisfy the demands of the many specialist groups within the ranks of amateur radio, but also to encourage those of you who do tend to specialize (whether in HF, LF, RTTY or whatever) to try something new. Excerpts from "Bulletin No. 2" state that the new team members are Robert/F5VHN and Eric/K3NA. Also, Project Star Reach intends to use this opportunity for educating non-DXers into the "how, where and when" of working DX. They are delighted that several major amateur radio publications recognize the importance of this in revitalizing our hobby from within, and have agreed to run articles ahead of the 3B9C operation, giving suitable hints and tips (which will, of course, be equally applicable to other expeditions as time goes by). Within the constraints of time and geography, they are also happy to entertain requests for club presentations along similar lines. Don Field, G3XTT, says, "Drop me an E-mail, and let's see what we can do." Don's E-Mail address is: g3xtt@lineone.net
One way they hope to encourage participation in Project Star Reach is by way of the Nevada Rodrigues Trophies. The Nevada Comoros Trophies offered as part of the D68C DXpedition for working band-slots were extremely popular with DXers, with the winners working D68C on 23 band-slots. Trophies were also available to clubs to encourage their members to be active and work D68C either from home or perhaps from the club station. During the 3B9C DXpedition they will be running the Nevada Rodrigues Trophies. The rules will be broader than those used for the Comoros, and there will be continental awards as well as awards for clubs outside the UK. There will also be special awards for newcomers to HF. Details will be available soon. The Project Star Reach is still looking for much needed funds to help pay for this DXpedition. The costs of procuring and shipping so much hardware are high - in the case of 3B9C, they estimate shipping costs alone to be in the order of $20k. They are looking for help from commerical, club and individual sponsors to help make this happen, rather than having the burden fall totally on the team members (who, of course, will make some contribution to the logistics costs, in addition to finding all their own

travel and accommodation expenses). Between now and March further bulletins will be issued, but you can already find out much more by visiting the Web site which is up and running at: http://www.fsdxa.com/3b9c

9V0, ANTARCTICA. Allan, 9V1DX, is now active as 9V0A from Ellsworth Mountain. He was spotted in 40 and 30 meters CW. Watch 7001 or 10108 kHz between 0130 and 0300z.

AP, PAKISTAN. Bob, AP2JZB, was active on 17 and 12 meters SSB this past weekend. Watch around 18119 and 24946 kHz between 1330 and 1500z.

CQ MAGAZINE ANNOUNCES NEW WAZ AWARDS MANAGER. On December 15th, CQ Publisher Richard Ross, K2MGA, announced the appointment of Floyd Gerald, N5FG, as CQ Worked All Zones (WAZ) Awards Manager, effective January 1, 2004. Floyd succeeds Paul Blumhardt, K5RT, who is stepping down after four years in the position due to increased work and family commitments. "We will miss Paul's dedication to WAZ and the CQ awards program in general," said Ross, "and we thank him for his many contributions. He sets an excellent example for his successor, and we welcome Floyd to the CQ 'family.' " The press release states, "Floyd Gerald, N5FG has been an amateur since 1972, and is an accomplished DXer. He holds many amateur radio operating awards, including 5BWAZ (200 Zones), #1 DXCC Mixed and SSB, CQ DX Honor Roll SSB and CW, 9 Band DXCC, and 6BWAS. He is also a founding member of the Magnolia DX Association. Floyd served as the manager of the W5 QSL bureau from 1998-2002. During his tenure, the W5 QSL Bureau was the first QSL Bureau to employ a website so users could check on their QSL 'accounts' on line. He's also served as CQ Awards and ARRL DXCC Checkpoint, and has been a QSL manager for several DX stations. Floyd is retired from the housing industry and lives near Wiggins, Mississippi, with his wife Sherry on their 5 acre antenna farm. CQ would like to ask WAZ applicants to delay sending applications (and cards) to Floyd until 1 February 2004, in order to allow for an orderly transition and transfer of records. We apologize for this delay, but feel that it will reduce confusion and possible loss of anyone's application during the transition. Applications and cards sent to K5RT will be forwarded to N5FG each month. After February 1, WAZ applications and cards should be sent to:
Floyd Gerald, N5FG, 17 Green Hollow Rd., Wiggins, MS 39577-8318.
The Worked All Zones awards are part of a comprehensive operating award program sponsored by CQ magazine, the world's leading independent amateur radio publication."

DXCC NEWS. Bill Moore, NC1L, ARRL DXCC Manager, sent out the following press release: "The following is approved for DXCC credit:
Johnston Island KH3/KT6E - Only authorized persons are allowed to land on Johnston Island. Proof of presence at certain DXCC entities is required. Representatives of most operations are most helpful and cooperative in providing the necessary proof of presence and/or operating authorization as required. A very small number are not. Although no one has provided any information regarding that status of KH3/KT6E, some research on our part indicates that DXCC requirements have been met. Therefore, KH3/KT6E is accepted for DXCC credit."

FO/A, AUSTRAL ISLANDS. "The Daily DX" and "La Gazette du DX" are reporting that a Finish group will be active from here between January 5-19th. Their callsigns are not known yet. The team includes: Veko/OH1AWW, Jouko/OH1RX, Henri/OH3JR, Veijo/OH6KN and Kimmo/OH9MDV. Activity will be on all bands on CW/SSB/RTTY/PSK31. There will be a special emphasis on the low bands. More details are forthcoming, and the team plans to have a Web page.

IOTA 40TH ANNIVERSARY AWARD. Don Field, G3XTT, informs OPDX readers:
Just a reminder to IOTA enthusiasts (and would-be IOTA enthusiasts!) that IOTA 2004, the IOTA 40th Anniversary Awards Programme, starts on 1st January. A set of files for downloading is now avalable on the CDXC (Chiltern DX Club, the UK DX Foundation) Web pages, at:
http://www.cdxc.org.uk (follow the IOTA 2004 links)
These include a tracking spreadsheet that does absolutely everything you might need (my thanks to G3PMR and G3LAS for their work on this) or, if you don't want that level of complexity, there is a simple application form and lists of Premium Island Groups (by month) and Rare and Unnumbered groups qualifying for the DXpeditioners Awards. Remember that all applications must arrive in electronic form. No paper applications will be accepted. Full rules and a list of Frequently Asked Questions also appear on the Website, but questions may also be sent direct to me." Don Field's, G3XTT, E-mail address is: don@g3xtt.com
Any queries about the IOTA Programme as a whole should, of course, continue to go to the IOTA Manager G3KMA ( g3kma@dsl.pipex.com ) and general information about the IOTA Programme is available on the IOTA Web pages at: http://www.rsgbiota.org

KG4, GUANTANAMO BAY. Bill, W4WX, will be active as KG4DX from GTMO January 13-19th. He will operate the HF bands and 6 meters. QSL to his home call, direct with SASE or via LoTW.

KP2, U.S. VIRGIN ISLANDS. Kan, AB2RF, will be active as KP2/AB2RF from St. Thomas between December 26-31st. Activity will be on 80-6 meters CW/SSB/RTTY. QSL via AB2RF using the address on QRZ.com.

LIGHTHOUSE ACTIVITY.....
Remember, the "Lighthouse Christmas Lights QSO Party" is between 0001z, December 20th and 2359z, January 4th.

Warren, WM2Z, plans to activate the following lighthouses as WM2Z/m during the ARLHS "Lighthouse Christmas Lights" event: Horton Point (ARLHS reference USA-387), Long Beach Bar (USA-440), Orient Point (USA-606) and Plum Island (USA-633). Activity will be on 20 and 40 meters SSB. QSL via home call (QRZ.com).

Dave, K7HMP, plans to activate the Lightship Overfalls (ARLHS USA-573) as K7HMP/4, December 27th, sometime mid to late morning. Depending on propagation and contacts, later in the day, he will move to Cape Henlopen State Park and activate Harbor of Refuge (USA-366) and Delaware Breakwater (USA-222). Dave is also looking into the "Historic" lights at Cape Henlopen (USA-120) and the Cape Henlopen Beacon (USA-1186). If he can activate them from a similar location, he will; otherwise, he may move to a separate location for some short period of time. If all

goes well Dave may stay overnight and also operate on December 28th. Being a glutton for punishment, he will also have the data and log sheets ready for Fenwick Island Light (USA-283) if time and band conditions allow. Activity will primarily be SSB on 20 and 40 meters. QSL via his home call (QRZ.com).

In the framework of the official launching of the greatest steamship of the world "QUEEN MARY 2" built in French yards of the Atlantic in St. Nazaire (Department 44), a station will be active December 22nd from the lighthouse of the "Vieux Mtle" (DPLF reference PB-181 for the French Sea Coast Lighthouses award). Activity will run from 1200z until 1700z, using the calls F6IFC/P and F5OGG/P. Look for them on 14250 and 7044 kHz SSB, 14044 and 7024 kHz CW. A special QSL will be available for this expedition with the picture of the lighthouse and the QUEEN MARY 2. QSL for F6IFC/P via F6IFC. QSL for F5OGG/P via LX1NO.

NEW OFFICIERS FOR 2004. The Western Washington DX Club (WWDXC) have elected the following new officers for 2004.
President - Joseph Shinners, W7GTO
Vice President - Dennis Bowman, W7SNH
Secretary - Brian Moran, N9ADG
Treasurer - Marina Zuetell, N7LSL
Trustees - James Hadlock, K7WA
Robert Nielsen, N7XY
Richard Swanson, K7BTW
Mary Lewis, W7QGP
Joe Gregory, W7QN
Kirk Bellar, N7UK
The WWDXC would also like to invite everyone to the Pacific NW DX Convention to be held in Everett, WA, between July 16-18th. Details should be available soon on the club Web site at: http://www.wwdxc.org

QSL INFO AND NEWS.....
Steve, OM3JW, reports that the first batch of 7W4HI (AF-094) QSLs (that were receive direct) was expected to be mailed on December 19th, and another batch was expected to go out after Christmas. If you don't get a 7W4HI QSL at the end of January, send E-mail to Ivan, OM3CGN at: om3cgn@nextra.sk

Champ, E21EIC, is the QSL Manager for 9M0SEA (not Spratly Island), the special callsign used during the SEANET 2003 in Johor Bahru, West Malaysia. He is also the QSL Manager for 9M4JB the special callsign used during the CQWW CW Contest in West Malaysia.

Mac, W3HC, informs OPDX that he is the QSL Manager for new stations: XQ3WTR and CE3WTR.

Hiro, JA6WFM, now active as JA6WFM/HI8 says his QSL Manager is JA6VU (QSL direct only with SASE). Bureau cards will be handled after Hiro returns to Japan.

S2, BANGLADESH. Koichirco, S21YY, is active almost daily on 3507-3508 kHz sometimes starting at 1230z and as late as 1730z. QSL via JM1HXU.

SPECIAL EVENT. Look for Jack, K9LSB, to be operating as K9L from March 1-14th in celebration of 50 years as a licensed operator. K9LSB and members of the Hoosierland Amateur Mobile Systems will operate all bands and all modes from the home of K9LSB in Fort Wayne, Indiana. All QSLs go to K9LSB. (a SASE will get you a nice card in return). Equipment for the activity will be a FT-1000MP Mark V and a FTV-1000 6 meter transverter into an A3A at 65ft. He will use dipoles on everything else.

SPECIAL EVENT (Attention Prefix Hunters!). Carlos Beviglia, LU1BCE, Secretary of the Radio Club Argentino (RCA), informs OPDX that between January 4-15th, the RCA will participate in the 6th Andes Mountains Land Cross. It is made every year honoring the cross that General San Martin did leading his army to Chile during the American Independence War in 1817. The cross will be made as San Martin did by land on mules, through the mountains the same ways the army did, at an average height of 4500m. The RCA will provide the comunication for the event for the 300 participants who will divide into 6 columns, and spread off 750 kms. RCA will set up two HF stations at every camp point throughout the whole journey. The DX operation will be mainly on SSB/CW on all HF bands, and the callsign to be used is LS4M. Attention WPX hunters, the LS4 prefix has not been activated for many years (nearly 20). A special QSL card and award (5 QSOs any mode, any band) will be issued. QSL info is via LU4AA, bureau or direct.

T33, BANABA ISLAND (Update). Preparation for the 2004 Banaba DXpedition is on its way according to their Web page. Last week a team finalized the loading of the 20 foot container with approx. 4500 Kg of materials which is now on its way to Kiribati. They hope it will arrive there at end of February. They still mention that they still have 2 operator spots available (provided travel arrangements to Kiribati can still be arranged, flights are getting full). The first photos have been published on the "Pictures" section on their Web site, so you can get an impression of what is going to be transported to the island. The 2004 Banaba DXpedition Web page is at: http://www.dx-pedition.de/banaba2004/pictures-index.html
The team has put in many weeks of effort to prepare as much as possible so they don't loose any extra time on the setup of the station. They state all masts are ready to go; the SteppIR's are pre-mounted, the 6 and 30 meter beam is pre-mounted, all low band antennas are pre-cut, generators have had their first hours run and oil is replaced, ready to play, coax and control cables are all cut on right length with plugs, etc. Apart of possible problems with transportation delays, not much can go wrong now. They are all confident that the Banaba 2004 operation will be a successful one. They are still looking for addition funds. The transportation costs are much higher than expected. They had to buy a container because it was impossible to load it in 2 days which was expected from them in the first place.

TO4, EUROPA. Interesting week. On Wednesday, December 17th, an annoucement was sent out stating the TO4E team was "definitively QRT" because of

tropical cyclone CELA, and the team made about 32000 QSOs. The report stated that CELA's winds blew violently and the buildings on the island suffered. Roofs were torn off but nobody, neither the military detachment or the Europa 2003 team was injured. However, the report stated that radio equipment was damaged "a lot". The team was expected to be back on Reunion on Friday, December 19th. However, another delay took place and the team did not depart from the island. The team's departure has now been pushed back a few days, and they have obtained permission to continue using TO4E during this time. The TO4E team came back on the air Friday, December 19th. QSNs show that they were active on 20/15/12/10 meters. As this was being typed Sunday morning (1300z), no QSNs were reported. Please refer to the TO4E Web page for more details and updates at: http://europa2003.free.fr/europa_infos-e.htm

TT8, CHAD. As mentioned in OPDX.638, Allan, N5XZ, is now active as TT8XZ using some type of Motorola radio which is very limited in accessing frequencies (he has to program each frequency in the radio). He was spotted this past week on 14130, 14195, 7050 and 7055 kHz basically between 1900-2000z. QSL via N5XZ.

YA, AFGHANISTAN. Johnny, LA5IIA, is now active as YA8G in Kabul for about the next 5 months. He was spotted this past weekend on 20/17/12 meters. Most of his activity will be on CW and some RTTY, with very little SSB. He is there as a UNICEF worker and plans to be active in his spare time. QSL via LA4YW. For more details and some interesting pictures, please visit his Web page at: http://www.qsl.net/la8g/YA8G.htm

From: Carl Smith <N4AA@dxpub.com>
Subject: FOR IMMEDIATE RELEASE - ZA Ham Course

Martti, OH2BH asked that the following be distributed this weekend.
**********
IT'S NOW YOUR PLEASURE TO TAKE THE CHRISTMAS SPIRIT TO ZA-LAND AND FURTHER ENHANCE AMATEUR RADIO IN ALBANIA - ONCE THE RAREST COUNTRY OF THEM ALL

Project Goodwill Albania 2003 closed on December 15, 2003 as one of the richest experiences shared by more than forty (40) volunteer amateur radio operators who participated in the event at various times during a five-week program. The best of Albania's youth with their professors and associates were introduced to the joy of international amateur radio. Thirty-nine (39) new licensees are ready to join this great hobby of ours. Unfortunately radio equipment is currently out of reach for these new Albanian hams, and therefore it is reasonable that a collective effort should be launched.

We now seek your personal help to ensure that these licensees will soon meet us on the bands. Here is the recipe to make them active on the bands.

A: We all have old functional radio equipment around that will better serve these fine new licensees than us. It may be a unit that once served you so well that it can now travel to Albania and bring happiness to those you will soon talk to. Let's limit ourselves to fully functional transceivers, preferably solid-state, although your TS820s and TS830s and the like would go straight to the point.

B: If you have no spare equipment, your monetary support for buying a piece of ham gear is welcome. We target a small new transceiver priced at less than USD 1,000. A minimum donation of USD 100 will be processed through the Northern California DX Foundation (NCDXF) and it can be tax deductible to you.

Just search the web ( http://www.za1a.com/help/help.htm ) and you may wish to select your own future sponsored amateur radio licensee in Albania based on his/her picture and personal profile of individual interests. One day you may be talking to your selected friend in ZA-land and/or even visiting her/him in Albania. Upon receiving your pledge, we will be delighted to provide you with direct contact information - email, phone and postal address - so you or any of your friends can communicate with your selected Albanian ham. The actual equipment shipment may be consolidated within your country.

The First Albanian DX Convention will be organized in June 2004, and you will be personally invited to be there and meet your new ZA friend and others who responded to this call for help. I am looking forward to seeing many of you there and sharing the adventure and operating from ZA together with you.

Practical Arrangements

Please contact one of these Project Goodwill Albania 2003 representatives:
Angel, EA1QF (ea1qf@ure.es)
Roger, G3LQP (g3lqp@aol.com)
Yoichi, JP1NWZ (jp1nwz@cqpub.co.jp)
Uli, DJ2YA (dj2ya@t-online.de)
Carsten, DL6LAU (carsten.esch@appello.de)
Ole, LA2RR (la2rr@online.no)
Wayne, N7NG (n7ng@arrl.org)
Chip, K7JA (c.margelli@vxstdusa.com)
Carl, K9LA (k9la@arrl.net)
Warren, K7WX (k7wx@earthlink.net)
Mario, I2MQP (ari@micronet.it)
Max, I8NHJ (i8nhj@pagus.it )
Pertti, OH2PM (pertti.simovaara@pp.inet.fi)
Jim, VE1JF (74237.2073@compuserve.com)
Martti, OH2BH (oh2bh@sral.fi)

and you will receive instructions on how to proceed with your equipment donation.

In case of a monetary donation, please write your check to NCDXF, Project Goodwill Albania and mail it to Bruce Butler, W6OSP, 4220 Chardonnay Ct, Napa, CA 94558, USA or contact Bruce ( w6osp@aol.com ), for his instructions and advice.

We plan to get the equipment to Albania as soon as possible so that all the new licensees will be operational before the June Convention. Your callsign will be listed on the Honor Board which will be displayed at the new University club station (ZA1UT - University of Tirana ). The University club station will be officially opened during the spring in time for the First Albanian DX Convention.

Best Season's Greetings - DX Is!

Martti Laine, OH2BH

You have a very strange point of view. Since when are government jobs
(someone has to do them) "welfare"? Since when is volunteerism paid at all?

E mail to the 64 machine people about kg4leg & on 12-21-03 he was
still jamming and causing problems for 146.640 people.

Hey Guys,
Some of you have said you did not receive this earlier so I am
sending it again.
Also check out a nice website at www.fab-corp.com Click on the
links for ham products at top left. Company owned by our own KG4YZZ
AND KG4YZY,Shawn and Dave.

Don,

Would you post a message to the group stating that I would like for
all on the repeater not talk or even acknowledge KG4LEG. This guy is
nuts, as we all know, and he gets off by fighting. He will of course
jam trying to cover the users, but think it best if we do not talk to
him.

Wright,N9EE,the Owner of the Holiday 146.640 N9EE Repeater ...)

---

Hey Guys...
Ron,N9EE has requested that we all Not get involved with a
conversation with KG4LEG.
While I realize that a lot of us (including myself) cannot resist the
firing off of a few salvos of insults to this guy,We as a group
represent the Greatest coverage repeater in Tampa Bay and should be
able to look past KG4LEG and move on.
This Guy is perhaps the only jammer that I have heard give his true
name and callsign.We should be able to work with that and this should
allow us to see his dismissal from Ham radio.
Great efforts are being made to record this jerk with several people
doing the recording.These recordings will be sent to the F.C.C. as
soon as possible.
I normally don't "label" people ,however, This guy is stupid and has
invited us to get him off the air.
SO LETS DO IT.......

---

I call upon all who receive this Newsletter to write the F.C.C. and
let them know about what you have heard Roy,KG4LEG say and in full
detail.
Use the following info...

1. Who ......Who you are in full (Your callsign,Name,address,phone
number,and your F.C.C. ULS number) (found on your detail page on
www.qrz.com )

2.What......What is your complaint in full detail. What have you heard
Roy,KG4LEG say on the repeater and at what times and dates.Should
include KG4LEG's full name address also (found at www.qrz.com ) (You
need to be as accurate as possible...) Letter should indicate that
during violations he uses his callsign to identify his station.

3.Where......Where have you heard the violations of F.C.C. Rules and Regulations.(The 146.640,N9EE repeater and list any other repeaters you have heard Roy,KG4LEG violate F.C.C. Rules.(He has been on other Repeaters with his activities as well)

3.Why.....Why You believe KG4LEG's activities need F.C.C. actions.
Note: Be sure to save a copy of your letter in case needed.

---

The email address for Mr. Hollingsworth at the F.C.C. is rholling@fcc.gov

---

Hopefully this helps all of you in writing the F.C.C. and we can get him off the air. While it is a terrible thing to try to get a licensed operator off the air,This is the exception.This man shows NO respect to any operators that use the 146.640,N9EE Repeater and in fact makes all of the users and all of the 2 meter band look bad. This repeater has been the butt of many jokes in the past due to the jammers and other things going on...We need to make a statement to the Ham community that this type of operator WILL NOT AND SHOULD NOT BE TOLERATED BY ANY REPEATERS' USERS. I ask all to help in the effort. If all of the approx. 200 operators who use this machine,email the F.C.C. we all who use 2 meters will be well on our way to making 2 meters respected in the Bay Area again.
And what about the hundreds of scanner users in the Bay Area ?....What does this type of activity say to them about Ham radio ?

---

Thankyou for your interest in The 64 NEWSLINE.
This newsletter contains information that may be of interest to the Tampa Bay Ham community.
If you have any information you would like to share with the 64 Repeater Group please feel free to send it here and it will be passed along to the Group.
Any submissions do become property of the Editor and may be sent out as time and space allows.
This newsletter may be forwarded to other Hams ONLY PLEASE...
Thankyou,

all?

You also have a very strange point of view!
Government jobs have always been the root of welfare.

(When the public welfare was reformed then President Clinton ordered
thousands put on the federal payroll to "Employ them" Elevator operators
for the Pentagon, for automatic self serve elevators. etc.)

IE: Position paid by the taxpayers without responsibility for the outcome or
result.
Show me anyone in any government position who is held responsible for the
damage they do, or failures to perform! Never happens, or rather so
rarely it is a major news event, when was the last time you heard of a
government employee held responsible!

None of the positions listed are actually Volunteers! All are paid,
although some are called compensation. Pay, Salary = Compensation. No
difference.

There used to be volunteer fire men, and other "Public Service
positions, but not much anymore, the Unions are using these positions to

extract moneys to enhance the political position they uniquely espouse!
That THEY OWN these positions!

Up at Dayton, several years ago, Riley Hollingsworth claimed he had GLENN A BAXTER under control. Obviously, the FCC net didn't hold. Time for the top cop to get that joker out of the broadcast business. Baxter's ticket runs out 17 Oct 2005; maybe it should just be left expired. Better a pirate than a ham.

BA,

I guess what 'roger' does not understand was that JFK was calling for
the American People to be "Committed" to a Life's Work in any form of
Public Service. YES - These were JOBS and most of the Volunteer
Programs have their Benefits. But... JFK was asking more of
individuals; then simply doing a 'job'. Things like a bring a Passion
to their Work. A Desire to make this Nation a Better Place for All
the People. Giving Back To America.

As for 'roger' last three lines:
* Do you suppose JFK was shot for mouthing off?
* If he had not said those things, would he still be alive?
* Would he have been elected for a second term?

'roger' evidently subscribes to the "False" Idea of the OWLES.
That it is their Duty-In-Life to Tear Down America in Words and Deads.
To Attack America's Dead Heros and Public Leaders like JFK.

Since you said "I guess" you acknowledge you ignorance.

None of the comments you appended,
from you own questionable bias has
anything to do with what I said and do
not answer the question ask.

The office of the president is a distractive function,
the speeches quoted were political in nature.
Not in keeping with the proper performance of his office.

Would he have been reelected?
I wonder.
He did reduce taxes, possibly for the wrong reasons,
we will never know.
He was not a deity, nor an exceptional man.
His fame came from being assonated!
Not a satisfactory way to make a mark in history.
IMO

The only attack was yours. Unwarented and unnecessary.
JFK was not and is not a Hero! He is DEAD!

I subscribe to the Readers Digest.
Never heard of OWLES.
I am a thirteenth generation American,
a veteran of the US ARMY 1st Division.

I do not tolerate insults from those speaking from ignorance.

> wabfh ~ RHF
> = = = We Are Better For Him (JFK).

I also do not subscribe to a religious following to a figure who contributed little to the strengths of the Construction and the limited powers the Federal government has been permitted. Only the founders deserve such reverence.

You should read more about his service in WWII.. perhaps the book PT-109?
He was a war hero, more than we can say about our last two presidents
(including the current one).

It was his speaches I addressed, not his service record.
He did indeed loose his ship to a Japanese
Warship and managed to save the crew.
I have heard the story, and seen the movie.

But being assinated did not make him a hero.

Clinton, avoided service and was largely disrespected for it.
Bush (current) served in a manner that was not sterling, but he did serve.
I can't say I approve of either's conduce relative to the military,
but President Bush is at least well liked!

Again, this has nothing to do with the question I ask!

No more nits....

roger, Roger. ROGER !

"Would he (JFK) have been reelected ?"

Humbled by your Pedigree of being a Thirteenth Generation American.

And Speaking Out of My (simple mind: I Love My Country) Ignorance.

I would have to Answer Your Question: Most Certainly YES !

TBL: JFK would have been Re-Elected [.]

# 5242. FS: Sierra 121 Tunable VTVM/VLF Rcvr

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-22 17:00:14 UTC
From: Walter Treftz <pendragon@netsignia.net>
Message-ID: <3FE72309.4A32F98E@netsignia.net>
Source record: 60413

FS: Sierra 121-A, tunable VTVM

Freq range: 10khz - 510 khz

Controls:
Attn Steps: -60/.001, -50/.003, -40/.01, -30/.03, -20/.1, -10/.3,
and 0/1
Input Level: 0/1, +10/3, +20/10, +30/30, +40/100
Injector Sw: CAL & REC
Meter Sw: CAL & REC
IF & AF gains
Headphone jack on front panel
Meter Scales: -10 to +2 db, 0-1v & 0-3v

Comes with manual copy and my parts replacement notes.

I got this at a hamfest with intent of using for VLF rcvr. Bought
a manual and started replacing parts (leaky caps, out-of-
tolerance resistors, etc) even though it was working (having
never used one, had no idea if it was working well or not but
signal generator punches through). THEN, couple weeks ago picked
up a Sierra 128-A (same gadget) at another 'fest and it appears
this is the one to keep (rack-mount like rest of my station,
solid-state, much larger freq range - DC to about 15 mhz, etc.)

Can send digital pix if desired.

If interested, make a reasonable offer. Buyer pays shipping.
No extra charge to pack up and haul to USPO or UPS. If in central
Florida, can deliver (Gainesville to St.Pete)
for gas or beer.

Any questions, contact direct at --
--- pendragon@netsignia.net
--- hvalver/at/hotmail/dot/com
--- rosemarytreftz/at/yahoo/dot/com

or (352) 637-1755

73 Walt (N4GL)

BTW, if anyone reading this has a 128-A and the manual, would
like to hear from them re getting a copy.

# 5243. Kenwood TM-231A Schematic Needed for Modification

Merry Christmas and Happy Holidays fellow Hams. I am in need of a schematic of the Kenwood TM-231A 2m Mobile Radio that I just found. Seems to work great but would like to do some of the mods listed on the internet. A scan of the PC board and schematic showing the area of the mods would be greatly appreciated. Would also be interested in purchasing a manual, either original or copy of same. Gladly pay all costs involved. Please contact me off list if you are able to help. Thanks and 73's Don Smith KB6GQA

A magnetic field is the field surrounding a magnet.
An electric field is the field produced by a voltage difference.
(Think "Static Electricity" and how it attracts dust.)

A changing magnetic field produces an electric field.
A changing electric field produces a magnetic field.

Electromagnetic radiation (Light, Radio Waves) consists of energy
disturbances that continually switch back and forth between electric and
magnetic fields. (The collapse of the electric field produces a magnetic
field. The collapse of the magnetic field produces an electric field.)

That's about as good as it gets without doing the math.

Kennedy was a fascinating figure --
--basically groomed from birth by a scheming father for the presidency,
--a womanizer,
--the visionary that sent us to the moon and started the Peace Corps,
--and the sort of legend that can only be made by dying young.

However, Kennedy also gave us LBJ,
--who gave us the welfare state that has arguably destroyed the family
structure of black Americans over the last 35 years,
--who ramped up the Vietnam War,
--and didn't try to win it -- betraying the trust of our servicemen,
--and giving credence to a knee-jerk anti-war movement that persists
(though times have changed) to this day.

I did.

You can do so also by doing a google using the search terms

jfk pt-109 incompetent

Just stick with the mainline links, such as the one from NBC, or from the guy who was on the PT boat with him.

And to his credit, he got the USA going into space. I think he was a good guy, and he had a healthy libido. He was also smart enough to know that lowering taxes stimulates the economy. Democrats now have gone far, far away from JFK's Democrats. That is why they are going the way of the dodo.

And now, to be in line with the intent of this newsgroup (speaking of space), does anyone here use azimuth-only antennas for satellite use? I'm trying to, and ZERO success. I hear them, but so far, nada. Tips please? Followup here, or reply directly (but read the PureMail message at the bottom here!!).

From what I can tell these days, there are only a couple dozen guys actually using the sats. True?

All the best, and 73,
Dave

Correct. Being "assinated" would have made him a homo. Which he was
not, by any means. He had sex with more women than either Bill or
Hillary wanted to.

> Clinton, avoided service and was largely disrespected for it.
> Bush (current) served in a manner that was not sterling, but he did serve.

How about you? Did you "serve" more or less than either Bush Sr. or
Bush Jr.? OR did you "serve" as much as Clinton?

The FAQ says there should be a radio theme to the posting, so:

Question: here in NH, I've been keeping my scanner handy when the prez
contenders come to visit. Anyone else doing so?

A "knee-jerk" anti-war movement? The Vietnam war lasted 15 years (25 years if you count the advisors sent in the 50's), about ten years longer than WWII. The war started while I was a young child playing with toys in my backyard and I was able to join the military as a young adult before the war ended. Any response in the latter years of that war (the period with the most wide-spread peace movement) could hardly be described as "knee-jerk."

ok folks we have some information that was verified by one of the
locals on one of the VA's websites.

the format is what coy roy KG4LEG likes to say, followed by what coy
roy's file says......can you say, BUSTED!!!

1.ROY- i never signed my DD214
VA- DD214 was signed

2.ROY- i was in vietnam
i did undercover operations in vietnam
VA- NO OVERSEAS SERVICE

3.ROY in the marines i was a tool and die maker
i was an aircraft mechanic
i did undercover operations in vietnam
VA- roys MOS 67A10 (avation)

4. ROY- i was a colnel
VA- PFC

5. ROY- i was honorably discharged
VA- TRUE (says permanent discharge)

6. ROY- i get 6000 a month for a pension
VA- about 1800 a month (yeah mabe 6K a month for a colnel)

MISC other info
VA- went into service in 1972
VA- in for only 2 years (why only 2?)
VA- ROY qualified on M14 got marksman badge
VA- ROY has been recieving pension for about 20 years
---

saturday night roy was off the wall, he spent most of his time on the
output to the repeater, drinking heavily, when he was confronted with
the TRUTH to what really happened in the MARINES,, he got defensive
and said why are you getting into my personal bisness!!!!! rant rant
rant fag boys punk boys. finally about 2AM his wife charlotte gets on
the radio and starts tossing tons of profanity and obscene language at
everyone, saying roys not bothering anyone and we need to leave them
alone. (sounds like shes taking hits from the same BONG roy is)

as N0JAM says in his famous statement "POOR ROY, HE'S SO CONFUSED!"
others have refered to roy as a social lepper

persons heard on the 146.640 repeater tonight
K4DNA

N0JAM
KG4YZZ
KD4YDH
N9EE
KG4LEG
and others i forget.

# 5257. k1man - W1AW bulletins

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-23 05:46:56 UTC
From: "Chuck...K1KW" <cdoneal@comcast.net>
Message-ID: <kFQFb.634183$Fm2.570107@attbi_s04>

K1man broadcasts are NOT like W1AW bulletins as
the fat "MAN" claims. The W1AW bulletins last 10 minutes. They
are on ONCE a day, weekdays only. IF they interfere
with existing QSO's it last only 10 minutes. Nothing
anyone would get pissed about. However, k1man, likes
to say he is "just like" W1AW... well he isn't. His "broadcasts"
last 1 1/2 hours, several times a day!!!. So, he is NOT like the
W1AW bulletins. He is just an amateur wannabee broadcaster
and egotist that thinks he found a "loophole" in the FCC rules,
and uses the W1AW bulletins as an excuse. Hey...given this
precedent, why couldn't any ham have a 24/7 broadcast on
ham radio! Just call it a "bulletin" The call in talk show is an option.

It's time to limit bulletin broadcasts to what W1AW has been
doing for their 90+ year history and keep bulletins to 10 minutes
and once a day. This should please K1man, the belgrade bastard,
and ensure that he IS JUST LIKE W1AW.

73,
Chuck...K1KW

Decide if you want Yagi or Quad. Now build one. You only need to flip your beam 90 degrees to change from vertical to horizontal. I got my plans from arrl.net. I started at google.com. Search engines are your friend

The men who were there know what happened!
With civilians directing the operations who were
more intent on body count that control of a territory.
Take if one day, stop, do a body count,
retake the same territory tomorrow.

My brother (a Marine) spent two terms in 'nam!
I bet him the policy was to maintain a status quo,
not victory, He argued that our military could kick
their butts. I agreed and pointed out that the Military
was not given the go ahead to act in a reasonable military manner,
it was all politics! After he returned, he bought me a steak dinner.
(I provided him a house while he finished at the University)

Your language and manners need mending sir!

You should take our own advice!

I am Not a "Little Fella" and I DO know what I am talking about!
The Anti war movement attacked the Veterans when they returned
and ridiculed them.

Demonstrators and draft dodgers were uniformly COWARDS!

No, demonstrators assured defeat, and the deaths of thousands of
Vietnamese who didn't get out!

Three men in my Brothers outfit died in the fighting.
Many more suffered from the drugs made so plentiful for them to
fight the depression of the conditions they were forced to be in.

One Marine squad on a flanking patrol destroyed an entire
Vietcong infantry company in twenty minute fire fight.
All the Marines involved were wounded, seven of the nine died of their
wounds.
I personally knew one of the survivors He is now a police officer.
That squad killed 135 of the enemy.

Politicians should never be allowed near a battle field unless in Chains!

ROY UPDATE!!!!!!!!
KG4LEG was visited by the fcc today!!!
KA4GAH was visited first, then after talking to the fcc, the fcc went
to COY ROYS HOUSE!!!!!

one FCC person was from tampa, the other came down from virginia.
roy was issued a letter of some kind, and had it explained to him.
it is suspected that the fcc told him to stay off the 146.640 N9EE
repeater
roy was heard earlier today having a civil conversation on the 145.330
repeater
mabe he will stay off the 146.640 now!

it is really rare that the FCC actually makes a visit like that,
someone must have pulled some strings.....
for years the jammers have plagued 146.640 and the FCC has not dne
anything about it

As one who was there, the administration put so many "Uhh Uhh's" on the rules of engagement that we had no chance of winning the war. Winning the battle, and fighting with the bravest guys you ever saw, made no difference when Macnamara and Johnson boasted that we "couldn't bomb a shithouse with out Whitehouse approval."

Battle is a fluid situation, you have to improvise. When you first have to check back with the White House before bombing anybody you loose. Why the hell didn't they bomb the hell out of Hanoi? This is where the Russians were bringing in all the supplies to support Uncle Ho.

Johnson was scared we may hit a Russian ship, or bring the Chinese into the mix. I was all for nuking the whole damn bunch.

So, the writer that stated we did not want to win is anything but a "stupid son of a bitch" , he has an excellent handle on the realities of the political side of the conflict.

=2D----BEGIN PGP SIGNED MESSAGE-----
Hash: SHA1

I have a TR-7400 and I'd like to use it on repeaters that use PL.
Unfortunately, I can't find any references to how to do this. There's
a little plug on the right side near the speaker jack, but I have no
idea what plugs into it.

Does anyone know where I can get whatever it is to make that work?
I'm okay if there's a homebrew fix for a particular tone, as long as
it's not a permanent mod.

Jack.

I'll tell you what I mean, "You stupid sonofabitch."

I mean that thousands of good American soldiers were wasted as cannon fodder, betrayed by LBJ and his cronies. I was there, jackass.

We stopped bombing Hanoi, etc. while arguing for years on the shape of the table they would be using at the peace talks. Meanwhile my buddies were getting killed.

No, Dwight, I agree with your assessment of the Vietnam war.

The knee-jerk anti-war movement I'm speaking about is the one currently hampering our efforts to eradicate terrorism, that is funded to a large part by nostalgic nam-era activists.

>Is it better to use MP3 or WAV files.

Best is the OGG Ogg Vorbis open source, open format. It's lossless _and_
compressed. Downside; not many players.

WAV are huge, but lossless.

MP3, like WMA, are 'lossy' formats. If you can stand losing some quality
(and to my ears, it ain't much, esp. on voice), MP3 and WMA could be
acceptable.

> My concern is that these will be lrge files and may crash the hard drive?

If you don't have enough room for WAVs, then use one of the other three
formats.

That's a myth, Roger. Soldiers heading for Vietnam flew out on military aircraft departing from military bases and returned from Vietnam on military aircraft landing at military bases. The soldiers returning from Vietnam were very rarely close enough to civilian demonstrators to even be attacked or ridiculed. I joined the military in 1970 and traveled, in uniform, throughout the country to various training facilities that year. I was never attacked or ridiculed. Instead, the vast majority, in all age groups, were friendly to me and respectful of the job our military was doing. Americans had doubts about that war, but it was not directed towards the soldiers.

> (snip) Politicians should never be allowed
> near a battle field unless in Chains!

And that sentence shows your lack of understanding of the wider implications of that war. We had just ended a major conflict with the Chinese in Korea just a few years earlier - a conflict we didn't win. That same China now had nuclear weapons, an even larger military, and was not exactly thrilled that we attacking another of it's neighbors. A major escalation of the Vietnam war, which would have been necessary to win it, would have certainly caused China to openly join the conflict, with potentially devastating results for this country. Our government did the best it could do, within the constraints of the realities of the times.

As for the soldiers, many of the things they were complaining about (the operation tempo, shortages of food and supplies, and so on) were the result of faults within the military, not the civilian government. And, since the civilian government rarely selected the daily targets for patrols or missions (the civilian government set the wider strategic goals, leaving the daily activities to the military leaders there), many of the screw-ups in those daily activities were the result of military leaders also. In the end, the military just used the civilian government as a convenient scapegoat to hide their own screw-ups and failures whenever possible.

Hello,
I am trying to repair a computer power supply, and of course the part
that burnt up is the only one I cannot identify. It is (I think) a
voltage regulator. It is a 3 pin package attached (screwed) to a
largish heat sink. It has the code k1821 on the face, and there is a
logo that looks like an 'F' over either a 'E' or a 'C' like so F
E
I have looked on NTE and chipdocs with no luck. Thanks!

I don't doubt that the majority were polite and respectful. It is in the
nature of most patriotic Americans to respect the Military service, with
many being drafted and understanding the nature of the task!
And I am glad you had it easy, there was no excuse for the unruly behavior.

BUT 'This' MYTH I saw myself, watched repeated and got involved in breaking
up a few or the attacks!
They did not occur at return points for the military, but at schools when
the Vets would enroll and attend, and sometimes in other groups when some
one identified a member of the military in the immediate area. Sometimes it
was verbal, but I saw at least twenty fist fights. The worst one was when a
gang of about fifty demonstrators tried to prevent an ex Marine from going
to class because the demonstration was "shutting down" the school.. It was
only heated discussion, until some jackass decided that since the Jar-Head
wouldn't do what they told him they would restrain him. He was gentle, no
fatalities, fifteen taken for medical attention. NEVER JUMP a mud Marine!
The crowd scattered when he started breaking bones. Arms and Collar bones
break pretty easily and put unruly people down. Since I was older and
dressed in a suit I was identified as staff, funny, since I was only a
sophomore, but I came over to the school from work, I had to wear a suit in
my job! Because of this I helped cool off some other confrontations that
might have escalated into violence. Couldn't get the police or school

security to do anything, they got scarce at the sight of a crowd!

My brother told me that while he was flying home (civilian air lines) he encountered people who spit on him. He avoided them. He returned to Vietnam for another tour before he got out.

Never jump to conclusions without all the facts. There may be nothing there to land on.
The theory that China would have joined the war was never a factor, except in the eyes of the peaceniks since the Chinese WERE FINANCING the war!!! They also supplied most of the Munitions used! They had whole divisions in Korea! There were Chinese Military Advisors we captured and released in the Field. The Marines were ordered NOT to take Chinese prisoners.

BUT civilian politicos are not Generals, lacking the training and skills required in warfare, and often have wrong headed motivations. I am very well educated on the political scene of the time, and My job was to design weapons systems for use in the battle, or I would have been in the military then. I had been out ten years when the heavy fighting began. (reserves)

> As for the soldiers, many of the things they were complaining about (the

There was a change of our tactics due to the change in the warfare tactics used in Vietnam, no question! And in all wars there are screw-ups. Some of which cause casualties. BUT interference by non military government personal was a major factor in the length of the conflict and the level of losses we sustained.

All Soldiers complain, even when there is nothing real to complain about.
It's the nature of the Job and the pressure on the individual.

Just get a new one. There is no telling how long it will work after
you fix it. Most PS parts are run at full bore. When a part fails,
it messes up other parts. Do you need an AT or an ATX power supply?
ATX is sold everywhere. "Intel" supplies have a four pin connector
for +12V to the processor. The ones without the four pin connector
are for Celeron or AMD cheaps. (not a misspelling)

Product called "Coax-Seal". Non-hardening black putty.

I use self vulcanizing plumbers tape (peel off the white strip stuff that sticks to itself permanently when you overlap it) and one or two black cable ties at the finishing end. (to hold it until the chemistry bonds them at the molecular level - time depends on temperature)

when applied to clean surfaces, and you wrap 'up' so dripping water rolls over the seams and not into them, it's leak-proof.

ï¿½Ciao!

Hey, here's the best way to do this without it looking like shit and it will still be easy to remove later if you need to change out LNBs or something. use digiseals and digicon 360 degree crimp connectors also use a non conductive grease on the threads. its the strongest connector on the market and weatherproof to boot. All reputable installers use digicons and digiseals with a grease if you really want to fullproof it then use a heat shrink tube over the entire connector and digiseal. :)

Sorry, I don't buy that either. I've been a veteran for 30 years and my wife is a disabled veteran. We've attended school with many veterans, attend veterans events throughout each year, and both have been members of veterans organizations for at least the last 20 years. Throughout all that, we've never met a veteran yet who has said he or she personally was spit on or attacked. Instead, these claims most often come from those who were not directly involved with the military at the time, and almost always involve a third party ("I knew a guy who said..."). This is the stuff myths, not facts, are made of.

When and where was this? A violent incident like that (fifteen injured, broken bones, and so on) should easily be verifiable through newspaper accounts of the time.

> My brother told me that while he was flying
> home (civilian air lines) he encountered
> people who spit on him. (snip)

Really? Which civilian airlines flew into the Vietnam war zone? Which airlines allowed passengers to spit on other passengers?

> Never jump to conclusions without all
> the facts. There may be nothing there
> to land on. The theory that China would
> have joined the war was never a factor,
> except in the eyes of the peaceniks since
> the Chinese WERE FINANCING the
> war!!! (snip)

The possibility of China openingly joining the conflict was a major factor in decision making of the time. China was obviously supporting the North Vietnamese, but that is vastly different from what I said ("an esculation of the conflict would have caused China to *openly join* the conflict"). An open conflict with China would have led to several million Chinese soldiers flooding into Vietnam to fight our soldiers directly, and may have even led to nuclear warfare between China and the USA. Only a darn fool would have ignored that possibility (yet some military leaders did actually want to ignore the possibility - our civilian government was wise enough not to).

> BUT civilian politicos are not Generals,
> lacking the training and skills required
> in warfare, and often have wrong
> headed motivations. (snip)
>
> BUT interference by non military
> government personal was a major factor
> in the length of the conflict and the level
> of losses we sustained.

And Generals lack the knowledge and skills to judge the wider political implications of a conflict. They also don't have a mandate from the people of this country, a Constitutional mandate, to make decisions that could impact all Americans. The elected President is Commander in Chief of the military and I expect that Commander to command and the soldiers (including Generals) to obey. Anyone who has a problem with that should consider relocating to a country controlled by a military - this country and it's military is controlled by an elected civilian government.

I'm always a bit amused whenever I hear a rant which promises to "take it to the Supreme Court." Aside from this being a very USA-centered proposition, the amusement stems from the fact that nothing guarantees that the US Supreme Court will do anything. You may have a right to submit a petition for an appeal, but they have the right to simply ignore you (letting the opinion of a lower court stand).

And if you don't like that, you can write your congressman.

Though it would be within my rights to force the issue, you're probably right. This country is going to hell and as far as the Congressmen, most of them are the fault. It isn't "just" the President(s) who screws things up. Still, it could be interesting to test the issue. But the Supreme Court has more important issues to decide. Why worry about a manner of doing business that has been around for as long as the country itself OR MORE? Out with the old, in with the new.. CREDIT. Again, I say it leans toward the "666" idea. While your head may not have to be stamped 666 as it's been said to be needed in the last days, the fact of needing plastic is as bad. It still leaves those without plastic, without the right to purchase. Discrimination regardless how you look at it. This argument could go on forever. Until those that DO sit on Congress and so on get off their dead over paid - over compensated with benefits - asses - to correct the wrongs, it won't get any better. WE the little people can argue all we want. What the hell good does it do? NONE. Gets a bunch of us pissed off at others and for what? It isn't worth it. G.W.

That would be true if they were selling only ONE copy of it, but when I COULD find a copy of it locally, due to the fact that it almost ALWAYS sold out each month, I inquired as to how many copies they got at the closest store. They said 15 per issue.

So your math would be in slight error. Multiply that number by 15 and you get $718.56. Not bad for only one magazine, and when you consider they usually have at least 100 or more magazines on their shelves.

Cop out excuse. A person's beef would be with the ARRL, not the contracted agency, and it would be the ARRL's responsibility to deal with the contracted agency.

Congress passed a law long ago that states that no
business is allowed to REQUIRE your SS number for a
business transaction. I bet RS will take some alternate
form of identifiucation.

These things have led to two modern phenomena -

1) Voter apathy - low turn-out., Whgat I cal the "ho hum" factor.

2) An aggresive Supreme Court that now makes KINGS and
supercedes not only the lower courts, but also the congress,
the Presdent and everybody else.

The balance of power went out the window, and the wealthy
minority controls everything through their puppets.
Some things are working well, but I think Democracy is in peril.

I hear you on the voter apathy - low turn out. I helped work the elections the last couple times and our local turn out SUCKED. Less than 1/2 of the registered voters. On another issue related, we here in SW PA had an issue on the ballot before PNC park and Heinz Field were built. WE the voters were basically asked if we wanted tax dollars and so on to pay for them. I can't recall the exact wording. The majority voted NO (like 90% against) but we had them shoved up our ass anyway. The politicians did as they pleased, they ignored the voters. So much for a vote being counted. No wonder people don't want to vote. WHY? When those in control do as they damned well please. Even our local Rep said he voted in the State House to approve the money.. Needless to say, he lost my support. He has tripped up in a few lies as of late. Somehow he still squeaks enough votes to get re-elected. G.W.

True about 30 years ago, however, this has been weakened by the war on drugs, the war on terror, the war on...

From http://www.ssa.gov

"If a business or other enterprise asks you for your SSN, you can refuse to give it. However, that may mean doing without the purchase or service for which your number was requested."

The above is in reference to situations where you are NOT required by law to provide a SSN.

You can also find a long list of of situations where you are REQUIRED by law to provide your SSN.

Sorry, this can go no further, you CHOSE not to believe
anything you like, but I was there at the incidents described.
Perhaps it was a local phenomena, we were told otherwise.
The Media would cover Demonstrations, but never showed
the violence! I believe many demonstrations were staged! (Phony)

Your opinions are yours to hold dear.
My memories are painful reminders that it is not a perfect world.

I did not say My brother was on a civilian airline in a war zone.
That was your error!
It happened when he boarded a flight at SFO on his way to PHX!
BTW: He doesn't talk about it with strangers either, not knowing
what to expect as a reaction. You clearly have a difficulty
understanding what I have written, probably due to the wide gulf
between our experiences. I understand.

I do not have an obligation to explain or convince you.
Also I do not care to burst your bubble.
Or to break your rose colored glasses. So I will not continue,
didn't meant to get sucked into this line of discussion anyway.
The direction this has taken is not in the topic of the radio group,
and I am leaving the group since it has produced nothing of value
or interest to me.

> facts, are made of.

I suppose we have never met, at least in person.
I was in the reserves, working in military related work, and witnessed the
events personally.
BTW: Myth = one definition, an old story where the origin is not known....
like the Bible! (No author credited)

> > (snip) I saw myself, watched repeated

> accounts of the time.

There have been auto accidents in California with over a hundred cars
involved, you heard how many were hurt and the outcome of these accidents of
course!
I don't know where you would see it, the school handled it in their clinic
and I didn't see any press or TV about it locally. I do not know why
because I would have thought it was big news!
A broken wrist two broken collar bones, and lots of bruises and a couple of
black eyes didn't seem so big. There were more hurt in a fight after the end
of season football game!
However the Demonstration got almost a whole page! But why would you
believe the news papers, with known bias, and not an eye witness? Not to
good on jury duty to ignore direct testimony. But there is no trial. And I
decline to testify further.

> military is controlled by an elected civilian government.

You state the obvious as if you have a problem believing it.
Why if Generals lack this magically unique knowledge
are they sometimes elected to the office of President?
Like for example, Washington, Grant, Eisenhower, etc!
I respect your opinion, though I do not agree with much of it.
Why do you believe you have the right to suggest that

a citizen of this country should leave because they disagree with you?
(Rhetorical, I AM dropping this group.)

# 5308. NEW Pork Butt racist audio recordings to be available on the net!

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-25 22:07:22 UTC
From: Peter's Pan <Peter@Neverland.gov>
Message-ID: <20031225-23722-73540@foorum.com>
Source record: 60384

New Pork Butt audio clips will soon be made available via the internet. In case you're curious, these are the recordings of the racist radio event that precipitated Riley W. Hollingsworth becoming the new, so-called enformer of ham radio. (What a joke...) The incident with N9GOR, an African American ham radio operator from Illinois whom Rich called nig-er, porch monkey, spear chucker and other filthy racial terms.

Strange. Riley the Enforcer? The "dirty dozen" of amateur radio are STILL roaming free, causing all kinds of problems.

Makes you wonder what Riley has up his sleeves, allowing K1MAN and Pork Butt to team up and spit in his face. Riley is either a cowardly wimp, or a governmental sell-out.

Peter

Not to get caught up in this, rather a comment. I can't say if/who/when/
where someone got spat upon, but I
could BELIEVE that one of those long-haired, granny-
glasses drippy-hippy could have been severely injured
if he tried such a caper. If any of those cowardly, "peace"
niks had jumped upon, or spat upon one of our Marines,
then I would supported him, encouraged him, urged him,
or HELPED him to put on an old fashioned ***whippin' that SOB would not
soon forget! And if any bones got
broken, particularly of those pot smoking, #$%^&%$#@, then all the better!

Then he'd have MY a** to whup if he pulled such a caper and spit on me,
'cause being rather a large fella
with something of a temper, I'd have stomped a mudhole
in his butt he'd not forget. The airlines wouldn't have had
to've "protected" me; I'd have attempted to take care of it myself. Now,
much older and mellower, but still in pretty good health, I'd think a bit
more about getting into an altercation. When I was 21-22? Uh-unh! I'd have
smacked hell out of him without a second thought.
Hehe! Matter of fact, I GOT into a few fights in those
days. LOL!

I don't remember hearing personally of spitting incidents,
only of vague reports of such. I only know what *I* would have done!~

I have no proof, other that what he told me. And since he wasn't a liar, I believe him.

If you want photos of his 1957 letter of induction( which shows his job title as Radio Operator), signed by J. Edgar Hoover; or the 1957 letter assigning him to Newark, also signed by Hoover; or his retired FBI credentials showing his job title as Communication Specialist, I can e-mail them to you.

Before connecting, spray both connectors with WD40 (has negligible
effect on signals). Connect. Wipe off WD40 (on outside, of course). Wrap
tightly and neatly with self-amalgamating tape. Spray again with WD40.
Will last for ever.

Ian,

Surely the WD40 should not be applied to the electrically connecting surfaces ?
Isn't oil an insulator ?
And I wouldn't be happy leaving self amalgamating exposed to the sun - overwrap
in plastic insulating tape as well with the outermost layer not wrapped under much
tension to stop the tape unwrapping itself when baking in the sun.

Nick

Yeah - sorry to drift the topic here - I won't say any more on this.
However, I will just add as a final remark that the same happened in
our area. A referendum was sent out to ask the voters if they wanted
to build a light rail corridor between two cities. It passed.
Then the government said - "we are not going to fund it" right
afterward, and NOW they want to do the vote AGAIN after putting out a
lot of propaganda on why it should not be done!

Moral: If you don't like democracy, bend their minds a bit and try
again!

End Of Thread!

Amateur Radio Newsline™ Report 1376 - December 26, 2003

Amateur Radio Newsline report number 1376 with a release date of Friday, December 26, 2003 to follow in 5-4-3-2-1.

The following is a Q-S-T. A California city says NO to BPL, an earthquake hits the central California and Kids Day 2004 is just a week or so away. The details on Amateur Radio Newsline report number 1376 coming your way right now.

(Billboard Cart Here)

**

RADIO LAW: LOMPOC SAYS NO TO BPL

The City of Lompoc, California, has said NO to Broadband over Powerlines, and its a big win for ham radio. Amateur Radio Newsline's Bruce Tennant, K6PZW, has been monitoring the situation and has the details:

--

Paul Andreasen, K1JAN, said it this way -- quote: "Well, we won ONE at least!"

What Andreasen is referring to was a plan by Lompoc city leaders to deploy Broadband over Powerlines in that city and the work of the ham community to head it off.

Andreasen is the ARRL Technical Coordinator for the Santa Barbara Section and a ARRL Technical Advisor for the League's Southwestern Division. And he was one of the organizers of the movement to stop the deployment of B-P-L in the Lompoc area.

In an e-mail, Andreasen says that his group sprang into action when they learned of plans to permit powerline broadband. He presented city leaders with several studies and some facts on interference effects to and from other licensed RF users.

--

Andreasen: "I know the mayor so I stopped in one day and asked him. He said yes they were and I introduced him to some of the facts of radiation not only causing problems with public communications, the CHP, Amateur Radio, etc., but about it also causing problems with the BPL system (itself).

--

Meantime, Eric Lemmon, WB6FLY, made the California Highway Patrol aware of their efforts. The statewide C-H-P radio system operates on low-band F-M which falls right smack in the middle of the spectrum used by B-P-L.

And then they wait until December 17th for the newspapers to report the results of their City Council vote on the matter. The good news: No Broadband Over Powerlines in Lompoc. Instead, the City Council approved a rival, non radiating system that uses fiber optic technology.

But that's not all. The company that did the study for the planners was told by the City Administrator not to entertain any radiating methodologies at all. All because ham radio operators spoke up and provided proof that B-P-L could be hazardous to the regions R-F environment.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

Another quote from Paul Andreasen, K1JAN, kind of sums it up. "We not only win one, but a bureaucracy kept it's word!" (K1JAN, W6YN)

**

RESCUE RADIO: THE CENTRAL CALIFORNIA QUAKE

Meantime, about 90 miles North of Lompoc an earthquake measuring 6 point 5 on the Richter scale struck at 11:15 a.m. on Monday December 22nd. Centered not far from the famed Hearst Castle tourist attraction at San Simmeon. Ham radio was quick to respond as we hear in this report:

--

K6YR: "Various parts of the livingroom looked like the U.S. Army had gone through a Fedeey'n safe house. Just glass and food stuffs all over the place. It was pretty scary."

--
That's Rob Griffin, K6YR, the Section Manager for the area where the quake hit. He was describing what his own home looked like after the magnitude 6.5 temblor hit. But Griffin would have to put off clean-up chores because there was other work that needed to be done:

--

K6YR: By noon the San Luis Obispo Emergency Operations Center had called out the ARES and RACES operators, primarily supporting the Red Cross in opening shelters in Paso Robles and Oceana. Morrow Bay also had Red Cross shelters and we provided communications for the Red Cross because their cell phones just weren't functioning for the first 12 hours after the earthquake.

--

According to Griffin with cellphones down, another way to communicate was needed by emergency workers. Enter ham radio volunteers.

--

K6YR: "We had some come from as far as South county which includes Oceana, Nipomo, maybe even some from Santa Maria to help support the North county Paso Robles ARES area."
--

The city of Paso Robles was hardest hit. Part of the historic downtown area was destroyed and two people were killed. Griffin says that hams were on scene providing communications for about 24 hours. When we spoke to K6YR some were still there:

--

K6YR: " There are some Amateur operators still manning the county Emergency Operations Center. but my understanding is that the communications and support up at the Paso Robles Police Department has closed down for the timer being and it appears that the Red Cross has its communications which relies on cell phones back in operation."

--

The bottom line. It took the cellular providers about 12 hours to get service back to most of the stricken area. Meantime ham radio operators were there, doing what they do best.

For the Amateur Radio Newsline, I'm Burt Hicks, WB6MQV, reporting.

--

According to Cal Tech, Monday's temblor was the state's first deadly earthquake since the magnitude 6.7 shaker that hit Northridge California in 1994. (ARNewsline(tm))

**

RESTRUCTURING: VK TO GET REVISED AMATEUR RADIO SERVICE

Hams in Australia will soon have a restructured Amateur Radio Service. Some of the changes are coming soon Others are still being negotiated. Q-News Graham Kemp, VK4BB, is here with the details:

--

As reported, the Australian Communications Authority has decided to discontinue the Morse code proficiency requirement for the amateur service. The ACA will also remove the prohibition of third party communications to an amateur station in another country. If another country seeks a prohibition on such communications, this will be published and conveyed to the amateurs. To effect this decision, the ACA will need to amend the Radiocommunications Licence Conditions Determination No. 1 of 1997. Thats the Amateur LCD.

The ACA will directly inform the amateur community through established communication channels when the amendment has been made. The ACA will update the Amateur Internet Linking System consumer fact sheet to

incorporate changes to third party communication arrangements.

The ACA will continue to impose limits on the purity and stability of emitted frequencies, and maximum power limits on amateur stations in accordance with the ITU's requirements for transmitting stations. The ITU requirements will be incorporated into the ACA's public information doments in early 2004 to ensure that they are available to amateur licensees.

The ACA will maintain current requirements for use of a callsign while operating an amateur station, as contained in sections 8, 37 and 44 of the Amateur LCD. The ACA is still considering whether to permit the abbreviation of callsigns during emergency services operations and training. A decision will be announced by mid-2004.

The ACA will proceed with the proposal for Australia to participate in European Conference of Postal and Telecommunications Administrations - CEPT. While liaison with CEPT about T/R 61-01 can commence immediately, the licensing arrangements necessary to implement this will not begin until mid-2004.

The ACA is working through submissions about the remaining proposals, including the licensing structure, and expects to announce decisions by mid 2004.

For the Amateur Radio Newsline, I'm Graham Kemp, VK4BB, of Q-News Australia.

--

Obviously for hams down-under, this is the start of something big. (Q-News)

**

Break 1

News never takes a holiday and neither do we. From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the K-9-K-E repeater serving Godfrey Illinois.

(5 sec pause here)

**

HAM RADIO EVENTS: KID'S DAY IS SUNDAY JANUARY 4

Its one of the two most important ham radio holidays of the ham radio year and its only about a week away. Of coarse we are talking about the first of two Kids Day operating events for 2004.

According to a recent ARRL Letter, the first Kid's Day of 2004 will occur on a Sunday. Next Sunday, January the 4th. And unlike most other on-the-air events, Kid's Day is not a contest. Rather its a time when

experienced hams open their hearts and their stations to invite kids in and put them on the air to experience the magic that is ham radio.

Kid's Day will run from 1800 to 2400 UTC, and there's no limit on operating time. The suggested exchange is a youngsters name, age, location and favorite color. Most operation will be found on 14.270 to 14.300, 21.380 to 21.400 and 28.350 to 28.400 MHz and local 2 meter repeaters.

Guidelines for Kids Day are available at www.arrl.org/FandES/ead/kd-rules.htm. And -- oh yes: If you miss this Kids Day operating event the next one won't take place until Saturday, June 19th. (ARRL)

**

HAM RADIO EDUCATION: IARU CONGRATULATES NEW HAMS

A top IARU official has welcomed Albania's newly licensed hams to the hobby. Bill Pasternak, WA6ITF, is here with more:

--

Ole Garpestadt, LA2RR, is IARU Region 1 Chairman. And while participating in the recent graduation ceremony for Project Goodwill Albania 2003, he took the time to congratulate the new Albanian licensees, and welcomed them to the bands.

Garpestadt credited the University of Triana and the program organizers with their success in conducting the training and succeeding in something that the IARU itself has had only limited results with. It should be noted that LA2RR participated in final negotiations with Albanian authorities for their entry to CEPT and bringing the Albanian licensing regime into line with the rest of the CEPT world.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF

--

One final note on Project Goodwill Albania 2003. Its organizer, the famed D-Xer Martti Laine, O-H-2-B-H, was awarded a "Senior Fellow of Polytechnic University of Tirana" at the graduation ceremony. In his closing remarks Liane thanked everyone involved for what he termed as their five weeks of serious effort. (Via press release)

**

HAM RADIO EDUCATION: 2004 - 2005 FAR SCHOLARSHIPS OPEN

Meanwhile, here in the United States, it's ham radio scholarship time again. This, with word that Foundation for Amateur Radio is providing applications for hams to apply for the 59 awards that it will administer for the 2004 through 2005 academic.

Right now, the foundation is inviting Amateur Radio licensees planning to pursue a full-time course of study beyond high school, and who are

either enrolled in or accepted for enrollment at an accredited university, college or technical school to compete for these scholarships. Awards range from $500 to $2500 with preference in some cases going to residents of specific geographic area or to those pursuing certain study programs.

The cutoff date is April 30, 2004. Application forms are available by mailing a request to FAR Scholarships, P.O. Box 831 Riverdale, Maryland. The Zipcode is 20738. (Foundation for Amateur Radio)

**

ELECTRONIC ASSISTANCE: REPAIRCLINIC.COM

A new Web site has been created to usher Americans away from their throwaway habits and into the world of yesteryear when we just kept it working.

Called RepairClinic.com, the cyberspac port provides aids for those looking to repair anything from a refrigerator or air conditioner to more complex devices such as microwave ovens. The site appears to derive most of its income by selling spare parts and factory manuals.

At the moment the site sticks to typical kitchen appliances. It does not provide advice on such items as radios, T-V sets, VCRs and other consumer electronics. At least, not yet. (Science Today)

**

RESCUE RADIO: THE LATEST TOWER TO COLLAPSE IS....

A 528 foot tower supporting antennas for WMGX and WYNZ in the Portland, Maine area collapsed on Thursday, December 11th. As reported on Scott Fybush's web site, the reason for the tower falling appears to be a guy wire that apparently snapped. The story, and a photo of the tower prior to collapse, can be seen at www.fybush.com/nerw.html Its not known if any ham radio repeaters shared this support structure. (CGC)

**

NAMES IN THE NEWS: VE1MR NAMED RAC RADIO AMATEUR OF 2003

Bill Elliott, VE1MR, has been named to receive the RAC Radio Amateur of the Year Award for 2003. Currently President of Halifax Amateur Radio Club, Elliott has been a Radio Amateur and a member of Radio Amateurs of Canada and its predecessor national organizations for over twenty years. Through that time, VE1MR has consistently and generously donated his technical and organizational skills to significantly promoting excellence in Amateur Radio and facilitating its public service role.

For a complete story on VE1MR's activities and the contributions which qualified him for this prestigious award, see http://www.rac.ca/new/canada.htm (RAC)

**

NAMES IN THE NEWS: JENNICAM GOING QRT

And, by the time you read this, Jennifer Ringley will have taken her famed jennicam.org webcam off the Internet and Q-R-T. This, after 7 years of her permitting the world to watch her life through a cyberspace eye.

Ringley was 20 and a student at a Pennsylvania college when she installed a web camera in her room and launched jennicam.org. That was in April of 1996 and over the years the cameras have followed her every movement 24 hours a day.

A self-described former computer geek who now lives in Northern California, Ringley has posted that her web cam was intended to be a fun way for her mom or friends to keep tabs on her. Also, that it was an interesting use for the digital camera that she bought on a whim in the bookstore.

Now, the site has a notice saying it will be closing on December 31st. No reason is given and Ringley has not respond to e-mail query's from the press. (Published news reports)

**

BREAK 2

Bringing you communications news 52 weeks a year. From the United States of America, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

HAM RADIO AND SPACE: THE MARS EXPRESS

An amazing space DX record for ham radio. This as Charlie Suckling, G3WDG reports that he has successfully received the 'Mars Express' deep-space probe using his 3 meter dish antenna.

Mars Express has been on its way to the red planet since the 2nd of June and was scheduled to arrive on Christmas Day. The signal was earlier received on 8.4 GHz by James Miller, G-3-R-U-H, at the AMSAT D-L ground station in Bochum, Germany. This, when the probe was 107 million kilometers away on November 16th.

Although traveling at the speed of light, the signal took about six minutes to reach earth. The AMSAT D-L website has information on how amateurs can receive Mars Express.

The AMSAT-DL website at www.amsat-dl/pa5/reception_g3ruh.htm provides information on how amateurs can receive Mars Express. (GB2RS)

**

HAM RADIO IN SPACE: PC SAT UPDATE

AMSAT North America reports that P-C sat is doing fine and will continue in good sunlight through New Years Eve. The satellite is seeing about 50 packet users per day and 30 per pass over the USA.

Anyone with a 2 meter transceiver and T-N-C can easily copy this bird. Just tune the radio to 145.825 and watch for 1200 baud normal AX.25 packet. (AMSAT)

**

INTERNATIONAL-SWEDEN: NO CODE ON JANUARY 1?

GB2RS reports that Sweden is likely to permit former CEPT Class 2 amateurs access to the High Frequency bands from the 1st of January. SM0SMK, the President of Swedish national amateur radio society has said that they hope the Morse code test requirement will be removed at the turn of the year.b (RSGB)

**

INTERNATIONAL - UK: NEW TRAINING PRESENTATIONS ON THE WEB

The Chelmsford Amateur Radio Society in Essex England has made all of its Powerpoint slide presentations for the United Kingdom's Foundation and Intermediate courses available on the web. Those who are interested in seeing what's involved in getting these new U-K licenses can download the slides from www.qsl.net/g0mwt (M5AKA)

**

DX

In DX, the FMRE Sunday bulletin has announced that the X-F4 DXpedition to Socorro Island will begin March 3rd, and run for two weeks. The call sign to be used is X-F-4-I-H. 8 operators from Mexico will be active all bands and modes including VHF, UHF and satellite. No QSL information is available at this time. (XE1KK, N4GN)

And S57CQ expects to be in Bhutan by the time you hear this newscast. He plans to spend as much of his spare time as possible active as A52Q. QSL as directed on the air. (RSGB)

Lastly PA4WM will be in Turkey for six months, on a four week rotation schedule. He operates SSB, CW and RTTY as TA1/PA4WM with 100 watts into a G5RV. He plans to upgrade his antennas with a vertical and receiving antenna for 160 and 80 meters at the earliest available time. (GB2RS)

**

THAT FINAL ITEM: HEAVY METAL ON THE HAM BANDS

And finally this week, Heavy metal is back on the ham bands. No, not the rock music kind. We are talking heavy metal as in vintage AM gear. Paul Goodman, K2ORC, has more in this report filed over the air - using AM :

--

Sunset on December 27, 2003 will mark the kickoff of this year's Heavy Metal Rally. A showcase for AM transmitters that weigh at least 250 pounds and produce 250 watts or
more, the annual event is sponsored by Electric Radio magazine.

The Rally has become a coast to coast highlight for many AM amateur stations in North America with activity on 160, 75 and 40 meters. The event goes all night, ending at sunrise on December 28

Participants who want to compete for the top place trophy submit logs to the event coordinator. Scoring for the Heavy Metal Rally utilizes a point system that takes into account, among other things, total number of contacts and the number of states and bands worked. In a departure from traditional contest-type scoring, a station can receive an extra point for each positive signal or audio report received by the event coordinator from other hams and SWLs.

Scoring notwithstanding, many AM fans participate in the Heavy Metal Rally simply for the pleasure of talking and listening to other AM stations with strong signals and outstanding audio.

Winter HF operating conditions generally lead to numerous coast to coast contacts featuring a diversity of transmitters. It would not be unusual for listeners to hear, an amateur in Colorado on a restored Gates broadcast transmitter chatting with someone in California running a Collins broadcast transmitter.

--
Contact Audio
--

While broadcast transmitters may be the first thing to come to mind when picturing equipment that meets the Heavy Metal weight and power criteria, the Rally also features a sizeable number of homebrew and military rigs. For more information on the 2003 Heavy Metal Rally, including the email address for log submissions and a list of suggested operating frequencies, please visit amfone.net -- that's alpha-mike-foxtrot-oscar-november-echo - dot - net.

Reporting for the Amateur Radio Newsline, this is Paul Goodman, K2ORC.

--

Sounds great, doesn't it! You can hear more for yourself on Saturday evening December 27th overnight into Sunday the 28th on 160 and 75 meters. Its the 2003 Heavy Metal Rally on your radio to enjoy. (ARNewsline(tm))

**

NEWSCAST CLOSE

For this week and this year, that's all from the Amateur Radio Newsline. Our thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News for their assistance in producing this weeks report.

Yes, I choose not to believe accusations against a significant portion of this country's population, or accusations of incompetency against the government of this country, without clear and convincing evidence to back it up. Surely you don't believe your word alone is enough for such accusations, in a public forum, to go unchallenged.

> (snip) So I will not continue, didn't mean
> to get sucked into this line of discussion
> anyway. The direction this has taken is
> not in the topic of the radio group, and I
> am leaving the group since it has produced
> nothing of value or interest to me. (snip)

Well, that is certainly your decision to make. However, if what you've said is really true, I strongly urge you to follow up by reporting your experiences to the various veterans organizations in this country. Several have ongoing programs to gather and verify the history of veterans over the years.

> There have been auto accidents in
> California with over a hundred cars
> involved, you heard how many were
> hurt and the outcome of these
> accidents of course!

No, but there would be a written record of each of those automobile accidents - newspaper accounts, police records, hospital records, insurance claims, and so on. The same is true for the incident you described (fifty demonstrators jumping a marine, with fifteen requiruing medical attention for broken bones), which means your claim can be fairly easily verified if true.

> (snip) But why would you believe
> the news papers, with known bias,
> and not an eye witness? (snip)

I'm not going to "believe" anyone, including a supposed eyewitness, without facts to back up what is said. I can ask a newspaper for the source of it's information, or research the incident myself in the same manner as

the newspaper did. But, an eyewitness, without verification of what is said, is the absolute least reliable source of information.

> You state the obvious as if you have
> a problem believing it. Why if Generals
> lack this magically unique knowledge
> are they sometimes... (snip)

Again, a military officer does not have a mandate from the people to make decisions that could impact all Americans. In a democracy, we place that authority in the hands of the elected government, not in Generals. The elected President is Commander in Chief of the military and the soldiers (including Generals) obey his commands. Any effort to subvert that system, by claiming government should have no say in the actions of our military or whatever, is, in my opinion, a direct effort to subvert the very system of government in this country. I took an oath many years ago to defend the people, Constitution, and government, of this country. I still consider the ultimate goal of that oath worthwhile.

Message-ID: <a7dee37b.0312261234.85c5b05@posting.google.com>
Source record: 60301

I'll be passing my technician test next Saturday, and I'll have about $400.00 to spend on a first rig. I would be very desirous to start out with a good older piece of equipment that I can attach a simple dipole, and start transmitting, but I was wondering if there is a specific web resource for buying used, older equipment? I'd assume $400.00 is a decent amount of money to get one's feet wet without having to buy a small handheld, and talk either on simplex or via repeaters...

Again, QUITE new to this, with stunningly limited knowledge of buying used, old gear. Any point in the right direction would be greatly appreciated.

Regards,

Daniel

A technician license does not allow HF.

Why a dipole for 2 meters? A quarterwave groundplane is a much better match then a dipole at 75 ohms and up. Same amount of surface area.

Daniel:

Good luck on your test -- we can always use more good amateurs. The rig you're looking for will depend on whether you pass the No-Code Technician test, or if you can also pass the 5 WPM CW test and become a Tech Plus.

No-Code Techs are presently limited to 6 meters and above, which pretty well limits you to FM repeater operation.

Tech Plus licensees have CW privileges in certain sections of the frequencies below 30 MHz. You can transmit in the lower bands of the 80, 40, 15, and 10 meter bands by CW only.

It would behoove you to pass the 5 WPM code test if you want to get on the lower frequencies immediately.

It is becoming increasingly apparent that the CW requirements for American hams will be eliminated, and your privileges can change any day now.

Hope this helps.

Although Techs without code are limited to 6m and up, you are NOT limited to FM repeater operation. In many parts of the country there is SSB and CW activity on 6 meters and above. There is also satellite activity in the VHF/UHF real. All of this is open to Technicians, including using CW as at VHF/UHF you don't have to pass a CW test.

Some Techs get into collecting grid squares. My OM has worked up to 1000 miles on 6meters and 2meters by taking advantage of Sporadic E openings and tropospheric ducting. It does require work to learn when these propagation modes are providing interesting contacts and work to stay on top of these openings. However some people find that working grid squares all over the US and Canada on VHF just as exciting as working rare foreign stations.

Techs who have passed the CW test also get 10m voice privileges from 28.300 to 28.500

People familiar with the FCC rule making process are projecting at least 2 years IF the FCC decides to act at all. They may just leave it as is. Even if it does change in the future, there is no point in waiting as you will miss out on some fun operating time and CW itself is a fun mode once you get some ability at it. (hint: try the G4FON free software and follow the directions. After about 30 hours of study and practice, you should be ready for the CW test).

Nick,
I can't say I've noticed any tendency for WD40 to insulate the
contacting surfaces of connectors (not that I do this very often). There
should normally be sufficient pressure for the contacts to punch through
the oily layer. I reckon that WD40 will be similar to 'Lectrolube' and
similar switch cleaner-lubricants which leave a lubricating layer. Maybe
switch cleaner could be used instead of WD40, but it must be
lubricating, and not just cleaning.

However, I did once have a problem with the points in the ignition
circuit in a car. I put a little too much grease on the cam, and it
eventually worked its way along to the actual contacts. It proved a
surprisingly effective insulator!

As for the effects of sunlight on self-amalgamating tape...
Again, I haven't noticed any obvious deterioration, but the '.co.uk'
part of my e-mail address may offer some explanation! I wouldn't use PVC
tape to overwrap it - PVC always comes adrift eventually. The
old-fashioned black fabric-based electricians' tape would probably be
OK, provided you secure the end with superglue (another sovereign
remedy).

Cheers,
Ian.

I am fairly certain I saw the S.A. tape tip in RadCom
a while back, also "PVC cables when hot" being a hazard to bare skin..

and I cant bring myself to lubricate fixed contacts before sealing up. Like
car battery terminal posts being smeared with vaseline before fitting the

clamps - just cant do it ! Probably being paranoid here !

Thanks for the reply though

Nick

Best is to use a good quality compression connector such as LRC snap n seal. If these connectors are installed properly, the only target for water intrusion is the threads. If you put a small dab of silicone grease on the threads of the female portion of the connection before screwing on the connector (make sure it's on the threads, not the center conductor), no other water proofing is needed. We did an experiment at the cable company I worked at when snap n seal connectors were first introduced. We sealed all four connectors on a tap as above and put the tap in the bottom of a trash barrell under three feet of water. After three months under water, there was no sign of water intrusion.

While I can't vouch for it from personal experience, I've read that the plasma TVs generate a lot of RFI hash. The LED monitor should be OK as that is what is in the laptops and our club has used them for Field Day with no problem.

I originally went with RG-11 and found it too unwieldy and went back
to RG-6. You have plenty of signal so unless the cables are *really*
long it's not a problem.

>
>I'm using T&B SNS connectors on the cable and where the connection
>meets the LNB, I'm thinking about using some sorta of silicone grease

DC-4 or DC-5 compound works well when used sparingly and *only* at the
one end of the cable.

The problem with using silicon grease is getting anything to stick
afterwards. You have to be very careful with the stuff.

As others have mentioned, coax seal (tm), or the electrical putty, and
liquid electrical tape all work well as does the flooded heat shrink
tubing. The latter makes the neatest and most mechanically sound
connection, but you don't want to put too much stress on that "F"
connector on the LNB. The RG-11 was putting far too much stress on
mine. I have both the DISH Network and C-Band satellite reception and
found even with 200 foot runs to both the big and little dishes the
RG-6 was preferable, at least in my situation.

>sealant on the threds, plenty of wrapping with Scotch 88 tape and then
>a coat of Skotchcoat.

I prefer simple is better. (on the LNB I just give the F connectors
and cable a couple of coats of liquid electrical tape and a little dab
of DC-4 compound inside) Nor do I use Scotch 88 tape. I have problems
with it in both high temperature and low temperature extremes. In
most cases I've found the "cheap" stuff worked better over a wider
range, but you have to try it first as the quality may vary widely.

One other point, I never flood the connectors in a splice. Only at the
far outside end do I flood the connector. Splices get only the
flooded heat shrink tubing. When shrunk it has a wall thickness about
twice to three times the thickness of the RG-11 jacket. The flooding
compound thoroughly seals the outside of the cable and connectors from
the elements with no additional wrapping.

>Isn't oil an insulator ?

Sure it is, but that has little to do with the application. WD-40
also works well on moving switch contacts. I'd not recommend it in a
band switch though as getting in the pader caps would be a disaster.

Remember in a switch the pressure "wipes" the surface. In the case of
the connector the pressure of a well tightened connector will press
out any oil giving a good contact. Unfortunately it also provides
some lubrication making for the possibility of over tightening the
connector. I've stripped the threads right out of PL259s and N
connectors when I managed to get some silicon grease on the threads.

>And I wouldn't be happy leaving self amalgamating exposed to the sun - overwrap
>in plastic insulating tape as well with the outermost layer not wrapped under much
>tension to stop the tape unwrapping itself when baking in the sun.

Too complicated a way to go. I don't get that elaborate on high power
UHF and VHF connections.

Simple, liquid electrical tape is as good as any as long as the
surface is dry so it can stick. It forms a very tough film that lasts
a long time even in direct sunlight.

Looking for the web site to download "Web Logger" software. This is an MS Access based program, but not the one by N6GFS or K6REA (same software?)

It is a fairly simple program, not made for contesting, but just keeping a log of contacts.

Any help out there?

I have some liquid tape and it is very good for this kind of thing, too.
Also you may want to look for Caltex CopperKote - a copper loaded
grease if you can't stand the thought of putting vaseline or similar
on the plugs first. I also use it on battery posts.

It is used commercially by the power companies when they string up
supply lines. The tiny copper flakes cut thru and make contact.
Cheers.

IC-746Pro and phone patch.

Well so far I have learned that the 8 pin DIN plug is the correct plug for hooking up a phone patch.

I have also learned that on that DIN plug, the pins needed are 2 - ground, 3 - PTT, 4 - Microphone in, 5 - Receive Audio, and if needed, 7 - 12 volts (actually 13.8V).

I wired pin 2 and pin 4 on the DIN plug so I could cable up the SP-767P external speaker and phone patch.

I have been looking for the manual for the SP-767P but have been unable to find it. I am also looking for the plug that couples the phone line to the SP-767P but will probably simply rig one of my own tomorrow if it doesn't turn up.

Have I missed the point, or do I gather that, in the USA, shops are
asking for an SSN when making normal credit card purchases? What has
this to do with creditworthiness as far as the shop is concerned? Surely
they get paid regardless?
Ian.

I made no accusations against any but the persons involved!
You were not there, and can only attempt to make it less clear.
What "significant portion of this country's population?"
The Peaceniks were at most somewhat less than 3% of the population, and
don't seem to share your dedication to protecting this country and it's
people.
I made no "accusations of incompetency against the government of this
country" Rather I pointed out My opinion of the generally poor decisions
made under a difficult set of circumstances.
These are hardly hidden and are for the most part common knowledge.

I was engaged in a discussion, not a court case, my word is good in court,
and many other forums, all of which I have a right to access and speak in.
You can not challenge my stated view of incidents by argument and innuendo!

> > (snip) So I will not continue, didn't mean

As I will shortly!

> Well, that is certainly your decision to make. However, if what you've
> said is really true, I strongly urge you to follow up by reporting your
> experiences to the various veterans organizations in this country. Several
> have ongoing programs to gather and verify the history of veterans over
the
> years.

I made every attempt possible to me at the time. The school handled it as a
"student altercation" and their report did not state a cause! My sworn
statement is on record as were eight others.

The school has changed administrations since then, and the records are in
storage. It is possible, but not easy to obtain them. I've tried.

> > There have been auto accidents in California with over a hundred cars

insurance
> claims, and so on. The same is true for the incident you described (fifty
> demonstrators jumping a marine, with fifteen requiring medical attention
> for broken bones), which means your claim can be fairly easily verified if
> true.

You are not quoting me, and clearly did not read nor understand what I said.
I said only one (Jackass) jumped the marine. There were fifty demonstrators
present, most ran when the violence erupted. Many (8) jumped in to help,
including myself. fifteen were looked at for medical reasons, but they were
only three broken bones, which I stated clearly! At the time the bones were
broken, there was some serious reduction in the action! Most were burses,
skinned knees and elbows, and (I think) a couple of black eyes.
Where do you get off mis-quoting in order to try to cast doubt upon someone
else? Is it poor form, dishonest and makes you look foolish!

Snipping out partial quotes, and modifying them to allow you more to comment
on is not questionable it is dishonest!
As to verification.
You have clearly never tried to obtain the records of an accident you were
not involved in!
You must state a reason, and they block out all names and addresses to
protect the privacy of the persons named. It takes a court order to obtain
more detail.

> > (snip) But why would you believe
> > the news papers, with known bias,

You would be a poor juror!
The court is clear, testimony and physical evidence are the only material
you may base a finding upon.

Also, as I said, I was not trying to make you believe, rather relate to you
an experience I HAD and verify that I had reason to believe it was more
common than the several minor incidents I personally viewed! Nothing you
have said changes anything at all!

> > You state the obvious as if you have

Repeating yourself doesn't make you more believable nor more patriotic!
You make statements which clearly indicate you either didn't understand what
I said, or have twisted the words to mean what you WANTED to hear. That
Ho-Ra not withstanding, it is not part of nor has any bearing upon the
discussion we were involved in.
I choose not to be drawn into a discussion of the responsibilities of
officers (Generals) to advise a president. It is not part of this
discussion!
After a visit to your poorly written web site, I see your travels possibly
corrupted your perspective and you have a twisted view of reality!

I have never been asked my SS# when making a credit card purchase and
would never give it too them if they did ask. IF they refused the sale I'd
tell them to go fuck themselves and ask to see a manager. IF he or she
refused he'd get the go fuck yourself treatment too as would the store.

Yes you missed that it was for credit card applications not credit card
purchases. Some large chain stores in this country have their own charge
cards and if you apply for one, then you have to put down the SSN.

Good luck with the exam Daniel, and keep at it.

Your best bet is to find an Elmer in your area to help get you started.
Buying a used rig and not knowing anything about them is a fast way to get
ripped off.

Start with this link:
http://www.dxzone.com/catalog/Ham_Radio/Elmers/

Have fun and hope to hear you on the air!

No. They only need your SSN when you apply for credit. At no other time
does a merchant need your number.

Dave

Lets see who is really being dishonest here. Your exact words were...

"The worst one was when a gang
of about fifty demonstrators tried
to prevent an ex Marine from going
to class because the demonstration
was "shutting down" the school.. It
was only heated discussion, until
some jackass decided that since the
Jar-Head wouldn't do what they
told him they would restrain him. He
was gentle, no fatalities, fifteen taken
for medical attention. NEVER JUMP
a mud Marine! The crowd scattered
when he started breaking bones."

You clearly said "they," not one, tried to restrain the marine ("they
would restrain him"). You said nothing about most demonstrators running when
the violence erupted. Instead, you said the "crowd scattered when he started
breaking bones." You said nothing about the number of broken bones. And,
finally, you said fifteen demonstrators needed medical attention ("He was
gentle, no fatalities, fifteen taken for medical attention"). The story
you're telling now is a lot different from the story you told before.

> Snipping out partial quotes, and modifying
> them to allow you more to comment on is
> not questionable it is dishonest!

I have not modified a single one of the quotes of what you've said. Your messages, and my quotes from those messages, are there for all to see.

> (snip) You would be a poor juror! The court
> is clear, testimony and physical evidence are
> the only material you may base a finding upon.

Of course, this is a public forum, not a courtroom, Roger. However, lets look at this from that perspective for a moment. The strongest testimony is that backed up by physical evidence. You've offered no physical evidence. Regardless, since you've now changed your story under cross examination, nothing you've said would hold up even in a courtroom.

> (snip) After a visit to your poorly written web
> site, I see your travels possibly corrupted your
> perspective and you have a twisted view of
> reality!

Those travels were arranged, and paid for, by the Department of Defense.

146.640 repeater update. the repeater has been off for the last
several days, not sure 100% why, but i was told several other people
have been in trouble with the FCC locally in the tanmpa bay florida
area regarding the 640 repeater.
i heard one was KG4YZZ,
his www.qrz.com page lookup is here
KG4YZZ Lookups: 563
Sean C Fleeman
7143 State Road 54 228
New Port Richey FL 34653
USA

Mailing Label Postcard
Email: kg4yzz@hotmail.com
http://www.fab-corp.com

Thanks for looking me up. I assume that you have found me here on
QRZ.com because I am talking to you or have talked to you, or maybe
you just heard my call sign. In any case, hello!
I am located in Pasco County, Florida on Florida's west coast. I am
the Pasco County Skywarn Coordinator - you can normally catch my nets
whenever there is severe weather in Pasco on the 146.640 machine or
442.650 machine with a PL of 100Hz. I have a a weekly net at 8:30 PM
EST as well on those frequencies.

I have extensive background in the field of emergency communications
as well as fire, EMS and police experience. My life has been focused
on "emergency" services since I was 14 years old and started as a
Clearwater Police Explorer -I have not left that field since.

I currently run two companies here locally in Pasco, Citicom which is
a local Internet provider. You can visit us there at
http://www.citicom.com we are currently hosts for the
http://www.tbwskywarn.org website as well as being Core 4 for APRS
(also a Tier 2 provider for APRS), http://www.aprsfl.net

My other company Fleeman Anderson & Bird Corp, http://www.fab-corp.com
works in 802.11b/g and HSMM networks, we also support items that most
hams need such as feed line, connectors and antennas. Feel free to
check me out or drop me an e-mail!

73 de Sean KG4YZZ

i will update as more info is available.
until that time, i found this in an archives posting on the arrl
website.

http://www.arrl.org/news/enforcement_logs/2001/0505.html
April 25, 2001
Mr. Ronald A. Wright, N9EE
8849 Gum Tree Avenue
New Port Richey, FL 34653
Mr. Joseph A. Seitz, NR7Z
11833 Ottawa Avenue
Orlando, FL 32837-7717

RE: Amateur Radio repeater N9EE

Dear Messrs. Seitz and Wright:

This is in response to the September 25, 2000 complaint that the N9EE repeater on 146.64/04 MHz, located in Holiday, Florida, is causing interference to repeater K4UCF, operated by the University of Central Florida Amateur Radio club in the Orlando area. We have reviewed the complaint and the response to the complaint. Both the complaint and the response to it were very articulate and detailed, and we appreciate the time the parties devoted to providing us with the information needed to resolve this matter.

Section 97.205 of the Commission's rules states that where there is interference between a coordinated repeater and an uncoordinated repeater, "the licensee of the uncoordinated repeater has primary responsibility resolve the interference." In this matter, it appears that the Florida Repeater Council has coordinated both repeaters and that the great height of N9EE was not a factor in the coordination. As a result, no enforcement action is warranted at this time.

It appears that the use of PL tones and a change in antenna pattern may alleviate the interference situation. We note that the Florida Repeater Council policy on interference, according to their web site, states that "If both systems are coordinated, the FRC will determine who bears the primary responsibility for correcting the interference" (see Section 16(b), Coordination Policy.)

The Commission expects the Florida Repeater Council to make such a determination and expects the parties to work together to determine whether such remedies will solve the interference problem. Please notify us if you are unable to obtain such a determination.

> It does indeed verify the accuracy of Dwight's quote.
>

The story has not changed, I only added details to show his assumptions were
BOGUS.
Actually I DID detail the number of broken bones! The number taken to the
Schools clinic included four of us who tried to break it up! I only got a
skinned knee. I didn't feel that was a needed detail, or for that matter
than any significant detail was needed. I was unaware that Dwight was
intending to defend the actions about which he has no first hand knowledge!
You are also being very selective and not at all objective.
None of these comments has any impact upon the incident which occurred so
long ago!
So inclusion of "they" was a misleading indicator which cause him to jump to
several unfounded assumptions. Again, his perception, not my commentary.
There is no point in the "Cross Examination" unless he maintains the
Demonstrators were not at fault. Please Name those you are defending! I
was there and couldn't get the names!
Perhaps more detail would have been needed, but there seemed no point, it is
OT!
However let me point out that he makes the comment

> (snip) After a visit to your poorly written web
> site, I see your travels possibly corrupted your
> perspective and you have a twisted view of
> reality!

Those travels were arranged, and paid for, by the Department of Defense.

On his web page he states,
I was born in North Carolina in 1953. However, other than two years on the
coast of the Mediterranean Sea near Istanbul Turkey, I spent much of my
childhood in Sacramento California. I enlisted in the Army in 1970 and
served a little over two years in Germany (MOS 31M - Radio Relay Operator).
I returned to Europe in 1977 and found work as a sales representative with a
consumer electronics marketing firm based in Basel, Switzerland. I later
managed a German-owned computer store in Heidelberg.

During those ten years in Germany, I took a course in journalism and public
affairs, and an electrician course with several additional sub-courses in
communications fundamentals, logical troubleshooting, and electrical

physics.

In 1998, I went to Europe once again to live in Vicenza Italy for a year. When I returned to the United States, I lived in Washington State for several months and then moved to my present home in Myrtle Beach, South Carolina.

Were all these Junkets paid for by Tax dollars? Shame!!!!

So much for your insistent irrelevant nitpicking!

Good Bye!

And why would you care?

I only related that I HAD seen a demonstration where violence erupted, and
DS wanted to pick it apart. Nether polite conversation, nor good manners
were evident!
Are there no participants in news groups with a modicum of manners?
Are you defending violent demonstrations as a "first amendment right?"
Rhetorical, your answers are of no consequence, and will have no effect!
All will be as it is now, and the sands will cover it all in time!

We used to have some stuff in the Air Force called "F-4 tape" which worked great for this sort of thing. It's kind of like a putty tape, in rolls with plastic separating each layer of the tape. You wrap up the connector like you would with electrical tape, only stretching the tape a bit as you go. What happens is the tape molds itself together around the connector and provides a very water-tight seal around the whole tape job. Not sure if it's available on the civilian market but if so it's a great item to have handy.

a.k.a. 3M Scotch 70 Silicone Fusible Backshell Tape, apparently.

Sounds like good stuff... sort of the high-tech, stable-silicone big
brother of the less-expensive self-amalgamating rubber electrical
tape. Not cheap, though... list price for a 1" by 30' roll is on the
order of $30 in quantity, over $38 in onesies. Ouch.

If you wanted details, all you had to do was ask (as I did for you, Roger). As for Turkey, my father was stationed there with the Air Force. The trip to Germany was paid for by the Army while my wife was still on active duty. She got out three years later and went to work for the Army as a civilian employee (HQ USAREUR in Heidelberg). For much of that time I worked at civilian jobs, and later for the Army itself. I was still working for the Army, as a civilian employee, when we went to Italy (HQ SETAF in Vicenza) for the Kosovo conflict. My wife retired as DoD employee shortly before the trip to Italy and I retired shortly afterward (just after the trip to Washington state).

I'll just stick to Coax-Seal (tm)
http://www.coaxseal.com/

Same here. I've been using Coax-Seal for years now. I have yet to find
anything better or easier to work with.
When I do have occasion to take the connectors apart the sealant can take
some minutes to remove, but the connections look just as clean as the day I
put them up.
I would suggest one thing. When storing Coax Seal in the shack, especially
after you have opened and used part of it, be sure to store the remainder in
an airtight container of some sort. If you don't, it has a tendency to dry
out and lose it's elasticity. (this takes a couple of years, so don't be
alarmed) I store the unused portion in a simple zip lock sandwhich bag that
I press the air out of before zipping it closed.

Tom,
From the pictures on the website, 'Coax-Seal' looks exactly like
ordinary self-amalgamating tape (as I know it). The cut-away picture
shows that it does not actually bond to the plastic outer of the coax,
which enables you to open up the connection in the future.
However, I would still prefer to give the parts a spray of WD40 before
the connections are made, make the connection, spray again to ensure
that the threads are wetted, wipe off the obvious surplus (but not
trying too hard, so there are still traces left). You then apply the
tape, stretching it somewhat as you go, ensuring that you keep a nice,

even tension. You end up with a tight-fitting, waterproof rubber boot around the joint, with the WD40 trapped inside to resist any tendency to corrode.
I think the only argument is whether to use WD40 or not.
Ian.

If I were interested in ham radio, I'd have a ham radio license.

But I'm a SWL and so I could care less about QST, CQ, 73 and Ham Radio. It's "interesting" to see so many x-posts to r.r.s about ham radio.

About 45 years ago I used ta listen to hams and decided that I didn't want to be one nor continue listening to them. Most of my closest friends are hams but they've given up on "converting" me (even when I help them with tech "stuff").

The great majority of hams are nice people and they sure do justify more than their hobby when there's an emergency. But why they think that SWLer's are

interested in /their/ hobby still puzzles me.

There are times when there are mutual interests. When a ham goes feral and starts broadcasting as a pirate and a felon, this can connect both hobbies and such as that makes me not want to just automatically killfool all the ham newsgroups.

But look at this SUBJ: "Why you don't like the ARRL".

And - of the four newsgroups - two are for SWLers and CBers.

May I ask for as little more care when deciding to what many newsgroups one posts to?

Thanks,

Gray Shockley

I didn't jump to any conclusions. Instead, I simply questioned the exact words you posted to this newsgroup.

> You did not ask, you assumed!

See the last paragraph below.

> It is different when your ox is gored.

Man, you're not at all in touch with reality. No ox of mine was gored. I openly volunteered the information, as I have done many times in these newsgroups over the years.

> You should not be so quick to criticize
> others when they do what your have
> been indulging in all along!

Initially, any criticism was in your own head. I simply questioned the story given. You grew defensive when it became obvious that I wasn't going to accept your story as offered. At that point, you began to change and embelish the story to make it more believable. But, in my view, those very changes and embellishments only made the story less believable (the truth rarely changes).

> But you didn't ask for more details, you
> criticized taking immense leaps of faith at
> what you THOUGHT I had said!

I specificially asked you when and where the incident took place. If you continue to deny that (as you've now done twice in this message), I'll post an exact quote of those words too. Otherwise, I've had my say, with nothing more needed to be said, so will therefore let this entire discussion drop at this point. Take care, Roger.

Sadly, we don't always have much control over where messages are cross-posted, Gray. Since some Hams are CB'ers and others SWL's, the discussion itself may have actually started in one of those non-ham newsgroups. In other cases, it is trolls (in any one of the newsgroups) trying to belittle Ham radio and it's operators (posted to a number of newsgroups in an effort to get the widest possible audience for that). In still other cases, the discussion started in a ham radio newsgroup, with other newsgroups added by participants who mainly frequent those other newsgroups. Whatever the case, you're certainly not alone - we get our share of messages relating to other topics posted in the Ham radio newsgroups as well.

TMEN carried a feature about amateur radio (Cop McDonald), and some
amateur radio advertising. Long time ago. Home Power magazine
mentions amateur radio regularly.

Where are you anyway?? You can get MT on line. CQ and POPComm did always
suck. 73, at least Wayne's editorial, was pretty weird. You can get QST
all over the place around the Toledo/Detroit area. All the bookstores
have it, a couple of drugstores have it, and I think at least one of the
Meijer's has it too.

SB DX @ WW < KB8NW $OPDX.641
Ohio/Penn DX Bulletin No. 641

The Ohio/Penn DX PacketCluster
DX Bulletin No. 641
BID: $OPDX.641
December 29, 2003
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NC1L, NG3K, W3UR & The Daily DX, K4VUD, N4AA & QRZ DX, N4KZ, W4DKS, KN5G, N5FG, K8JE, K8YSE, CT1EEB, DL/VE3ZIK & www.contesting.info, F5CWU & La Gazette du DX, F5NQL & UFT, I0JBL, I1JQJ/IK1ADH & 425 DX News, JI6KVR & JA-IOTA Islands News, M5AAV, UA2FM, VA3RJ & ICPO, XE1KK, XE2AC, Z35M and ZL4HU for the following DX information.

SPECIAL EDITOR'S NOTE: My family (wife/OPDX's chief proof-reader Linda, Teddy [TJ] and wife Jessica, Katie) and I (KB8NW) would like to wish all DXers, Contesters and OPDX readers a very "Happy Safe and Healthly New Year". Also, we would like thank the many who have contributed information over the year (there are too many to list). REMEMBER, without them there would not be an OPDX Bulletin. I would also thank the many who sent holiday greetings. I tried to answer some and wished I could answer each one of them individually, but it would take a huge amount of time. You would not believe the amount of E-mail I receive......
73 and Have a Great Holiday de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st/December, through Sunday, 28th/December there were 214 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4W, 4X, 5A, 5B, 5H, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A5, A6, A7, AP, BV, BY, C3, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HI, HK, HK0/a, HL, HP, HR, HS, HV, HZ, I, IS, J6, J8, JA, JD/m, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PZ, S2, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V7, VE, VK, VK9L, VK9N, VP8, VP8/h, VQ9, VR, VU, XE,

XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations. As always, you never know - "Work First Worry Later" (WFWL).

1A, SMOM. The following is a press release on an upcoming operation from the Sovereign Military Order of Malta (SMOM). Luciano Blasi, I0JBL, reports: Following the significant number of "new one" requests received in these years, a team led by Francesco, IK0FVC, will activate 1A0KM during the weekend from January 2nd to January 5th, 2004. Other team members will be I0JBL, IK0FTA and IK0PRG. From the beginning this operation, the QSL manager for the 1A0KM's activities will be Sergio, IK0FTA. For further information an E-mail address will be activated: <mailto:1a0km@sixitalia.org>1a0km@sixitalia.org

5V, TOGO. Members of the F6KOP Le Radio Club de Provins 77 (near Paris) plan to be active from Lome (Grid Square JJ06) as 5V7C from March 6-12th. Operators mentioned are: Dany/F5CW (one of the TO4E gang), Franck/F4AJQ, Pascal/F5TVG, Pascal/F5JSD, Romain/F8BUI and Guenther/F5VHQ/OE5TGL. Activity will be on 160-6 meters CW,SSB and Digital. QSL Manager is F5TVG: Franck Savoldi, P.O. Box 92, F94223 Charenton Cedex, FRANCE. An E-mail address is available for more information, suppoort, sponsoring, help, skeds and etc at: 5V7C@free.fr
The groups Web page (in French) is available at: http://5v7c.free.fr

6Y, JAMAICA. Martin, KN5G, will be active as 6Y5/KN5G until January 4th. He E-mailed OPDX and states that all operations are QRP with an Elecraft K2 using mostly battery power and a vertical dipole along the beach in Negril. Martin states, "The only problem now is I am running out of log sheets!" OPDX spotted him on 80/40/20/17/15/12/10 meters CW this past week.

9N, NEPAL (News). Charles Harpole, K4VUD, informed the DX community this past week that his efforts (along with Satish/9N1AA) to expand ham radio in 9N-land including a memorial club station for Father Moran, 9N1MM 9SK), are on an indefinite hold due to the disturbed social and political conditions there. All radios, including other gear and cash, that was donated some years ago have been distributed to the existing licensed native 9N hams (cash used immediately upon donation to purchase needed items like coax and Morse keys, etc.). Charles states, "That gear will come back to a club station someday. Foreign visitors have operated there, as you know. Please bear with this situation and extend understanding."

A5, BHUTAN. Dane, S57CQ, is now active as A52CQ and is expected to stay in Bhutan through January 14th. Activity is expected to be on all bands as much as possible (no 160m). He was spotted this past weekend on 40m (as early as 1700z and as late as 2345z, then moves to 80m), 20m (1230-1300) and 10m (after 0900z). QSL via S57DX.

DXCC NEWS. ARRL Great Lakes Division Director Jim Weaver, K8JE, informs OPDX that Kirk E. Swallow, W8QID, of Cincinnati, OH, was appointed the

Great Lakes Division Representative on the DXAC, effective January 1, 2004. He will succeed Billy (Pick) Pickard, WA5PAE, who had recently became a "Silent Key" (SK). Kirk is a lifelong worker/manager in the field of two-way communications and retired recently from Verizon as a technical area manager. He is former president of the Queen City Emergency Net (Red Cross affiliate) and is an active member of the SWODXA. He has gone on numerous DXpeditions to the Caribbean (most recently to TI a couple of weeks ago) and is listed at 345 at the Top of the (DX) Honor Roll. Kirk and his wife Joyce serve as QSL Managers for a variety of DXpeditions.

LIGHTHOUSE ACTIVITY. Members of the Five Flags Amateur Radio Association (FFARA), W4UC, will once again operate from the Pensacola Lighthouse (ARLHS USA-592) from the Naval Air Station Pensacola (Escambia county Florida, WW Loc. EM60ii) on January 1, 2004. This will be the FFARA's 3rd annual event from the Lighthouse. The FFARA broadcasted their very first official Amateur station from inside the Lighthouse 3 years ago with assistance from the U.S. Navy and U.S. Coast Guard. January 1st marks a special day as it was on January 1st in 1859 when the light was first lit in the Pensacola Lighthouse. W4UC plans on having a minimum of 3 stations operating on 40/20/15/10/6 meters from 1500-2200z. For QSL information, look up W4UC on QRZ.com Web site. They will be using ARLHS member #844. QSL via operator's instructions.

IOTA NEWS.....
EU-157. John, F5VHQ, will be active from Ile de Cezembre (DIFM MA-008) as F5VHQ between now and January 2nd. Activity on bands/modes were not provided. QSL via his home callsign.

OC-201. By the time you read this, Jonathan, W1CU, should have operated again from Waiheke Island in New Zealand on his way back to the US. He was on the air very briefly on December 27th as ZL/W1CU. QSL to his home call. ADDED NOTE: Jonathan worked about 650 stations on the second day of the CQWW CW Contest from the same site on OC-201.

J49, CRETE. Peri, HB9IQB, will be active as J49PM in the CQ WPX CW Contest (May 29-30th) as a Single-Op/Single Band (15m)/Low Power entry. QSL to his home callsign via the Bureau.

KP2, U.S. VIRGIN ISLANDS (Special Event). To celebrate the New Year, remember to look for operators David/N4KZ and Mark/K4MCE to activate the special event station, N4Z, between December 30th to January 6th from St. Croix. Activity will be on 160-6 meters, SSB and CW. QSL via N4KZ.

PACIFIC OPERATIONS (A3 and T2). Sara/HA9SD and Eli/HA9RE are expected to be active during the new year from Tuvalu between January 1-18th (their callsigns not yet known) and from Tonga as A35RE from January 20th to February 4th. They will have two stations active with operations on 80-10 meters CW/SSB. QSL ONLY direct to HA8IB (with 2 new IRCs or 2 USD).

QSL INFO AND NEWS.....
Please note that QSLs for 4N25K go only DIRECT to YU1SB. The address

is: Bozic Slavko, Jurija Gagarina 196/50, Novi Beograd,
SERBIA AND MONTENEGRO.

Please note QSL info for station T9/9A3GZ, who was active in CQWW CW Contest, ARRL 160m Contest...etc, is T98U (via the bureau) or 9A3GZ (direct).

Graham, M5AAV, informs OPDX that he now has the logs and QSL cards for the TX4PG operation and is in a position to handle "Bureau Requests Only" for last year's Dxpedition.

Victor Loginov, UA2FM, UA2 QSL Bureau official, informs OPDX that on December 6th during a UA2 annual meeting, they decided to start their own incoming QSL bureau. This means that they will stop getting incoming QSL cards from SRR QSL Bureau in Moscow (P.O.Box 88). The new address is: UA2 QSL Bureau, ROSTO Technical School, ul.Ozyornaya 31, Kaliningrad, 236029, Russia. Please update your QSL bureau address book, and from now on send all QSL cards for UA2 only to the address above. Otherwise they won't get them.
ADDED NOTE: Victor mentions UA2 is the second call area of Russia. They have the following active prefixes: all UA2, RA2, RK2, RU2, RV2, RX2 and R2MWO (permanent callsign for the Museum of the World Ocean). (Note that RK21Z was from R1Z.) RW2F is a contest call for the UA2 Contest Club, RK2FWA.

Vlado, ZA/Z35M, informs OPDX that all direct QSL cards for ZA/Z35M, Z35M and Z3100M received no later than December 22nd, have been answered the same way they were received. All QSLs for the Z3100M operation were sent via the bureau. Direct QSLs should be sent via Z35M to: Vladimir Kovaceski, Box 10, Struga 6330, Macedonia.

The Kermadec DX Association along with ZL2HU and ZL4HU wish to advise that with the very strong New Zealand Dollar the way it is at the present, one green stamp no longer covers the cost of ECONOMY postal replies to QSL cards. However, one IRC is still sufficient to cover return mail costs. The Association will respond directly to all requests posted to them before January 1, 2004, where there has been only one green stamp included. As they are a non profit organization, all cards mailed to them on and after January 1, 2004, which do not include sufficient funds for Ecomomy Class return mail will be replied to VIA THE BUREAU. If and when the U.S. Dollar gains some ground against the New Zealand Dollar, they will further consider their position. THEY do appologize for this delay for those expecting to receive cards by the direct mode, but it is beyond their control when governments set currency exchange rates that are not favourable to their cause. "I trust you will all understand. Regards ..... Ken Holdom, ZL4HU, Group Organizer/Team Leader/QSL Manager for the Kermadec DX Association."

SURVEY BEING TAKEN. Jose, CT1EEB, informs OPDX that he is just taking a survey and nothing else but a survey, your reply and help will be mostly appreciated. "From the DXCC Entities/IOTA Ref., what would you vote as

the most-wanted for you concerning the bands you need (from 160-6 meters and IOTA Ref.)?"
A) 4W - Rep. Dem. Timor Leste
B) D2 - Angola (and the Luanda Province Group for IOTA)
C) S9 - S. Tome (Rolas Islet IOTA AF-023)
D) C9 - Mozambique (Mozambique Island or Bazaruto for IOTA)
E) VU - India (the Goa State group for IOTA)
Once again let them know what bands you still need for these DXCC Entities. Jose states, "Let me remind you that this is not a DXpedition project, just a survey I am doing." Jose's E-mail address is: zemurtosa@mail.telepac.pt

TI, COSTA RICA. Bob, KE0UI, is now active as TI5/KE0UI but only until December 31st. He states that he will only be using low power with modest antennas, and CW on the WARC bands will be his priority. QSL via his CBA or via the Bureau.

TO4E QRT. The TO4E/TO4WW team is back home and stopped their transmissions December 20th around 2000z. Dany, F5CW, reports they made 34,000 QSOs. Their logs are now available on the Web at: http://europa2003.free.fr/ Logs were temporarily suspended earlier due to a complaint by the ARRL. The log search contained a wild card feature which Wayne, N7NG/7, from the League stated could compromise the QSLing integrity.

VK9C, COCOS-KEELING ISLAND. Just a reminder that Ken, JA1CMD, will be active from here as VK9CA now through January 2nd. Activity will be on 80-10 meters CW/SSB with only 100 watts. QSL via JA1CMD or K4ST.

VK9X, CHRISTMAS ISLAND (Very early Announcement!). David, VK2CZ, will be active from here as VK9XD between December 3-12th, 2004. Activity will be on all bands plus include an entry in the ARRL 10m DX Contest (December 11-12th) using a 7 element monobander (at 330m ASL) with 400 watts. David makes the following statement about his operation: "It is a long way off, and its a long way there. 1st EVER activation in the ARRL 10m contest!!"

XF4, REVILLAGIGEDO ISLANDS. Ramon/XE1KK and Luis/XE2AC inform OPDX that the Federacion Mexicana de Radio Experimentadores (FMRE) announced last Sunday, December 21st, a XF4 DXpedition is expected to begin March 3rd, for 2 weeks from Socorro Island (NA-030) using the callsign XF4IH. They mentioned that 95% of the paperwork is ready. There will be 8 operators (all XE ops). Operators mentioned are: Pepe/XE1J, Ismael/XE1AVM, Rafael/ XE1GRR, Javier/XE1KOF, David/XE1XR, Luis/XE1GLL and Martin/XE2ML. Their activity will be on all bands 160-6 meters including the WARC bands, VHF, UHF. The modes will be CW, SSB RTTY and PSK31. No QSL info was mentioned yet. More details to follow.

Z3, MACEDONIA. Look for Antonio/IZ8CCW and Pietro/IZ8FWN to be active as either Z38M or Z3/homecalls between January 2-6th. Activity is expected to be on all bands CW, SSB and RTTY. Several members of Z37M are expected to be with them. QSL via IZ8CCW.

ZF2, CAYMAN ISLANDS. Just a reminder that Pete, N2LM, will be active as ZF2PD on Grand Cayman Island (NA-016) now through January 8th. Activity will be 80-6 meter CW/SSB. Requests for QSL cards can be sent to his home callsign, N2LM.

They are LCD (Liquid Crystal Display) monitors, not LED, and yes, there
should be little or no RF interference from them.

# 5391. hy-gain HG-54HD Tower Cables

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-28 21:50:01 UTC
From: JM <marasim@direcway.com>
Message-ID: <3fef5019_1@127.0.0.1>
Source record: 60260

I am looking for replacement cables for my HG-54HD crank-up tower. Noticed a lot of fraying and rather not see it come crashing down.

Please let me know if you have them to sell or know of anywhere I might obtain them.

73's,
Jim - WA2IJA

heres and update from the 640 newsline. KG4LEG
Hello all, from KG4COQ
The 64 machine has returned back on the air.
Within the next few days several new control operators will be chosen by Ron ,N9EE to control operation of the repeater if the event of jammers and will help maintain the repeaters control in case Ron is not available.
I personally ask you all that if a jammer is active on this machine PLEASE, DO NOT TALK TO THEM OR TALK ABOUT THEM . If they do not have a audience, most go away....
The repeater is being watched by F.C.C. very closely so remember to use your call every 10 minutes and watch your language and do not talk to the jammers.
Thankyou and lets help clean up the greatest repeater in the bay area.

Don,
KG4COQ

I have had pretty good luck by running a piece of nylon thread along opposite sides of the connector, taping the thread in place, then coating the Coax connector with about an eighth of an inch of Hot melt, then when cool, With a layer or two of electrical tape to protect the Hot melt from the sun. Thought of using Heat shrink, but it soften the Hot Melt! The threads can be used to open the melt to make it easy to remove if I need to access the connector. Some if these connections have gone four years and look Okay!

# 5394. G4FON Koch Method Update

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-28 22:21:55 UTC
From: haf47@juno.com
Message-ID: <f03bf94f.0312281421.416a21bc@posting.google.com>
Source record: 60263

For those who are trying to learn the Morse code, there is no better way to learn it than by the Koch method.

In my opinion there is no better software available using the Koch method than the marvelous program from Ray Goff, G4FON of the UK.

This program begins with the practice of just two letters..when they are mastered another letter is added to the mix...when they are mastered, then another letter added, etc. And YOU'RE the one adding additional letters at your own pace.

It's easy, and it's the fastest way I know of to learn the code, and the software is free.

Is there anyone who would care to admit that they cannot learn 2 letters of the code? If you can do 2 letters, you can learn the entire code.

The G4FON Koch CW Trainer version 6 is available for download at:

www.qsl.net/g4fon

>From the pictures on the website, 'Coax-Seal' looks exactly like
>ordinary self-amalgamating tape (as I know it).

They are quite different. Self-amalgamating tape is a strong, stretchable tape. 'Coax-Seal' is a form of mouldable putty which just happens to be supplied as a rolled-up strip, but it has no strength as a 'tape'.

>The cut-away picture shows that it does not actually bond to the
>plastic outer of the coax, which enables you to open up the connection
>in the future.

Coax-Seal does bond to the plastic jacket, and also to metal - in both cases, well enough to form a good waterproof seal... but if you use it like the illustration in the ads, you'll have a real mess that is very difficult to remove from the metal parts.

Self-amalgamating tape is much better in that respect, because it can be cut and peeled off to leave clean surfaces. For round shapes that are simple to wrap - like in-line plugs and jacks - it's best to use only self-amalgamating tape. But for shapes like bulkhead connectors you can't wrap tape tightly down onto the flange, so water can seep upward into the connector.

The really useful feature is that Coax-Seal will bond to self-amalgamating tape! That feature lets you use the best possible combination of the two methods.

For a cable plug and a bulkhead socket, mould some Coax-Seal around the base of the socket and a short way up the round part - but don't cover the whole connector. Then wrap self-amalgamating tape down over the cable and plug, and onto the Coax-Seal. That gives a very good seal indeed, and you can cut the tape away at any time to find the metal parts clean, bright and dry.

I've used these methods for many years on large yagi arrays with many coax connections, and they do keep the connections totally waterproof.

>However, I would still prefer to give the parts a spray of WD40 before
>the connections are made, make the connection, spray again to ensure
>that the threads are wetted, wipe off the obvious surplus (but not
>trying too hard, so there are still traces left). You then apply the
>tape, stretching it somewhat as you go, ensuring that you keep a nice,
>even tension. You end up with a tight-fitting, waterproof rubber boot

>around the joint, with the WD40 trapped inside to resist any tendency
>to corrode.
>I think the only argument is whether to use WD40 or not.

If the waterproofing works - and it certainly can - then there won't
*be* any tendency to corrosion.

You can purchase heat shrink with the hot melt glue on the inside.
When you shrink the tube (starting at the center and working out) the
hot melt glue coats everything and the tube is much stronger than the
stuff you get at radio shack.

>threads can be used to open the melt to make it easy to remove if I need to

When you want to remove the cover, just heat a bit and use a box
cutter, or sharp knife to cut it away. (wear leather gloves)

Thanks a lot, but that is not the one I am looking for.
The only thing I can find on the copy I have is "Ham Logger" in a box at the top of the data entry window.
I have Googled everything I can think of, and am beginning to think it is not on the web anywhere, maybe just something that has been passed around to people via email.

Thanks again,
George

Source record: 60271

Greetings,

I wonder if anyone could help me out with this one...

I have a FT-757 and recently bought it's matching FC-757AT antenna tuner.
The only problem is that it came without the matching interconnecting cable
(referred to as Connection Cable C T9101292 in my manual).

Does anyone have this cable that I may buy? I could certainly fabricate one
but the connectors seem Yaesu proprietary. If you have any information,
hints or guidance I would certainly appreciate it!

Many Thanks and 73,
Vaughn

The stuff is made by 3M in two sizes that I've seen
800 IMCSN .80"/.22" 20/5.6 mm
and .400 IMCSN .40"/.12" 10/3.1 mm
It's a tad over a dollar a foot.

Also Times wire packages a piece with their N connectors.

I have some photos of both sizes of tubing as well as the connector
and I have one splice that has been taken apart.

I cut the splice out of the line as I though there was a problem with
it, which there was, but it was the last thing I expected. It turns
out the barrel connector had shorted and the other connectors were
still good, or would have been if I hadn't cut them out.

I'll try and get some shots up on my web page Monday or tuesday.
My home page is www.rogerhalstead.com and the URL for the coax splices
and heat shrink tubing *will* be
http://www.rogerhalstead.com/ham_files/connectors.htm when it goes up.
As it's past 3:00 AM, I have to create the page, resize the images and
then ftp it up to the server, I think it's gonna wait. To top it off I
have to spend most of tomorrow (Monday) out at the airport, finishing
up a demolition project and then cleaning up... soooo, if my memory
holds that long, I'll try and get the page up Monday evening.

OK, I did get the page up, but only small images. Links to larger 800
X 600 images this evening.

The handheld ones with a built-in antenna won't work any better
then an FRS radio. You need external antennas and HEIGHT at UHF.

What you describe is actually a 'reverse' phone patch (phone line
to radio) as opposed to the more 'normal' kind.

It is doable, but you would have to have some way to either
manipulate push-to-talk on his end remotely, or have him do it for you.
Clumsy at best either way, and you rack up long-distance charges.

You may want to look into Echolink. It lets you establish a
realtime link, via Internet pathways, between two repeaters. The only
criterion is that the two repeaters both have an Echolink connection.

http://www.echolink.org/

If both you and your friend are within range of an Echolink-
equipped repeater, no rig mods are necessary: One of you simply sets up
the link, usually via DTMF commands to the repeater, and you're off and
running.

Hope that helps.

Gentlemen,
As a long time experimentor I have used all of the suggestions given
in this thread. But science has moved on. 'Plastic dip' is now made in
spray form so I use that instead of the semi liguid stuff supplied in
cans which I also use for encapsulating.
The spray form puts a thin film over the joints which can readily be
peeled off
when reworking the joint. The sprayed plastic dip also shrinks
somewhat after application. Cost is around $6 per can of either form
in any hardware store.
Regards
Art

# 5409. Win a J-38

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-29 17:01:49 UTC
From: K&#65533;HB <groupk0hb@earthlink.net>

Source record: 60278

Straight Key Night in Minnesota and Surrounding Areas

New Year's Eve is just around the corner. You could stay up and watch the "ball drop" in New York at 11PM local or get on the air with your old Radio Shack straight key and recapture some of the nostalgic magic of radio. It will be fun. And this year, you can participate in a the ARRL sponsored SKN and receive special recognition sponsored by the MWA.

Straight Key Night (SKN) is 24 hours. SKN 2004 begins at 6:00 p.m. CST December 31 and runs for 24 hours through 6:00 p.m. CST January 1 (0000 --2400 UTC January 1, 2004). Rules are found here...

http://www.arrl.org/contests/rules/2004/skn.html

The Minnesota Wireless Association (http://wb0tra.no-ip.org/mwa/) is a local contesting group whose official ARRL territory is a 175 mile radius circle centered on Sauk Centre, MN. If you fall within the MWA circle, and DON'T consider yourself a seasoned CW op, you could win a real J-38 straight key to replace that old Radio Shack special just by booking at least 10 QSOs.

Anyone in MWAland is eligible to participate in SKN. However, to be eligible to win the J-38, you cannot be a seasoned CW op. Anyone who has posted over 2,000 CW contest QSOs or handled more than 100 pieces of CW traffic is not eligible to participate in the grand prize J-38 special. But forget about the awards. Just get on and operate CW!

SKN is not a true "contest." Instead, it is designed to promote CW as a second language. There are lots of CW op wanna-bees in the area. There is no better time than right now to start the learning process, and receive some recognition for your effort.

Any participant within the MWA territory who completes 10 CW QSOs on SKN (24 hour period) will receive an MWA Certificate of Achievement and a personalized bottle of MWA SKN Brasso to help keep the old Brass Straight Key in fine shape. The J-38 award, mounted on a beautiful Hickory (Pecan) wooden base, will be presented based on representations and claims, rather than any sort of log checking. The J-38 award will be based on time spent operating, the number, and primarily the quality of QSOs (keep your notes about name, city, state, RST, age, years a ham, other discussions in the QSOs, etc., to complete the questionaire). A summary of those participating will be posted on the MWA reflector and on the club's web page in summary form only. The final award will be delivered to the meeting this fall, although you need not attend the annual meeting to win the J-38. A questionaire will be used to determine eligibility and final awards. Decisions of the judges (N0FP Chair) are final. All official

correspondence regarding the MWA SKN should be emailed to N0FP@arrl.net.

# 5410. Elmering Opportunity New Years Eve

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-29 18:13:57 UTC
From: K&#65533;HB <groupk0hb@earthlink.net>
Message-ID: <F9_Hb.24986$Pg1.11333@newsread1.news.pas.earthlink.net>

Elmering.

SKN is an elmering opportunity. If you know the code, and you want to see it continue as part of our ham radio culture, you have to pass it on. Nobody teaches CW any more. We used to have converts from the military, where CW ops were to learn code or face a courtmartial. They got to 20WPM in a couple of weeks but had a gun to their heads for 8 hours a day to do it. Learning CW is a one-on-one activity and each of us CW ops needs to feel an obligation to our elmers to pass it on. SKN is designed to do just that.

Get on the air. Encourage friends that have expressed interest in CW to get on the air and provide them a Q. That's what SKN is all about. Check out the old novice bands and try a CQ at 12 WPM or even slower. You don't HAVE to use a straight key. Many CW ops don't even own one. I didn't until last year when I tried my first ever SKN. So don't feel pressure to not operate because you don't have a straight key. Just tell whoever you talk to that you are using an electronic contrivance to facilitate the code sending. The ARRL has a competition for "the best fist heard." Don't even think about accepting that award either.

And let me tell you it isn't easy slowing down to 5 WPM and still be able to copy. And the rusty old key don't seem to work with the grace that used to fill the novice bands with music. It's much easier at 30WPM. It was baby steps that got you to where you are and it's baby steps that will get others there too.

Take a shot at the new "@" character. It's not easy for me to send for some reason. CA run together is not in this op's vocabulary. dah dit dah dit dit dah was a good choice for the character, but it's one trick this old dog is resisting for some reason.

Look for me in the old novice bands on 80M and 40M. Afterwords, represent to me that you worked 10 Qs and you will have some MWA Brasso to spiff up the old key. And turn in your soapbox at the ARRL. Tell us about your elmer too.

Bullshit! Thanks for reminding why I let my VFW membership
lapse. Boring war stories from old men with no life. And how
the tales got taller as the evening wore on on. Audie Murphys,
all of them!

"Learn code or face court martial" BULLSHIT!
"20 wpm in two weeks" BULLSHIT!

It's made by 3M and sold by many electrical supply firms.
The first photo in the link below shows the two types they offer.

The numbers are 800 which is 0.800/0.22", or 20/5/6 mm.
The first number is the diameter "un shrunk" while the second is the
smallest working shrunk diameter.

They also make a 400 which is 0.400/.12", or 10/3.1 mm tube.

These are coated internally with something akin to, or it really is,
hot melt glue.

http://www.rogerhalstead.com/ham_files/connectors.htm

The price has gone up some, but I think the last I purchased was a bit
over $10 for a 3 foot length of the 800.

I'm not. Like you I suggested RG11 might be a bit large.
I tried it here and replaced it with RG-6 for the satellite feed lines
for both the small dish and C-band.

I found it placed too much stress on the LNBs.

However terminating the RG-11 is easy as they make a connector that
slips right on the cable and has an F connector on the other end.
They are more of a "press on" rather than crimp. Work very well.
OTOH they do nothing to relieve the stress imparted to the LNB
connector by the large cable.

It is made by Pirelli too with a different name. We use it for coax
and for electrical. The connections for sleave pumps 80m down into
a well (= under water) perform - just well ;-)
Never had a coax soaked using this method for over 10 years.

Kind regards, Eike

You may not be aware but HAMS operate on SHORTWAVE, so do CB
operators. Doesn't matter HF, VHF, UHF. Still shortwave.

Well, Barnes and Noble in upper Michigan does NOT carry it any more as
B Dalton does not either. I'm now in central Florida and B & N and
Books a Million NO GO.
QST is not available everywhere and you might find it's not available
in the Toledo area anymore.

Check out Mountain Radio. They sell the rig blaster interface unit that is
good for communicating between computers, rigs and telephone lines. Watch
out, their construction techniques are very half assed with solder splashes
etc on the printed circuit cards and shipped units that do not work.

I think I have found the 'big ones', three, I am now looking for a ham operator
that I bought a big wheel from at Belton several years back, can you help.
I took a long time to install the 'big wheel' and before I got it up,,, recieived 'non
glowing
reports',,, soooo, I was slow in installing,,,, (years), but not that it is in the air,,,
fairly
pleased,,, would like to "co phase"?? if I can find another one.?? (yeah, I know how this
sounds, it was mostly a case of 'other irons') thanks. 73

## 5430. Ham Fest Entrepreneur

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-30 17:51:50 UTC
From: Alan Jatowski <a@letdjatow.org>
Message-ID: <bssdvl$r2j$0@pita.alt.net>
Source record: 60199
Cross-posted to: rec.radio.amateur.misc,rec.radio.amateur.policy

Michael Hughes, a 21 year old ham radio op, has come up with
a unique money making idea for hamfests.

After attending hamfest for years and experiencing the putrid
body odor which hams emit at hamfest and seeing the thousands of
unshaven faces, Michael has joined forces with a national
toiletries company to produce the first ever "Ham Radio
Convention Personal Hygiene Kit."

The kits will be hawked on the convention floor for under $5,
according to Michael, which is a reasonable price for hams
who would rather spend money on radio junk than personal
hygiene items.

Kiosks, where the kits will be sold on the convention floor, will
have large signs over them with the words, "Hams Stink."
"That alone will get people's attention," said Michael.

Power supplies are (with some notable exceptions) usually pretty
easy to fix, and I would imagine Yaesu would be happy to supply a
service manual.

Have you considered self-repair?

JJ,

"Why you think hams are interested in what radios
and antennas you use to SWL with is beyond me."

Since this was Cross Posted to several NewsGroups:

* rec.radio.amateur.policy, [ Amateur - HAM ]

* rec.radio.amateur.misc, [ Amateur - HAM ]

* rec.radio.shortwave, [ S H O R T W A V E ]

* rec.radio.cb [ C B ]

The Devil Is In The Details...
So "GS" is simply communicating his 'status' as a SWL.

The Question Every Amateur Must Ask Themselves is . . .
Is Any Body ? ? ? L I S T E N I N G ? ? ?

YES - But they may be a lowly SWL and You will Never Know;
Unless the SWL sends the HAM a QCL Request and the HAM Replys in Kind.
? How many Amateurs Actively Seek QCL Reports form SWLs ?
? How many Amateurs 'send out' "QCL Cards" to the SWLs ?

Exus Laxus Good Buddy ~ RHF
Breaking-On-the-Low-Side - Can I Get a Radio Check ? QC? QC? BS!
.
.

Hmm, well I saw it at one place last week, along with MT, CQ, and the
scanner one, I can't think of the name. Leo's bookstore has them all,
they used to have the British SW Magazine and Practical Wireless too,
but not lately.

I haven't been to B Dalton in a long time, but Barnes and Nobles had it
a couple of months ago.

I guess you will have to subscribe, it's cheaper than buying it anyway.

Technically you don't "subscribe" to QST. You join the ARRL and receive the
magazine as a result of your membership.

All it conveys is he owns two radios and some other stuff, it conveys nothing about his 'status' as an SWL. Just a brag list. Maybe I should list all my ham equipment with my postings, like anyone would care.

kg4leg coy roy update on 146.640 N9EE repeater

newest updates recap
FCC has brought up charges against KG4YZZ for giving out kg4legs personal information, in particular, giving out coy roy's social security number, and giving out roys information from pinellas countys tax records website.

also being investigated is ronald wright N9EE for allowing this traffic over his repeater without shutting it down. possible action against ron may be taken, the fcc has requested ron to voluntarilary shut the repeater down indefinately.

DON KG4COQ has sent an email to all 146.640 users to ask them to write the FCC F.C.C to protest the actions against KG4YZZ and N9EE.

it appears many voices have been heard at the fcc, it appears the situation with ron may have been resolved, and the situation with KG4YZZ may have been resolved without charges filed. this is not totally confirmed. in addition to this statement the 146.640 repeater is back on the air with several changes. ronald wright has now given several frequent users "control operator" status and access to repeater controller codes. thwe new control op's that i have identified are.... KG4COQ don, KG4YZZ sean, and seans lfe partner.. KG4YZY david, there may be others, they are still looking for 1 or 2 more control ops.
it has been discussed that KA3YAE may volunteer to be a control op, YAE's only objection is that he only has a handheld that does DTMF. the repeater is now only on when control op's are present, so it is usually shut off by YZZ around 1am and turned back on around 4-5 am by KG4COQ

since the FCC visit, coy roy has been heard on the 145.330 (land o lakes) repeater, he has been heard having a civil conversation there, but has also been heard on the (bay pines VA) repeater 147.360 and they shut it off immediately.

heres some www.qrz.com public information lookups for some of the people mentioned today, and also that use the repeater often.....

Thanks for looking me up here on QRZ. I'm here in the sunny state of
Florida, on the Gulf Coast about 30 miles North of Tampa.
I am a WCF ARRL Section Technical Specialist for APRS & HSMM. I also
am on the ARRL working group for HSMM.
I operate a APRS IGATE and Wide Area APRS digipeater for Pasco County,
as well the third.aprs.net core APRS-IS server. http://www.aprsfl.net
has all the information about APRS at our site.
You can also always find me monitoring my repeater, 442.65 PL100. You
can also hit the repeater using Echolink, KG4YZY-R (node 4429).
Aside from enjoying amateur radio, I spend alot of time dealing with
my two businesses. Citicom Communcation Services -
http://www.citicom.com - a internet service provider in the Tampa
Area, and Fleeman Anderson & Bird - http://www.fab-corp.com - a 2.4ghz
802.11 wireless networking gear company.

Well no, he did appear on the Art Bell Show (or whatever it's called
without Art) since the magazine folded. I couldn't be bothered to stay
up and listen, to see if he said anything about the end of the magazine.
Maybe if he was talking about interesting stuff, like he used to write
about in his editorials, but the stuff I tuned in for was just his
grumpy old man stuff that had nothing to do with amateur radio, computers
or other technology.

I haven't read Douglas Adams in so long, I can't remember specifically,
and I don't have the books any longer. But I suspect you're right.

At which point, since you don't know which newsgroup the person is posting from, you potentially lose contact with the person you're responding to.

Just my point. I don't want to belong to ARRL just as I don't care to
belong to AARP, NRA, AAA, Skinheads, etc. I just want to read their
magazine when it has something that interests me. I wouldn't buy it
every month as most of the time it has useless drivel about some
clowntest or whether someone died or some such crap. ARRL and QST have
a short time left as the active Ham population lessens. If they took a
real survey as to how many real active ham there are they would find
the number far less than they think. I'm not talking about members,
I'm talking about HAMS that really use a radio to transmit a signal.
Doesnt matter what band. How many transmit a signal at least once a
week? Most don't.
Look at your local HAM clubs, talk to the members(if you can wake them
up). Most show up and act disgusted with the club, Ham radio, life in
general. New folks are never there. Ya I know about your Skywarn in
Flint, MI. Great service! Could be run on CB, NEXTEL, GMRS.

Well then you can't expect the magazine to be sold at outlets when you only buy it once in a while. They've got to recoup the costs of printing and distributing and the "once in a while" buyer just doesn't provide that.

Can you "just buy" the magazines of AARP, NRA, AAA, etc.
without joining? I am always amazed at people that want the "benefits"
of an organization's efforts, in this case the publication, but don't want
to support the organization by joining. I see the same thing at times
in the antique car hobby. People that bitch about the club rules
at a car show, or otherwise want technical help from club officials
but won't part with the few bucks it takes to join.

If that HAM is active on CB, does that count? It's a radio signal.

Then go to your library and read it, assuming you know what a library is.

I am looking for a ham operator, that I bought a two meter horz
groundplane bigwheel antenna from several years ago, at Belton
Texas. He built both two/440mhz antennas. I 'think' he lived in Dallas
and just came down to Belton for the hamfest. Would like to get back in
touch,if possible, to purchase another two meter, like the one I have.
thanks in advance. 73

?

Sounds like a classic case of power line insulator leakage.

Power line insulators sometimes develop micro-cracks in which
dust and dirt settle. In cold dry weather, these cracks
provide a dry leakage path for an arc, usually to the metal
frame or supports for/within the insulator. (we are talking about
a tiny near-continous arc here, not a flashover) The result
is a pesky noise that may be on an insulator located as much
as 1/4 mile away, but will still give you an S5 to S7 white-noise
which will ruin all your SWL and Ham'ing.

The way to know for sure is to wait for a good rainy day.
If the noise goes away when the poles, lines and insulators
are wet with rain, then it's a good bet you have a leaking
insulator someplace in the vicinity. The noise will come back
when the insulator dries out and the carbonized dirt in the same
goes bacl to path-arcing again. This can lead to a very dangerous
condition know in the industry as a "Hot Pole"

(see: http://www.utilityinnovations.com/lingo.htm )

A good way to find an leaking insulator
in the area is to find the noise with your AM car radio (tune
to a vacant spot on the dial in the daytime when U can hear
the noise/hash) and drive around. Noise will be greatest when
your near the pole. Use a pocket/portable radio as the "noise
sniffer" to find the pole. (Note: Never touch a pole that
you suspect may be "leaking" or has a suspect bad insulator)

Take down the pole number, call the power company and
tell them you *suspect* that they have a possible Hot Pole
Situation / Incident. Be clear and do not enhance the situation.

Be sure to tell them who/how/why and this will usually get them
out to check/fix the same.

Again, the key words here are: "I suspect a possible Hot Pole".

This is a hazard that, if confirmed, all power companies take seriously
and usually the SWL or Ham is the first person to be aware of such
as his radio will pickup the noise of the electric arcing.
Most power companies will be
happy to find/fix such a condition early as it may preclude a possible
catastrophic insulator/line failure in their distribution system later on.

Only if you are pre 1960 and still consider 11 meters as a ham band.

Check the figures yourself then check how many are really active. Yes
you can but NRA and AARP rags on the stand. AAA no. I quoted no data,
I made an observation. Get you head out the sand and look around. See
all of your old buddies just hanging around the club meeting doing
nothing? is field day as well attended as it was in the 60's? Are new
folks welcomed? Is help provided?
If so then consider yourself lucky.

Thanks for the info, Google Washer ! I thought it had something to do either with the radio itself, or some kind of digital source such as broadband on power lines, wireless networking or something like that, because if I switch in sideband, it sounds very computer-generated.

In your opinion, if WAS a computer generated interference, would using a balun between my radio and the antenna help to reduce the interference or not ? Thanks

# 5471. Where's the NRA on whoring as bush bitches?

Newsgroup: rec.radio.amateur.misc
Date: 2003-12-31 22:32:49 UTC
From: King_Returns@hotmail.com
Message-ID: <e2fcabf2.0312311432.18356c19@posting.google.com>

Where's the NRA on whoring as bush bitches?

American soldier, Your one true loyalty should be to America, not traitor bush to rob ourselves from. Remember: bush, he ain't got no public concern worth mentioning, when it comes to the whereabouts, of more than half the American tax payers expenses regarding Iraq's jeopardized security, now being sold off as planned to the bushmob at what will be, lower than going values. Namely, your own as measured worthless.

As American Soldier, in unbiased corporate TV america, your told you're willing to DIE in servitude as a thieving bushite slave without question, a blind loyalty and obedience, not to a Just God mind You, or the Battle Hymn of the Republic, no, but to worship the demon bush in a destructive cult-like ignorance that does not even afford Your costly ongoing sacrifice, the luxury, of telling US why corporate america refuses to scientifically report on your actual consuming of MEASURED microscopic radio-active heavy metal TOXIC waste, that includes plutonium in trust, to 'bushite' your dumfuk evil comrades you'll kill with especially, or to being blowed up to smithereens by sexy rummy's cluster duds. Mr. franks and bush bitch buford blount State it is of little or no concern to corporate americans how many bomblets were used, or where they fell to kill women, children or US Patriots with, for, the glorious bushmob will take a few extra bills payable from America to the commi business partners that way for including You in indiscriminate mass murder, see?, and none are the wiser. American Patriot Soldier, repeat after me: "A proud bushite nazi soldier is a dead bushite nazi soldier halted from harming our innocent sons and daughters." Or, AGAIN, corporate america's public refusal to speak up for 'The People' (soldiers included) paying the almost half of Iraq's monthly bill going mysteriously vanished in rummy or bush's war crime pocket... Who gives a toot where it is all going wasted right bushite?, it's only You or yours who could go as the innocent in God's favor still being sacrificed next.

Look, as the very old tales tell repeatedly, the lawless Satan wager, to somehow without knowing how, become

omnipotent ruler as tyrannical dictator of this forsaken World, leaving US ALL including Johnny, deprived our rights to justice and freedom, and instead, to the lot of US, be ACTUALLY put up on a cross to die again metaphorically for unarrested bush to continue example with, as an illiterate barbaric enemy of "The Man", just like, isn't going to happen in this lifetime. I ain't no fictional character, and as true blooded Patriot, hate the bush demon war monger during breakfast, lunch, and supper. And besides, I'd personally kill bush first before that neither world tried. Trust US, G, or I single handedly as a man, will triumph over traitor bush's criminality, as the American cop killing 9/11 perpetrating war profiteering savage he is as antiChrist, it's just, will you like Talk Radio in America censors, and rich CNN celebs readily encourage, silently continue to watch your fellow family murdered for bush bitch buford blount, and still refuse to voice objection nor take any action in defense of all that is Our World truly suffering as Yourself included? I despise bush like every alive person who would read this is.

Refuse to speak for Your own freedoms truly pirated by bush, and you'll likely continue to lose out really like America currently is. Refuse to help our desperately pleading God you know being victimized in Your name truly, and you will bare the consequences of being forsaken. Maybe even, towards an end you'll declare, someone else has forsaken you, when it will be only yourself to blame for not speaking for all those denied their happy lives through the brutal criminal tirades of the demon antiChrist, Your Mr. bush Jr.. Again, this will never change: We had complete co-operation granting one hundred percent access through Iraq without delay, prior to bombing any of Iraq's public sector with toxic waste that contained US People. Every Iraqi child murdered served no good reason or purpose but to war God's love, and my good name. And, still today, that unarrested evil demon tyrant dictator, still chooses to sacrifice many a soft spoken, slow footed American Patriot to, so far, too few bushite nazi dumfuk losers. In addition: We have also learned, Iraq had granted surrender of Iraqi assets to give to the war criminal bushmob, if they would forego the needless indiscriminate murder of easily tens of thousands of innocent families, (like dropping cluster bombs into our residential communities), but war criminal rotten rumsfeld refused because he had already PERSONALLY set up hundreds of illegitimate targets that would, kill

primarily only innocent people while destroying public institutions, and bring home a few extra million American payments, tax free.

What more could Saddam do that he wasn't asked for? I beg you to kill the demon bush on behalf of our humanity, and on behalf of the rare American Patriot who will get rightly confused as, bush bitch buford blount's thoughtless nazi teen savages. The anitChrist must not be allowed to survive continuing such heinous war crimes against our being, and myself as the no longer reluctant standing eternal King.

Listen to witness, America's corporate news celebs will mention it is of no concern to You as the unjustly robbed from and dying for the demon antiChrist in sacrifice. Look, I as Christ too, would destroy any cowardly proud bushite nazi teen soldier victimizing my innocent family irrationally, as most, if not all able-bodied men of our world would also if forced into a decision to defend our lives from the likes of a bush bitch buford blount, or a bomb wherever death squad running tommy franks heroin pusher, but I'm told through my faith in the power of myth, the military should have one or two brave and godly Patriots still idly standing around, who would willingly chance to uphold their sworn Oath to protect their country and family, like with the American Constitution's Bill of Rights, and Justice everywhere by protecting the falsely accused, as could be, themselves, they should know now, or soon will be learning of the other way. A proud nazi bushite savage, is a dead nazi bushite savage halted from harming our innocent families irrationally, and low and behold, a good nazi bushite savage is easily found as an enemy of ALL Humanity and God, hiding as nazi vermin in the pirated, bushite military uniform, not true Americans, but enemies to US all, which includes their selves they pour toxic waste on, while the bushmob robs their 'smart' family back home, undefended, neglected, and wounded like Christ was.

Your Mr. bush Jr. is worthless to this world as a hater of American freedom to not arrest himself and rotten rummy for murdering US New Yorkers on 9/11.

All I'm looking for in this world, one human enough to join US equally as a Loyalist to Humanity, and to do everything we can together to destroy that treasonous 9/11 perpetrator, corporate america's so very deeply hated and despised this entire Universe over, Your Mr. bush Jr.. To not bravely kill or immediately arrest the

demon antiChrist along with rumsfeld the rotten, sets enslaved america tracking further down an old worn path of History, as enemies of not only the good Iraqi People bush and bremer whom openly rob from now without apology while giving out cheap candy, but of US all truly in the bigger dream without bindings. It's like bush is waging his demon war with every political body that believe evidence is a requirement to convince US who is evil, or criminal, an wallah, as if by some Supreme Will, the Son of a Just God named Johnny really comes down to our levels to raise a simple awareness through one hell of a, big time collecting plate. (Every proud bushite nazi bagged, I'm willing to pay the good deeder, ten cents per..)

Fear not my friend, the fascist bushite shall be lost by our universally wreathed good guy plot line. An evil bushite now irrationally fights against everyone's freedom for a war criminating ungodly tyrannical evil power that persecutes the innocent with murder, or torture to steal our, sworn to uphold eternal values from. If I don't destroy the demon bush antiChrist in Our defense with this last breath, someone else will, and our faith in God will with hope, find a love truly honored with respect and gratitude for being so magnificent. Never again, left vulnerable in my name as undefended to be victimized for a war monger's consequence.

Let US get out there and bag US the bush demon for God, or the Lord, Allah, or just Johnny, instead of victimizing Catholics, Muslims, Jews, or Atheists, along with all the rest as a Palestinian truly measured, encompasess everyone.

The Two Troublemakers
http://www.rense.com/general46/guilt.htm

/ / Some of the students had Palestinian passports. When they asked what they were guilty of, the [bushite nazi savage] soldiers said, "You are guilty of being Palestinian." \ \

A ungodly bushite nazi teen soldier, as an enemy of America was quoted to say also to the falsely imprisoned:

/ / "Say that you love Bush and I will give you food," \ \

Not a love for Justice, or the Bill of Rights, but a love for the American cop killer traitor bush demon robbing their very own grandparents they demand by threat of your murder, for US all as Humanity to do

likewise degenerating, sacrificing our World as cowardly slaves to benefit the ungodly bushmob 'cabal' of parasites, the enemies of everyone, including that as God's will.

‘Beyond human imagination'
http://www.globeandmail.com/servlet/story/RTGAM.20031104.warar1104_4/BNPrint/International/

/ / I told them I wanted a lawyer. They told me I had no right to a lawyer, because I was not an American citizen. \ \

"International law? I'd better call my lawyer,"
http://www.payk.net/mailingLists/iran-news/html/current/msg05842.html

/ / "International law? I'd better call my lawyer," the American President joked in response to a reporter's question at the White House. \ \

Again, by denying the rest of US as Humanity Justice, the bushites need advertise between commercial break only, "Laden did it", no need to follow the ample criminal 9/11 leads folks, because the crime they say wasn't committed by true American values. Go on along bush, cheney, and rumsfeld say, pay no attention to our evidentiary findings such as, the American FBI's documented contention, that bush's business partner, General Ahmad, funded the 9/11 'mastermind' Atta, or the CIA's, regarding bush LYING in America's name about Niger (TREASON), or MSNBC's almost Biblical Revelation, about the bushmob having a signed and sealed, 'top secret' war plan to not follow the 9/11 evidence to secure invasion of Afghanistan for Enron, at Condoleeza's desk, two days prior to the terrorist act taking place, of which when confronted, confessed as fully implemented by the Whitehouse. A 'top secret' plan to blame Laden on a crime they wouldn't actually try to arrest for with evidence, a plan arranging that would find bin in Afghanistan pleading innocence with the help of bush's partner again, General Ahmad, a crime of such magnitude, it would 'justify' a war mongers criminal invasion to thwart Enron's impending CRIMINAL bankruptcy, THIEVING FROM MOMS AND POPS, to then, ATTEMPT, to close the surviving, armed with knowledge for good reason Police investigations. All of this setting a lowly nazi bushite war criminal, frothing publicly at more than six billion + of US, to state without opinion, that We, as Humanity, are no longer afforded God's GIVEN Human Rights to defend ourselves, nor is the criminal dictates of the demon antiChrist accountable to any rules of law. Universal they publicly quip, as the not-so 'secret' ungodly bushite

doctrine of tyranny as enslavement of all that is Righteous and Holy in this World, because, hey, there is no God to speak of... and the King of kings, Son of God fellow, well.. that's all just ninepence fiction. No, WE, as all the make believers of this World, will no longer have ANY legal recourse to defend our own loved family from being stolen from through a bush bitch buford blount doing whatever criminally with dumfuk loyal nazi teen bushites leading to sacrifice for, for demon bush dictates his corporate american bred bushite nazi teen leaders, can not be held to a code of conduct, distinction, or honor. That's the bush world now you'll except without say. As an American, you're forfeiting your rights by not saying anything to protect those falling murdered in evil bush's name. American Talk Radio is waiting for your call to be hung up on.

All Nations outside of America are a politician's friend, and nobody is going to vote to incriminate ourselves for something we would be innocent of. For bush, Ashcroft, and rumsfeld to contend, humans outside of bush america's border, are no longer afforded the rights of being, and bushites can rob our Universe and there is nothing anybody can do about it, isn't going to sell well anywhere. The criminals have enough of a time not getting caught for the things that they do, and almost no one but the lifeless, would stand silently with bush while needlessly murdering ourselves as the innocent.

See?, when bush bitch buford blount murderers innocent people, often their surviving friends and family take it out by killing bushite soldiers that mindlessly follow bush bitch buford blount's criminal command. And, why shouldn't we? The unarrested bush bitch buford blount confesses to murdering thousands of good honest People, for no objective, but to let the bushmob rob even further more children from US all. Kill bush for the love of Jesus, please.

Notice to the World: Literate American Soldiers have not voiced written objection to my writing, (us.military.army) but for the exceptionally rare bushite nazi savage, who sorrily slack, others shouldn't be allowed to tell the truth about polls, 9/11 criminal investigations, or bush and rummy getting the Patriots murdered for pension thieves and heroin pushers to tyrannically profit at our devolvements. Encouraging US to continuing in bush's name getting robbed and murdered irrationally? no rights to defend ourselves from crime in a court of law they say?, without a God, or any

reason for love of this world whatsoever? The bushites think that they can first degree murder our world's women and children, our freedoms as Justice for US all, and miraculously, as the result, will bring our entire, dazed and confused World to it's knees as the whore of Babylon. Indefinitely. (Not like a real Whore mind you, most crack-addicts, and even some G men, hold limits on how far they'll go victimizing the innocent to glorify a blatantly evil and ungodly enemy of all that is good and righteous in this world.

Anyway.

The CIA, and the FBI are surely in agreement with US, on this indivisible Justice thing. The quicker bush dies as unarrested traitor by the hands of a true American Patriot, the sooner an explanation will be demanded as forth right and coming.

Again, American soldier, wake up, and kill bush for sacrificing your friends and family to die as cowards, too afraid to stand with God in defense of the once great American flag. My America, is the land of the not so stupid, and brave enough to kill unarrested bush and rumsfeld for 9/11 almost immediately, or any other war criminating enemy of America fighting to not have our Justice served by nabbing the true 9/11 suspects.

Through a legal lens - the attack and occupation of Iraq http://electroniciraq.net/news/printer1262.shtml

/ / The International Covenant on Civil and Political Rights, RATIFIED by both the U.S. and Britain, pulls no punches on this count: "Any propaganda for war shall be prohibited by law" (Article 20). \ \

This is what bush needs to be immediately arrested on for his Niger claims, if you see him not behind bars awaiting public trial, do the American Police force and soldiers everywhere a favor, and kill the escaping demon bush for the love of Your life wills it.

By protecting the demon antiChrist bush for continuing in Our names to rob from Humanity by breaking American laws willingly, will now be a public declaration supporting crime against our betters. I will not stand motionless while bush and rumsfeld with bremer persecute school teachers not guilty of criminal offences, while pirating Iraq's wealth for Dutch-Shell, Worldcom, and double billers, commi Halliburton, all the while, feeding American Patriots radio-active toxic waste to die as losers. Think Patriot.

Arthur MacArthur "Those forty minutes when I defied my orders, were the keystone of my career." A career that would lead him to the highest rank in the United States Army. Saving many lives he did by doing so bravely.

His son later, defying Hoover, smashed thousands of American WWI vets, who were demanding their promised checks to save themselves from starvation. Winning he did, corporate banking's recognition and praise as a savior of the american way of life, and The People?, they ate it again when in 1950, at the age of 70, defying Truman, launched a win sumtin at all costs attack against China, that quickly during the unreported stupid needless slaughter of countless American teens, forced Truman to concede defeat by begging for a immediate truce with China while firing MacArthur, who came home to giant demonstrations of love and affection for sacrificing American lives forgotten to the accolades of corporate america's unsung hero.

George S. Patton Jnr. "It's no fun to say to a man you love, go out, go out and get killed, and we have had to say it, and by God they have gone..."

Johnny Wizard "Let US just get bush instead friend."

For the love of life and countries, kill bush as traitor to all our Humanity.

Your unbroken eternal Warrior,
as acting Servant and King,

the one and only,
as staring Johnny Wizard,
the true Son of Man

P.S. My reader, I taunt you again: forward these words of love or hate as if they were of Your own concern. America I think Will be interested in this public outrage of the silent majority, an outrage that will ecplise into an international scandal of such proportions, it just might win US the newscast with the facts on Justice ruling our way. ( I am excepting all reasonable job offers. Hint hint.)

--

A bushite nazi soldier's motto: Do NOT kill demon bush for the love of God as true Patriots would, but war your comrades in arms with toxic cluster bombs to secretly kill yourselves with later on, including US as the innocent, our children included, while STEALING, not going nowhere public Iraqi institutions, including desperately needing humanitarian aid shipments, starving

the poorest of the poor, all to please and glorify the
pension thieves of our Grandparents, and the heroin
pushers to our school kids.

--

> To my friends in Iraq, don't let corporate american
> media divide yourselves from community as equal
> participators. An Iraqi, is foremost, a member of our
> Humanity, and just like the rest of US, hate the God
> betraying anti-American demon antiChrist bush, more than
> anything else in the Universe for persecuting the
> innocent while killing coppers to steal our assets
> undefended without a leader to speak out everywhere for
> our living rights included.

--

Free to be living justly for yourself
truly as caring to know this as everything

What a horrible day as history. We witness the likes of
The happen to be "wealthy" as extremely disturbing
american, Bill Hemmer or Blitzer, or CBC's corporately
managed professional news teams, who would as they have
done, propagandize our communities with intentional
deceit to not cover, the top priority established facts
on our actual murders, and happily watch US fall further
robbed, as Mr. bush Jr. victims, while feigning a just
representation on behalf of our civilization. Look,
phone them yourself. These corporate cultists do not
offer any counter to the facts that stand before US all,
but for to practice censorship against Humanities
interest in nabbing the prime 9/11 suspects. There is
no dispute found with those who are aware of the
evidence that directly implicates bush Jr. And rumsfeld
for our murders on 9/11. But Bill doesn't want to
actually work for the People to protect the interests of
Americans as police officers, such as those directly
involved in the criminal investigations, and instead,
sides to leave yourself in the dark on bush Jr.'s true
nature, as the super evil anti-Christ, actively,
actually, really, no doubt about it, trying to further
destroy the American dream as no longer Our own as
equals committed to freedom through representation.

USATODAY.com - Cluster bombs kill in Iraq

/ / During the war in Iraq, U.S. ground forces dipped into
stockpiles of more than 740 million cluster bomblets, all
with a history of high dud rates. \ \

Good points....now allow me to add some from the other side.

No, lets make it just one.

Know many new guys that DONT KNOW IT ALL?

Dan/W4NTI
